LABOUR FORCE REPORT MALAYSIA

JUNE 2022

Announcement:

Department of Statistics Malaysia is conducting the Household Income, Expenditure and Basic Amenities Survey (HIES/BA) 2022 from 1st January 2022 until 31st December 2022 and the Annual Economic Survey (AES) 2022 from 15th April 2022 until 30th September 2022. DOSM greatly appreciates the cooperation given by selected respondents by sharing their information with DOSM and making the survey a success. Please visit www.dosm.gov.my for more information.

Economic and social statistics publication namely PocketStats which contain quarterly and annual statistics can be obtained from the DOSM portal or via the link https://bit.ly/PocketStatsQ1 2022.

Please be informed that the Government of Malaysia has declared National Statistics Day (MyStats Day) on October 20 each year.
MyStats Day theme is
"Connecting the World with Data We Can Trust".

Published on 09 August 2022

The monthly Labour Force Report, Malaysia, presents the statistics of labour force, employment, and unemployment obtained from the Labour Force Survey (LFS). The implementations of the LFS are based on the guidelines and recommendations of the International Labour Organization (ILO) with reference to the Surveys of Economically Active Population, Employment, Unemployment and Underemployment: An ILO Manual on Concepts and Methods.

The labour force statistics are used as a vital input for labour market analysis, policy formulation as well as planning, implementing, and monitoring programmes particularly related to human resource development. These statistics also serve as an essential reference to researchers, economists, academicians, private sector, and individuals in research related to employment and the labour market.

The Labour Force Report for June 2022 describes the labour supply situation as the country was in the transition phase to endemic. The report also elaborates on the month-on-month changes to examine the immediate effects of recent events. In addition, annual changes from the same month of the previous year are also reported.

The Department of Statistics Malaysia gratefully acknowledges the cooperation and contribution rendered by all parties in making this publication a success. Every feedback and suggestion towards improving future reports are highly appreciated.

DATO' SRI DR. MOHD UZIR MAHIDIN
Chief Statistician Malaysia

List of Tables

Actively unemployed	**:**	Persons who were available for work and were actively looking for work during the reference week.
Category of skills	**:**	For reporting purpose, the category of occupation is regrouped into three levels of skills based on the Malaysia Standard Classification of Occupation (MASCO) 2013 as below:

Skilled workers:

1. Managers;

2. Professionals; and

3. Technicians and associate professionals.

Semi-skilled workers:

4. Clerical support workers;

5. Services and sales workers;

6. Skilled agricultural, forestry, livestock, and fishery workers;

7. Craft and related trades workers; and

8. Plant and machine operators and assemblers.

Low-skilled workers:

9. Elementary occupations.

Starting on January 2022, the category of occupation is based on the Malaysia Standard Classification of Occupation (MASCO) 2020 with an addition of group 0 - Armed forces occupations.

Economic activity	**:**	Classification of industries according to the Malaysia Standard Industrial Classification (MSIC) 2008 version 1.0 into five main sectors namely Agriculture, Mining & Quarrying, Manufacturing, Construction and Services. In the meantime, Manufacturing and Services are further disaggregated into subsectors.
Employed	**:**	All persons who, at any time during the reference week worked at least one hour for pay, profit or family gain either as an employer, employee, own-account worker or unpaid family worker.
Employee	**:**	A person who works for a public or private employer and receives regular remuneration in wages, salary, commission, tips or payment in kind.
Employer	**:**	A person who operates a business, a plantation or other trade and employs one or more workers to help him.
Employment-to-population ratio	**:**	The proportion of employed population to working-age population.
Inactively unemployed	**:**	Did not look for work because they believed no work was available or that they were not qualified; Would have looked for work if they had not been temporarily ill or had it not been for weather condition; and had looked for work prior to the reference week and were waiting for result of job applications.

Labour force	:	Labour force refers to population in the working age group (15 to 64 years) who are either employed or unemployed.
Labour force participation rate	:	The ratio of labour force to the working-age population, expressed as a percentage.
Outside labour force	:	All persons not classified as employed or unemployed are classified as outside labour force. This category consists of housewives, students (including those going for further studies), retired, disabled persons and those not interested in looking for a job.
Own account worker	:	A person who operates his own farm, business or trade without employing any paid workers in the conduct of his farm, trade or business.
Skill-related underemployment	:	Those with tertiary education and working in the semi-skilled and low-skilled categories.
Time-related underemployment	:	A group of people who employed less than 30 hours during the reference week because of the nature of their work or due to insufficient work and are able and willing to accept additional hours of work. Persons who were employed more than 30 hours during the reference week are considered to be in full employment.
Unemployed	:	Those who did not work during the reference week but are interested to work and seeking for a job. Classified into two groups which are actively and inactively unemployed.
Unemployment rate	:	The proportion of the unemployed population to the total population in labour force, expressed as a percentage.
Unpaid family worker	:	A person who works without pay or wages on a farm, business or trade operated by another member of the family.

CONCEPTS AND DEFINITIONS

❓ What is Labour Force Survey (LFS)?

Labour Force Survey (LFS) was conducted to collect information on the structure and distribution of labour force, employment and unemployment from the perspective of labour supply.

LFS encompasses both urban and rural areas for all administrative districts within all states in Malaysia using multi-modal data collection approach through the personal interview and a Computer-Assisted Telephone Interview (CATI).

The LFS are conducted based on the standard guidelines and recommendations of the International Labour Organizations (ILO).

The survey population comprises persons who live in the private living quarters, hence excludes persons residing in institutions such as hotels, hospitals, hostels, prisons, and workers residing in construction worksite.

The working age for the analysis of LFS in Malaysia refers to household members between the age of 15 to 64 years during the reference week, who are either in the labour force or outside the labour force.

LABOUR FORCE

- The population in the working age group of 15 to 64 years (in completed years at last birthday).
- Either employed or unemployed in the reference week.

EMPLOYED

- Persons who, at any time during the reference week worked at least one hour for pay, profit or family gain (as an employer, employee, own-account worker or unpaid family worker).
- Persons who did not work during the reference week because of illness, injury, bad weather, leave, labour dispute and social or religious reasons but had a job, farm, enterprise or other family enterprise to return to.
- Those on temporary lay-off with pay who would definitely be called back to work.

UNEMPLOYED

- Those who did not work during the reference week but are interested to work and seeking for a job.
- Classified into two groups which are actively and inactively unemployed.

OUTSIDE LABOUR FORCE

- All persons not classified as employed or unemployed.
- Example: housewives, students, retirees, disabled persons and those not interested in looking for a job.

UNEMPLOYMENT RATE

- The proportion of the unemployed population to the total population in labour force.
- Percentage of the unemployed population in the labour force.

LABOUR FORCE PARTICIPATION RATE

- The economic activity of a population depends on the demographic characteristics of that population.
- The proportion of the economically active population, hence differs between sub-groups of that population.
- These variations are measured by specific activity rates termed as labour force participation rate.
- Labour force participation rate is defined as the ratio of the labour force to the working age population (15 to 64 years), expressed as a percentage.

SEASONAL ADJUSTMENT

- Time-series data are very useful for economist, policy & decision makers and time-series analysts to identify the important features of economics series such as direction, turning point and consistency between other economic indicators. Sometimes this feature is difficult to obeserve because of seasonal movements. Thus, if seasonal effect can be removed, the behaviour of the series would be better viewed. The estimation and removal of the seasonal effects is called seasonal adjusment.

- Seasonal adjustment is a process to identify and to remove the regular within-a-year seasonal pattern, which may also include the influences of moving holidays and working/trading days effect in each period. The ultimate objective of the process is to highlight the underlying trends and short-term movements in the series.

- In Malaysia, most of the time series data are affected by seasonal effects. Hence, to eliminate the seasonal effect as well as to seasonally adjust the Malaysian economic time series data, a standard seasonal adjustment package, X-12 ARIMA was used by Department of Statistics, Malaysia.

Source: Labour Force Survey, Department of Statistics Malaysia (DOSM)

- **The number of employed persons** continued to trend up in June 2022, with an addition of **36.3 thousand persons (+0.2%)** to **15.94 million persons** (May 2022: 15.90 million persons). In terms of seasonally adjusted, the number of employed persons rose by 0.7 per cent. The **employment-to-population ratio** which indicates the ability of an economy to create employment, edged up by **0.1 percentage points** to record **66.9 per cent** as against May 2022 (66.8%).

- By economic sector, the number of employed persons in the Services sector continued to strengthen, particularly in Food & beverage services activities, Wholesales & retail trade; and Administrative & support service activities. A similar trend was observed in the Agriculture, Manufacturing and Construction, while Mining & quarrying sector persistently registered a decline in employment.

- **The employees' category** made up the largest component of employed persons, with a share of **76.1 per cent**. This category registered a month-on-month increase of 0.1 per cent (+13.0 thousand persons) to **12.13 million persons** in June 2022 (May 2022: 12.11 million persons). On the same note, the **own-account workers** strengthened further during the month with an increase of 22.2 thousand persons (0.8%) to register **2.77 million persons** (May 2022: 2.74 million persons).

- In June 2022, the number of **unemployed persons** was declining for eleven consecutive months, with a fall of **1.1 per cent (-7.1 thousand persons)** to **630.6 thousand unemployed persons** (May 2022: 637.7 thousand persons). Meanwhile, on seasonally adjusted terms, the number of unemployed persons dropped by 4.4 per cent. Consequently, June's **unemployment rate** descended to **3.8 per cent**, the lowest since the pandemic hit the country, but has yet to return to the pre-pandemic period. Meanwhile, seasonally adjusted estimates for the unemployment rate fell by 0.2 percentage points to record 3.6 per cent.

- During the month, the number of **labour force** continued to increase by **0.2 per cent** or equivalent to 29.1 thousand persons to **16.57 million persons** (May 2022: 16.54 million persons). June's **labour force participation rate** (**LFPR**) held steady at **69.5 per cent**. Seasonally adjusted estimates showed that the labour force increased by 0.4 per cent and the LFPR rose by 0.2 percentage points.

- The number of **outside labour force** fell by **0.1 per cent** or **4.6 thousand persons** to **7.26 million persons** in June 2022 (May 2022: 7.26 million persons). The major composition of outside labour force was **housework/ family responsibilities** with **42.8 per cent**, while the category of **schooling/ training category** ranked second with **40.1 per cent**.

- An improving socio-economic circumstance in the first half of 2022 might be one of the important factors in the country's economic recovery phase as well as the labour market. The vigorous economic activities in June 2022 also has enabled business activities to arouse after facing the challenges of the long-standing health crisis. Economic activities which were severely affected by the pandemic, such as the tourism industry and tourism-related industries, were seen to be recovering with an increase in the number of tourists in June 2022, thus enabling business activities to revive. The operation of all economic activities during the month also contributed to the increase of job opportunities since businesses required more workers to accommodate their business operations. Furthermore, Malaysia is optimistic that the economic recovery will remain resilient in the upcoming months, supported by various initiatives and government's effective management of the current situation. Subsequently, the need for labour is also seen as increasing in line with the development of economic activities. Thus, with these positive developments, the labour market is expected to continue to recover in the upcoming months.

1 CONTINUOUS IMPROVEMENT OF MALAYSIA'S LABOUR FORCE IN JUNE 2022, REGISTERING THE LOWEST UNEMPLOYMENT RATE SINCE THE PANDEMIC

During the month, healthier economic growth was observed as all economic and social activities were operating as usual. According to the World Bank Group's lead economist for Malaysia, Malaysia's economy is performing well in facing the global challenges, even with the impact of the pandemic, which was further affected by the war in Ukraine, restrictions on movement in China, rising interest rates and concerns about stagflation, as the country is surrounded by uncertainties[1].

Similarly, Malaysia's labour market recovery is seen as more sustained in June 2022 as business activities continued to pick up. The Malaysian Finance Minister, Tengku Zafrul Abdul Aziz, stated that Malaysia's economic growth projection is still on track. However, constant monitoring is required to ensure that the appropriate monetary and fiscal measures are taken to maintain economic growth despite the challenges[2]. In addition, based on the Monster Employment Index (MEI), Malaysia's job market recorded 31 per cent growth in job demand in June 2022, with 5 per cent increased in hiring activities[3]. This situation indicates that several industries in Malaysia have nearly returned to their pre-pandemic business functioning, such as tourism, hospitality, and retail industries experiencing the most robust recovery after the pandemic.

Therefore, the labour force situation continued to recover and grow during the month, in line with the current economic developments since the nationwide transition to endemic phase. Hence, the labour force condition was observed to be more stable in June 2022 as more demand for labour was needed in the market, thus opening up more job opportunities in the market. This situation is reflected by the continuous improvement of Malaysia's labour force in June 2022, with an increasing number of employed persons while unemployment continued to decline, registering the lowest unemployment rate since the pandemic.

As for the Leading Index (LI) performance, it rebounded by 2.2 per cent in May 2022 (April 2022: -0.5%), indicating a better performance in May 2022 with the long-term trend index continuously above 100.0 points, anticipating a positive economic outlook in the forthcoming months. Similarly, both the export and import of the monthly external trade indicators increased by double digits, rising by 21.3 per cent (May 2022: 5.6%) and 15.2 per cent (May 2022: 3.6%) respectively.

2 The number of employed persons continued to trend up in June 2022

The number of employed persons continued to trend up in June 2022, with an addition of **36.3 thousand persons (+0.2%)** to **15.94 million persons** (May 2022: 15.90 million persons). In terms of seasonally adjusted, the number of employed persons rose by 0.7 per cent. Year-on-year, the number of employed persons continued to record an increase with 4.2 per cent (+638.8 thousand persons) as against the previous year whereby the country was in total lockdown (June 2021: 15.30 million persons).

By economic sector, the number of employed persons in the Services sector continued to strengthen, particularly in Food & beverage services activities, Wholesales & retail trade; and Administrative & support service activities. A similar trend was observed in the Agriculture, Manufacturing and Construction sectors, while Mining & quarrying sector persistently registered a decline in employment.

The **employment-to-population ratio** which indicates the ability of an economy to create employment, edged up by **0.1 percentage points** to record **66.9 per cent** as against May 2022 (66.8%). Year-on-year comparison, this ratio went up by 1.9 percentage points (June 2021: 65.0%) [**Chart 1**].

Chart 1: Employed persons and employment-to-population ratio, January 2018 - June 2022
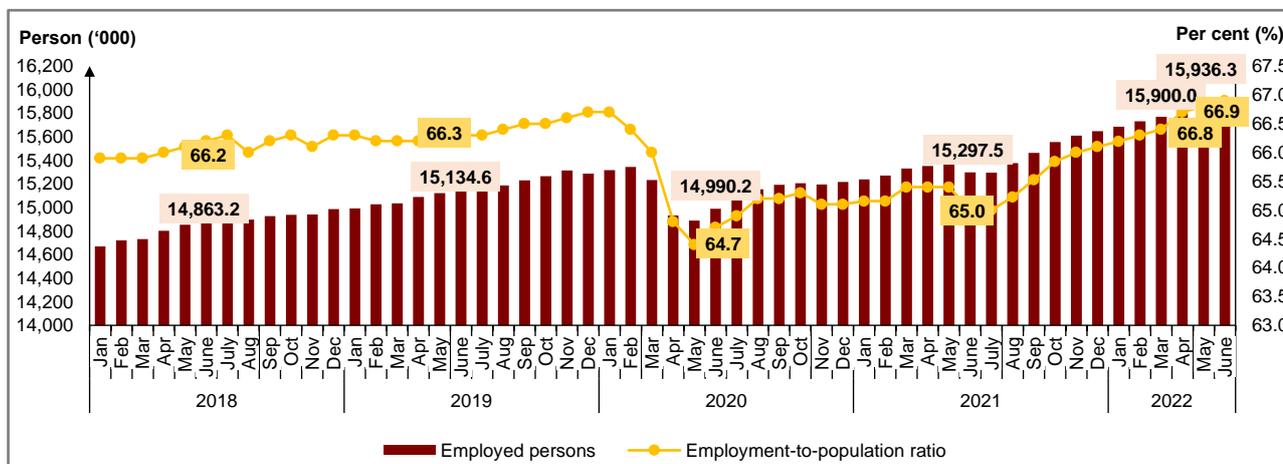

The employees' category made up the largest component of employed persons, with a share of **76.1 per cent**. This category registered a month-on-month increase of 0.1 per cent (+13.0 thousand persons) to **12.13 million persons** in June 2022 (May 2022: 12.11 million persons). On the same note, the **own-account workers** strengthened further during the month with an increase of 22.2 thousand persons (0.8%) to register **2.77 million persons** (May 2022: 2.74 million persons). This group consists of mostly daily income earners working as small businesses such as small retailers; hawkers; sellers in markets and stalls; as well as smallholders [**Chart 2**].

Chart 2: Employed person by status in employment, May and June 2022
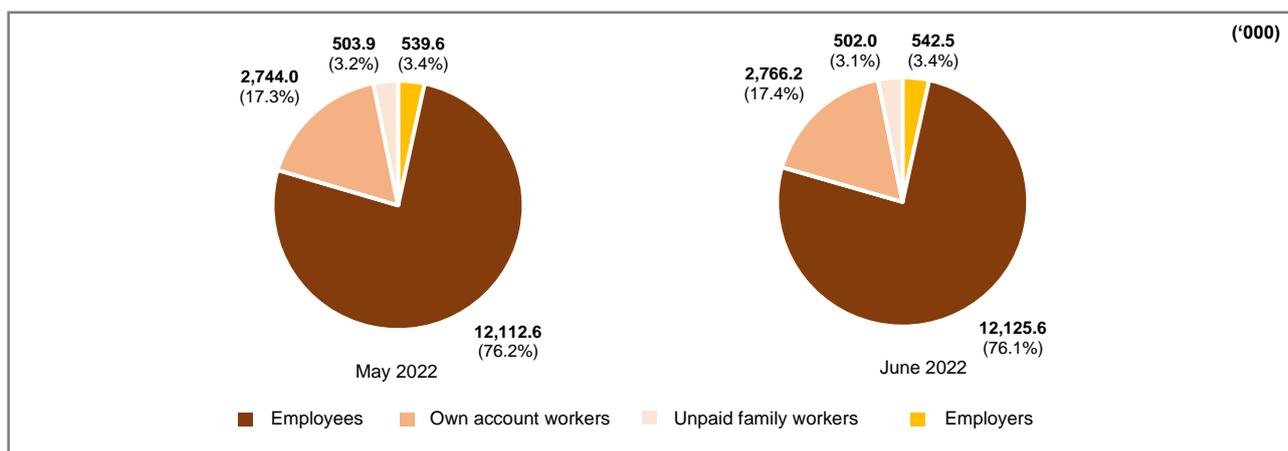

The number of employed persons who were temporarily not working in June 2022 declined by **6.7 per cent** (**-6.3 thousand persons)** to **87.8 thousand persons** as compared to May 2022 (94.1 thousand persons). As for the year-on-year comparison, this category was reduced by 713.3 thousand persons (-89.0%) as against 801.1 thousand persons recorded in June 2021 during the total lockdown. This group of persons, who were most likely not able to work were not categorised as unemployed as they had work to return to.

3 **June's unemployment rate descended to 3.8 per cent, the lowest since the pandemic hit**

In June 2022, the number of **unemployed persons** was declining for eleven consecutive months, with a fall of **1.1 per cent (-7.1 thousand persons)** to **630.6 thousand unemployed persons** (May 2022: 637.7 thousand persons). Meanwhile, on seasonally adjusted terms, the number of unemployed persons dropped by 4.4 per cent. Consequently, June's **unemployment rate** descended to **3.8 per cent**, the lowest since the pandemic hit the country, but has yet to return to the pre-pandemic period. Meanwhile, seasonally adjusted estimates for the unemployment rate fell by 0.2 percentage points to record 3.6 per cent.

The number of unemployed persons continued to decrease by 18.0 per cent year-on-year or 138.1 thousand persons (June 2021: 768.7 thousand persons). Therefore, the unemployment rate declined by 1.0 percentage points as against 4.8 per cent in June 2021 **[Chart 3]**.

Chart 3: Unemployed persons and unemployment rate, 1982 - 2021 and January 2020 - June 2022
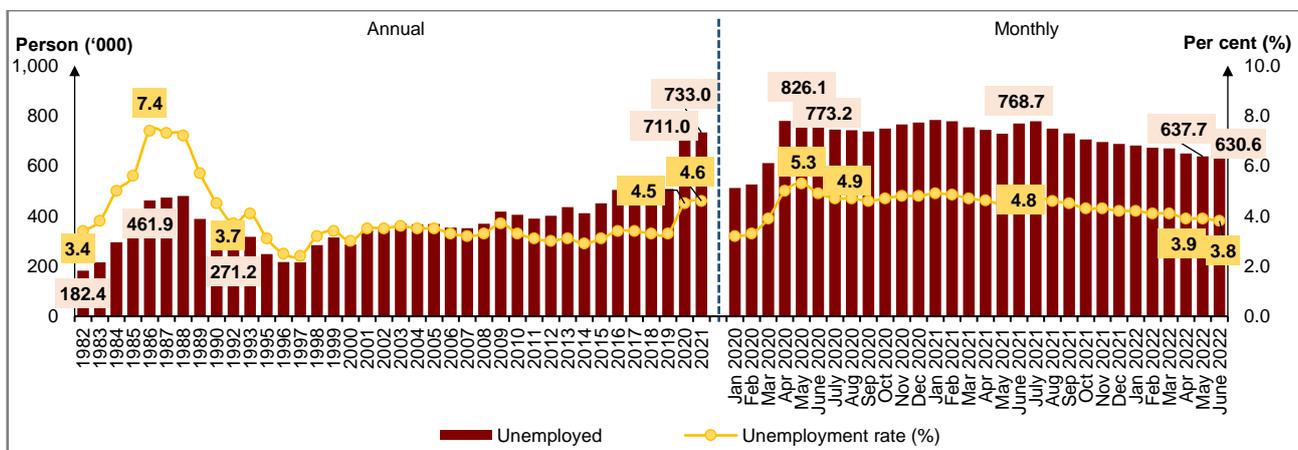

By category of unemployment, the **actively unemployed** or those who were available for work and were actively seeking jobs encompassed **83.8 per cent** of the total unemployed persons. This category dropped by **1.0 per cent (-5.5 thousand persons)** to **528.5 thousand persons** (May 2022: 534.0 thousand persons). The **unemployed persons for less than three months** made up **59.0 per cent** of the total actively unemployed, whereas those who were in the **long-term unemployment** of more than a year[4] was **6.6 per cent**. Meanwhile, those who believed that there were no jobs available or the **inactively unemployed** recorded a decrease of **1.6 per cent** or equivalent to **1.7 thousand persons** to **102.1 thousand persons** (May 2022: 103.8 thousand persons) **[Chart 4]**.

☐ May 2022　■ June 2022
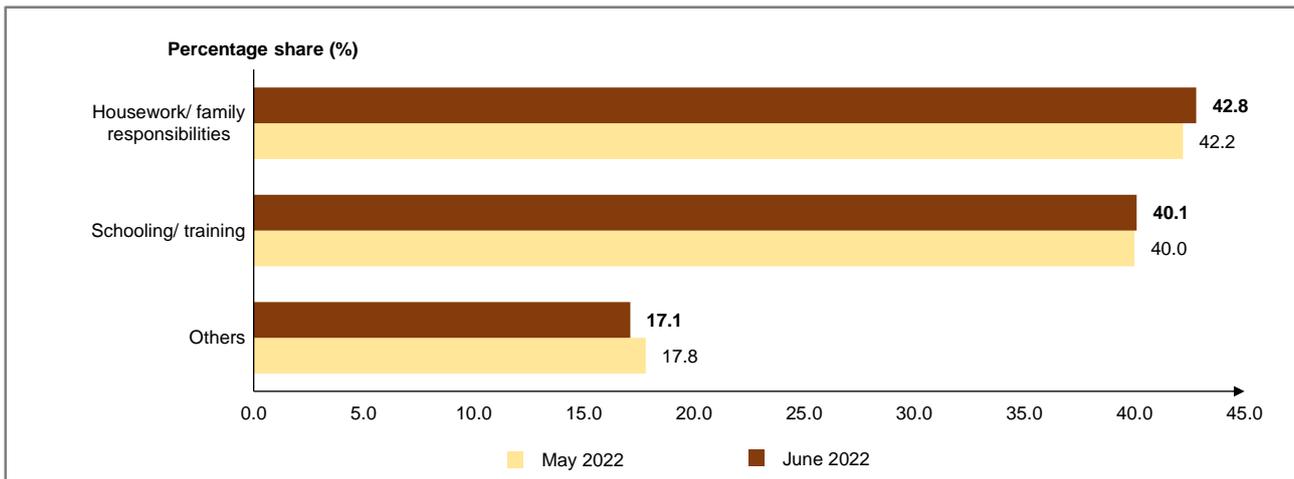

6 GOVERNMENT'S INITIATIVES[5]

The Wage Subsidy Programme (PSU) under the PRIHATIN package is a financial assistance paid to employers for each enterprise to support employers to continue their operations and retain employees. Through PSU 1.0, this programme had benefited 322,177 employers and 2.64 million registered employees with a total approved value of RM12.96 billion as of 8 July 2022. In addition, a total of RM1.41 billion was channelled to 81,158 employers, enabling them to continue operating and retain 719,029 employees through PSU 2.0 under the Kita PRIHATIN Package. Under PSU 3.0, there were 162,317 employers were supported to retain 1.53 million employees with a value of RM3.78 billion. Furthermore, through PSU 4.0, a total value of RM2.57 billion was channelled to 163,722 employers and 1.92 million employees under PEMULIH packages. In the meantime, through PSU 5.0, a total of RM204.78 million was channelled to 7,674 employers to retain 116,433 employees.

As of 8 July 2022, through the *JaminKerja* Recruitment Incentive Programme with the collaboration of SOCSO has successfully placed 4,459 youths under the National Apprenticeship Scheme (SPN) which was specifically designed for the apprentice group under the Ministry of Youth and Sports in collaboration with other ministries such as the Ministry of Works, Ministry of Human Resources and Federal Agencies under all three ministries. Also, a total of 3,618 graduates were successfully placed through the Ministry of Higher Education's Career Advancement Programme (KPT-CAP). Under the Ministry of Entrepreneur Development and Cooperatives (MEDAC), the Professional Training and Education for Growing Entrepreneurs (PROTEGE) which was an initiative to implement the employability improvement programmes and foster entrepreneurial skills among graduates, a total of 4,316 graduates were successfully positioned. Besides, from a total of 3,988 applications, 1,101 participants were successfully placed in technology and digital services jobs through the MyDigitalWorkforce Work in Tech (MYWiT). Meanwhile, a total of 8,891 veterans benefited through the ATM Veterans Reskilling and Upskilling Programme (PRUV-ATM) which was implemented to improve the socio-economic status of veterans, whereby veterans will be trained to enhance their knowledge and skills for the employment and entrepreneurship sectors.

As for the business empowerment, a total of 448 new entrepreneurs were assisted, involving a total of RM3.91 million was approved under the Youth/ MARA Educational Institution Graduate Entrepreneur

---

[5] This segment is included in the report as a reference for reader based on the 103rd & 104th Kewangan Rakyat Report of 12th and 17th July 2022 on the status of approvals, disbursements and registrations.

Programme (PUTRA), which was designed to provide financing facilities for micro businesses in all sectors, except agriculture and livestock farming, and to produce dynamic entrepreneurs among the younger generation who are eager to start a business as of 30 June 2022. Subsequently, a total of RM2.77 million was channelled to 36 MARA technical entrepreneurs through the Technical Entrepreneur Development Programme (PUTEK), which was a financial facility for the younger generation to start a business in a technical field based on the abilities obtained under MARA. On top of that, a total of RM10 million has been approved to assist 265 women entrepreneurs who were affected by COVID-19 and to increase their business capacity under the Women Special Business Financing Scheme (DanaNITA). Also, out of the total 36,034 applications under the Targeted Relief and Residual Facility (TRRF), RM6.0 billion was channelled to 25,470 Small and Medium Enterprises (SMEs) which were affected in the services sector as of 28 June 2022.

Under the Agrofood Facilities (AF) provided by Bank Negara Malaysia (BNM), with a goal of driving the modernisation of the agricultural sector in order to improve food security and safety, generate higher income and attract more younger agropreneurs, there were 2,268 approved applications from 3,020 applications with a total financing value of RM1.78 billion as of 28 June 2022. Through the Professional Financing Scheme (ProSPEC) under MARA, which aims to provide business facilities and increase the participation of Bumiputera entrepreneurs in the field of professional entrepreneurship, a total of RM3.25 million was approved for 11 professionals to venture into entrepreneurship, as of 30 June 2022. In the meantime, a total of RM21.72 million was channelled to support 919 Micro SMEs as of 1 July 2022 under the Indian Community Entrepreneur Development Scheme (SPUMI), which was a strategic programme under TEKUN meant to assist the Indian community in developing their economy through business and entrepreneurship.

Additionally, from a total of 780 financing applications, 409 applications were approved with a total financing value of RM84.0 million as of 24 June 2022 through the PENJANA Tourism Financing programme, which was specifically allocated for Bumiputera SMEs to support SMEs and micro-SMEs that were still affected by the COVID-19 pandemic. Besides, a total of RM92.9 million had been channelled to 13,893 businesses in the form of grants and loans for digitalisation services subscriptions to support and encourage SMEs and Technical and Digital Mid-tier Companies (MTCs) to digitalise their operations and trade channels as of 1 July 2022. Meanwhile, under the CENDANA programme, which aimed to support the Arts, Culture, and Entertainment Sector, a total of RM7.50 million was channelled to 590 recipients from the total 1,582 applications for this programme, including artists and organisations who were actively involved in the Malaysian Arts and Culture industry as of 15 July 2022.

7 LOOKING AHEAD

An improving socio-economic circumstance in the first half of 2022 might be one of the important factors in the country's economic recovery phase as well as the labour market. The vigorous economic activities in June 2022 also has enabled business activities to arouse after facing the challenges of the long-standing health crisis. Economic activities which were severely affected by the pandemic, such as the tourism industry and tourism-related industries, were seen to be recovering with an increase in the number of tourists in June 2022, thus enabling business activities to revive. The operation of all economic activities during the month also contributed to the increase of job opportunities since businesses required more workers to accommodate their business operations.

Furthermore, Malaysia is optimistic that the economic recovery will remain resilient in the upcoming months, supported by various initiatives and government's effective management of the current situation. Subsequently, the need for labour is also seen as increasing in line with the development of

economic activities. Thus, with these positive developments, the labour market is expected to continue to recover in the upcoming months.

Notes:

[1]For 1982- 2000, category of occupation are classified according to the "Dictionary of Occupational Classification, 1980" as follows:

1: Professional, technical and related workers
2: Administrative and managerial workers
3: Clerical and related workers
4: Sales workers
5: Service workers
6: Agricultural, animal husbandry and forestry workers, fishermen and hunters
7: Production and related workers, transport equipment operators and labourers

[2]For 2001 - 2010, category of occupation are classified according to the "Malaysia Standard Classification of Occupations (MASCO) 1998" as follows:
1: Legislators, senior officials and managers
2: Professionals
3: Technicians and associate professionals
4: Clerical workers
5: Service workers and shop and market sales workers
6: Skilled agricultural and fishery workers
7: Craft and related trade workers
8: Plant and machine-operators and assemblers
9: Elementary occupations

[3]For 2011 - 2015, category of occupation are classified according to the "Malaysia Standard Classification of Occupations (MASCO) 2008" as follows:
1: Managers
2: Professionals
3: Technicians and associate professionals
4: Clerical support workers
5: Service workers and shop and market sales workers
6: Skilled agricultural, forestry and fishery workers
7: Craft and related trades workers
8: Plant and machine-operators and assemblers
9: Elementary occupations

[4]For 2016 - 2021, category of occupation are classified according to the "Malaysia Standard Classification of Occupations (MASCO) 2013" as follows:
1: Managers
2: Professionals
3: Technicians and associate professionals
4: Clerical workers
5: Service and sales workers
6: Skilled agricultural, forestry, livestock and fishery workers
7: Craft and related trades workers
8: Plant and machine-operators and assemblers
9: Elementary occupations

Notes:

[1] **For 1982 - 2000, industry was classified according to the "Malaysia Industrial Classification, (Updated) 1972" as follows:**

A: Agriculture, forestry, livestock and fishing
B: Mining and quarrying
C: Manufacturing
D: Electricity, gas and water
E: Construction
F: Wholesale and retail trade, restaurants and hotels
G: Transport, storage and communications
H: Finance, insurance, real estate and business services
I: Community, social and personal services

[2] **For 2001 - 2009, industry was classified according to the "Malaysia Standard Industrial Classification (MSIC) 2000" as follows:**

A: Agriculture, hunting and forestry
B: Fishing
C: Mining and quarrying
D: Manufacturing
E: Electricity, gas and water supply
F: Construction
G: Wholesale and retail trade; repair of motor vehicles, motorcycles and personal and household goods
H: Hotels and restaurants
I: Transport, storage and communications
J: Financial intermediation
K: Real estate, renting and business activities
L: Public administration and defence; compulsory social security
M: Education
N: Health and social work
O: Other community, social and personal service activities
P: Private households with employed persons

[3] **For 2010 - 2021, industry was classified according to the "Malaysia Standard Industrial Classification (MSIC) 2008" as follows:**

A: Agriculture, forestry and fishing
B: Mining and quarrying
C: Manufacturing
D: Electricity, gas, steam and air conditioning supply
E: Water supply; sewerage, waste management and remediation activities
F: Construction
G: Wholesale and retail trade, repair of motor vehicles and motorcycles
H: Transportation and storage
I: Accommodation and food service activities
J: Information and communication
K: Financial and insurance/takaful activities
L: Real estate activities
M: Professional, scientific and technical activities
N: Administrative and support service activities
O: Public administration and defence; compulsory social security
P: Education
Q: Human health and social work activities
R: Arts, entertainment and recreation
S: Others service activities
T: Activities of households as employers

Notes:

[1]**For 1982 - 2000, industry was classified according to the "Malaysia Industrial Classification, (Updated) 1972" as follows:**

A: Agriculture, forestry, livestock and fishing
B: Mining and quarrying
C: Manufacturing
D: Electricity, gas and water
E: Construction
F: Wholesale and retail trade, restaurants and hotels
G: Transport, storage and communications
H: Finance, insurance, real estate and business services
I: Community, social and personal services

[2]**For 2001 - 2009, industry was classified according to the "Malaysia Standard Industrial Classification (MSIC) 2000" as follows:**

A: Agriculture, hunting and forestry
B: Fishing
C: Mining and quarrying
D: Manufacturing
E: Electricity, gas and water supply
F: Construction
G: Wholesale and retail trade; repair of motor vehicles, motorcycles and personal and household goods
H: Hotels and restaurants
I: Transport, storage and communications
J: Financial intermediation
K: Real estate, renting and business activities
L: Public administration and defence; compulsory social security
M: Education
N: Health and social work
O: Other community, social and personal service activities
P: Private households with employed persons

[3]**For 2010 - 2021, industry was classified according to the "Malaysia Standard Industrial Classification (MSIC) 2008" as follows:**

A: Agriculture, forestry and fishing
B: Mining and quarrying
C: Manufacturing
D: Electricity, gas, steam and air conditioning supply
E: Water supply; sewerage, waste management and remediation activities
F: Construction
G: Wholesale and retail trade, repair of motor vehicles and motorcycles
H: Transportation and storage
I: Accommodation and food service activities
J: Information and communication
K: Financial and insurance/takaful activities
L: Real estate activities
M: Professional, scientific and technical activities
N: Administrative and support service activities
O: Public administration and defence; compulsory social security
P: Education
Q: Human health and social work activities
R: Arts, entertainment and recreation
S: Others service activities
T: Activities of households as employers
