JABATAN PERANGKAAN MALAYSIA

ANALISIS INDEKS HARGA PENGELOUAR TAHUNAN

ANALYSIS OF ANNUAL PRODUCER PRICE INDEX

2023

Pemakluman:

Jabatan Perangkaan Malaysia (DOSM) telah melancarkan OpenDOSM NextGen sebagai medium yang menyediakan katalog data dan visualisasi bagi memudahkan pengguna menganalisis pelbagai data dan boleh diakses melalui portal <https://open.dosm.gov.my>.

DOSM sedang menjalankan Banci Pertanian 2024. Sila layari <https://www.myagricensus.gov.my/> untuk maklumat lanjut. Tema adalah "Banci Pertanian, Kunci Kemajuan Pertanian."

Kerajaan Malaysia telah mengisytiharkan Hari Statistik Negara (MyStats Day) pada 20 Oktober setiap tahun. Tema sambutan MyStats Day adalah "Statistik Nadi Kehidupan". DOSM menyambut ulang tahun ke-75 Jubli Intan pada tahun 2024.

Announcement :

The Department of Statistics Malaysia (DOSM) has launched OpenDOSM NextGen as a medium that provides data catalogue and visualisations to facilitate users' analysis and can be accessed through <https://open.dosm.gov.my>.

DOSM is conducting the Agriculture Census 2024. Please visit <https://www.myagricensus.gov.my/> for more information. The theme is "Agriculture Census, Key to Agricultural Development."

The Government of Malaysia has declared National Statistics Day (MyStats Day) on October 20th each year. MyStats Day theme is "Statistics is the Essence of Life". DOSM commemorates its 75th Diamond Jubilee in 2024.

KATA PENGANTAR

Analisis Indeks Harga Pengeluar Tahunan 2023 diterbitkan oleh Jabatan Perangkaan Malaysia (DOSM) yang memaparkan statistik tahunan bagi siri masa 2011 hingga 2023 merangkumi dua statistik utama iaitu Indeks Harga Pengeluar (IHPR) Pengeluaran Tempatan dan Indeks Harga Pengeluar Perkhidmatan (IHPPR).

Penyusunan statistik IHPR Pengeluaran Tempatan adalah berdasarkan konsep dan garis panduan daripada *Producer Price Index Manual: Theory and Practice, 2004* yang diterbitkan oleh *International Monetary Fund* (IMF), manakala IHPPR pula merujuk kepada *Methodological Guide for Developing Producer Price Indices for Services* yang diterbitkan oleh *Organisation for Economic Co-operation & Development (OECD)*, *Eurostat* dan *Joint Eurostat-OECD Task Force*.

IHPR Pengeluaran Tempatan mengukur purata perubahan harga barang di peringkat pengeluar yang dikenakan oleh pengeluar tempatan dalam sesuatu industri. Indeks ini merangkumi lima sektor iaitu Pertanian, perhutanan & perikanan, Perlombongan, Pembuatan, Bekalan elektrik & gas dan Bekalan air. Manakala IHPPR mengukur perubahan harga yang dikenakan oleh industri perkhidmatan tempatan. Indeks ini merangkumi lapan subsektor perkhidmatan terpilih iaitu Pengangkutan, Penginapan dan aktiviti perkhidmatan makanan & minuman, Maklumat & komunikasi, Aktiviti hartanah, Profesional, Pendidikan, Kesihatan dan Kesenian, hiburan & rekreasi.

Setiap bahagian dalam penerbitan ini dilengkapi dengan infografik, ringkasan penemuan, jadual statistik dan nota teknikal yang menerangkan konsep dan definisi bagi membantu pengguna memahami statistik yang dikeluarkan.

Jabatan merakamkan setinggi-tinggi penghargaan atas kerjasama dan sumbangan yang diberikan oleh semua pihak dalam menjayakan penerbitan ini. Maklum balas dan cadangan untuk penambahbaikan pada masa akan datang amat dihargai.

Oktober 2024

PREFACE

The Analysis of Annual Producer Price Index, 2023 published by the Department of Statistics Malaysia (DOSM) which presents annual statistics for the time series of 2011 to 2023 includes main statistics, namely Producer Price Index (PPI) Local Production and Services Producer Price Index (SPPI).

The statistics compilation of PPI Local Production is based on concepts and guidelines from the Producer Price Index Manual: Theory and Practice, 2004 published by the International Monetary Fund (IMF), while the SPPI refers to the Methodological Guide for Developing Producer Price Indices for Services published by the Organisation for Economic Co-operation & Development (OECD), Eurostat and a joint Eurostat-OECD Task Force.

PPI Local Production measures the average price changes of goods at the producer level charged by local producers in the industry. The index covers five sectors: Agriculture, forestry & fishing, Mining, Manufacturing, Electricity & gas supply and Water supply. Meanwhile, SPPI measures changes in prices charged by the local services industry. The index covers eight selected services sub-sectors, namely Transportation, Accommodation and food & beverage service activities, Information & communication, Real estate activities, Professional, Education, Health and Arts, entertainment & recreation.

Each section in this publication is provided with infographics, summary of findings, statistical tables and technical notes that explain the concepts and definitions to assist users in understanding the published statistics.

The Department gratefully acknowledges the cooperation and contribution rendered by all parties in making this publication a success. The feedback and suggestion to improve in the future are highly appreciated.

Pengenalan

Ekonomi global perlahaan kepada 3.1 peratus pada 2023 berbanding 3.5 peratus pada 2022. Memandangkan landskap global terus mengalami perubahan kadar pertumbuhan yang turun naik, ekonomi global dijangka menunjukkan pertumbuhan yang sederhana. Kadar pertumbuhan ini dijangka kekal konsisten pada tahun-tahun akan datang¹. Ketakpastian adalah kekal, menyebabkan *International Monetary Fund (IMF)*² meramalkan kadar pertumbuhan global sebanyak 3.2 peratus pada 2024 dan 2025. Ramalan ini mengambil kira pemulihan yang perlahaan daripada pandemik global, konflik geopolitik yang berterusan dan kenaikan kadar faedah oleh negara lain bagi mengawal inflasi.

Di sebalik ketakpastian dalam ekonomi dunia, dengan permintaan global yang rendah dan gangguan dalam pengeluaran komoditi, ekonomi Malaysia terus berkembang 3.7 peratus pada 2023. Selain itu, pertumbuhan dalam perbelanjaan pelaburan dan penggunaan juga mendorong permintaan domestik Malaysia pada tahun 2023. Ini juga dibantu oleh keadaan pasaran buruh yang menggalakkan, tekanan inflasi yang sederhana dan industri pelancongan yang berkembang. Bank Dunia³ mengunjurkan dengan permintaan domestik yang kukuh akan memacu Keluaran Dalam Negeri Kasar (KDNK) negara untuk berkembang sebanyak 4.3 peratus pada 2024.

Menurut *World Economic Outlook*, harga komoditi yang lebih rendah dan situasi rantai bekalan yang normal membantu mengurangkan inflasi keseluruhan global, namun ia kekal tinggi. Konflik Timur Tengah dan pengurangan pengeluaran Pertubuhan Negara Pengeksport Petroleum (OPEC+) menyumbang kepada kenaikan harga minyak, dengan peningkatan pengeluaran daripada negara bukan pengeluar OPEC. Justeru, IMF⁴ mengunjurkan inflasi global meningkat secara perlahaan, daripada 6.8 peratus pada 2023 kepada 5.9 peratus pada 2024 dan 4.5 peratus pada 2025, dengan negara maju kembali kepada sasaran inflasi mereka lebih awal berbanding pasaran sedang membangun dan ekonomi membangun. Inflasi teras secara amnya, diunjurkan meningkat secara perlahaan. Inflasi teras yang berterusan ini telah mengambil kira inflasi perkhidmatan, dipacu oleh permintaan dalam negeri yang berdaya tahan, pertumbuhan gaji yang lebih kukuh daripada jangkaan dan putaran perbelanjaan berterusan daripada barang kepada perkhidmatan yang memberi tekanan ke atas harga.

Harga Komoditi Global 2023 dan Unjuran

Harga komoditi, seperti yang diukur melalui indeks harga komoditi Bank Dunia⁵, diunjurkan menurun 4.0 peratus pada 2024 selepas jatuh hampir 24.0 peratus pada 2023. Ini adalah penurunan paling rendah sejak pandemik COVID-19. Selain itu, harga tenaga juga dijangka jatuh pada 2024 dan kekal mendatar pada 2025.

Harga minyak Brent telah meningkat dengan ketara majoriti berlegar sekitar USD80 setong pada 2023. Purata harga minyak mentah Brent adalah USD83 setong pada 2023, turun daripada USD100 setong pada 2022. Harga komoditi bahan api diunjurkan menurun pada 2024 pada purata 9.7 peratus, dengan harga minyak turun kira-kira 2.5 peratus. Penurunan ini mencerminkan kapasiti ruang yang banyak dan pertumbuhan bekalan bukan OPEC+ (Organisasi Negara Pengekspor Petroleum serta negara bukan ahli terpilih, termasuk Rusia) yang stabil.

Harga gas asli dijangka terus menurun pada 2024 berbanding 2023. Wood Mackenzie⁶ meramalkan harga 2024 lebih rendah berbanding 2023 sebanyak 45.0 peratus, dan dijangka kekal sederhana pada 14 juta tan pada 2024, dengan pasaran gas menjadi semakin seimbang berikutan bekalan baharu, permintaan yang lembap dan penyimpanan yang tinggi. Walaupun permintaan gas asli cecair Asia kekal rendah, prestasi ianya tidak mungkin meningkat.

Harga makanan global turun sebanyak 13.7 peratus pada 2023, menurut Indeks Harga Makanan oleh Pertubuhan Makanan dan Pertanian Pertubuhan Bangsa-Bangsa Bersatu (FAO)⁷. Harga komoditi makanan diramalkan menurun 2.2 peratus pada 2024. Berdasarkan IMF⁸, ramalan harga makanan telah disemak semula dengan penurunan perlahan, didorong oleh jangkaan bekalan global yang stabil bagi gandum dan jagung.

Pengeluaran minyak sawit mentah Malaysia pada 2023 pulih berbanding pengeluaran 2022, yang membawa kepada harga minyak sawit mentah yang menyederhana kepada RM3,800 satu tan pada 2023. Lembaga Minyak Sawit Malaysia (MPOB) mengunjurkan harga minyak sawit mentah lebih kukuh berbanding tahun sebelumnya, dengan harga julat purata antara RM3,900 hingga RM4,200 satu tan pada 2024. Menurut MPOB, antara faktor yang mempengaruhi pengukuhan harga purata minyak sawit mentah pada 2024 adalah jangkaan bekalan minyak sawit terhad di dunia berikutan pelaksanaan mandat biodiesel B35 di Indonesia.

⁵ Merujuk kepada *Commodity Markets Outlook* oleh The World Bank, Mei 2024

⁸ Merujuk kepada *World Economic Outlook Update*, Januari 2024

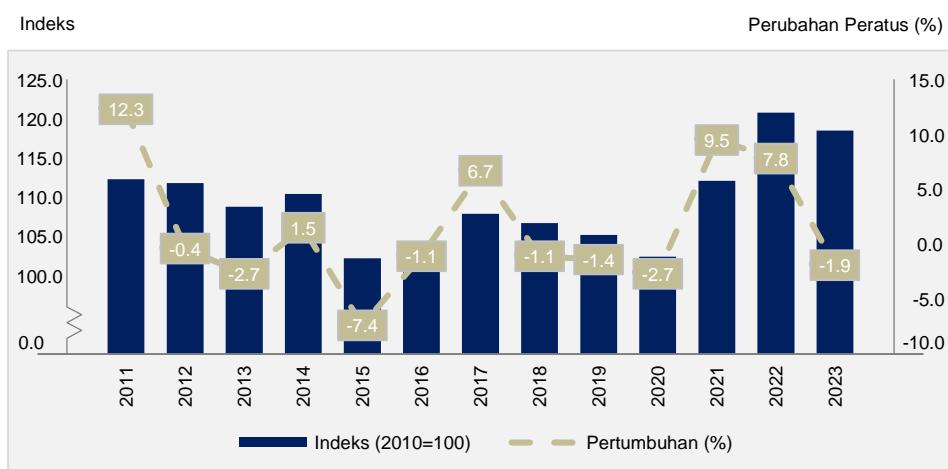

Indeks Harga Pengeluar Keseluruhan 2023

Indeks Harga Pengeluar (IHPR) Pengeluaran Tempatan turun negatif 1.9 peratus pada 2023 selepas peningkatan 7.8 peratus pada 2022. Ini adalah penurunan pertama sejak 2020 berikutan harga komoditi utama Malaysia yang lebih rendah. Harga komoditi pada 2023 tidak menentu disebabkan ketakpastian harga, terutamanya dalam pasaran produk petroleum.

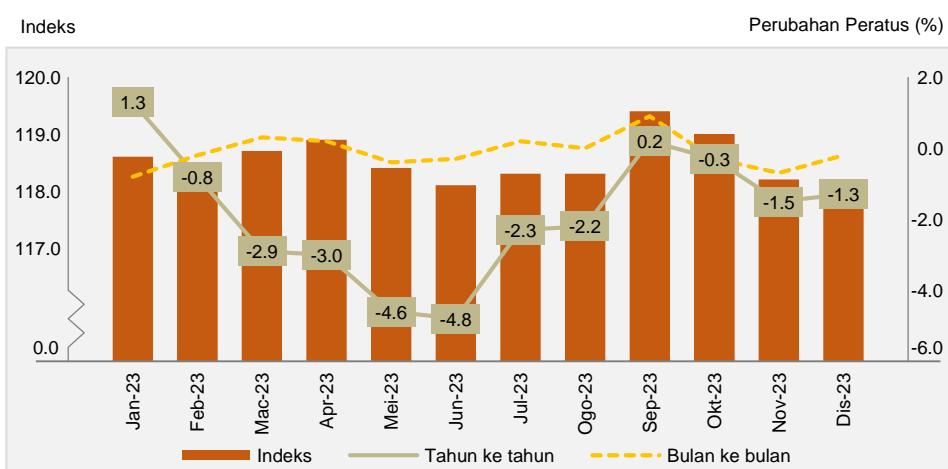

[Carta 1]

IHPR Pengeluaran Tempatan bermula dengan momentum positif dengan merekodkan peningkatan 1.3 peratus pada Januari 2023 berbanding tahun sebelumnya. Bagaimanapun, indeks itu menguncup bermula pada Februari 2023 (-0.8%) hingga Ogos 2023 (-2.2%) dan kembali kepada aliran menurun dari Oktober 2023 (-0.3%) hingga akhir tahun 2023. IHPR terendah dicatatkan pada Jun 2023 (-4.8%) dan tertinggi pada Januari 2023 (1.3%). Penurunan itu disebabkan terutamanya oleh harga komoditi utama yang lebih rendah melibatkan produk minyak sawit dan minyak mentah. [Carta 2]

Carta 1: IHPR Pengeluaran Tempatan Tahunan, 2011-2023

Carta 2: IHPR Pengeluaran Tempatan Bulanan, 2023

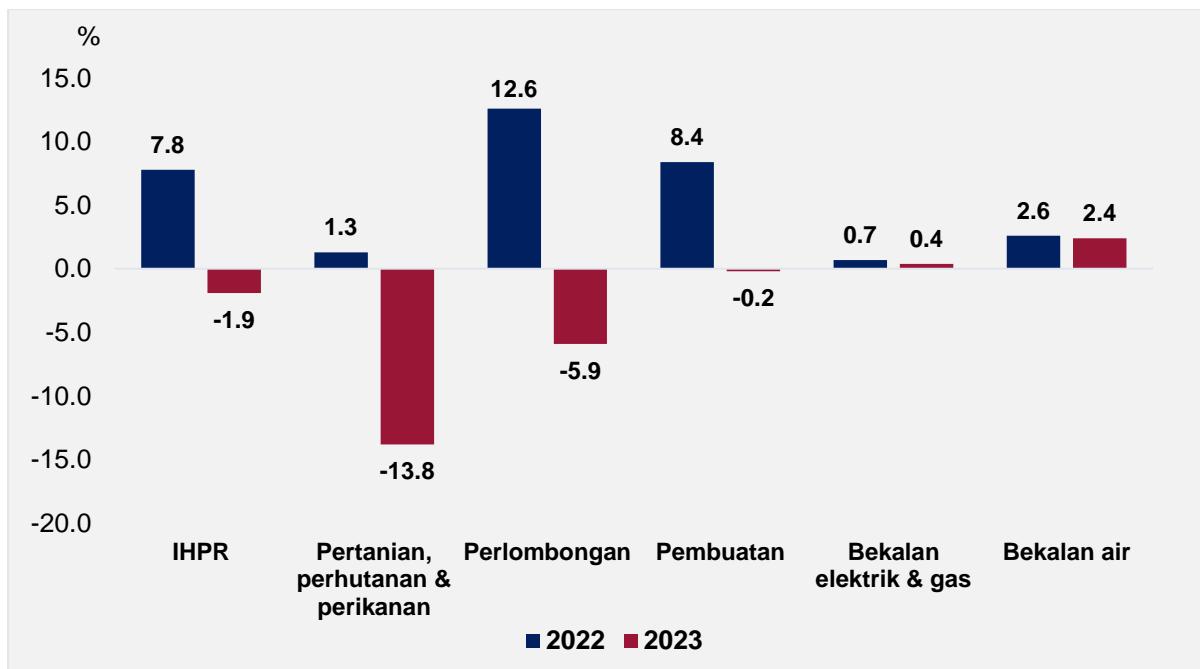

Indeks Harga Pengeluar mengikut Sektor

IHPR Pengeluaran Tempatan turun negatif 1.9 peratus pada 2023 (2022: 7.8%) disebabkan terutamanya oleh penguncupan dalam sektor Pertanian, perhutanan & perikanan iaitu negatif 13.8 peratus daripada peningkatan 1.3 peratus pada 2022. Sektor Perlombongan juga menurun negatif 5.9 peratus berbanding 12.6 peratus pada 2022. Dalam masa yang sama, sektor Pembuatan mencatatkan penurunan perlahan negatif 0.2 peratus berbanding kenaikan 8.4 peratus pada 2022. Bagaimanapun, sektor utiliti kekal positif pada 2023, dengan Bekalan elektrik & gas dan Bekalan air masing-masing meningkat sebanyak 0.4 peratus dan 2.4 peratus. [Carta 3]

Jadual 1: IHPR mengikut Sektor, 2022 dan 2023

Sektor	Indeks		Pertumbuhan (%)	
	2022	2023	2022	2023
Jumlah	120.8	118.5	7.8	-1.9
Pertanian, perhutanan & perikanan	144.7	124.8	1.3	-13.8
Perlombongan	104.2	98.1	12.6	-5.9
Pembuatan	120.8	120.5	8.4	-0.2
Bekalan elektrik & gas	117.4	117.9	0.7	0.4
Bekalan air	115.2	118.0	2.6	2.4

Carta 3: Perubahan Peratus Tahunan IHPR mengikut Sektor, 2022 dan 2023

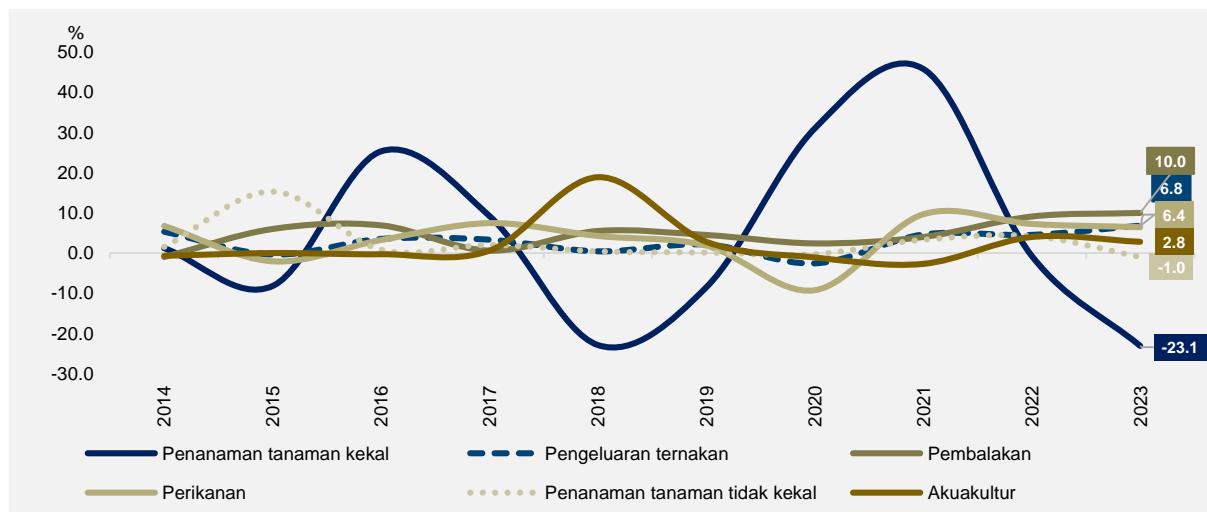

A Pertanian, Perhutanan & Perikanan

Indeks Pertanian, perhutanan & perikanan merosot dua digit negatif 13.8 peratus pada 2023, selepas peningkatan 1.3 peratus pada 2022. Sebagai komponen terbesar dalam sektor ini, penurunan dua digit dalam indeks Penanaman tanaman kekal sebanyak negatif 23.1 peratus (2022: -0.7%) membawa kepada kemerosotan keseluruhan sektor ini. Penurunan indeks ini disebabkan terutamanya oleh Buah tandan kelapa sawit segar yang mengalami penurunan indeks sebanyak negatif 24.8 peratus (2022: -0.5%). Penanaman tanaman tidak kekal juga turun negatif 1.0 peratus selepas peningkatan 4.2 peratus pada 2022. Sementara itu, subsektor lain mencatatkan peningkatan pada 2023. Pengeluaran ternakan meningkat 6.8 peratus (2022: 4.5%) dan Pembalakan mencatatkan peningkatan dua digit sebanyak 10.0 peratus (2022: 9.1%). Dalam masa yang sama, indeks Perikanan terus meningkat 6.4 peratus (2022: 7.2%) dan Akuakultur meningkat 2.8 peratus (2022: 4.0%). [Carta 4]

Jadual 2: Sektor Pertanian, Perhutanan & Perikanan, 2022 dan 2023

Sektor (A)	Indeks		Pertumbuhan (%)	
	2022	2023	2022	2023
Pertanian, perhutanan & perikanan	144.7	124.8	1.3	-13.8
Penanaman tanaman tidak kekal	144.2	142.7	4.2	-1.0
Penanaman tanaman kekal	145.1	111.6	-0.7	-23.1
Pengeluaran ternakan	131.6	140.6	4.5	6.8
Pembalakan	165.4	181.9	9.1	10.0
Perikanan	155.3	165.3	7.2	6.4
Akuakultur	137.0	140.8	4.0	2.8

Carta 4: Perubahan Peratus Tahunan Sektor Pertanian, Perhutanan & Perikanan, 2014 - 2023

Subsidi dan kawalan harga ayam telah ditamatkan bermula pada 1 November 2023, mengambil kira bekalan semasa dan harga yang mulai stabil. Rasional penamatkan subsidi secara pukal bagi ayam adalah bagi mengurangkan ketirisan subsidi pada ketika itu yang turut dinikmati oleh warga asing. Bagaimanapun, subsidi dan kawalan harga telur ayam gred A, B dan C masih dikekalkan sehingga kini. Sehubungan itu, Kementerian Pertanian dan Keterjaminan Makanan (KPKM) dan Kementerian Perdagangan Dalam Negeri dan Kos Sara Hidup (KPDN) telah memperluaskan Jualan Rahmah dan Jualan Agro Madani ke seluruh negara bagi membekalkan ayam pada kadar harga yang berpatutan. Indeks Pengeluaran ternakan meningkat sederhana pada 2023 kesan daripada pengapungan harga ayam.

Babi mencatatkan peningkatan dua digit sebanyak 29.1 peratus berbanding 9.9 peratus pada 2022. Terdapat kenaikan harga yang ketara berikutan peningkatan kos operasi dan menjadi lebih teruk dengan penularan Demam Babi Afrika (ASF). Penularan ASF telah memberi kesan besar kepada pengeluaran babi hidup di samping kenaikan harga makanan haiwan. Bahan mentah yang mahal dan kos operasi yang tinggi menyumbang kepada jumlah kenaikan kos. Selain itu, tekanan untuk menaikkan harga daging babi segar amat ketara semasa sambutan Krismas dan cuti Tahun Baru China berikutan bekalan terhad dan permintaan tinggi, fenomena biasa di seluruh dunia.

Penanaman tanaman tidak kekal juga menurun negatif 1.0 peratus selepas peningkatan 4.2 peratus pada 2022. Menurut Berita Harian, harga sayur-sayuran yang dijual di peringkat ladang kepada pemborong jatuh separuh daripada kos pengeluaran sayur-sayuran. Petani di seluruh negara menghadapi lambakan bekalan, menyebabkan sebahagian daripada mereka memusnahkan hasil kebun berikutan penurunan harga dan kelembapan dalam jualan.

Indeks Perikanan, yang terdiri daripada ikan segar dan makanan laut segar, terus meningkat sebanyak 6.4 peratus (2022: 7.2%) dan Akuakultur meningkat 2.8 peratus (2022: 4.0%). Perubahan cuaca menyebabkan gangguan bekalan, terutamanya semasa monsun (November – Mac /April). Akibatnya, beberapa item mengalami kenaikan harga disebabkan permintaan yang lebih tinggi berbanding bekalan, seperti Sotong (24.1%), Selayang (17.6%) dan Udang (17.1%).

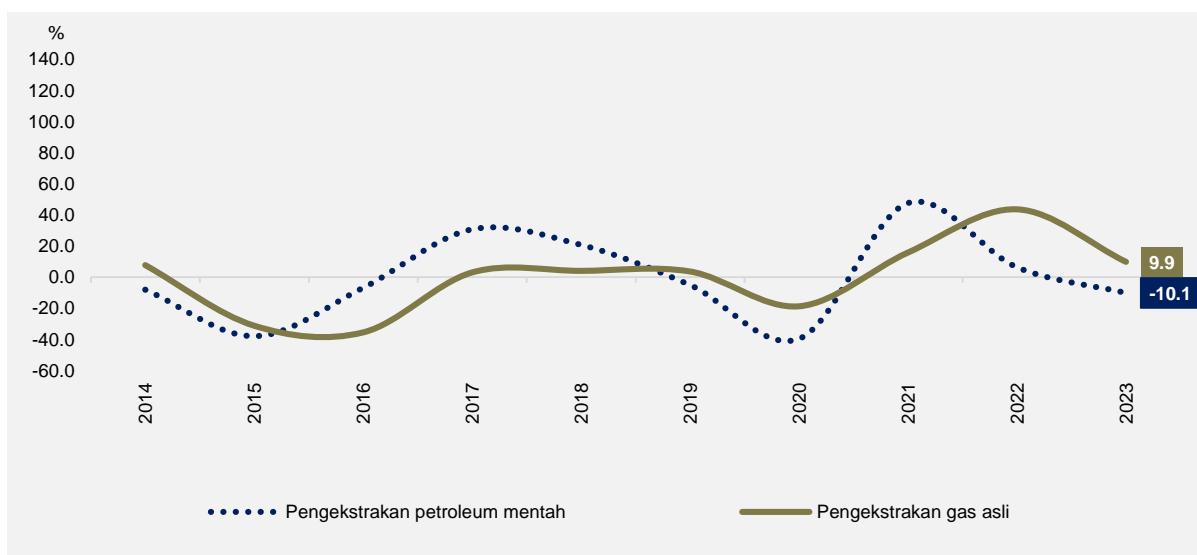

B Perlombongan

Sektor Perlombongan merosot negatif 5.9 peratus pada 2023 berbanding peningkatan dua digit 12.6 peratus pada 2022. Pengekstrakan petroleum mentah menurun dua digit sebanyak negatif 10.1 peratus selepas peningkatan 6.4 peratus pada 2022. Sementara itu, Pengekstrakan gas asli meningkat pada kadar lebih perlahan 9.9 peratus berbanding 43.7 peratus pada 2022. **[Carta 5]**

Jadual 3: Sektor Perlombongan, 2022 dan 2023

Sektor (B)	Indeks		Pertumbuhan (%)	
	2022	2023	2022	2023
Perlombongan	104.2	98.1	12.6	-5.9
Pengekstrakan petroleum mentah	105.1	94.5	6.4	-10.1
Pengekstrakan gas asli	105.9	116.4	43.7	9.9

Carta 5: Perubahan Peratus Tahunan Sektor Perlombongan, 2014 - 2023

Purata harga minyak mentah Brent USD83 setong pada 2023, turun daripada USD100 setong pada 2022. Pada separuh tahun pertama 2023, harga minyak mentah turun naik berikutan larangan import Kesatuan Eropah (EU) ke atas minyak mentah dan produk Rusia. Ini menyebabkan kenaikan kadar faedah di kalangan bank pusat global dan keimbangan inflasi serta kemelesetan⁹. Walau bagaimanapun, harga minyak mentah Brent pada separuh tahun pertama 2023 adalah kurang menentu berbanding 2022, apabila harga mencécah paras tertinggi akibat pencerobohan berskala penuh Rusia ke atas Ukraine.

⁹ U.S Energy Information Administration, Januari 2024

Pada separuh tahun kedua 2023, ketegangan geopolitik dan kebimbangan mengenai permintaan minyak mentah mengakibatkan turun naik harga yang lebih tinggi. Harga minyak mentah Brent berada pada USD78 setengah pada akhir tahun 2023, USD5 di bawah permulaan 2023. Pada 4 Jun 2023, ahli OPEC+ mengumumkan lanjutan pemotongan pengeluaran minyak mentah sehingga akhir 2024. Pemotongan itu telah ditetapkan akan tamat pada penghujung 2023. Pada awal September 2023, Arab Saudi juga mengumumkan akan melanjutkan pemotongan pengeluaran secara sukarela negara itu sehingga penghujung tahun 2023.

Kenaikan mendadak harga berlaku akibat pencerobohan Rusia ke atas Ukraine apabila saluran paip terus mengalir dari Rusia. Aliran ini menurun secara berterusan, terus memberikan tekanan ke atas harga, tetapi harga mula turun antara suku ketiga dan suku keempat 2023, apabila LNG terus melonjak ke Eropah. Selepas lantunan semula pada suku keempat, penurunan harga berterusan dengan cuaca sederhana kembali, permintaan Eropah yang lemah dan kekurangan permintaan LNG di Asia¹⁰.

C Pembuatan

Jadual 4: Indeks Terpilih Sektor Pembuatan, 2022 dan 2023

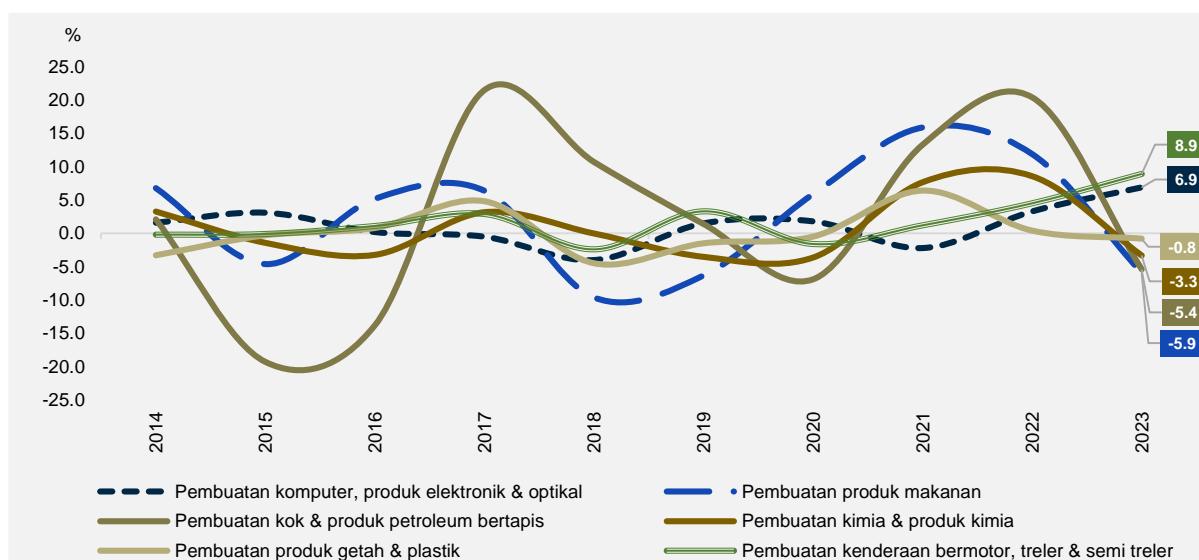

Sektor (C)	Indeks		Pertumbuhan (%)	
	2022	2023	2022	2023
Pembuatan	120.8	120.5	8.4	-0.2
Pembuatan produk makanan	128.4	120.8	11.9	-5.9
Pembuatan kok & produk petroleum bertapis	160.6	151.9	20.4	-5.4
Pembuatan kimia & produk kimia	126.1	121.9	8.6	-3.3
Pembuatan produk getah & plastik	101.7	100.9	0.4	-0.8
Pembuatan komputer, produk elektronik & optikal	106.4	113.7	3.3	6.9
Pembuatan kenderaan bermotor, treler & semi treler	109.7	119.5	4.5	8.9

Indeks Pembuatan mencatatkan penurunan marginal sebanyak negatif 0.2 peratus pada 2023 berbanding 8.4 peratus yang dicatatkan pada 2022. Penurunan itu disebabkan oleh kemerosotan indeks Pembuatan produk makanan (-5.9%), Pembuatan kok & produk petroleum bertapis (-5.4%), dan Pembuatan kimia & produk kimia (-3.3%). Namun, penurunan dalam sektor ini diimbangi dengan peningkatan dalam Pembuatan komputer, produk elektronik & optikal (6.9%) dan Pembuatan kenderaan bermotor, treler & semi treler (8.9%).

[Carta 6]

¹⁰ Oxford Institute for Energy Studies, January 2024

Carta 6: Perubahan Peratus Tahunan Sektor Pembuatan Terpilih, 2014 - 2023

Pembuatan produk makanan menurun negatif 5.9 peratus pada 2023 berbanding pertumbuhan dua digit sebanyak 11.9 peratus pada 2022. Pembuatan minyak dan lemak daripada sayuran dan haiwan yang terdiri daripada produk berasaskan minyak sawit dan isirong sawit, mencatatkan penurunan signifikan negatif 10.0 peratus pada 2023 berbanding 11.9 peratus pada tahun sebelumnya. Walau bagaimanapun, Pembuatan produk makanan lain yang terdiri daripada pembuatan pastri, kek, roti dan sebagainya, meningkat sebanyak 3.8 peratus (2022: 3.0%).

Harga minyak sawit mentah jatuh lebih rendah baru-baru ini berikutan semakan semula *Domestic Market Obligation* (DMO) oleh Indonesia yang telah berkuatkuasa pada 1 Mei 2023. Berdasarkan semakan tersebut, Indonesia telah membuat beberapa perubahan pada polisi berikut merangkumi mengurangkan sasaran minyak masak domestik daripada 450,000 tan kepada 300,000 tan, mengetatkan nisbah eksport daripada 1:6 kepada 1:4 dan mengeluarkan semula permit eksport yang digantung lebih awal daripada tempoh asal.

Pasaran komoditi pada suku keempat 2023 berada dalam keadaan baik disebabkan oleh permintaan global dan bekalan yang mencukupi yang mengekang kenaikan harga pada 2024. Pengeluaran minyak sawit mentah Malaysia juga lebih tinggi pada suku tahun keempat berbanding tempoh yang sama pada 2022, yang membawa kepada penyederhanaan harga minyak sawit mentah.

Dalam masa yang sama, Pembuatan kok & produk petroleum bertapis turun negatif 5.4 peratus selepas pertumbuhan dua digit sebanyak 20.4 peratus pada 2022. Ini terutamanya disebabkan oleh Pembuatan produk petroleum bertapis, yang terdiri daripada gas asli cecair, bahan api diesel lain dan sebagainya yang merosot sebanyak 5.4 peratus.

Pembuatan kimia & produk kimia juga turun negatif 3.3 peratus daripada peningkatan 8.6 peratus pada 2022 dengan Pembuatan kimia asas, baja dan sebatian nitrogen, plastik dan getah sintetik dalam bentuk primer turun negatif 4.5 peratus. Bagaimanapun, Pembuatan serat buatan manusia dan Pembuatan produk kimia lain masing-masing meningkat sebanyak 14.9 peratus dan 0.5 peratus.

Pembuatan produk getah & plastik yang terdiri daripada sarung tangan getah, bahagian komponen plastik untuk industri elektrik dan elektronik menurun negatif 0.8 peratus berbanding kenaikan 0.4 peratus pada 2022. Penurunan ini sebahagian besarnya disebabkan oleh indeks Sarung tangan getah (-12.8%) dan Filem, plastik (-15.0%).

Sebaliknya, Pembuatan komputer, produk elektronik & optikal meningkat daripada 3.3 peratus pada 2022 kepada 6.9 peratus pada 2023. Peningkatan itu disumbang oleh Pembuatan komponen dan papan elektronik (7.8%), Pembuatan komputer dan kelengkapan peranti (5.1%) dan Pembuatan peralatan komunikasi (11.6%). Komponen elektronik seperti litar bercetak, litar bersepadu dan wafer silikon kekal positif pada 2023.

Sementara itu, Pembuatan kenderaan bermotor, treler & semi treler terus meningkat 8.9 peratus berbanding 4.5 peratus. Peningkatan ini disumbang oleh Pembuatan kenderaan bermotor (8.0%) yang terdiri daripada kereta penumpang.

Jadual 5: Harga Produk Sawit Terpilih, 2022 dan 2023

HARGA MPOB RM PER TAN/METRIK		Minyak Sawit Mentah	Minyak Mentah Isirong Sawit	Buah Tanda Kelapa Sawit Segar	Minyak Sawit RBD
2022	Januari	5,354.50	9,156.00	61.61	5,519.00
	Februari	5,930.50	9,938.50	68.30	6,324.50

Sumber: *The World Bank*

Pasaran komoditi global menghadapi ketidaktentuan pada 2023 bukan sahaja disebabkan kebimbangan geopolitik yang berlarutan, tetapi juga sebahagian besarnya tertumpu pada China dan perubahan iklim. Pada permulaan pandemik COVID-19, permintaan yang lebih rendah menyebabkan harga minyak merosot, dan harga kekal di bawah USD50 setong pada tahun 2020. Sejak itu, sejajar dengan pemulihan sosio-ekonomi pasca COVID, harga minyak telah meningkat dengan ketara, berlebaran sekitar USD80 setong untuk majoriti 2023. Purata harga minyak mentah Brent adalah USD83 setong pada 2023, turun daripada USD100 setong pada 2022, (17.0%). Pasaran global diselaraskan kepada dinamik perdagangan baharu, dengan minyak mentah dari Rusia menemui destinasi di luar

Kesatuan Eropah (EU), dan permintaan minyak mentah global jatuh di bawah jangkaan. Dinamik tersebut mengimbangi impak daripada sekatan bekalan minyak mentah OPEC+¹.

*Economist Intelligent Unit (EIU)*² telah mengunjurkan harga minyak akan kekal meningkat pada 2023. Walau bagaimanapun, harga minyak turun mendadak pada Mac 2023 berikutan kejatuhan Silicon Valley Bank dan Signature Bank di Amerika Syarikat di samping isu kecairan yang dihadapi oleh Credit Suisse. Perubahan pada separuh pertama 2023 adalah berikutan larangan import EU ke atas minyak mentah dan produk Rusia yang membawa kepada kadar faedah yang lebih tinggi di kalangan bank pusat global.

Purata harga global minyak mentah Brent berlegar pada purata USD80 setong pada Julai 2023 selepas mencapai purata USD75 setong pada Jun 2023. Bekalan minyak mentah diunjurkan terus terhad apabila Pertubuhan Negara-negara Pengeksport Petroleum (OPEC) dan ahli-ahlinya telah melaksanakan pengurangan pengeluaran. Faktor lain seperti penurunan dalam eksport minyak mentah Rusia, yang lebih rendah daripada jangkaan stok minyak mentah Amerika Syarikat dan Keluaran Dalam Negara Kasar China yang lemah pada suku tahun kedua menyumbang kepada kenaikan harga minyak mentah pada Julai 2023³.

Purata harga minyak Brent USD94 setong pada September 2023, meningkat daripada USD75 setong pada Jun 2023. Pasaran yang mendorong harga minyak lebih tinggi pada September 2023 telah menurun pada bulan Oktober 2023, walaupun dengan bekalan minyak mentah berterusan yang ketat dan konflik yang semakin meruncing di Timur Tengah⁴. Pada awal November 2023, harga minyak mentah Brent menjunam ke paras terendah dalam tempoh empat bulan kepada sekitar USD80 setong. Penurunan mendadak ini dicetuskan oleh peralihan tumpuan pasaran daripada risiko bekalan kepada situasi ekonomi global dan permintaan minyak. Menurut Agensi Tenaga Antarabangsa (IEA)⁵, perdagangan pasaran depan juga berubah dengan jangkaan lebihan bekalan yang akan menyebabkan penurunan harga.

⁵ Merujuk kepada *International Energy Agency*, November 2023

Penutup

Harga komoditi pada 2023 dilihat tidak menentu berikutan turun naik harga, terutamanya dalam pasaran tenaga. Harga minyak mentah juga mengalami ketakpastian berikutan beberapa siri pengurangan pengeluaran minyak oleh OPEC+ dan keimbangan bekalan yang berkait dengan perang Israel-Hamas. Risiko geopolitik yang semakin meningkat, termasuk perang yang bertambah serius, telah meningkatkan ketakstabilan dalam bekalan dan harga tenaga global⁶. Harga komoditi, seperti yang diukur dalam indeks harga komoditi Bank Dunia, diunjurkan menurun 4.0 peratus pada 2024 selepas jatuh hampir 24.0 peratus pada 2023, penurunan paling rendah sejak pandemik COVID-19.

Prospek pada 2024

Ketegangan geopolitik di Timur Tengah telah menaikkan harga komoditi utama seperti minyak dan emas. Harga minyak juga diunjurkan purata USD98 setong pada 12 bulan yang akan datang selepas negara-negara OPEC melanjutkan pemotongan bekalan minyak mentah secara sukarela⁷. Risiko utama kepada unjuran harga komoditi adalah berkaitan dengan kemungkinan konflik yang semakin meningkat di Timur Tengah, yang boleh mengakibatkan harga minyak yang lebih tinggi dengan ketara dan mencetuskan semula tekanan inflasi global.

Selepas penurunan mendadak akibat COVID-19, permintaan minyak meningkat kepada paras pra-pandemik pada 2023. Berdasarkan polisi sedia ada, pertumbuhan permintaan minyak dunia adalah perlahan dalam tempoh ramalan 2022 - 2028 di mana peralihan tenaga semakin maju⁸. Unjuran ini dipengaruhi oleh peningkatan kecekapan tenaga merentas pelbagai industri dan peningkatan penggunaan kenderaan elektrik (EV) dalam kereta penumpang, di mana peralihan kepada pengangkutan elektrik telah memainkan peranan utama dalam penurunan permintaan minyak.

Indeks Harga Pengeluar mengikut Seksyen Barang

Dari segi IHPR mengikut seksyen komoditi, empat indeks yang mengalami penurunan pada 2023 adalah indeks Bahan-bahan mentah tidak boleh dimakan (-17.4%), Minyak dan lemak daripada haiwan & sayuran (-10.2%), Bahan api, galian pelincir, dll (-4.9%) dan Bahan kimia (-3.6%). Sementara itu, indeks Jentera & kelengkapan pengangkutan (6.4%), Makanan (4.1%), Pelbagai barang keluaran kilang (3.3%), Minuman & tembakau (1.4%) dan Barang-barang keluaran kilang (1.1%) kekal positif berbanding 2022. [Carta 7]

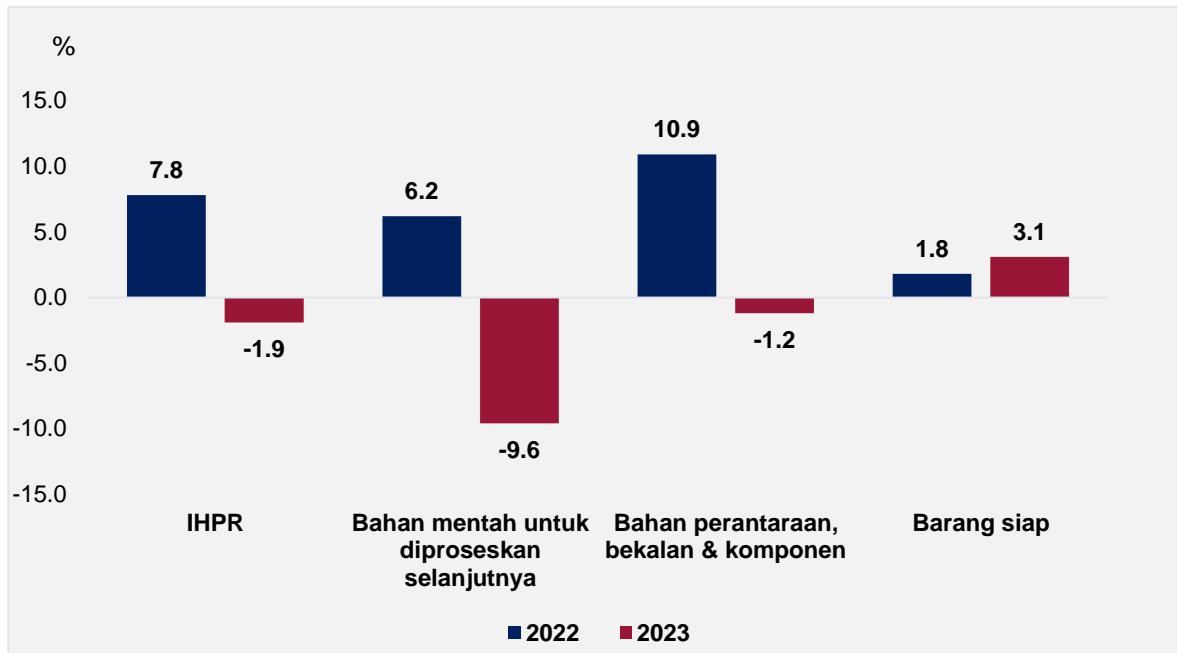

Carta 7: Perubahan Peratus Tahunan IHPR mengikut Seksyen Barang, 2022 dan 2023

Indeks Harga Pengeluar mengikut Peringkat Pemprosesan

Indeks Bahan Perantaraan, bekalan & komponen menurun negatif 1.2 peratus daripada peningkatan 10.9 peratus pada 2022 dan indeks Bahan mentah untuk diproseskan selanjutnya turun kepada negatif 9.6 peratus selepas peningkatan 6.2 peratus pada 2022. Sementara itu, indeks Barang siap barang meningkat 3.1 peratus pada 2023 berbanding 1.8 peratus pada 2022. [Carta 8]

Carta 8: Perubahan Peratus Tahunan IHPR mengikut Peringkat Pemprosesan, 2022 dan 2023

Peringkat Pemprosesan 1:

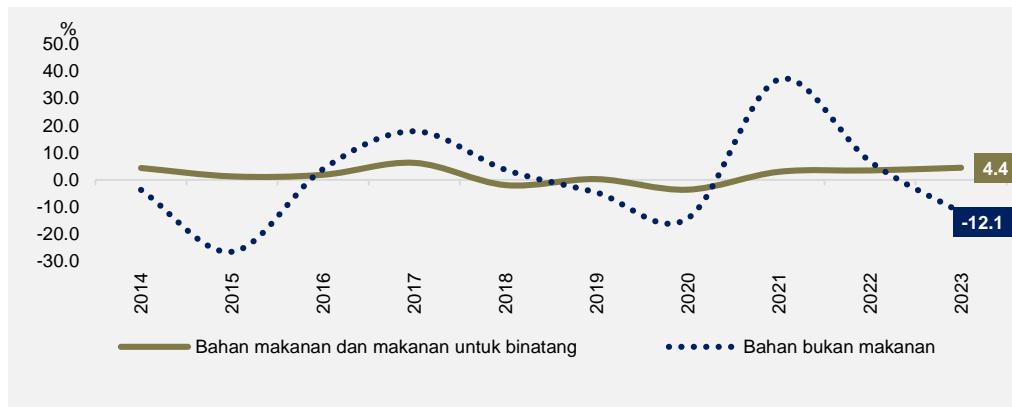

1 Bahan Mentah untuk Diproseskan Selanjutnya

Bahan mentah untuk diproseskan selanjutnya merosot negatif 9.6 peratus selepas mencatatkan peningkatan 6.2 peratus pada 2022, dengan Bahan bukan makanan mencatatkan penurunan negatif 12.1 peratus (2022: 6.8%). Sementara itu, Bahan makanan dan makanan untuk binatang meningkat 4.4 peratus (2022: 3.4%). Harga komoditi utama yang lebih rendah seperti petroleum mentah dan buah tandan kelapa sawit segar menyebabkan penurunan dalam indeks Bahan bukan makanan. Sementara itu, indeks ayam pedaging dan telur ayam menyumbang kepada peningkatan indeks Bahan makanan dan makanan untuk binatang. [Carta 9]

Jadual 6: Bahan Mentah untuk Diproseskan Selanjutnya, 2022 dan 2023

Peringkat Pemprosesan 1	Indeks		Pertumbuhan (%)	
	2022	2023	2022	2023
Bahan mentah untuk diproseskan selanjutnya	129.1	116.7	6.2	-9.6
Bahan makanan dan makanan untuk binatang	132.3	138.1	3.4	4.4
Bahan bukan makanan	126.4	111.1	6.8	-12.1
Bahan bukan makanan kecuali bahan api	142.9	110.9	0.5	-22.4
Bahan api mentah	117.5	110.3	10.7	-6.1

Carta 9: Perubahan Peratus Tahunan Bahan Mentah untuk Diproseskan Selanjutnya, 2014 - 2023

Peringkat Pemprosesan 2:

2 Bahan Perantaraan, Bekalan & Komponen

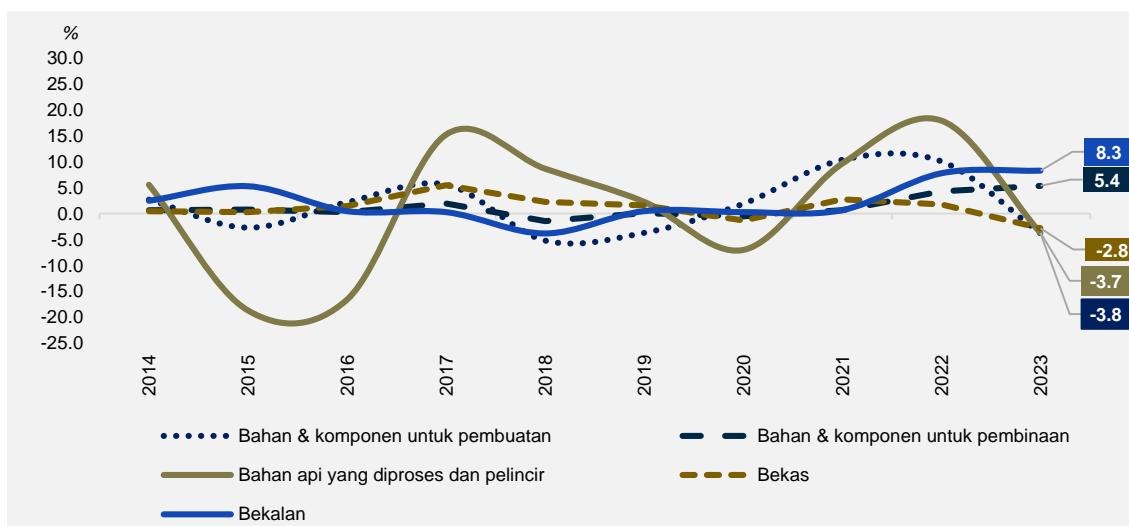

Penurunan indeks Bahan perantaraan, bekalan & komponen sebanyak negatif 1.2 peratus disebabkan oleh Bahan dan komponen untuk pembuatan (-3.8%), Bahan api yang diproses dan pelincir (-3.7%) dan Bekas (-2.8%). Bagaimanapun, indeks Bekalan (8.3%) dan Bahan dan komponen untuk pembinaan (5.4%) meningkat pada tahun 2023. [Carta 10]

Bahan untuk pembuatan makanan terdiri daripada tepung dan serbuk koko menurun sebanyak 9.1 peratus, manakala Bahan untuk pembuatan lain terdiri daripada produk minyak sawit (minyak sawit RBD, olein sawit) turun sebanyak 2.6 peratus. [Jadual 7]

Jadual 7: Bahan Perantaraan, Bekalan & Komponen, 2022 dan 2023

Peringkat Pemprosesan 2	Indeks		Pertumbuhan (%)	
	2022	2023	2022	2023
Bahan perantaraan, bekalan & komponen	126.7	125.2	10.9	-1.2
Bahan dan komponen untuk pembuatan	123.4	118.7	10.1	-3.8
Bahan untuk pembuatan makanan	133.4	121.3	12.7	-9.1
Bahan untuk pembuatan lain	123.1	119.9	9.5	-2.6
Bahan dan komponen untuk pembinaan	109.2	115.1	4.3	5.4
Bahan api yang diproses dan pelincir	145.2	139.8	18.0	-3.7
Bekas	117.9	114.6	1.8	-2.8
Bekalan	127.2	137.7	7.8	8.3
Industri pembuatan	125.5	137.4	6.5	9.5
Industri bukan pembuatan	127.0	135.4	9.5	6.6

Carta 10: Perubahan Peratus Tahunan Bahan Perantaraan, Bekalan & Komponen, 2014 - 2023

Peringkat Pemprosesan 3:

3 Barang Siap

Jadual 8: Barang Siap, 2022 dan 2023

Peringkat Pemprosesan 3	Indeks		Pertumbuhan (%)	
	2022	2023	2022	2023
Barang siap	103.0	106.2	1.8	3.1
Barangan pengguna siap	112.9	114.9	2.7	1.8
Makanan pengguna siap	125.9	129.7	6.2	3.0
Barangan pengguna siap kecuali makanan	107.4	108.7	1.1	1.2
Kelengkapan modal	97.8	101.8	1.1	4.1
Industri pembuatan	97.8	100.3	2.0	2.6
Industri bukan pembuatan	97.4	102.4	0.7	5.1

Barang siap meningkat 3.1 peratus pada 2023 (2022: 1.8%) disebabkan oleh kedua-dua indeks Kelengkapan modal (4.1%) dan Barangan pengguna siap (1.8%). [Carta 11]

Peningkatan dalam indeks Barangan pengguna siap disokong oleh indeks Makanan pengguna siap (3.0%) dan Barangan pengguna siap kecuali makanan (1.2%). Indeks Barangan pengguna siap biasanya dibandingkan dengan Indeks Harga Pengguna (IHP) untuk tujuan analisis trend harga. Sementara itu, indeks Makanan pengguna siap, yang merupakan komponen di bawah Barangan pengguna siap, biasanya dibandingkan dengan

indeks kumpulan Makanan & minuman bukan alkohol dalam IHP. Indeks Makanan pengguna siap meningkat 3.0 peratus pada 2023 (2022: 6.2%) sama seperti indeks kumpulan Makanan & Minuman Bukan Alkohol dalam IHP (2023: 4.8%; 2022: 5.8%)¹¹.

Carta 11: Perubahan Peratus Tahunan Barang Siap, 2014 - 2023

Sementara itu, peningkatan dalam indeks Kelengkapan modal adalah disebabkan oleh kedua-dua indeks Industri pembuatan (2.6%) dan Industri bukan pembuatan (5.1%). **[Jadual 8]**

¹¹ Berdasarkan Analisis Indeks Harga Pengguna Tahunan 2023

Introduction

Global economic slowed down to 3.1 per cent in 2023 from 3.5 per cent in 2022. As the global landscape continues to undergo fluctuating rates of growth, it is expected that the global economy will show growth. This growth rate is anticipated to remain consistent in the coming years¹. Uncertainties remain, leading the International Monetary Fund (IMF)² to forecast a global growth rate of 3.2 per cent for 2024 and 2025. This forecast considers a gradual recovery from the global pandemic, ongoing geopolitical conflicts, and the rise in interest rates by other countries to control inflation.

In spite of growing uncertainty in the world economy, low global demand and disruptions in the production of commodities, the Malaysian economy expanded by 3.7 per cent in 2023. Furthermore, growth in investment and consumption spending propelled Malaysia's domestic demand in 2023. This was also aided by favourable labour market conditions, easing inflationary pressures, and thriving tourism industries. The World Bank³ projects that strong domestic demand will drive the country's Gross Domestic Product (GDP) to grow by 4.3 per cent in 2024.

According to World Economic Outlook, lower commodity prices and the normalisation of supply chain conditions helped to reduce global headline inflation, but it remained high. The Middle East conflicts and Organisation of the Petroleum Exporting Countries (OPEC+) production cuts contributed to an increase in oil prices, which was mitigated by increased production from non-OPEC producing countries. Subsequently, the IMF⁴ projected global inflation to incline moderately, from 6.8 per cent in 2023 to 5.9 per cent in 2024 and 4.5 per cent in 2025, with developed countries returning to their inflation targets sooner than emerging market and developing economies. Core inflation is generally projected to increase marginally. The persistence in core inflation was accounted by services inflation, as resilient domestic demand, stronger-than-expected wage growth and continued spending rotation from goods to services put upward pressures on prices.

Commodity Global Prices in 2023 and the Forecast

The commodity prices, as measured by the World Bank's commodity price index⁵, are projected to decline by 4.0 per cent in 2024, after falling by nearly 24.0 per cent in 2023. It was the steepest decline since the COVID-19 pandemic. Energy prices are also projected to fall in 2024 and remain relatively flat in 2025.

Brent oil prices have climbed significantly, hovering around USD80 per barrel for the majority of 2023. The price of Brent crude oil averaged USD83 per barrel in 2023, downed from USD100 per barrel in 2022. Prices of fuel commodities are projected to decrease in 2024 by an average of 9.7 per cent, with oil prices decreasing about 2.5 per cent. The decreases reflect abundant space capacity and strong non-OPEC+ (Organisation of the Petroleum Exporting Countries plus selected non-member countries, including Russia) supply growth.

Natural gas prices are expected to continually decline in 2024 as compared to 2023. Wood Mackenzie⁶ forecasted lower 2024 prices by 45.0 per cent as compared to 2023 and expected to remain modest at 14 million tonnes in 2024, with the gas market becoming increasingly balanced on account of new supply, dampened demand and high storage. Even though Asian liquefied natural gas (LNG) demand remains lower, LNG performance is unlikely to intensify.

Global food prices decreased by 13.7 per cent in 2023, according to the Food and Agriculture Organisation (FAO)⁷ Food Price Index. Food commodity prices are predicted to decline by 2.2 per cent in 2024. Based on the IMF⁸, forecasts for food prices have been revised slightly downward, driven by expectations of abundant global supplies for wheat and maize.

Malaysia's crude palm oil output recovered in 2023 as compared to production in 2022, which led to a moderate price of crude palm oil of RM3,800 in 2023. The Malaysian Palm Oil Board (MPOB) projected the prices to be stronger than the previous year, with an average price ranging from RM3,900 to RM4,200 per tonne in 2024. According to MPOB, among the factors that influence the strengthening of the average price of crude palm oil in 2024 is the expected limited supply of palm oil in the world following the implementation of the B35 biodiesel mandate in Indonesia.

Overall Producer Price Index in 2023

The Producer Price Index (PPI) Local Production went down by negative 1.9 per cent in 2023 after an increase of 7.8 per cent in 2022. This was the first decrease since 2020 due to the lower prices of Malaysia's main commodities. Commodity prices in 2023 were highly uncertain due to price volatility, especially in petroleum products. [Chart 1]

PPI Local Production started with a positive momentum to record 1.3 per cent increase in January 2023 as compared to the previous year. However, the index has contracted since February 2023 (-0.8%) until August 2023 (-2.2%) and has returned to a downturn trend from October 2023 (-0.3%) until the end of the year. The lowest PPI was recorded in June 2023 (-4.8%) and the highest was in January 2023 (1.3%). The decline was mainly due to the lower prices of the main commodities related to palm oil and crude oil products. [Chart 2]

Chart 1: Yearly PPI Local Production, 2011-2023

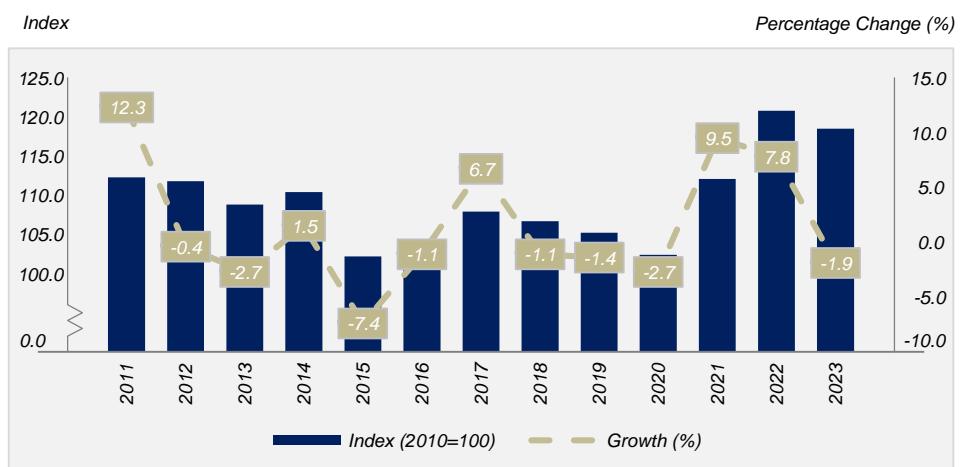

Chart 2: Monthly PPI Local Production, 2023

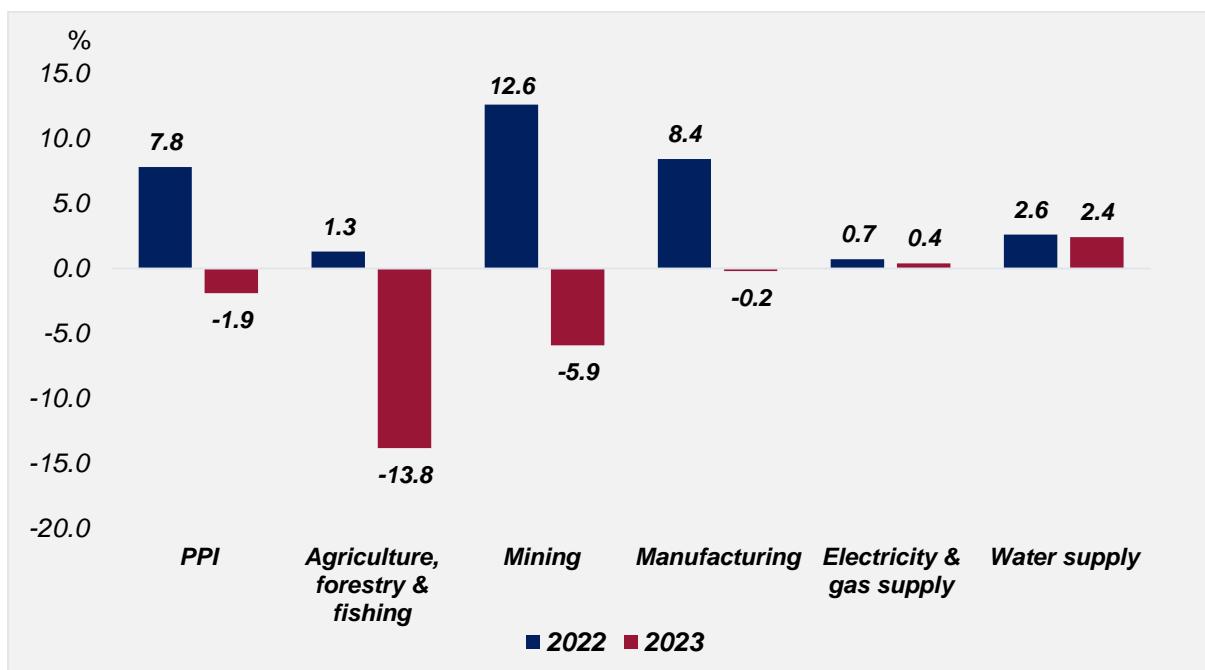

Producer Price Index by Sector

PPI Local Production decreased by negative 1.9 per cent in 2023 (2022: 7.8%) mainly due to the contraction in the Agriculture, forestry & fishing by negative 13.8 per cent from an increase of 1.3 per cent in 2022. The Mining sector also decreased by negative 5.9 per cent as compared to 12.6 per cent in 2022. In the meantime, the Manufacturing sector recorded a marginal decrease by negative 0.2 per cent as against 8.4 per cent increase in 2022. Meanwhile, the utility sector remained positive in 2023, with Electricity & gas supply and Water supply increased by 0.4 per cent and 2.4 per cent, respectively. [Chart 3]

Table 1: PPI by Sector, 2022 and 2023

Sector	Index		Growth (%)	
	2022	2023	2022	2023
Total	120.8	118.5	7.8	-1.9
Agriculture, forestry & fishing	144.7	124.8	1.3	-13.8
Mining	104.2	98.1	12.6	-5.9
Manufacturing	120.8	120.5	8.4	-0.2
Electricity & gas supply	117.4	117.9	0.7	0.4
Water supply	115.2	118.0	2.6	2.4

Chart 3: Annual Percentage Change of PPI by Sector, 2022 and 2023

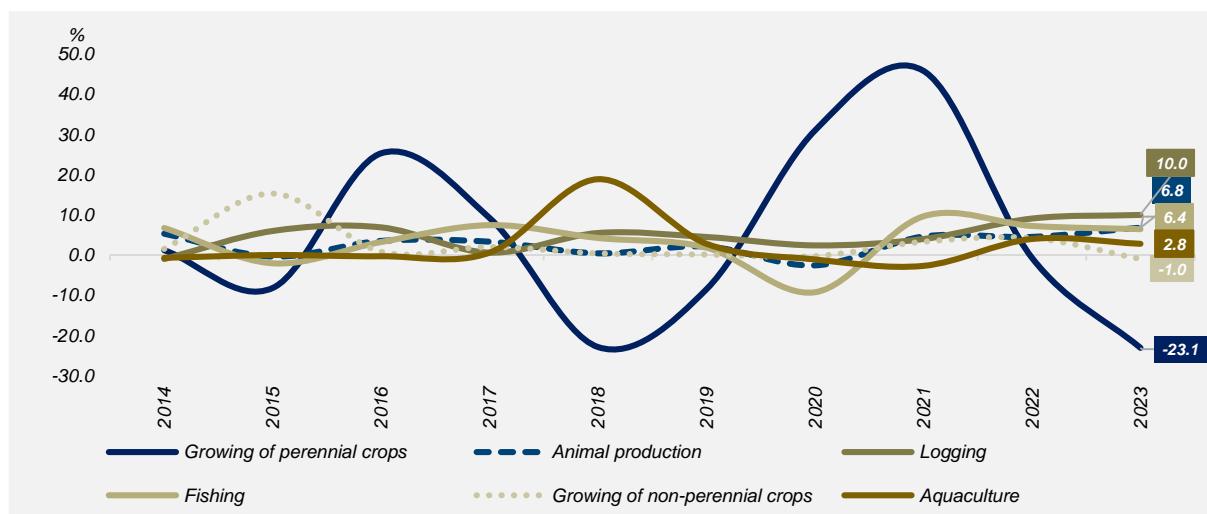

A Agriculture, Forestry & Fishing

The Agriculture, forestry & fishing index decreased by a double-digit of negative 13.8 per cent in 2023, after an increase of 1.3 per cent in 2022. As the largest component in this sector, the double-digit declines in the Growing of perennial crops index by negative 23.1 per cent (2022: -0.7%) led to the downturn of the overall sector. The decline in this index was mainly due to the Oil palm fresh fruit bunches which experienced a lower index by negative 24.8 per cent (2022: -0.5%). The Growing of non-perennial crops also declined by negative 1.0 per cent after an increase of 4.2 per cent in 2022. Meanwhile, other subsectors posted an increase in 2023. Animal production went up by 6.8 per cent (2022: 4.5%) and Logging recorded a double-digit increase of 10.0 per cent (2022: 9.1%). In the meantime, Fishing index continued to increase by 6.4 per cent (2022: 7.2%) and Aquaculture up by 2.8 per cent (2022: 4.0%). [Chart 4]

Table 2: Agriculture, Forestry & Fishing Sector, 2022 and 2023

Sector (A)	Index		Growth (%)	
	2022	2023	2022	2023
Agriculture, forestry & fishing	144.7	124.8	1.3	-13.8
Growing of non-perennial crops	144.2	142.7	4.2	-1.0
Growing of perennial crops	145.1	111.6	-0.7	-23.1
Animal production	131.6	140.6	4.5	6.8
Logging	165.4	181.9	9.1	10.0
Fishing	155.3	165.3	7.2	6.4
Aquaculture	137.0	140.8	4.0	2.8

Chart 4: Annual Percentage Change of Agriculture, forestry & fishing Sector, 2014 -2023

Subsidies and price controls on chicken have been discontinued effective on 1st November 2023, considering current trend of supply and prices that have started to stabilise. The rationale for ending subsidies in bulk for chicken was to reduce the leakage of subsidies, where at that point were also enjoyed by foreigners. However, subsidies and price control for chicken eggs grade A, B and C are still ongoing to date. As such, the Ministry of Agriculture and Food Security Ministry (KPBM) and the Ministry of Domestic Trade and Cost of Living (KPDN) are expanding the Jualan Rahmah and Madani Agro Sales across the country to supply chicken at affordable price. The Animal production index increased moderately in 2023 reflected by floating of chicken prices.

Swine /pig recorded a double-digit increase of 29.1 per cent as compared to 9.9 per cent in 2022. There was a significant price increase due to the increase in operating costs and became worse by the spread of African Swine Fever (ASF). The transmission of ASF has had a major impact on the production of live pigs in addition to the increase in the price of animal feed. The expensive raw materials and high operating costs contribute to the higher total cost. Besides, the pressure to increase the price of fresh pork was particularly significant during the Christmas celebration and Chinese New Year holidays due to limited supply and high demand, a common phenomenon around the world.

The Growing of non-perennial crops also declined by negative 1.0 per cent after an increase of 4.2 per cent in 2022. According to Berita Harian report, the price of vegetables sold at the ex-farm level to wholesalers falls to half of the cost of vegetable production. Numerous farmers nationwide experienced oversupply of production, forcing some of them to destroy the harvest from their farms due to the decline in prices and slowdown in sales.

Fishing index, which consist of fresh fish and fresh seafood, continued to increase by 6.4 per cent (2022: 7.2%) and Aquaculture up by 2.8 per cent (2022: 4.0%). Weather changes led to the supply disruption, especially during the monsoon (November – March/ April). Consequently, some items experienced higher prices due to a higher demand than supply, such as Cumit (24.1%), Round Scad (17.6%) and Shrimp (17.1%).

B Mining

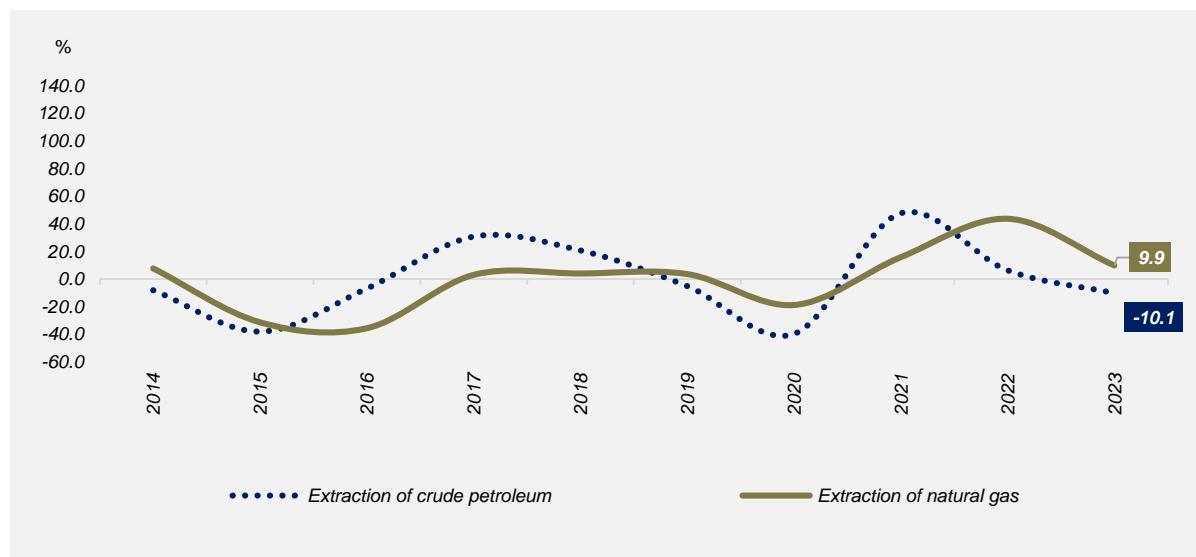

The Mining sector declined by negative 5.9 per cent in 2023 as compared to a double-digit increase of 12.6 per cent in 2022. The Extraction of crude petroleum decreased double-digit of negative 10.1 per cent after an increase of 6.4 per cent in 2022. Meanwhile, the Extraction of natural gas increased at a slower rate of 9.9 per cent as against 43.7 per cent in 2022.

[Chart 5]

Table 3: Mining Sector, 2022 and 2023

Sector (B)	Index		Growth (%)	
	2022	2023	2022	2023
Mining	104.2	98.1	12.6	-5.9
Extraction of crude petroleum	105.1	94.5	6.4	-10.1
Extraction of natural gas	105.9	116.4	43.7	9.9

Chart 5: Annual Percentage Change of Mining Sector, 2014 – 2023

The price of Brent crude oil averaged USD83 per barrel in 2023, downed from USD100 per barrel in 2022. In the first half of 2023, crude oil prices fluctuated following the European Union (EU) import ban on Russia's crude oil and products. This resulted in several interest rate hikes among global central banks and inflation and recession concerns⁹. However, Brent crude oil prices in the first half of 2023 were significantly less volatile than in 2022, when prices reached highs as a result of Russia's full-scale invasion of Ukraine.

⁹ U.S Energy Information Administration, January 2024

In the second half of 2023, geopolitical tensions and concerns around crude oil demand resulted in more price fluctuations. Brent crude oil prices ended the year at USD78 per barrel, USD5 below the start of 2023. On 4th June 2023, OPEC+ members announced the extension of crude oil production cuts through the end of 2024. The cuts had been set to expire at the end of 2023. In early September 2023, Saudi Arabia announced that it would extend the country's voluntary production cuts through the end of 2023.

The sharp rise in prices resulting from Russia's invasion of Ukraine quickly dissipated as pipeline flows continued from Russia. These flows declined steadily, putting further upward pressure on prices, but prices began to drop between the third quarter and the fourth quarter of 2023, as LNG continued to surge into Europe. After a rebound in the fourth quarter, the decline in prices continued with the mild weather returning, weakening European demand, and a lack of LNG demand in Asia¹⁰.

C Manufacturing

Table 4: Selected Index of Manufacturing Sector, 2022 and 2023

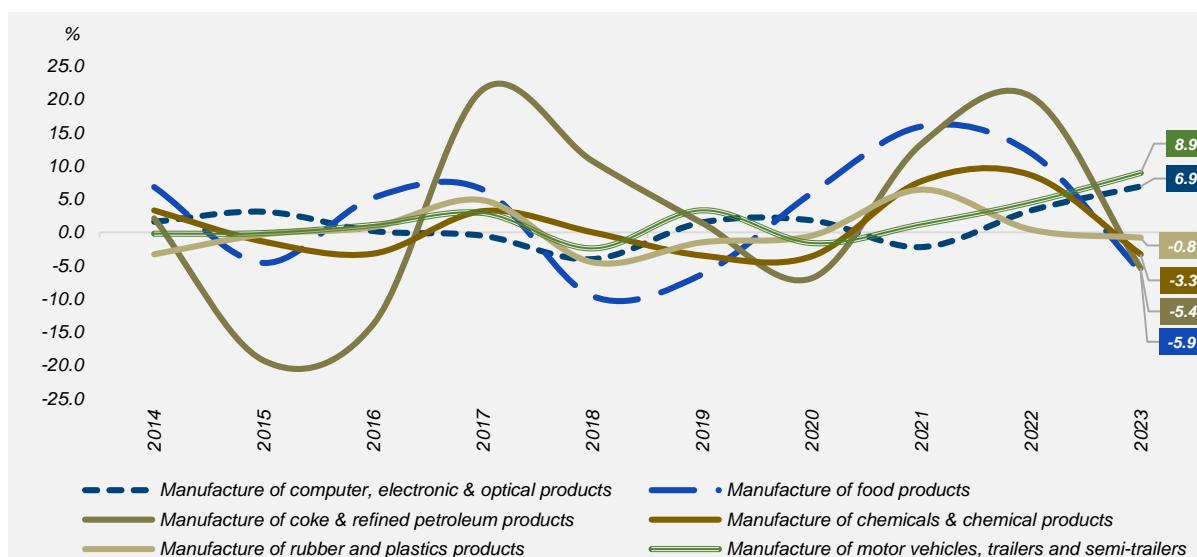

Sector (C)	Index		Growth (%)	
	2022	2023	2022	2023
Manufacturing	120.8	120.5	8.4	-0.2
Manufacture of food products	128.4	120.8	11.9	-5.9
Manufacture of coke & refined petroleum products	160.6	151.9	20.4	-5.4
Manufacture of chemicals & chemical products	126.1	121.9	8.6	-3.3
Manufacture of rubber & plastics products	101.7	100.9	0.4	-0.8
Manufacture of computer, electronic & optical products	106.4	113.7	3.3	6.9
Manufacture of motor vehicles, trailers and semi-trailers	109.7	119.5	4.5	8.9

The Manufacturing index registered a marginal decrease of negative 0.2 per cent in 2023 as against 8.4 per cent recorded in 2022. The decrease was underpinned by the decline in the index of Manufacture of food products (-5.9%), Manufacture of coke & refined petroleum products (-5.4%) and Manufacture of chemicals & chemical products (-3.3%). However, the decrease in this sector was balanced with the incline in Manufacture of computer, electronic & optical products (6.9%) and Manufacture of motor vehicles, trailers and semi-trailers (8.9%).

[Chart 6]

¹⁰ Oxford Institute for Energy Studies, January 2024

Chart 6: Annual Percentage Change of Selected Manufacturing Sector, 2014 – 2023

The Manufacture of food products declined by negative 5.9 per cent in 2023 as compared to a double-digit growth of 11.9 per cent in 2022. The Manufacture of vegetable and animal oils and fats, which consist of products based on palm oil and palm kernels, recorded a significant decrease to negative 10.0 per cent in 2023 as against 11.9 per cent in the previous year. However, the Manufacture of other food products which consist of the manufacturing of bakes, cakes, bread, etc., inclined by 3.8 per cent (2022: 3.0%).

The crude palm oil price has dived to a lower price in the early of 2023 following Indonesia's revision to its Domestic Market Obligation (DMO) which has been implemented commencing 1st May 2023. On the revision policy, Indonesia has made a few changes to several policies which includes reducing the domestic cooking oil target from 450,000 tonnes to 300,000 tonnes, tightening the export ratio from 1:6 to 1:4 and releasing suspended export permits earlier than the original period.

The commodity market in the fourth quarter of 2023 was softened by global demand and adequate supplies to limit price growth in 2024. Malaysia's crude palm oil output appears to be recovering, with higher production in the fourth quarter as compared to the same period in 2022, leading to a moderate price of crude palm oil.

In the meantime, the Manufacture of coke and refined petroleum products went down by negative 5.4 per cent after a double-digit growth of 20.4 per cent in 2022. This was particularly due to the Manufacture of refined petroleum products, which comprises of LNG, other diesel fuel, etc., which declined by 5.4 per cent.

The Manufacture of chemicals and chemical products also declined by negative 3.3 per cent from an increase of 8.6 per cent in 2022, with the Manufacture of basic chemicals, fertilizers and nitrogen compounds, plastics and synthetic rubber in primary forms down by negative 4.5 per cent. However, Manufacture of man-made fibres and Manufacture of other chemical products increased by 14.9 per cent and 0.5 per cent, respectively.

The Manufacture of rubber & plastics products which consist of rubber gloves, plastic components parts for electrical and electronics industries declined by negative 0.8 per cent as compared to 0.4 per cent increase in 2022. The decline was largely due to Rubber gloves index (-12.8%) and Film, plastic (-15.0%).

On the other hand, the Manufacture of computer, electronic and optical products increased from 3.3 per cent in 2022 to 6.9 per cent in 2023. The increase was attributed to Manufacture of electronic components and boards (7.8%), Manufacture of computers and peripheral equipment (5.1%) and Manufacture of communication equipment (11.6%). Electronic components such as printed circuits, integrated circuits and silicon wafer remained positive in 2023.

Meanwhile, the Manufacture of motor vehicles, trailers and semi-trailers continued to increase by 8.9 per cent as against 4.5 per cent. The increase was contributed by Manufacture of motor vehicles (8.0%) which consist of passenger car.

Table 5: Price of Selected Palm Oil Products, 2022 and 2023

MPOB PRICE RM PER TONNE/METRIC		Crude Palm Oil	Palm Kernel Crude Oil	Oil Palm Fresh Fruit Bunches	RBD Palm Oil

Source: The World Bank

Global commodity markets are facing price volatility in 2023, not only due to lingering geopolitical concerns, but also largely centred on China and climate change. At the beginning of the COVID-19 pandemic, lower demand caused oil prices to decline, and prices remained below USD50 per barrel for most of 2020. Since then, in line with the post-COVID socio-economic recovery, oil prices have significantly increased, hovering around USD80 per barrel for the majority of 2023. The price of Brent crude oil which averaged USD83 per barrel in 2023, downed from USD100 per barrel in 2022, (-17.0%). Global markets adjusted to new trade dynamics, with crude oil from Russia finding destinations outside the European Union (EU), and global crude oil demand fell short of expectations. Those dynamics offset the impacts of OPEC+ crude oil supply curbs¹.

¹ Refers to U.S. Energy Information Administration, January 2024

The Economist Intelligent Unit (EIU)² projected that oil prices would remain elevated in 2023. However, a sharp fall in oil prices in March 2023 was due to the collapse of Silicon Valley Bank and Signature Bank in the USA apart from liquidity issues faced by Credit Suisse. The fluctuation in the first half of 2023 was following the EU import ban on Russia's crude oil and products, which led to a higher interest rate among global central banks.

Global Brent crude oil settled at an average of USD80 per barrel in July 2023 after reaching an average of USD75 per barrel in June 2023. The crude supply was tightened further as the Organisation of the Petroleum Exporting Countries (OPEC) and its allies have implemented output cuts. Other factors, such as the decrease in Russia's crude oil exports, which is lower than expected in US crude stocks and China's weak Gross Domestic Product in the second quarter, contributed to the rise in crude oil prices in July 2023³.

Oil prices averaged USD94 per barrel in September 2023, an increase from USD81 per barrel in June 2023. The market that pushed oil prices higher in September 2023 reversed sharply in October 2023, despite continued tight crude supplies and an intensifying conflict in the Middle East⁴. In early November 2023, crude oil Brent plunged to a four-month low of around USD80 per barrel. The sudden sell-off was triggered by a shift in market focus from supply risks to global economic conditions and oil demand. According to the International Energy Agency (IEA)⁵, front-month market trade also shifts when markets appear to be more or less oversupplied, adding further downward pressure on prices.

Conclusion

Commodity prices in 2023 were highly uncertain due to price volatility, especially in energy markets. Crude oil prices have also experienced volatility due to a series of oil output cuts by OPEC+ and supply concerns related to the Israel-Hamas war. The intensifying geopolitical risks, including the war that increased volatility in global energy supplies and prices⁶. The commodity prices, as measured by the World Bank's commodity price index, are projected to decline by 4.0 per cent in 2024 after falling by nearly 24.0 per cent in 2023, the steepest decline since the COVID-19 pandemic.

² Refers to The Economist Intelligent Unit, March 2023

³ Refers to Taipei Times, July 2023

⁴ Refers to Trading Economics, September 2023

⁵ Refers to International Energy Agency, November 2023

⁶ Refers to Commodity Market Outlook by World Bank, December 2023

Outlook in 2024

Geopolitical tensions in the Middle East have been pushing up the prices of key commodities such as oil and gold. Looking ahead 12 months, oil prices are projected to average USD98 per barrel after the OPEC countries extended their voluntary supply cut of crude oil⁷. The main risk to commodity price forecasts relates to the possibility of escalating conflict in the Middle East, which could result in significantly higher oil prices and reignite global inflation pressures.

After a steep decline due to COVID-19, oil demand increased to pre-pandemic levels in 2023. Based on existing policy settings, growth in world oil demand is set to slow markedly during the 2022 - 2028 forecast period as the energy transition advances⁸. The projections are influenced by improvements in energy efficiency across various industries and the increasing use of electric vehicles (EVs) in passenger cars, where the shift to electric transportation has played a major role in the decrease in oil demand.

Producer Price Index by Commodity Section

In terms of PPI by commodity section, four index experienced decreases in 2023; Crude materials, inedible (-17.4%), Animal & vegetable oils & fats (-10.2%), Mineral fuels, lubricants, etc. (-4.9%) and Chemicals (-3.6%). Meanwhile, Machinery & transport equipment (6.4%), Food (4.1%), Miscellaneous manufactured articles (3.3%), Beverages & tobacco (1.4%) and Manufactured goods (1.1%) indices remained positive as compared to 2022. [Chart 7]

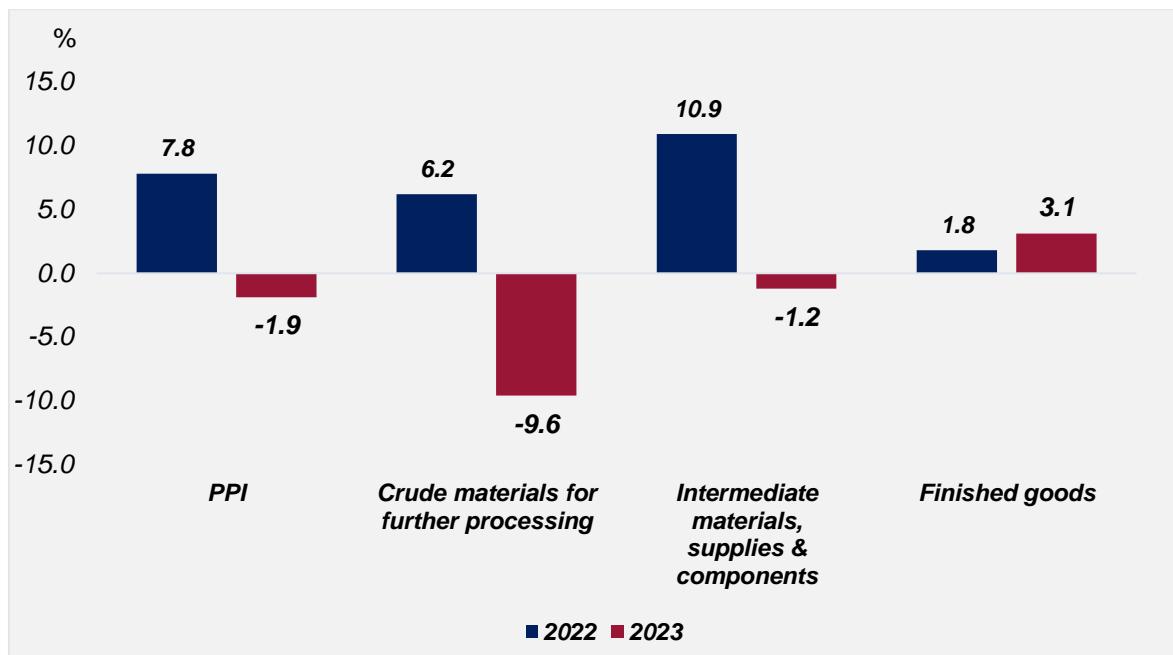

Chart 7: Annual Percentage Change of PPI by Commodity Section, 2022 and 2023

Producer Price Index by Stage of Processing

The Intermediate materials, supplies & components index rebounded to negative 1.2 per cent from 10.9 per cent increase in 2022, and index of Crude materials for further processing declined to negative 9.6 per cent after an increase of 6.2 per cent in 2022. Meanwhile, Finished goods index increased by 3.1 per cent in 2023 as compared to 1.8 per cent in 2022. [Chart 8]

Chart 8: Annual Percentage Change of PPI by Stage of Processing, 2022 and 2023

Stage of Processing 1:

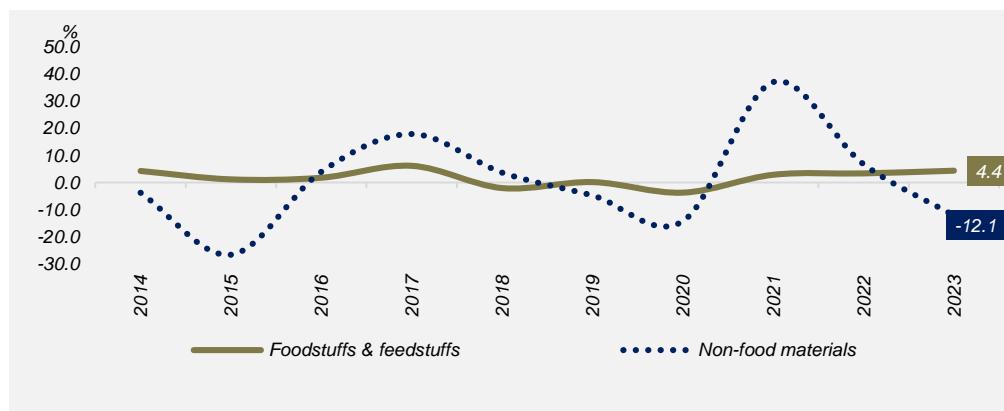

1 Crude Materials for Further Processing

Crude materials for further processing declined by negative 9.6 per cent after recording an increase of 6.2 per cent in 2022, with Non-food materials posting a decrease of negative 12.1 per cent (2022: 6.8%). Meanwhile, the Foodstuffs & feedstuffs increased by 4.4 per cent (2022: 3.4%). The lower primary commodity prices such as crude petroleum and oil palm fresh fruit bunches led to the decrease in the index of Non-food materials. Meanwhile, the index of Chicken broiler and Hen's egg, in shell contributed to the increase in the Foodstuffs & feedstuffs index. [Chart 9]

Table 6: Crude Materials for Further Processing, 2022 and 2023

Stage of Processing 1	Index		Growth (%)	
	2022	2023	2022	2023
Crude materials for further processing	129.1	116.7	6.2	-9.6
Foodstuffs & feedstuffs	132.3	138.1	3.4	4.4
Non-food materials	126.4	111.1	6.8	-12.1
Non-food materials except fuel	142.9	110.9	0.5	-22.4
Crude fuel	117.5	110.3	10.7	-6.1

Chart 9: Annual Percentage Change of Crude Materials for Further Processing, 2014 - 2023

Stage of Processing 2:

2 Intermediate Materials, Supplies & Components

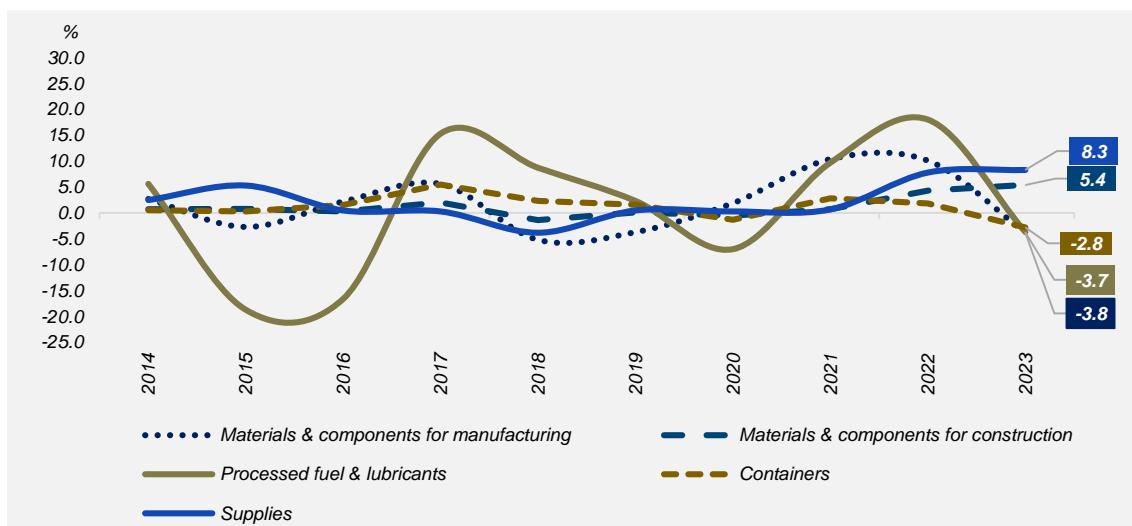

The decrease in the Intermediate materials, supplies & components index by negative 1.2 per cent was attributed to Materials & components for manufacturing (-3.8%), Processed fuel & lubricants (-3.7%) and Containers (-2.8%). However, Supplies (8.3%) and Materials & components for construction (5.4%) indices inclined in 2023. [Chart 10]

Materials for food manufacturing consists of flour and cocoa powder declined by 9.1 per cent, while Materials for other manufacturing comprises of palm oil products (palm oil RBD, palm olein) went down by 2.6 per cent. [Table 7]

Table 7: Intermediate materials, supplies and components, 2022 and 2023

Stage of Processing 2	Index		Growth (%)	
	2022	2023	2022	2023
Intermediate materials, supplies and components	126.7	125.2	10.9	-1.2
Materials & components for manufacturing	123.4	118.7	10.1	-3.8
Materials for food manufacturing	133.4	121.3	12.7	-9.1
Materials for other manufacturing	123.1	119.9	9.5	-2.6
Materials and components for construction	109.2	115.1	4.3	5.4
Processed fuel and lubricants	145.2	139.8	18.0	-3.7
Containers	117.9	114.6	1.8	-2.8
Supplies	127.2	137.7	7.8	8.3
Manufacturing industries	125.5	137.4	6.5	9.5
Non-manufacturing industries	127.0	135.4	9.5	6.6

Chart 10: Annual Percentage Change of Intermediate, Supplies & Components, 2014 - 2023

Stage of Processing 3:

3 Finished Goods

Table 8: Finished Goods, 2022 and 2023

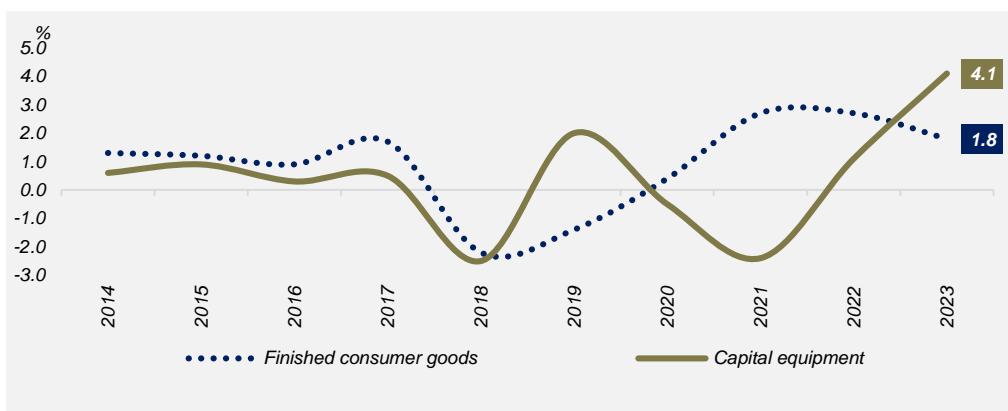

Stage of Processing 3	Index		Growth (%)	
	2022	2023	2022	2023
Finished goods	103.0	106.2	1.8	3.1
Finished consumer goods	112.9	114.9	2.7	1.8
Finished consumer foods	125.9	129.7	6.2	3.0
Finished consumer goods, excluding foods	107.4	108.7	1.1	1.2
Capital equipment	97.8	101.8	1.1	4.1
Manufacturing industries	97.8	100.3	2.0	2.6
Non-manufacturing industries	97.4	102.4	0.7	5.1

The Finished goods went up by 3.1 per cent in 2023 (2022: 1.8%) contributed by both indices of Capital equipment (4.1%) and Finished consumer goods (1.8%). [Chart 11]

The increase in the Finished consumer goods index was supported by the indices of Finished consumer foods (3.0%) and Finished consumer goods, excluding foods (1.2%). The Finished consumer goods index is commonly compared to the Consumer Price Index (CPI) for the purpose of analysing the price trend. Meanwhile, the index of Finished consumer foods, which is a component under Finished consumer goods, was usually compared to the index of Food & non-alcoholic beverages group in the CPI. The Finished consumer foods index increased

3.0 per cent in 2023 (2022: 6.2%) displaying a similar trend as the index of the Food & Non-alcoholic beverages group in the CPI (2023: 4.8%; 2022: 5.8%)¹¹.

Chart 11: Annual Percentage Change of Finished Goods, 2014 - 2023

Meanwhile, the increase in the Capital equipment index was attributed to both Manufacturing industries (2.6%) and Non-manufacturing industries (5.1%) indices. [Table 8]

Pengenalan

Penerbitan Indeks Harga Pengeluar (IHPR) Pengeluaran Tempatan merupakan penerbitan bulanan yang memaparkan statistik meliputi lima sektor utama iaitu Pertanian, perhutanan dan perikanan; Perlombongan; Pembuatan; Bekalan elektrik & gas dan Bekalan air. IHPR Pengeluaran Tempatan disusun berdasarkan data Survei Harga Pengeluar yang dilaksanakan pada setiap bulan. Bermula bulan rujukan Januari 2018, IHPR telah dikemaskini menggunakan “bakul” barang tahun 2015 dengan mengekalkan tahun asas yang sama, 2010=100.

Objektif

Objektif utama IHPR Pengeluaran Tempatan adalah untuk mengukur purata perubahan harga yang dikenakan oleh pengeluar barang dalam sesuatu industri. IHPR yang merupakan indeks berasaskan output ini juga merupakan penunjuk ekonomi makro yang digunakan bagi memantau pergerakan harga output tempatan dan sering dilihat sebagai penunjuk awalan kepada Indeks Harga Pengguna.

Skop dan Liputan

IHPR meliputi lima sektor ekonomi, iaitu Pertanian, perhutanan & perikanan, Perlombongan, Pembuatan, Bekalan elektrik & gas dan Bekalan air. Indeks diterbitkan di peringkat kumpulan tiga digit, peringkat bahagian dua digit dan peringkat sektor satu digit di peringkat Malaysia. IHPR turut disusun mengikut Peringkat Pemprosesan dan Seksyen Barang (SITC). IHPR mengikut peringkat pemprosesan dibentuk setelah komoditi yang disusun semula dan dikelaskan mengikut peringkat pemprosesan iaitu Bahan mentah untuk diproseskan selanjutnya, Bahan perantaraan, bekalan & komponen dan Barang siap. Sementara itu, IHPR mengikut seksyen barang meliputi 9 kumpulan iaitu Makanan, minuman & tembakau, Bahan mentah tidak boleh dimakan, Bahan api galian, pelincir, dll, Minyak dan lemak binatang & sayuran, Bahan kimia, Barang-barang keluaran kilang, Jentera & kelengkapan pengangkutan dan Pelbagai barang keluaran kilang.

Sejumlah 1,063 item komoditi digunakan dalam penyusunan IHPR Pengeluaran Tempatan.

Konsep dan Definisi

Klasifikasi

Klasifikasi IHPR Pengeluaran Tempatan mengikut industri adalah berasaskan kepada Piawai Perindustrian Malaysia (MSIC) 2008 yang selaras dengan *International Standard Industrial Classification of All Economic Activities, Revision 4* (ISIC). Manakala, klasifikasi IHPR mengikut seksyen barangan adalah berasaskan Piawai Penjenisan Perdagangan Antarabangsa (SITC) Pindaan 4.

Harga

Harga yang digunakan dalam pengiraan IHPR Pengeluaran Tempatan merujuk kepada harga yang diterima oleh pengeluar pada peringkat pertama pengkomersilan. Harga pengeluar barang tempatan merujuk kepada harga di kilang iaitu jumlah yang diterima oleh pengeluar daripada pembeli bagi seunit barang yang dikeluarkan. Ia tidak termasuk semua cukai tidak langsung seperti cukai eksais, cukai jualan dan cukai perkhidmatan (CJCP) dan bayaran pengangkutan yang dikenakan berasingan oleh pengeluar. Bagi barangan yang dikeluarkan, diproses atau dipasang di Malaysia, harga pengeluar merujuk kepada harga selepas ditolak diskaun dan rebet yang diberikan oleh pengilang dan tidak termasuk kos pengangkutan yang disewa serta kos pengangkutan lain antara pengeluar dan pembeli.

Kos pengangkutan bagi pertubuhan pengangkutan yang tidak menyewa perkhidmatan pengangkutan tetapi menggunakan kemudahan sendiri lazimnya merupakan sebahagian daripada kos item, dan telah diambilkira kerana sukar untuk mengasingkannya.

Wajaran

Wajaran untuk pengiraan IHPR diperoleh daripada Banci Ekonomi 2016 dan sumber data alternatif lain bagi nilai pengeluaran mulai IHPR bulan rujukan Januari 2018. Wajaran IHPR dikemaskini pada umumnya dalam tempoh lima tahun sekali. Wajaran bagi produk ditentukan berdasarkan peratus sumbangan item kepada nilai output dalam ekonomi. Wajaran IHPR mengikut MSIC dan Seksyen Barangan (SITC) adalah seperti berikut:-

Wajaran mengikut MSIC

Sektor (2005=100)	Wajaran			Sektor (2010=100)
	2005	2010	2015	
Pertanian	6.60	8.15	6.730	Pertanian, perhutanan & perikanan
Perikanan	0.81			
Perlombongan	9.83	9.67	7.927	Perlombongan
Pembuatan	80.00	78.79	81.571	Pembuatan
Bekalan elektrik, gas & air	2.76	3.05	3.442	Bekalan elektrik & gas
		0.34	0.330	Bekalan air
Jumlah	100.00	100.00	100.000	Jumlah

Wajaran mengikut Seksyen Barang (SITC)

Seksyen Barang	Wajaran	
	2010	2015
Makanan	5.71	7.454
Minuman & tembakau	1.36	1.307
Bahan mentah tidak boleh dimakan	8.24	5.769
Bahan api galian, pelincir, dll.	24.58	21.075
Minyak dan lemak binatang & sayuran	10.29	9.287
Bahan kimia	8.12	8.557
Barang-barang keluaran kilang	11.21	13.672
Jentera & kelengkapan pengangkutan	25.04	25.611
Pelbagai barang keluaran kilang	5.45	7.268
Jumlah	100.00	100.000

Pemilihan Produk

Pemilihan produk bagi survei harga bulanan adalah berdasarkan sumbangan item kepada jumlah output industri tersebut. Produk yang terpilih adalah mewakili kumpulannya. Item yang dimasukkan dalam pengiraan indeks secara kolektif menyumbang lebih 85 peratus daripada jumlah output bagi industri yang dipilih.

Pemilihan Pertubuhan

Pemilihan pertubuhan adalah berdasarkan sumbangan pertubuhan tersebut kepada jumlah output bagi industri yang telah terpilih. Pertubuhan yang terpilih mewakili produk masing-masing. Pertubuhan ini secara kolektif menyumbang sekurang-kurangnya 85 peratus daripada jumlah output produk yang terpilih. Senarai pertubuhan yang terlibat dalam pengeluaran tempatan diambil daripada Banci Ekonomi 2016 dan sumber-sumber tambahan. Senarai pertubuhan ini dikemaskini setiap tahun untuk mengambil kira pertubuhan baru dan sebarang perubahan yang berlaku kepada pertubuhan seperti tutup, tidak beroperasi, perubahan aktiviti, lokasi kilang dan alamat pos. Pada tahun 2023, bilangan pertubuhan yang diliputi adalah sebanyak 1,695.

Pemilihan Komoditi

Kajian awal dijalankan bagi setiap item komoditi yang terpilih dengan mengenal pasti jenis produk yang laris jualannya di samping keterangan atau spesifikasi yang terperinci seperti jenama, gred, saiz dan unit ukuran bagi item yang dikeluarkan atau diimport bagi tujuan pungutan harga.

Borang survei dihantar kepada semua pertubuhan terpilih pada peringkat awal bagi mendapatkan maklumat berikut:

- (a) Jenama komoditi yang biasa dikeluarkan
- (b) Jenama komoditi yang memberikan sumbangan yang penting kepada pengeluaran syarikat
- (c) Keterangan dan spesifikasi terperinci bagi jenama yang dinyatakan di (a) dan (b)
- (d) Brosur atau katalog bagi jenama komoditi

1,063 komoditi diliputi dari 1193 pertubuhan bagi pengeluaran tempatan setiap bulan dalam pengiraan IHPR. Komoditi ini dipilih berdasarkan kepentingannya dalam pertubuhan.

Sumber Data

Sejumlah 5,346 sebut harga dipungut setiap bulan daripada pertubuhan dan agensi kerajaan. Antara agensi kerajaan yang diliputi survei ini adalah seperti berikut:

- i. Jabatan Bekalan Air Negeri
- ii. Jabatan Perikanan Malaysia

- iii. Jabatan Perkhidmatan Veterinar
- iv. Lembaga Getah Malaysia
- v. Lembaga Koko Malaysia
- vi. Lembaga Lada Malaysia
- vii. Lembaga Minyak Sawit Malaysia (MPOB)
- viii. Lembaga Pemasaran Pertanian Persekutuan (FAMA)
- ix. Lembaga Perusahaan Kayu Malaysia (MTIB)

Kawalan Kualiti

Satu siri semakan dibuat bagi menentukan data harga yang diterima adalah munasabah, konsisten dan tepat. Prosedur semakan harga termasuk membuat perbandingan harga semasa dengan harga yang dilaporkan pada bulan sebelumnya bagi responden yang sama, di samping harga yang dilaporkan oleh responden lain bagi item komoditi yang sama. Harga yang menunjukkan perbezaan yang luar biasa akan dirujuk kepada responden untuk penjelasan bagi menentukan ketepatan.

Harga yang dilaporkan dalam borang akan disahkan oleh pegawai luar semasa menjalankan kerja luar dan ia akan disemak selanjutnya di ibu pejabat. Perubahan harga yang ketara akan dirujuk kepada pegawai luar untuk pengesahan. Dalam keadaan tertentu, responden akan dihubungi terus untuk penjelasan.

Data yang diterima akan disemak secara teliti sebelum tangkapan data dijalankan. Anggota di Jabatan Perangkaan Negeri diberikan latihan sekurang-kurangnya sekali dalam setahun mengenai prosedur, konsep dan definisi serta sebarang perubahan tentang spesifikasi produk dan item yang dipilih.

Metodologi Pengiraan Indeks

Berkuatkuasa mulai penerbitan bulan rujukan Januari 2018, kaedah indeks rantaian Laspeyres digunakan dalam pengiraan IHPR ($2010=100$) dengan menggunakan Disember 2017 sebagai bulan pautan.

IHPR disusun sebagai indeks rantaian bakul tetap. Ini bermakna turutan indeks bakul tetap dirantai bersama bagi mewujudkan satu siri masa yang berterusan. Perkara ini perlu untuk mengelakkan perubahan yang tidak dijangka dalam indeks apabila pengemaskinian bakul dilakukan.

Dalam usaha untuk indeks dirantai bersama antara bakul, wajaran bagi bakul lama dan baru perlu dinyatakan pada tempoh rujukan harga yang sama. Tempoh tersebut dikenali sebagai bulan pautan. Bakul IHPR Pengeluaran Tempatan adalah menggunakan bakul lama ($2010=100$) dan produk dikemaskini wajarannya menjadi bakul baru ($2015=100$).

IHPR bulan rujukan dihitung menggunakan bakul baru didarabkan dengan indeks yang diterbitkan sebelumnya berdasarkan bakul lama.

$$p_{t/10}^{ch} = p_{t/15}^{baru} \times \left(\frac{p_{D17/10}^{lama}}{p_{D17/15}^{baru}} \right)$$

Di mana,

$p_{t/10}^{ch}$ = adalah indeks rantaian yang mengukur perubahan harga dari 2010 kepada sebarang tempoh t sehingga Disember 2017

$p_{t/D15}^{baru}$ = adalah indeks komposit siri baru yang membandingkan harga pada sebarang tempoh t kepada Disember 2017

$p_{D17/10}^{lama}$ = adalah indeks komposit siri lama yang membandingkan harga bagi Disember 2017 kepada harga 2010

$p_{D17/15}^{baru}$ = adalah indeks komposit siri lama yang membandingkan harga bagi Disember 2017 kepada harga 2015

Dalam kes indeks rantaian, penjumlahan indeks purata berwajaran bagi kumpulan peringkat rendah atau barang adalah tidak sepadan dengan kumpulan peringkat yang lebih tinggi (indeks rantaian tidak berdaya tambah).

Kadar Perubahan

Kadar perubahan yang ditunjukkan oleh pergerakan harga boleh dikira menggunakan beberapa cara. Tiga kaedah pengiraan yang digunakan adalah perubahan peratus di antara bulan semasa & bulan yang sama tahun sebelumnya (tahun ke tahun); bulan semasa dengan bulan sebelumnya (bulan ke bulan) dan perubahan peratus antara purata tahunan tahun semasa yang spesifik dengan purata tahunan yang sama ditetapkan pada tahun sebelumnya. Contoh berikut menunjukkan cara pengiraan perubahan mata indeks dan perubahan peratus.

Perubahan Mata Indeks	Perubahan Peratus
Indeks Harga Pengeluar 125.4	Perubahan peratus indeks dibahagi dengan indeks sebelumnya, didarab dengan seratus.
Tolak Indeks sebelumnya 124.3	

Bersamaan dengan 1.1	$\frac{125.4 - 124.3}{124.3} \times 100$

	= 0.9 %

Pelarasian Musim

Data siri masa adalah amat berguna untuk ahli ekonomi, pembuat dasar & keputusan serta penganalisis siri masa untuk mengenal pasti ciri-ciri penting siri ekonomi seperti arah aliran, turning point dan konsistensi antara penunjuk ekonomi yang lain. Kadangkala ciri ini sukar untuk diperhatikan kerana pergerakan bermusim. Oleh itu, sekiranya kesan bermusim boleh disingkirkan, arah aliran data siri ini dapat dilihat dengan lebih baik. Anggaran dan penyingkiran kesan bermusim dipanggil pelarasian bermusim.

Pelarasian bermusim adalah satu proses untuk mengenal pasti dan menyingkirkan bentuk pola bermusim yang biasa berlaku dalam tempoh satu tahun, yang mungkin juga merangkumi pengaruh dari kesan cuti yang bergerak dan hari bekerja/berdagang bagi suatu tempoh. Objektif utama proses ini adalah untuk menunjukkan arah aliran dan pergerakan jangka pendek dalam siri ini.

Di Malaysia, kebanyakan data siri masa dipengaruhi oleh kesan bermusim. Oleh itu, untuk menghapus dan melaras kesan bermusim data siri masa ekonomi Malaysia, pakej standard pelarasian bermusim, X-12 ARIMA telah digunakan oleh Jabatan Perangkaan, Malaysia. Data

siri masa ekonomi Malaysia juga kerap dipengaruhi oleh perayaan agama utama seperti Aidilfitri bagi umat Islam, Tahun Baru Cina untuk kaum Cina dan Deepavali untuk kaum India. Tarikh perayaan-perayaan ini tetap mengikut tahun lunar tetapi berbeza-beza mengikut calendar Gregorian. Oleh itu, untuk menganggar dan menyingkirkan kesan cuti yang bergerak dari data siri masa, satu prosedur telah dibangunkan iaitu Seasonal Adjustment for Malaysia (SEAM).

Frekuensi Penyusunan

IHPR disusun setiap bulan manakala indeks suku tahunan dan tahunan dikira berdasarkan data siri bulanan.

Keperluan Kerahsiaan

Data yang digunakan bagi penyusunan IHPR telah dipungut di bawah peruntukan Akta Perangkaan 1965 (Disemak-1989). Akta ini mensyaratkan bahawa kandungan penyata individu adalah sulit. Selaras dengan peruntukan dalam Akta ini, hanya angka agregat diterbitkan.

Simbol dan Singkatan

- tanda negatif

- t.t.t.l tidak terkelas di tempat lain
- d.t.t data tidak tersedia

Introduction

The publication of Producer Price Index (PPI) Local Production is a monthly publication which presents statistics covering five main sectors namely Agriculture, forestry and fishing; Mining; Manufacturing; Electricity & gas supply and Water supply. PPI is compiled based on the data from the Producer Price Survey which is conducted on a monthly basis. Commencing in reference month of January 2018, PPI was updated using the “basket” of goods for year 2015 by maintaining the same base year, 2010=100.

Objective

The main objective of PPI Local Production is to measures the average changes in price of commodities charged by domestic producers of an industry. The PPI, which is an output-based index, is also a macroeconomic indicator used to monitor the price movements of local outputs and is often viewed as a leading indicator of Consumer Price Index.

Scope and Coverage

PPI covers the following five sectors of the economy, namely Agriculture, forestry & fishing, Mining, Manufacturing, Electricity & gas supply and Water supply. The indices are published at three-digit group level, two-digit division levels and one-digit sector level for Malaysia. PPI is also compiled by Stage of Processing and Commodity Section (SITC). PPI for Local Production by stage of processing is compiled by reclassifying the commodities according to the following stage of processing i.e. Crude materials for further processing, Intermediate materials, supplies & components and Finished goods. Meanwhile, PPI by commodity section covers 9 groups namely Food, beverages & tobacco, Crude materials, inedible, Mineral fuels, lubricants, etc, Animal and vegetable oils & fats, Chemicals, Manufactured goods, Machinery & transport equipment and Miscellaneous manufactured articles.

A total of 1,063 commodity items are used in the compilation of the PPI for Local Production.

Concept and Definitions

Classification

The classification of the PPI Local Production by industry is based on the Malaysia Standard Industrial Classification (MSIC) 2008, which adhere to the International Standard Industrial Classification (ISIC) Rev. 4. Meanwhile, the classification of the PPI for Local Production by commodity section is based on the Standard International Trade Classification (SITC) Rev. 4.

Prices

This refers to prices received by the producer at the first stage of commercialisation. Producer price of Local Production which refers to ex-factory price is the amount receivable by the producer from the purchaser for a unit of a good produced. It excludes indirect taxes such as excise duties, sales and services tax (SST) and any transport charges invoiced separately by the producer. As for goods produced, processed or assembled in Malaysia, producer prices refer to prices which are net of discounts and rebates given by the manufacturers and net of freight by hired transport and other transport costs between producer and purchaser.

The cost of transport for establishments which do not hire transport services but utilise their own transport facilities normally forms part of the cost of the item, are included as they are difficult to segregate.

Weights

The weights for PPI calculations are obtained from the 2016 Economic Census and other alternative data sources of data for the value of production from the PPI reference month of January 2018. The PPI weights are generally updated within five years. The weight of the product is determined based on the percentage contribution of the item to the output value in the economy. The weight of the PPI according to MSIC and Commodity Sections are given as follows

Weights by MSIC

Sector (2005=100)	Weights			Sector (2010=100)
	2005	2010	2015	
Agriculture	6.60	8.15	6.730	<i>Agriculture, forestry & fishing</i>
Fishing	0.81			
Mining	9.83	9.67	7.927	<i>Mining</i>
Manufacturing	80.00	78.79	81.571	<i>Manufacturing</i>
<i>Electricity, gas & water supply</i>	2.76	3.05	3.442	<i>Electricity & gas supply</i>
		0.34	0.330	<i>Water supply</i>
Total	100.00	100.00	100.000	Total

Weights by Commodity Section (SITC)

Commodity Section	Weight	
	2010	2015
Food	5.71	7.454
Beverages & tobacco	1.36	1.307
Crude materials, inedible	8.24	5.769
Mineral fuels, lubricants, etc.	24.58	21.075
Animal and vegetable oils & fats	10.29	9.287
Chemicals	8.12	8.557
Manufactured goods	11.21	13.672
Machinery & transport equipment	25.04	25.611
Miscellaneous manufactured articles	5.45	7.268
Total	100.00	100.000

Selection of Products

The selection of the products for the monthly producer price survey is based on their contributions to the total output of the industry. The selected items are representative of their group. The items included in the compilation of the index collectively accounted for at least 85 per cent of the total output of the industry selected.

Selection of Establishments

The selection of establishments is based on their contributions to the total output of the selected industry. The selected establishments are representative of their products. These establishments collectively accounted for at least 85 per cent of the total output of the products selected. The lists of establishments are drawn from the Economic Census 2016 as well as from other supplementary sources. The list of these establishments has been updated every year to consider new establishments and any changes in the status of the establishments such as closed down, non-operation, change in activities, factory location and postal addresses. In 2023, the number of establishments covered are 1,695.

Selection of Commodities

A preliminary survey is conducted to identify the major selling product varieties under each of the commodity item selected as well as detailed description/ specification pertaining to the brand, grade, size and unit of measurement of items produced for price collection purposes. Questionnaires are dispatched to all selected establishments at the initial stage to enquire the following information:

- (a) Regularly produced commodity brands
- (b) Commodity brands that constitute a significant share of the companies' production
- (c) Detailed descriptions and specifications of the brands stated in (a) and (b)
- (d) Brochures/catalogues of the commodity brands

1,063 commodities are covered from 1,193 establishments for Local Production monthly in the compilation of PPI calculation. These commodities are selected in view of their relative importance within the establishments.

Sources of Data

A total of 5,346 price quotations are collected on a monthly basis, from both establishments and government agencies. Among the government agencies covered by the survey are as follows:

- i. State Water Supply Department
- ii. Department of Fisheries
- iii. Department of Veterinary Services
- iv. Malaysian Rubber Board

- v. Malaysian Cocoa Board
- vi. Malaysian Pepper Board
- vii. Malaysian Palm Oil Board (MPOB)
- viii. Federal Agriculture Marketing Authority (FAMA)
- ix. Malaysian Timber Industry Board (MTIB)

Quality Control

A series of checks on the prices received are carried out to ensure their reasonableness, consistency and accuracy. The checking procedures include comparisons of prices supplied for the month against those of the previous months of the same respondents as well as with prices reported by other respondents for the same commodity items. Prices that display unusual variations are clarified with respondents to ensure the accuracy.

Prices quoted in the forms are verified on the ground by field supervisors and these are subjected to further scrutiny in the headquarters. Significant price changes are referred to the field supervisors for verifications and in certain cases, the respondents are directly contacted for clarifications.

The data are subjected to thorough checking before being captured. The staff of the Department of Statistics state office is given training at least once a year regarding procedures, concepts and definitions as well as any changes in the selected items and product specifications.

Methodology Index Calculation

Effective from the reference month of January 2018, Laspeyres chain index method is used in the calculation of the PPI which employs December 2017 as the link month. PPI are calculated as a chain of fixed-basket indices. This means that a sequence of fixed-basket indices has been chained together to create a continuous time series. This is necessary to avoid having breaks in an index when a basket update is performed.

In order to chain indices across baskets, weights for the old and new baskets must be expressed at the prices of a common period. This common period is called as the link month. The IHPR basket of Local Production is using the old basket (2010=100) and the product is updated with weight to become a new basket (2015=100).

In the month following the basket link month, price indices calculated using the new basket are multiplied by the index levels previously published for the old basket.

$$p_{t/10}^{ch} = p_{t/15}^{new} \times \left(\frac{p_{D17/10}^{previous}}{p_{D17/15}^{new}} \right)$$

Where

$p_{t/10}^{ch}$ = *is a chain index that measures price changes from 2010 to any period until December 2017*

$p_{t/D15}^{new}$ = *is a new series composite index comparing prices at any period t to December 2017*

$p_{D17/10}^{previous}$ = *Is a previous series composite index comparing prices for December 2017*

$p_{D17/15}^{new}$ = *is a new series composite index comparing prices for December 2017 to 2015 prices*

In the case of the chain index, the weighted averages of indices of lower level groups or items do not match those of the corresponding upper level groups (the chain index has no additivity).

Rate of Change

A rate of change representative of movement in prices may be derived in several ways. The current method of calculating PPI use three measures of change, i.e. the percentage change between any given month and the same month a year ago (year-on-year); the current month over previous month (month-on-month) and the percentage change between annual average for the specific current year to the same fixed period on the previous year. The following example illustrates the computation of index point and percentage change.

Index Point Change	Percentage Change
Producer Price Index 125.4	<i>Index point difference divided by the previous index, multiplied by one hundred</i>
Less Previous Index 124.3	
-----	$\frac{125.4 - 124.3}{124.3} \times 100$
Equal to 1.1	

	= 0.9 %

Seasonal Adjustment

Time-series data are very useful for economists, policy & decision makers and time-series analysts to identify the important features of economic series such as direction, turning point and consistency between other economic indicators. Sometimes this feature is difficult to observe because of seasonal movements. Thus, if the seasonal effect can be removed, the behaviour of the series would be better viewed. The estimation and removal of the seasonal effects is called seasonal adjustment.

Seasonal adjustment is a process to identify and to remove the regular within-a-year seasonal pattern, which may also include the influences of moving holidays and working/trading days effect in each period. The ultimate objective of the process is to highlight the underlying trends and short-term movements in the series.

In Malaysia, most of the time series data are influenced by seasonal effects. Hence, to eliminate the seasonal effect as well as to seasonally adjust the Malaysian economic time series data, a standard seasonal adjustment package, X-12 ARIMA was used by Department of Statistics, Malaysia. Malaysian economic time series data also often affected by major religious festivals such as Eid-ul Fitr for Muslims, Chinese New Year to the Chinese and the

Indian Deepavali. These festivals' dates are fixed according to the lunar year but vary according to the Gregorian calendar. Therefore, to estimate and remove moving holiday effect from time-series data, a procedure was developed, namely Seasonal Adjustment for Malaysia (SEAM).

Frequency of Compilation

The PPI is compiled for each calendar month while the quarterly and annual indices are computed from the monthly series.

Confidentiality Requirement

The data used for the compilation of PPI have been collected under the provisions of the Statistics Act 1965 (Revised-1989). The Act stipulates that the contents of individual return are confidential. In conformity with the stipulations of this Act, only aggregated figures are published.

Indeks Harga Pengeluar Perkhidmatan Keseluruhan 2023

Carta 1: IHPRP Perubahan Tahunan, 2011-2023

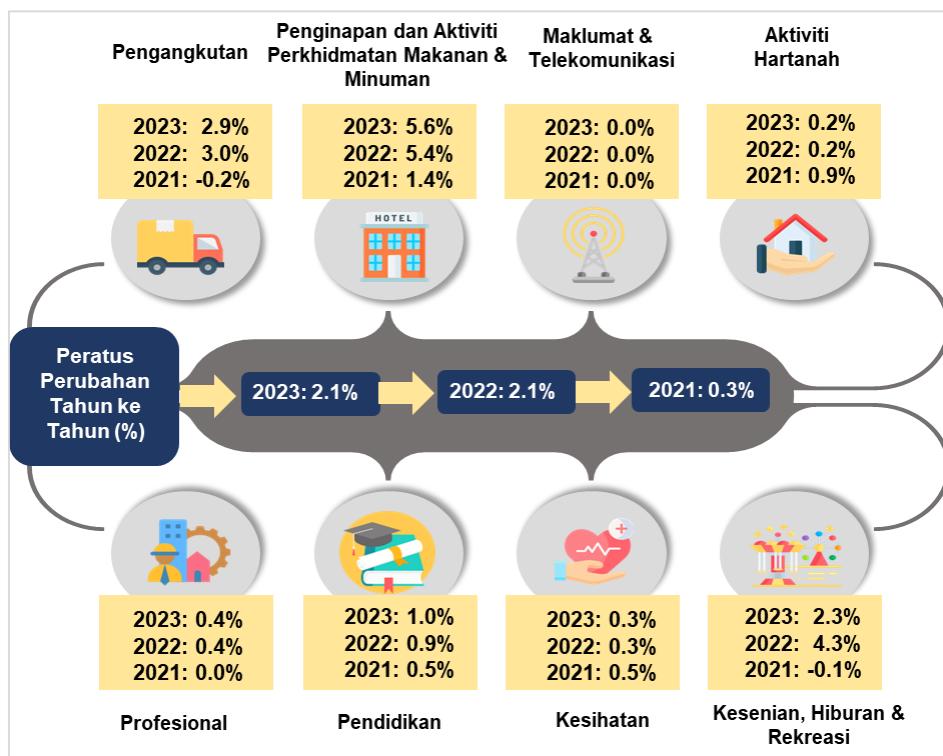

Carta 2: IHPRP Suku Tahun, 2021-2023

Indeks Harga Pengeluar Perkhidmatan (IHPRP) meningkat 2.1 peratus pada 2023, sama seperti 2022. IHPRP berada dalam julat daripada pertumbuhan terendah yang dicatatkan pada 2021 (0.3%) kepada pertumbuhan tertinggi yang dicatatkan pada 2022 dan 2023 (2.1%). Secara keseluruhan pada 2023, SPPI merekodkan 3.4 peratus pada Suku Tahun Pertama (ST1) 2023 dan mengekalkan momentum positif dengan kadar pertumbuhan yang lebih perlahan untuk suku tahun yang lain. IHPRP meningkat 2.7 peratus pada ST2 2023 dan terus meningkat 1.4 peratus (ST3 2023) dan 1.0 peratus (ST4 2023).

Indeks Harga Pengeluar Perkhidmatan mengikut Subsektor

Paparan 1: Perubahan Peratus Tahunan SPPI, 2021 - 2023

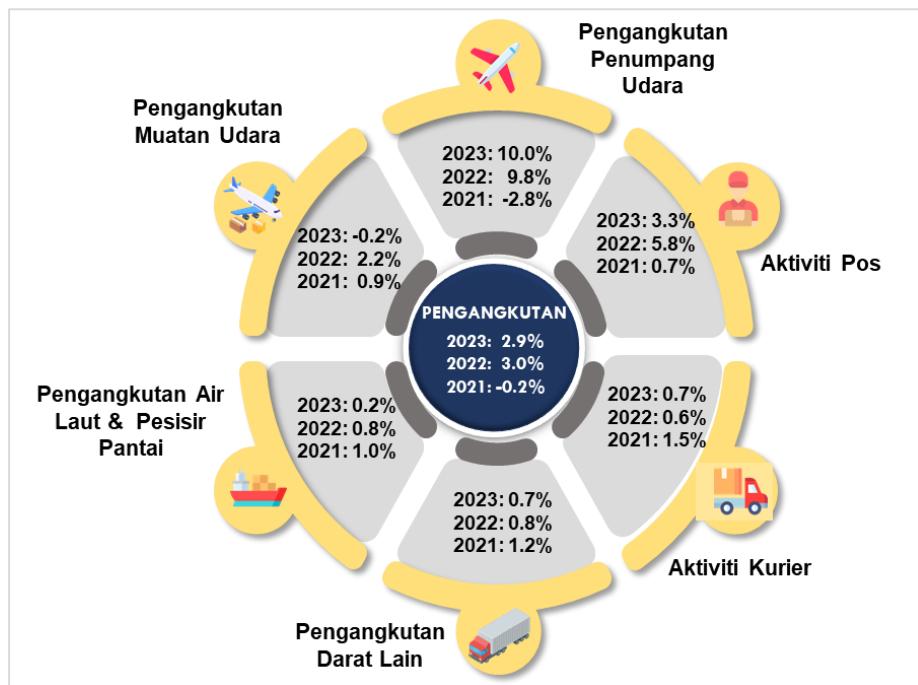

IHPRP mencatatkan purata 115.1 mata pada tahun 2023, peningkatan sebanyak 2.1 peratus, sama seperti yang dicatatkan pada tahun 2022. Semua subsektor merekodkan peningkatan pada tahun ini kecuali indeks Maklumat & komunikasi yang kekal tidak berubah. Subsektor Penginapan dan aktiviti perkhidmatan makanan & minuman meningkat 5.6 peratus (2022: 5.4%) manakala Pengangkutan merekodkan kenaikan 2.9 peratus (2022: 3.0%). Pada masa yang sama, subsektor lain yang mencatatkan peningkatan adalah Kesenian, hiburan & rekreasi (2.3%), Pendidikan (1.0%), Profesional (0.4%), Kesihatan (0.3%) dan Aktiviti harta (0.2%). [Paparan 1]

Pengangkutan

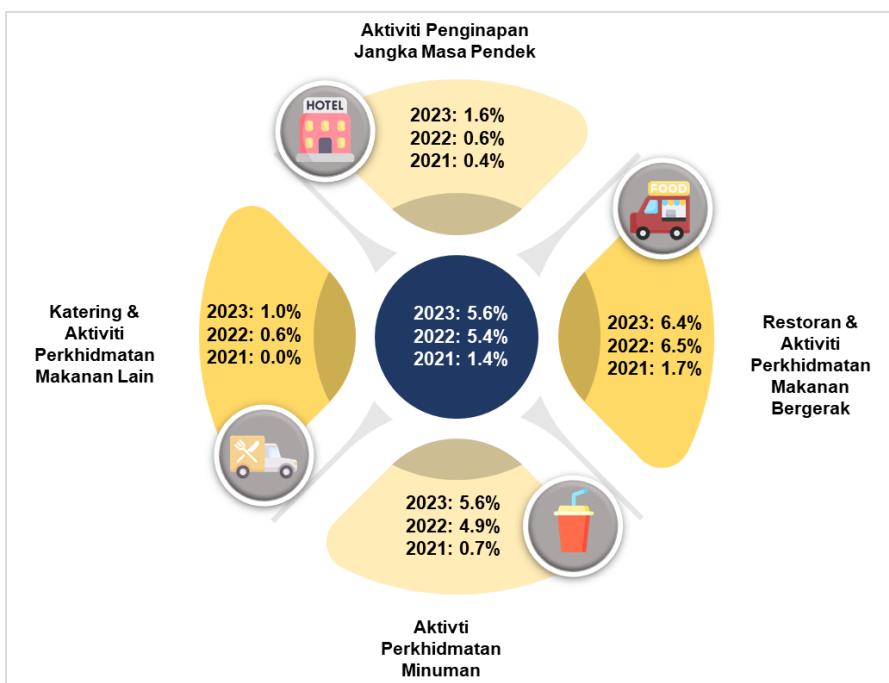

Subsektor Pengangkutan mencatatkan peningkatan 2.9 peratus pada tahun 2023 berbanding 3.0 peratus pada tahun 2022. Peningkatan ini terutamanya disebabkan oleh indeks Pengangkutan penumpang udara (10.0%) dan Aktiviti pos (3.3%). Manakala kedua-dua indeks Pengangkutan darat lain dan Aktiviti kurier masing-masing meningkat sebanyak 0.7 peratus diikuti oleh Pengangkutan air laut & pesisir pantai yang meningkat 0.2 peratus. Namun begitu, indeks Pengangkutan muatan udara mencatatkan penurunan negatif 0.2 peratus. [Paparan 2]

Paparan 2: Perubahan Peratus Tahunan Subsektor Pengangkutan, 2021 - 2023

Penginapan dan Aktiviti Perkhidmatan Makanan & Minuman

Paparan 3: Perubahan Peratus Tahunan Subsektor Penginapan dan Aktiviti Perkhidmatan Makanan & Minuman, 2021 - 2023

Pada 2023, indeks Penginapan dan aktiviti perkhidmatan makanan & minuman meningkat 5.6 peratus berbanding 5.4 peratus pada 2022. Peningkatan ini disebabkan terutamanya oleh indeks Restoran & aktiviti perkhidmatan makanan bergerak (6.4%) dan Aktiviti perkhidmatan minuman (5.6%). Sementara itu, indeks Aktiviti penginapan jangka masa pendek dan Katering & aktiviti perkhidmatan makanan lain juga masing-masing mencatatkan peningkatan 1.6 peratus dan 1.0 peratus. **[Paparan 3]**

Maklumat & Komunikasi

Subsektor Maklumat & komunikasi pada 2023 kekal tidak berubah sama seperti dicatatkan pada 2022. Namun begitu, indeks Aktiviti prosesan data, hosting & yang berkaitan; Web portal meningkat 0.1 peratus, manakala indeks bagi Pengaturcaraan komputer, perundingan & aktiviti berkaitan menurun negatif 0.3 peratus.

Aktiviti Hartanah

Subsektor Aktiviti harta tanah meningkat 0.2 peratus pada 2023, sama seperti yang dilaporkan pada 2022. Peningkatan ini disokong oleh Aktiviti harta tanah atas dasar bayaran atau kontrak (0.2%).

Profesional

Subsektor Profesional meningkat 0.4 peratus pada tahun ini, sama seperti yang dilaporkan pada 2022. Peningkatan ini disokong oleh Aktiviti perakaunan, simpan kira & audit; perundingan percukaian (0.6%), Aktiviti arkitek dan kejuruteraan & perundingan teknikal yang berkaitan (0.4%) dan Aktiviti guaman (0.2%).

Pendidikan

Subsektor Pendidikan meningkat 1.0 peratus pada 2023 berbanding 0.9 peratus pada 2022. Peningkatan ini disebabkan oleh indeks Pendidikan menengah (1.9%), Pendidikan pra-sekolah & rendah (1.1%), Pendidikan tinggi (1.0%) dan Pendidikan lain (0.2%).

[Paparan 4]

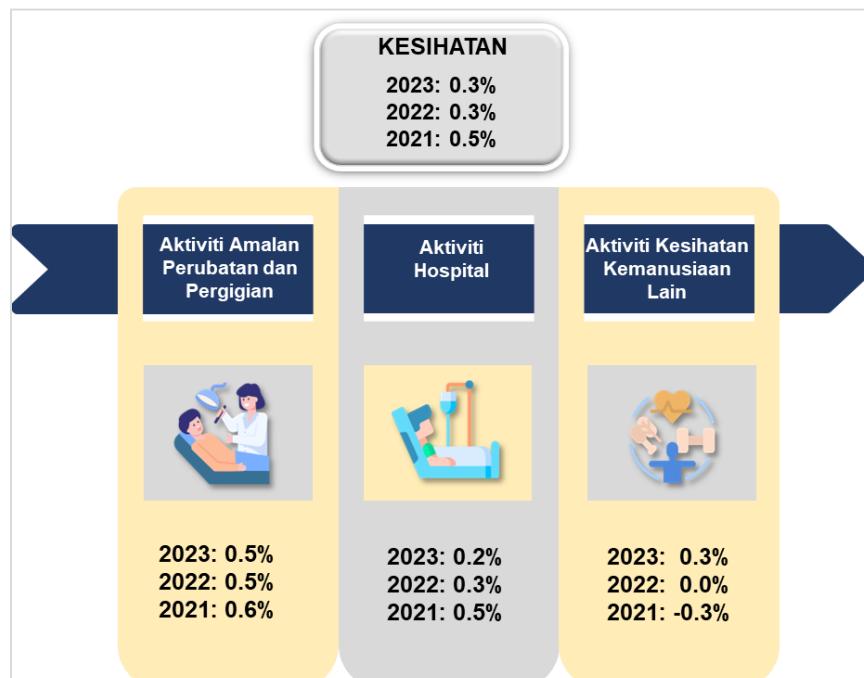

Paparan 4: Perubahan Peratus Tahunan Subsektor Pendidikan, 2021 - 2023

Kesihatan

Subsektor Kesihatan meningkat 0.3 peratus pada 2023 (2023: 0.3%). Peningkatan ini disumbang oleh indeks Aktiviti amalan perubatan & pergigian (0.5%), Aktiviti kesihatan kemanusiaan lain (0.3%) dan Aktiviti hospital (0.2%). **[Paparan 5]**

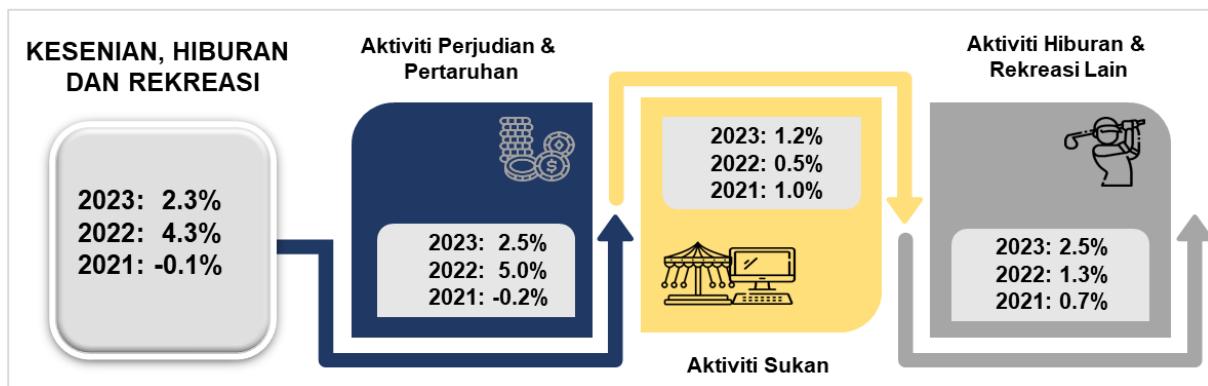

Paparan 5: Perubahan Peratus Tahunan Subsektor Kesihatan, 2021 - 2023

Kesenian, Hiburan & Rekreasi

Subsektor Kesenian, hiburan & rekreasi mencatatkan peningkatan 2.3 peratus pada tahun 2023 berbanding 4.3 peratus pada tahun sebelumnya. Peningkatan ini didorong oleh kedua-dua indeks Aktiviti perjudian & pertaruhan dan Aktiviti hiburan & rekreasi lain yang masing-masing mencatatkan kenaikan sebanyak 2.5 peratus. Indeks Aktiviti sukan juga meningkat 1.2 peratus. [Paparan 6]

**Paparan 6: Perubahan Peratus Tahunan Subsektor Kesenian, Hiburan & Rekreasi,
2021 - 2023**

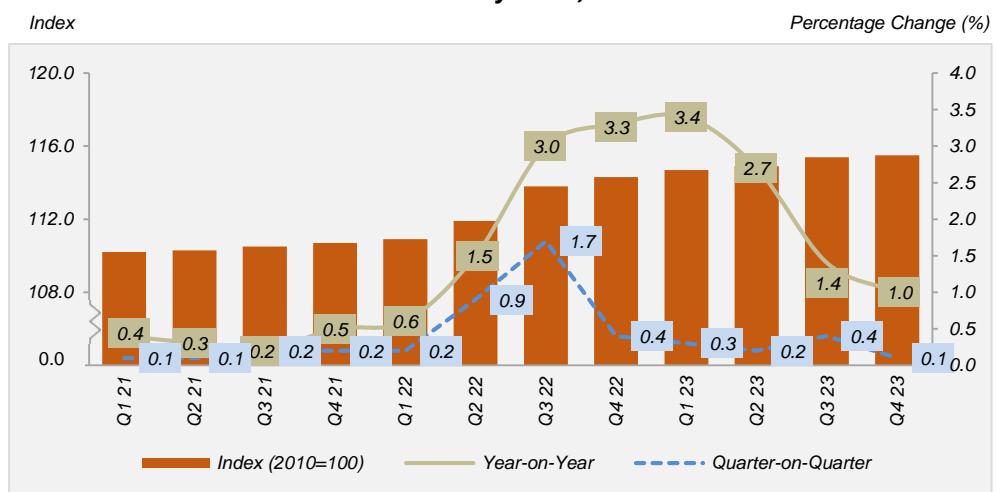

Overall Services Producer Price Index in 2023

Chart 1: Yearly Changes SPPI, 2011-2023

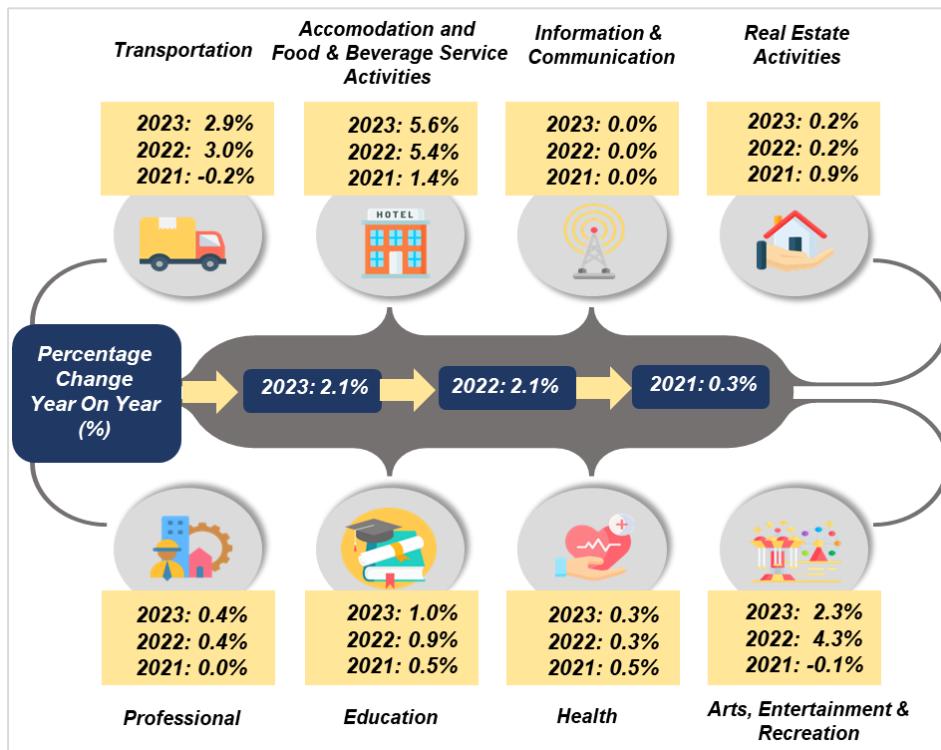

Chart 2: Quarterly SPPI, 2021-2023

The Services Producer Price Index (SPPI) increased 2.1 per cent in 2023, similar to 2022. SPPI ranged from the lowest growth recorded in 2021 (0.3%) to the highest growth posted in 2022 and 2023 (2.1%). Overall in 2023, SPPI recorded 3.4 per cent in Q1 2023 and keep positive momentum with a slower growth rate for the rest of quarters in the year. SPPI increased by 2.7 per cent in Q2 2023 and continued to increase by 1.4 per cent (Q3 2023) and 1.0 per cent (Q4 2023).

Services Producer Price Index by Subsector

Exhibit 1: Annual Percentage Change of SPPI, 2021 - 2023

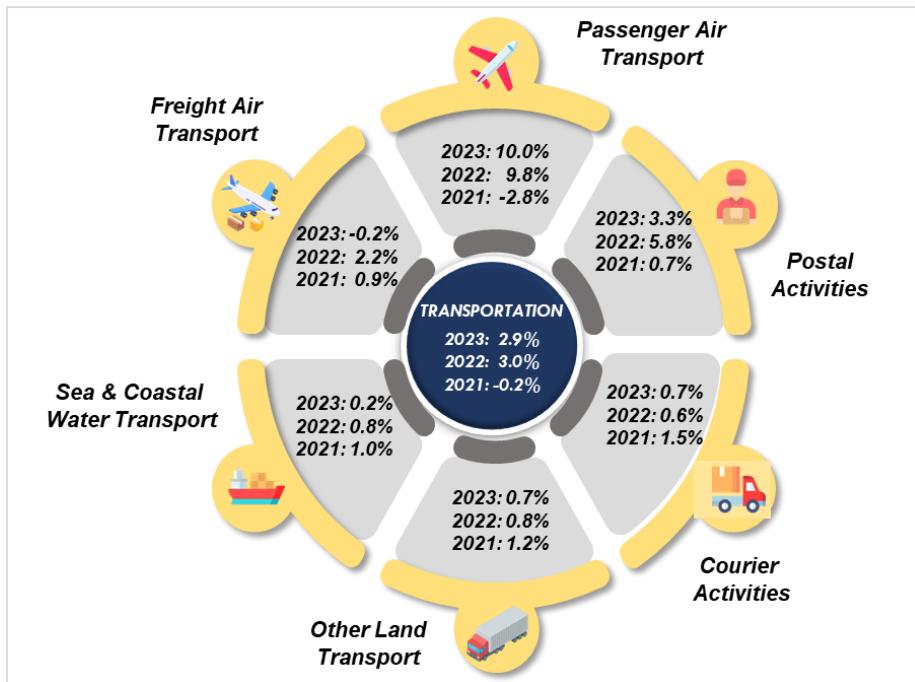

SPPI averaged 115.1 points in 2023, an increase of 2.1 per cent, the same rate as recorded in 2022. All subsectors recorded an increase this year, except the Information & communication which remained unchanged. Accommodation and food & beverage service activities subsector rose by 5.6 per cent (2022: 5.4%), while Transportation went up by 2.9 per cent (2022: 3.0%). In the meantime, the other subsectors that recorded increases were Arts, entertainment & recreation (2.3%), Education (1.0%), Professional (0.4%), Health (0.3%) and Real estate activities (0.2%). [Exhibit 1]

Transportation

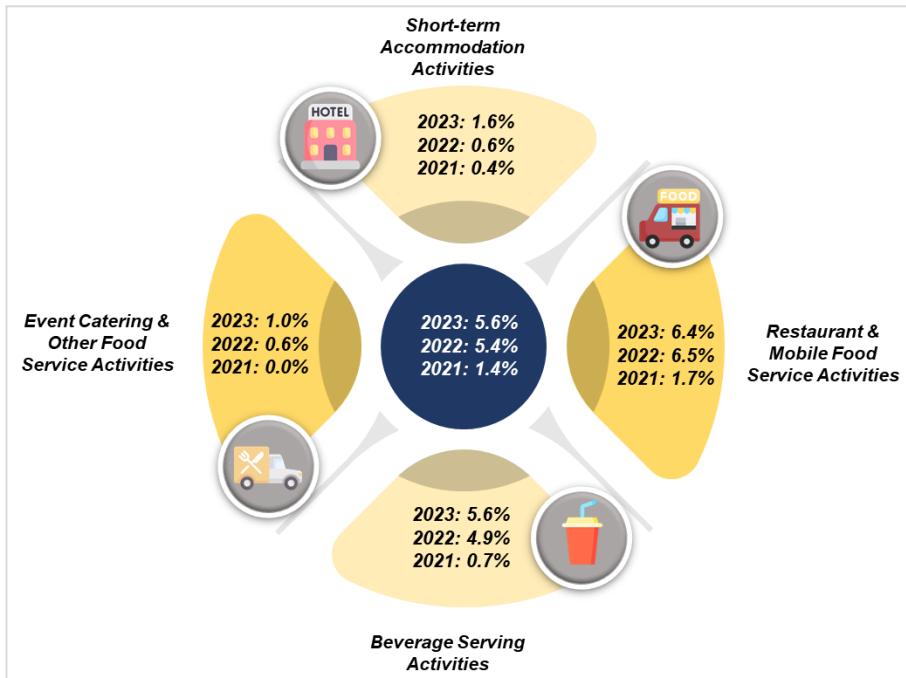

The Transportation subsector recorded an increase of 2.9 per cent in 2023 as against 3.0 per cent in 2022. The increase was mainly due to Passenger air transport (10.0%) and Postal activities (3.3%) indices. Meanwhile, Other land transport and Courier activities indices both inched up by 0.7 per cent, followed by Sea & coastal water transport, which increased by 0.2 per cent. However, index of Freight air transport recorded a decrease of negative 0.2 per cent. [Exhibit 2]

Exhibit 2: Annual Percentage Change of Transportation Subsector, 2020 -2023

Accommodation and Food & Beverage Service Activities

Exhibit 3: Annual Percentage Change of Accommodation and Food & Beverage Service Activities, 2021 - 2023

In 2023, the index of Accommodation and food & beverage service activities edged up 5.6 per cent as compared to 5.4 per cent in 2022. The increase was mainly contributed by index of Restaurants & mobile food service activities (6.4%) and Beverage serving activities (5.6%). Meanwhile, Short-term accommodation activities and Event catering & other food service activities indices also recorded an increase of 1.6 per cent and 1.0 per cent, respectively. [Exhibit 3]

Information & Communication

Information & communication subsector in 2023 remained unchanged as recorded in 2022. However, the index of Data processing, hosting & related activities; web portals increased by 0.1 per cent, while Computer programming, consultancy & related activities index decreased by negative 0.3 per cent.

Real Estate Activities

Real estate activities subsector increased by 0.2 per cent in 2023, the same rate recorded in 2022. This was contributed by Real estate activities on a fee or contract basis (0.2%).

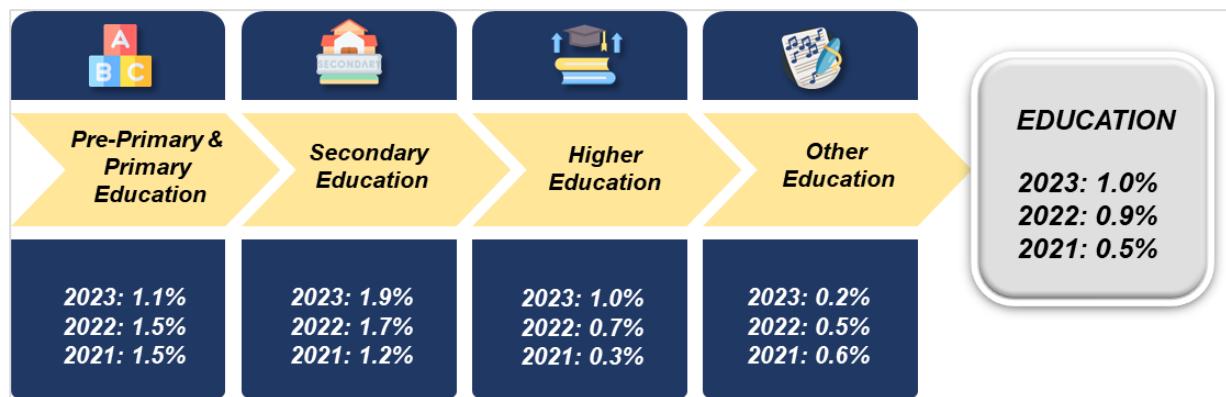

Professional

The Professional subsector increased by 0.4 per cent this year, the same recorded in 2022. The increase was contributed by Accounting, bookkeeping & auditing activities; tax consultancy (0.6%), Architectural and engineering activities & related technical consultancy (0.4%) and Legal activities (0.2%).

Education

The Education subsector went up 1.0 per cent in 2023 as compared to 0.9 per cent in 2022. The increase was attributed to the index of Secondary education (1.9%), Pre-primary & primary education (1.1%), Higher education (1.0%) and Other education (0.2%). [Exhibit 4]

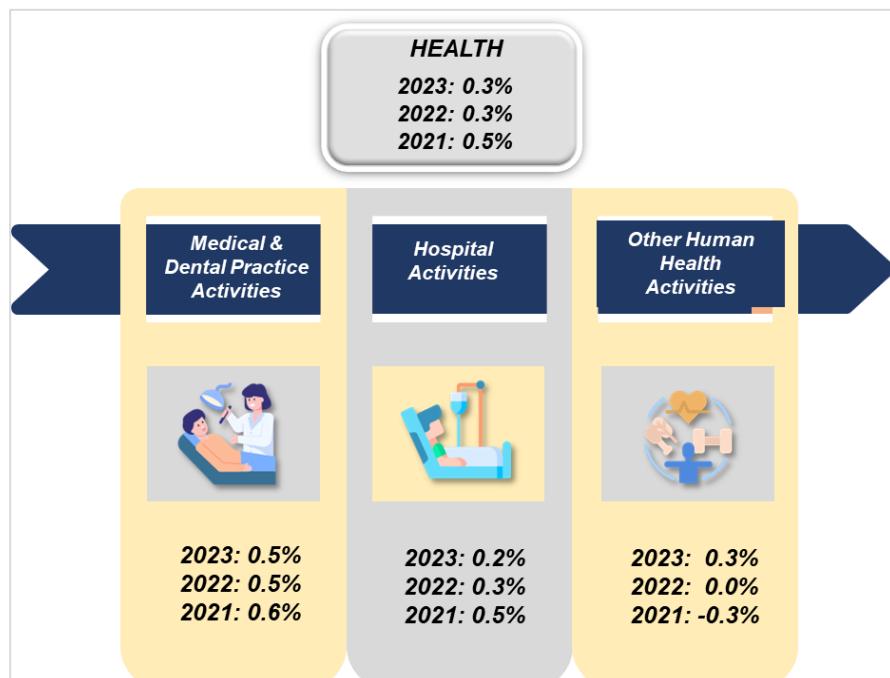

Exhibit 4: Annual Percentage Change of Education Subsector, 2021 - 2023

Health

The Health subsector inched up 0.3 per cent in 2023 (2022: 0.3%). The increase was contributed by the index of Medical & dental practice activities (0.5%), Other human health activities (0.3%) and Hospital activities (0.2%). [Exhibit 5]

Exhibit 5: Annual Percentage Change of Health Subsector, 2021 - 2023

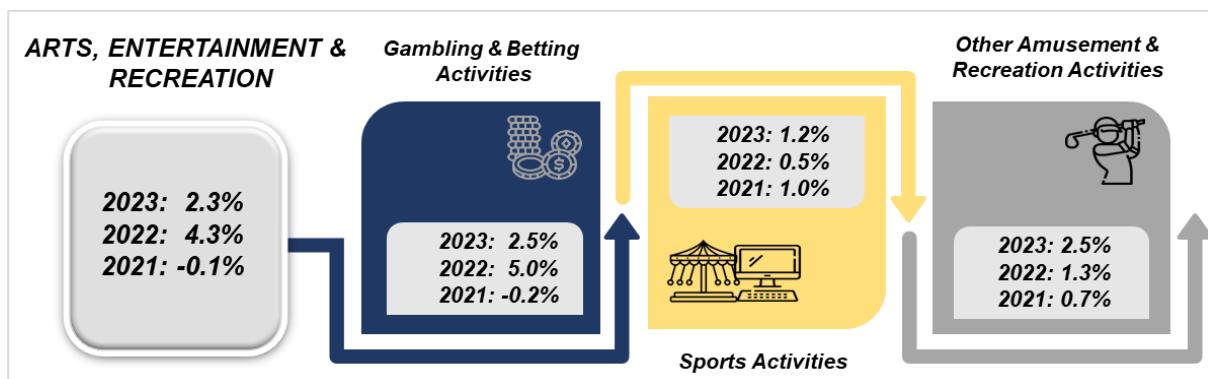

Arts, Entertainment & Recreation

The Arts, entertainment & recreation subsector registered an increase of 2.3 per cent in 2023 as compared to 4.3 per cent in the previous year. The increase was driven by both Gambling & betting activities and Other amusement & recreation activities indices, which recorded an increase of 2.5 per cent respectively. Index of Sports activities also increased by 1.2 per cent.

[Exhibit 6]

Pengenalan

Indeks Harga Pengeluar Perkhidmatan (IHPRP) dibentuk untuk mengukur purata perubahan harga perkhidmatan yang dikenakan oleh industri perkhidmatan tempatan di Malaysia. Selain itu, IHPRP juga berperanan sebagai *deflator* dalam penyusunan Indeks Perkhidmatan dan Keluaran Dalam Negeri Kasar (KDNK).

Konsep dan metodologi yang digunakan dalam penyusunan IHPRP adalah berpandukan kepada *Methodological Guide for Developing Producer Price Indices for Services* yang diterbitkan oleh *Organisation for Economic Co-operation & Development (OECD)*, *Eurostat* dan gabungan Pasukan Petugas *OECD-Eurostat*.

Maklumat daripada Survei Harga Pengeluar Perkhidmatan yang dilaksanakan secara suku tahun digunakan dalam penyusunan IHPRP. Survei ini bermula pada tahun 2008 bagi subsektor Pengangkutan dan seterusnya subsektor Maklumat & komunikasi (2011), subsektor Aktiviti hartanah dan profesional (2012) dan subsektor Pendidikan, Kesihatan, Penginapan dan Aktiviti perkhidmatan makanan & minuman dan Kesenian, hiburan & rekreasi (2013).

Sampel bagi Survei ini terdiri daripada pertubuhan yang terpilih bagi industri yang sama dalam Survei Perkhidmatan Suku Tahunan yang dijalankan oleh Jabatan Perangkaan Malaysia (DOSM). Survei Harga Pengeluar Perkhidmatan ini meliputi sebanyak 3,938 pertubuhan.

Skop Dan Liputan

Pemilihan Industri

Pemilihan industri adalah berdasarkan kepada sumbangan output industri yang diperoleh daripada Banci Ekonomi 2016 (tahun rujukan 2015). Industri terpilih menyumbang 75.3 peratus kepada keseluruhan sektor Perkhidmatan.

Subsektor yang diliputi

Terdapat lapan (8) subsektor yang diliputi dan pecahan mengikut industri adalah seperti berikut:

Pengangkutan	
49230	Pengangkutan muatan melalui jalan raya
50121	Pengangkutan muatan laut dan pesisir pantai, berjadual atau tidak berjadual
51101	Pengangkutan penumpang melalui udara mengikut laluan & jadual biasa
51201	Pengangkutan muatan udara mengikut laluan & berjadual biasa
52214	Perkhidmatan operasi lebuh raya, jambatan & terowong
52291	Penghantaran muatan
53100	Perkhidmatan pos nasional
53200	Aktiviti kurier selain daripada pos nasional

Penginapan dan Aktiviti Perkhidmatan Makanan & Minuman	
55101	Hotel & resort
56101	Restoran & restoran yang juga kelab malam
56102	Kafeteria / kantin
56103	Restoran makanan segera
56106	Gerai / penjaja makanan
56210	Katering makanan
56301	Pub, bar, diskò, Coffee-house, ruang koktel & karaoke
56302	Kedai kopi

Maklumat & Komunikasi	
61101	Perkhidmatan telekomunikasi berwayar
61102	Pembekal akses Internet oleh operator infrastruktur berwayar
61201	Perkhidmatan aktiviti telekomunikasi tanpa wayar
61202	Pembekal akses Internet oleh operator infrastruktur tanpa wayar
62010	Aktiviti pengaturcaraan komputer
62021	Perundingan komputer
63112	Aktiviti prosesan data
63120	Web portal

Aktiviti Hartanah	
68201	Aktiviti agen & broker harta tanah untuk pembelian, penjualan dan penyewaan harta tanah
68202	Pengurusan harta tanah atas dasar bayaran atau kontrak

Profesional	
69100	Aktiviti guaman
69200	Aktiviti perakaunan, simpan kira & audit; perundingan percukaian
71102	Perkhidmatan kejuruteraan

Pendidikan	
85102	Pendidikan pra-sekolah (swasta)
85104	Pendidikan rendah (swasta)
85212	Pendidikan menengah am (swasta)
85302	Pendidikan kolej & universiti (swasta)
85421	Sekolah muzik & tarian
85491	Pusat tuisyen

Kesihatan	
86101	Aktiviti hospital
86201	Perkhidmatan perubatan am
86202	Perkhidmatan perubatan khas
86203	Perkhidmatan berkaitan gigi
86901	Pusat dialisis
86902	Makmal perubatan

Kesenian, Hiburan & Rekreasi	
92000	Aktiviti perjudian & pertaruhan
93113	Kelab ekuestrian
93116	Padang golf
93117	Pusat boling
93118	Pusat kecergasan
93210	Aktiviti taman hiburan & taman tema
93297	Kafe siber / pusat internet

Pungutan Harga IHPRP

Pungutan harga pengeluar perkhidmatan merujuk kepada harga transaksi sebenar dan bukannya harga senarai. Harga adalah termasuk diskaun, surc妖 and rebat yang dikenakan kepada pelanggan namun tidak termasuk semua jenis cukai yang dikenakan ke atas jenis perkhidmatan.

Definisi

Definisi yang diguna pakai dalam penyusunan IHPRP adalah berdasarkan kepada Piawaian Klasifikasi Industri Malaysia (MSIC) 2008 Ver.1.0.

Pengiraan Indeks

Harga Asas

Harga asas ialah harga purata jenis perkhidmatan tertentu bagi tempoh empat suku tahun dalam tahun 2010.

Formula Indeks

IHPRP disusun dengan menggunakan formula *Laspeyres base-weighted price*:

$$\frac{\sum_{i=1}^n p_i^t q_i^s}{\sum_{i=1}^n p_i^s q_i^s} = \sum_{i=1}^n \frac{p_i^s q_i^s}{\sum_{i=1}^n p_i^s q_i^s} \times \frac{p_i^t}{p_i^s} = \sum_{i=1}^n w_i^s \times \frac{p_i^t}{p_i^s}$$

di mana:

$$w_i^s = \frac{p_i^s q_i^s}{\sum_{i=1}^n p_i^s q_i^s} = \text{Wajaran nilai relatif}$$

p_i^t = Harga tempoh semasa

p_i^s = Harga tempoh asas

q_i^s = Kuantiti tempoh asas

n = Bilangan item

Formula yang dipilih mempunyai satu kelebihan dapat menentukan harga tertentu atau kumpulan harga di mana ia bertanggungjawab terhadap sesuatu perubahan dalam indeks agregat.

Wajaran

Wajaran item diberikan mengikut perkadarannya sumbangan item kepada jumlah nilai output dalam ekonomi. Wajaran pengeluaran perkhidmatan mengikut MSIC seperti berikut:

Wajaran IHPRP mengikut Subsektor

Sektor	Wajaran	
	2010	2015
Pengangkutan	24.2	22.4
Penginapan dan aktiviti perkhidmatan makanan & minuman	22.9	20.0
Maklumat & komunikasi	29.3	39.6
Aktiviti hartanah	0.5	0.5
Profesional	5.6	4.7
Pendidikan	4.5	3.6
Kesihatan	5.3	4.3
Kesenian, hiburan & rekreasi	7.7	4.9
Jumlah	100.0	100.0

Pengemaskinian Bakul

Wajaran bagi mengemaskini bakul IHPRP (2010=100) diperoleh daripada Banci Ekonomi (BE) 2016 (tahun rujukan 2015). Penyediaan IHPRP bagi tahun asas seperti di atas adalah menggunakan kaedah "*Fixed Basket*". Penyusunan IHPRP adalah menggunakan kaedah "*Chain Index*" dengan mengemaskini bakul sahaja tanpa menukar tahun asas.

Kaedah indeks rantai *Laspeyres* digunakan dalam pengiraan IHPRP dengan menggunakan suku tahun sebelum sebagai suku tahun pautan. Pengemaskinian bakul IHPRP (2010=100) telah menggunakan penemuan Banci Ekonomi (BE) 2016.

Pengasasan semula indeks amat berbeza dengan pengemaskinian bakul. Asas semula indeks hanya menukarkan tempoh asasnya sahaja dan merupakan operasi mekanikal semata-mata, dalam bentuk siri yang lebih mudah untuk pembentangan dan perbandingan atau anggaran. Sementara itu, pengemaskinian bakul IHPRP pula adalah menggunakan

bakul lama (2010=100) dan produk dalam bakul beserta wajarannya dikemaskini untuk menjadi bakul baru (2015=100).

Produk dipilih berdasarkan sumbangan relatif produk berkaitan kepada nilai jualan industri dan hanya produk yang mempunyai wajaran *significant* sahaja dipilih untuk dimasukkan dalam bakul IHPRP pengeluaran perkhidmatan.

Pengemaskinian Bakul IHPRP (2010=100) dan *linking* menggunakan formula berikut:

$$P_{t/10}^{ch} = P_{t/15}^{baru} \times \left(\frac{P_{Q4 17/10}^{lama}}{P_{Q4 17/15}^{baru}} \right)$$

di mana:

$P_{t/10}^{ch}$ = adalah ‘chain index’ yang mengukur perubahan harga dari 2010 kepada sebarang tempoh t

$P_{t/15}^{baru}$ = adalah indeks komposit siri baru yang membandingkan harga pada sebarang tempoh t kepada suku tahun keempat 2017

$P_{Q4 17/10}^{lama}$ = adalah indeks komposit siri lama yang membandingkan harga bagi suku tahun ketiga 2017 kepada harga 2010

$P_{Q4 17/15}^{baru}$ = adalah indeks komposit siri baru yang membandingkan harga bagi suku tahun ketiga 2017 kepada harga 2015

Harga Relatif

Harga relatif bagi setiap jenis perkhidmatan merupakan peringkat asas bagi pengiraan indeks di peringkat yang lebih tinggi. Harga relatif dikira sebagai nisbah peratus harga semasa berbanding harga pada tahun asas dan ia diperoleh dengan membahagikan harga semasa dengan harga tahun asas bagi jenis perkhidmatan yang sama dan didarabkan dengan 100. Purata geometrik bagi harga relatif ini diperoleh untuk membentuk indeks pada peringkat kumpulan perkhidmatan.

Indeks Agregat

IHPRP keseluruhan disusun secara berperingkat dari peringkat Industri (5 digit) kepada Kelas (4 digit), Kumpulan (3 digit), Bahagian (2 digit) dan Seksyen (1 digit).

Perubahan Peratus Indeks

Perubahan peratus indeks dikira berdasarkan formula berikut:

$$y_t = \frac{I_t - I_{t-1}}{I_{t-1}} \times 100$$

di mana:

- y_t = merujuk kepada perubahan peratus indeks
 I_t = adalah indeks pada masa t (tempoh semasa)
 I_{t-1} = adalah indeks pada masa $t-1$ (tempoh sebelumnya)

Kawalan Kualiti

Proses validasi dan prosedur kawalan kualiti pada data harga yang diterima dijalankan bagi menentukan data harga yang diterima adalah munasabah, konsisten dan tepat. Prosedur semakan harga termasuk membuat perbandingan harga semasa dengan harga sebelumnya bagi responden yang sama, di samping harga yang dilaporkan oleh responden lain bagi jenis perkhidmatan yang sama. Harga yang menunjukkan perbezaan yang luar biasa akan dirujuk kepada responden untuk penjelasan dan menentukan ketepatan.

Keperluan Kerahsiaan

Data yang digunakan untuk menyusun Indeks Harga Pengeluar Perkhidmatan dipungut di bawah peruntukan Akta Perangkaan 1965 (Disemak-1989). Akta tersebut menetapkan bahawa kandungan penyata individu adalah sulit. Oleh yang demikian, angka yang telah diagregat sahaja diterbitkan.

Pindaan

Pindaan boleh dibuat kepada angka yang telah diterbitkan berdasarkan kepada data terkini yang diperoleh.

Simbol

QoQ : Suku Tahun ke Suku Tahun
YoY : Tahun ke Tahun

Introduction

The Services Producer Price Index (SPPI) is compiled to measure the average change in the prices of services charged by the local services industry in Malaysia. Besides, the SPPI also serves as a deflator in the compilation of the Index of Services (IoS) and Gross Domestic Product (GDP).

The concept and methodology used in the SPPI compilation are based on the Methodological Guide for Developing Producer Price Indices for Services published by the Organisation for Economic Co-operation & Development (OECD), Eurostat and a joint Eurostat-OECD Task Force.

The Quarterly Services Producer Price Survey provides the data used to compile the SPPI. This survey started in 2008, covering the Transportation subsector and was followed by Information & communication subsector (2011), Real estate activities and professional subsectors (2012) and Education, Health, Accommodation and food & beverage services activities and Arts, entertainment & recreation subsectors (2013).

The sample for this survey comprises selected establishments for the same industry in the Quarterly Services Survey conducted by the Department of Statistics, Malaysia (DOSM). The Services Producer Price Survey covered 3,938 businesses in total.

Scope And Coverage

Selection of Industries

The selection of industries is based on the contribution of output by industries from the Economic Census 2016 (reference year 2015). The selected industries contribute 75.3 per cent to the overall Services sector.

Subsector Covered

There are eight (8) sub-sectors covered and the breakdowns by industries are as follows:

Transportation	
49230	<i>Freight transport by road</i>
50121	<i>Transport of freight overseas & coastal waters, whether scheduled or not</i>
51101	<i>Transport of passenger by air over regular routes & on regular schedules</i>
51201	<i>Transport freight by air over regular routes & regular scheduled</i>
52214	<i>Highway, bridge & tunnel operation services</i>
52291	<i>Forwarding of freight</i>
53100	<i>National postal activities</i>
53200	<i>Courier activities other than national post activities</i>

Accommodation and Food & Beverage Service Activities	
55101	<i>Hotel & hotel resorts</i>
56101	<i>Restaurants & restaurants cum night clubs</i>
56102	<i>Cafeterias / canteen</i>
56103	<i>Fast-food restaurants</i>
56106	<i>Food stalls / hawkers</i>
56210	<i>Event / food caterers</i>
56301	<i>Pub, bars, discotheques, coffee-houses, cocktail lounges & karaoke</i>
56302	<i>Coffee shops</i>

Information & Communication	
61101	<i>Wired telecommunication services</i>
61102	<i>Internet access providers by the operator of the wired infrastructure</i>
61201	<i>Wireless telecommunication activities services</i>
61202	<i>Internet access providers by the operator of the wireless infrastructure</i>
62010	<i>Computer programming activities</i>
62021	<i>Computer consultancy</i>
63112	<i>Data processing activities</i>
63120	<i>Web portals</i>

Real Estate Activities	
68201	<i>Activities of real estate agents & brokers for buying, selling & renting of real estate</i>
68202	<i>Management of real estate on a fee or contract basis</i>

Professional	
69100	<i>Legal activities</i>
69200	<i>Accounting, bookkeeping & auditing activities; tax consultancy</i>
71102	<i>Engineering services</i>

Education	
85102	<i>Pre-primary education (Private)</i>
85104	<i>Primary education (Private)</i>
85212	<i>General school secondary education (Private)</i>
85302	<i>College and university education (Private)</i>
85421	<i>Music & dancing school</i>
85491	<i>Tuition centre</i>

Health	
86101	<i>Hospital activities</i>
86201	<i>General medical services</i>
86202	<i>Specialized medical services</i>
86203	<i>Dental services</i>
86901	<i>Dialysis centre</i>
86902	<i>Medical laboratories</i>

Arts, Entertainment & Recreation	
92000	<i>Gambling & betting activities</i>
93113	<i>Equestrian clubs</i>
93116	<i>Golf courses</i>
93117	<i>Bowling centres</i>
93118	<i>Fitness centres</i>
93210	<i>Activities of amusement parks & theme parks</i>
93297	<i>Cyber café / internet centre</i>

SPPI Price Collection

The price collection of services producer refers to the actual transaction prices, not the list prices. The prices are inclusive of discounts, surcharges and rebates charged to customers but does not include all types of tax imposed on the type of services.

Definition

The definition adopted in the SPPI compilation is based on recommendations of Malaysia Standard Industrial Classification (MSIC) 2008 Ver. 1.0.

Index Calculation

Base Price

Base price is an average of prices for the particular services for a period of four quarters in 2010.

Index Formula

The Laspeyres base-weighted price formula is used to compile the SPPI:

$$\frac{\sum_{i=1}^n p_i^t q_i^s}{\sum_{i=1}^n p_i^s q_i^s} = \sum_{i=1}^n \frac{p_i^s q_i^s}{\sum_{i=1}^n p_i^s q_i^s} \times \frac{p_i^t}{p_i^s} = \sum_{i=1}^n w_i^s \times \frac{p_i^t}{p_i^s}$$

where:

$$w_i^s = \frac{p_i^s q_i^s}{\sum_{i=1}^n p_i^s q_i^s} = \text{Relative value weights}$$

p_i^t = Current period prices

p_i^s = Base period prices

q_i^s = Base period quantities

n = Number of items

The formula selected has an advantage of determining a specific price or group of prices, which is responsible for any changes in the aggregate index.

Weights

The item weights are based on the proportion of their contributions to the total value of output in the economy. The weights by MSIC and commodity sections are as follows:

Weights of SPPI by Subsector

Subsector	Weights	
	2010	2015
Transportation	24.2	22.4
Accommodation and food & beverage service activities	22.9	20.0
Information & communication	29.3	39.6
Real estate activities	0.5	0.5
Professional	5.6	4.7
Education	4.5	3.6
Health	5.3	4.3
Arts, entertainment & recreation	7.7	4.9
Total	100.0	100.0

Updating Basket

The weights for updating SPPI (2010=100) obtained from the Economic Census 2016 (reference year 2015). The SPPI (2010=100) was prepared using the Fixed Basket method. The compilation of the indices use the Chain Index method, which updates its basket without changing the base year.

Laspeyres chain index method used in the calculation of the SPPI which applied previous quarter as the linkaged quater. The updating of SPPI basket (2010=100) used the findings of the Economic Cencus 2016.

Rebasing is different from the process of updating basket. It only changes its base period and it is purely a mechanical operation in forming a more convenient series for presentations and comparisons or estimates. Whereas, SPPI basket updates are using the old basket (2010=100) and updating products and its weight to become a new basket (2015=100).

Products are selected based on relative product and contribution to the industry's sales value and only products with significant weights are selected for inclusion in the SPPI basket.

Updated SPPI Basket (2010=100) and linking using the following formula:

$$P_{t/10}^{ch} = P_{t/15}^{new} \times \left(\frac{P_{Q417/10}^{previous}}{P_{Q417/15}^{new}} \right)$$

where:

- $P_{t/10}^{ch}$ = is a chain index that measures price changes from 2010 to any period t
- $P_{t/15}^{new}$ = is a new series of composite index comparing prices at any period t to fourth quarter 2017
- $P_{Q417/10}^{previous}$ = is the previous series of composite index comparing prices of fourth quarter 2017 to 2010 prices
- $P_{Q417/15}^{new}$ = is a new series of composite index comparing prices of fourth quarter 2017 to 2015 prices

Price Relative

The price relative for each type of service provides the basic level for the calculation of higher level indices. It is calculated as percentage ratios of the current prices to those prevailing in the base period and it is obtained by dividing the current prices by the corresponding base year prices and multiply them by 100. The geometric mean of these price relatives is obtained to form indices at group level.

Aggregated Index

The overall SPPI is built up progressively from Industry level (5 digit) to Class (4 digit), Group (3 digit), Division (2 digit) and Section (1 digit).

Percentage Change of Index

The percentage change of the index is calculated based on the following formula:

$$y_t = \frac{I_t - I_{t-1}}{I_{t-1}} \times 100$$

where:

- y_t = refers to index percentage change
 I_t = is the index at time t (current period)
 I_{t-1} = is the index at time $t-1$ (previous period)

Quality Control

Validation process and quality-control procedure on the prices received are carried out to evaluate whether the prices are reasonable, consistent and accurate. The checking procedures include comparing current prices against the previous prices for the same respondents as well as with prices reported by other respondents for the same type of services. Prices that display unusual variations are clarified with respondents to ensure the accuracy.

Confidentiality Requirements

The data used for the compilation of Services Producer Price Index have been collected under the provisions of the Statistics Act 1965 (Revised-1989). The Act stipulates that the contents of individual return are confidential. In conformity with the stipulations of this Act, only aggregated figures are published.

Revisions

Revisions will be made to the published figures based on the latest data available.
