JUNE 2024

Announcement

The Department of Statistics Malaysia (DOSM) has launched OpenDOSM NextGen as a medium that provides catalogue data and visualisations to facilitate users' analysis and can be accessed through https://open.dosm.gov.my.

DOSM is conducting the Agricultural Census 2024. Please visit https://www.myagricensus.gov.my/ for more information. The theme is "Agriculture Census, Key to Agricultural Development."

The Government of Malaysia has declared National Statistics Day (MyStats Day) on October 20th each year. MyStats Day theme is "Statistics is the Essence of Life". DOSM commemorates its 75th Diamond Jubilee in 2024.

DEPARTMENT OF STATISTICS MALAYSIA

The monthly Labour Force Report, Malaysia, presents the statistics of the labour force, employment and unemployment obtained from the Labour Force Survey (LFS). The implementation of the LFS is based on the guidelines and recommendations of the International Labour Organization (ILO) with reference to the Surveys of Economically Active Population, Employment, Unemployment and Underemployment: An ILO Manual on Concepts and Methods.

The labour force statistics are used as a vital input for labour market analysis, policy formulation, as well as planning, implementing, and monitoring programmes particularly related to human resource development. These statistics also serve as essential references for researchers, economists, academicians, the private sector, and individuals involved in research related to employment and the labour market.

The Labour Force Report for June 2024 describes the labour supply condition based on the current situation. The report also elaborates on the month-on-month changes to examine the immediate effects of recent events. In addition, annual changes from the same month of the previous year are also reported.

The Department of Statistics Malaysia gratefully acknowledges the cooperation and contribution rendered by all parties in making this publication a success. Every piece of feedback and suggestion towards improving future reports is highly appreciated.

DATO' SRI DR. MOHD UZIR MAHIDIN
Chief Statistician Malaysia

CONTENTS

Actively unemployed	:	Persons who were available for work and were actively looking for a job during the reference week.
Category of skills	:	For reporting purposes, the category of occupation is regrouped into three levels of skills based on the Malaysia Standard Classification of Occupation (MASCO) 2013 as below:

Skilled workers:

1. Managers;

2. Professionals; and

3. Technicians and associate professionals.

Semi-skilled workers:

4. Clerical support workers;

5. Services and sales workers;

6. Skilled agricultural, forestry, livestock, and fishery workers;

7. Craft and related trades workers; and

8. Plant and machine operators and assemblers.

Low-skilled workers:

9. Elementary occupations.

Starting in January 2022, the category of occupation is based on the Malaysia Standard Classification of Occupation (MASCO) 2020 with an addition of group 0 - Armed forces occupations.

Economic activity	:	Classification of industries according to the Malaysia Standard Industrial Classification (MSIC) 2008 version 1.0 into five main sectors namely Agriculture, Mining & quarrying, Manufacturing, Construction and Services. In the meantime, Manufacturing and Services are further disaggregated into sub-sectors.
Employed	:	All persons who, at any time during the reference week worked at least one hour for pay, profit or family gain either as an employer, employee, own-account worker or unpaid family worker.
Employee	:	A person who works for a public or private employer and receives regular remuneration in wages, salary, commission, tips or payment in kind.
Employer	:	A person who operates a business, a plantation or other trade and employs one or more workers to help him.
Employment-to-population ratio	:	The proportion of the employed population to working-age population.
Inactively unemployed	:	Did not look for work because they believed no work was available or that they were not qualified; Would have looked for work if they had not been temporarily ill or had it not been for weather conditions; and had looked for work prior to the reference week and were waiting for the result of job applications.

GLOSSARY

Labour force participation rate	:	The ratio of the labour force to the working-age population, expressed as a percentage.
Outside labour force	:	All persons not classified as employed or unemployed are classified as outside labour force. This category consists of housewives, students (including those going for further studies), retired, disabled persons and those not interested in looking for a job.
Own-account worker	:	A person who operates his own farm, business or trade without employing any paid workers in the conduct of his farm, trade or business.
Skill-related underemployment	:	Those with tertiary education and working in the semi-skilled and low-skilled categories.
Time-related underemployment	:	A group of people who were employed less than 30 hours per week during the reference week because of the nature of their work or due to insufficient work and were able and willing to accept additional hours of work. Persons who were employed more than 30 hours per week during the reference week are considered to be in full employment.
Unemployed	:	Those who did not work during the reference week were classified into two groups, which are actively and inactively unemployed.
Unemployment rate	:	The proportion of the unemployed population to the total population in the labour force, expressed as a percentage.
Unpaid family worker	:	A person who works without pay or wages on a farm, business or trade operated by another member of the family.

CONCEPTS AND DEFINITIONS

What is Labour Force Survey (LFS)?

Labour Force Survey (LFS) was conducted to collect information on the structure and distribution of labour force, employment and unemployment from the perspective of labour supply.

LFS encompasses both urban and rural areas for all administrative districts within all states in Malaysia using multi-modal data collection approach through the personal interview and a Computer-Assisted Telephone Interview (CATI).

The LFS are conducted based on the standard guidelines and recommendations of the International Labour Organization (ILO).

The survey population comprises persons who live in the private living quarters, hence excludes persons residing in institutions such as hotels, hospitals, hostels, prisons, and workers residing in construction worksite.

The working age for the analysis of LFS in Malaysia refers to household members between the age of 15 to 64 years during the reference week, who are either in the labour force or outside the labour force.

LABOUR FORCE

- The population in the working age group of 15 to 64 years (in completed years at last birthday).
- Either employed or unemployed in the reference week.

EMPLOYED

- Persons who, at any time during the reference week worked at least one hour for pay, profit or family gain (as an employer, employee, own-account worker or unpaid family worker).
- Persons who did not work during the reference week because of illness, injury, bad weather, leave, labour dispute and social or religious reasons but had a job, farm, enterprise or other family enterprise to return to.
- Those on temporary lay-off with pay who would definitely be called back to work.

UNEMPLOYED

- Those who did not work during the reference week but are interested to work and seeking for a job.
- Classified into two groups which are actively and inactively unemployed.

OUTSIDE LABOUR FORCE

- All persons not classified as employed or unemployed.
- Example: housewives, students, retirees, disabled persons and those not interested in looking for job.

UNEMPLOYMENT RATE

- The proportion of the unemployed population to the total population in labour force.
- Percentage of the unemployed population in the labour force.

LABOUR FORCE PARTICIPATION RATE

- The economic activity of a population depends on the demographic characteristics of that population.
- The proportion of the economically active population, hence differs between sub-groups of that population.
- These variations are measured by specific activity rates termed as labour force participation rate.
- Labour force participation rate is defined as the ratio of the labour force to the working age population (15 to 64 years), expressed as a percentage.

SEASONAL ADJUSTMENT

- Time-series data are very useful for economist, policy & decision makers and time-series analysts to identify the important features of economics series such as direction, turning point and consistency between other economic indicators. Sometimes this feature is difficult to observe because of seasonal movements. Thus, if seasonal effect can be removed, the behaviour of the series would be better viewed. The estimation and removal of the seasonal effects is called seasonal adjusment.

- Seasonal adjustment is a process to identify and to remove the regular within-a-year seasonal pattern, which may also include the influences of moving holidays and working/trading days effect in each period. The ultimate objective of the process is to highlight the underlying trends and short-term movements in the series.

- In Malaysia, most of the time series data is affected by seasonal effects. Hence, to eliminate the seasonal effect as well as to seasonally adjust the Malaysian economic time series data, a standard seasonal adjustment package, X-12 ARIMA was used by the Department of Statistics Malaysia.

KEY REVIEWS

- The number of **employed persons** continued to trend up in June 2024, increasing by **0.2 per cent (+25.9 thousand persons)** to **16.61 million persons** (May 2024: 16.58 million persons). The **employment-to-population ratio**, which indicates the ability of the economy to create employment, remained at **68.0 per cent** in June 2024 as in the previous month.

- By economic sector, the Services sector continued to exhibit increases in the number of employed persons, especially in Wholesale & retail trade; Food & beverage services; and Information & communication activities. A similar trend of employed persons was also observed in the Manufacturing, Construction, Mining & quarrying and Agriculture sectors.

- From the total employed persons during the month, **75.0 per cent** were in the **employees'** category. This category registered a monthly growth of **0.1 per cent (+15.3 thousand persons)** to **12.46 million persons** (May 2024: 12.44 million persons). On the same note, the **own-account workers** category remained on a positive trend with a **0.3 per cent increase (+9.7 thousand persons)** to **3.06 million persons** (May 2024: 3.05 million persons).

- The number of **unemployed persons** in June 2024 fell by **0.1 per cent (-0.8 thousand persons)** month-on-month to **565.3 thousand persons** (May 2024: 566.1 thousand persons). The **unemployment rate** during the month stood at **3.3 per cent** as of May 2024.

- In June 2024, the number of **labour force** continued to register month-on-month increase, rising by **0.1 per cent (+25.2 thousand persons)** to **17.17 million persons** (May 2024: 17.15 million persons). Therefore, the **labour force participation rate (LFPR)** during the month edged up by **0.1 percentage points** to **70.4 per cent** (May 2024: 70.3%).

- The number of persons **outside the labour force** declined slightly by **0.02 per cent** or **1.2 thousand persons** to **7.23 million persons** in June 2024 (May 2024: 7.23 million persons). **Housework/ family responsibilities** were the main reasons for the outside labour force, with **42.8 per cent**, followed by the **schooling/ training** reason at **41.4 per cent**.

- Malaysia's economy was observed to be steady, with robust economic activities that were contributed by the continuous domestic and export factors, a healthier job market and positive growth in the Agriculture and Construction sectors. The improvement in business activities is also seen to attract more investment and trade in Malaysia, further boosting more job creation, which will have a positive impact on Malaysia's labour market. Therefore, the country's labour market is foreseen to continue to be in a stable growth momentum due to the country's encouraging economic position as well as the continuous increase in tourist arrivals and better growth in all sectors of the economy.

Note: The monthly Labour Force Survey indicators are still using the estimated population data of the Malaysia Population and Housing Census, 2010

THE EXPANSION IN MALAYSIA'S ECONOMY HAD BOLSTERED THE COUNTRY'S LABOUR FORCE, FURTHER HEIGHTENED THE EMPLOYMENT, WHILE UNEMPLOYED CONTINUING TO REDUCE IN JUNE 2024

Malaysia's economy was viewed as having positive growth in June 2024, supported by the recovery of world trade and economic activity expansion, which further improved the country's labour market. According to RHB Investment Bank, the recovery of China's economy was the main reason for a better outlook for Malaysia's export products since there was a high demand for manufactured goods from China, especially for electrical and electronics (E&E) and machinery and transport equipment products[1]. The continued operation in the Manufacturing sector had led to stabilization of the country's economy and further boosted the labour force growth due to the enlargement of workforce requirements by industrial production to fulfil the increasing products demand. The increase in job opportunities to fulfil the employment demand not only improved the country's economy but also encouraged a gain in the number of employed persons in June 2024 the unemployed further declined.

Furthermore, to address the labour force concern, the government had implemented various initiatives to strengthen the labour force during the half of 2024. The government's intervention on job losses had escalated employment in June 2024. Human Resources Minister Steven Sim stated that a total of 65,674 workers were placed in the national job market through the Job Resettlement Programme by the Social Security Organisation (SOCSO) from January until June 2024[2]. The job loss issue has been a matter of critical concern in the nation's labour force recently. To ensure the stability of Malaysia's economy and the labour market, the government took the initiative to carry out many programmes such as career carnivals, skills development programmes, and many more to improve Malaysia's employment. Thus, this had helped the valuable jobseekers to obtain information on various job opportunities, further contributing to a better growth of the labour force during the month.

In addition, the increase in Malaysia's tourism sector had contributed to a thriving economic outlook and further burgeoning the labour market. The announcement by the government on 'Visit Malaysia 2026', which aims to attract more tourists from abroad over the upcoming year, has improved the tourism-related industries. Thus, the increase in tourism-related industries has contributed to the expansion of Malaysia's businesses as well as the job opportunities. This has led to a higher number of employed persons, while the unemployed continues to reduce in June 2024.

As for the Leading Index (LI) in May 2024, it remained on a positive growth trend for six consecutive months, with a rise of 3.8 per cent to 114.2 points as against the same month of the preceding year (May 2023: 110.0 points). On a monthly basis, LI's increased by 0.8 per cent during the month, as in April 2024. The smoothed growth rate of the LI for May 2024 remained consistent beyond the 100.0 point trend, reflecting a resilient economy underpinned by increasing tourism activities and promising external demand. Meanwhile, the monthly external trade indicators for exports and imports in June 2024, both recorded a decline of 1.6 per cent (May 2024: +11.6%) and -5.4 per cent (May 2024: +10.4%), respectively.

2 | The number of employed persons continued to trend up in June 2024

The number of **employed persons** continued to trend up in June 2024, increasing by **0.2 per cent (+25.9 thousand persons)** to **16.61 million persons** (May 2024: 16.58 million persons). Based on the seasonally adjusted terms, the number of employed persons rose by 0.4 per cent. Year-on-year, the number of employed persons recorded a 1.8 per cent growth, or equivalent to 297.9 thousand persons, compared to 16.31 million persons recorded in June 2023.

By economic sector, the Services sector continued to exhibit increases in the number of employed persons, especially in Wholesale & retail trade; Food & beverage services; and Information & communication activities. A similar trend of employed persons was also observed in the Manufacturing, Construction, Mining & quarrying and Agriculture sectors.

The **employment-to-population ratio**, which indicates the ability of the economy to create employment, remained at **68.0 per cent** in June 2024 as in the previous month. Subsequently, the ratio went up by 0.4 percentage points from 67.6 per cent in June 2023 **[Chart 1]**.

Chart 1: Employed persons and employment-to-population ratio, January 2019 - June 2024
From the total employed persons during the month, **75.0 per cent** were in the **employees'** category. This category registered a monthly growth of **0.1 per cent (+15.3 thousand persons)** to **12.46 million persons** (May 2024: 12.44 million persons). On the same note, the **own-account workers** category remained on a positive trend with a **0.3 per cent** increase **(+9.7 thousand persons)** to **3.06 million persons** (May 2024: 3.05 million persons). This group consists mostly of daily income earners working as small business operators, such as retailers, hawkers and sellers in the market, as well as smallholders **[Chart 2]**.

- 3,060.0 (18.4%)
- 12,460.6 (75.0%)

● Employees ● Own-account workers ● Unpaid family workers ● Employers
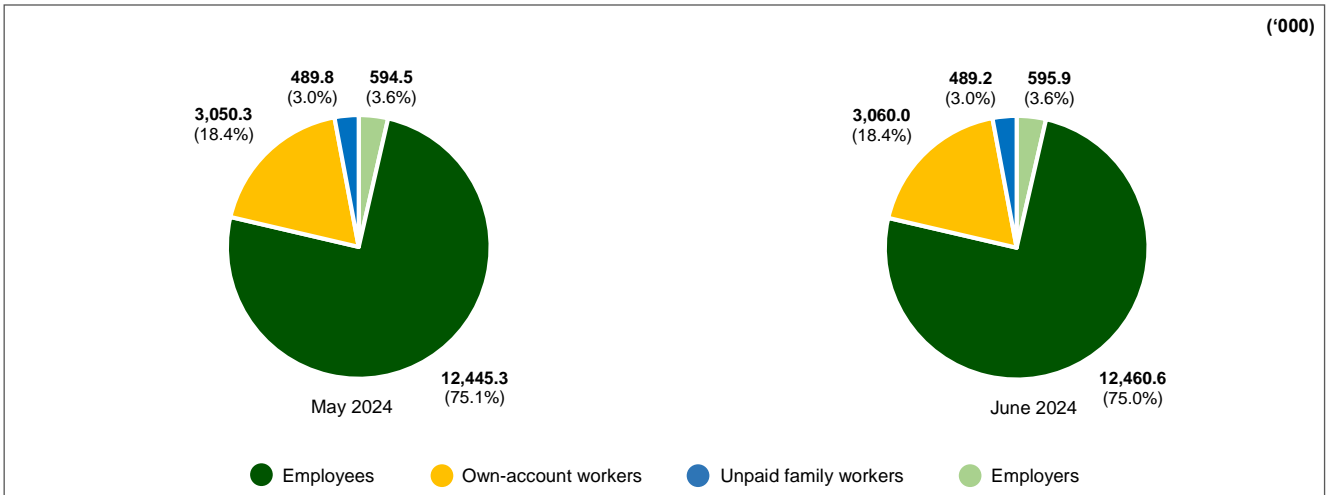

In June 2024, there was a **2.1 per cent** decrease **(-1.7 thousand people)** in the number of **employed persons who were temporarily not working**, bringing the total to **79.4 thousand persons** (May 2024: 81.0 thousand persons). Compared to June 2023, this number fell by 1.2 per cent (-1.0 thousand persons) from the previous year's number of 80.4 thousand persons. This group of persons, who were most likely unable to work temporarily, were not classified as unemployed as they still had work to return to.

3 **The unemployment rate stood at 3.3 per cent in June 2024**

The number of **unemployed persons** in June 2024 fell by **0.1 per cent (-0.8 thousand persons)** month-on-month to **565.3 thousand persons** (May 2024: 566.1 thousand persons). The **unemployment rate** during the month stood at **3.3 per cent** as of May 2024. In terms of seasonally adjusted estimates, the number of unemployed persons edged down by 1.9 per cent, recording 3.2 per cent of the unemployment rate.

On an annual basis, the number of unemployed persons also dropped by 2.8 per cent (-16.4 thousand persons) as compared to the same month of the previous year (June 2023: 581.7 thousand persons). Accordingly, the unemployment rate declined by 0.1 percentage points as against 3.4 per cent recorded in June last year **[Chart 3]**.

Chart 3: Unemployed persons and unemployment rate, 1982 - 2023 and January 2021 - June 2024

● Unemployed ● Unemployment rate (%)
In terms of the unemployment category, the **actively unemployed**, or those who were available for work and actively seeking jobs, made up **79.9 per cent** of the total unemployed persons in June 2024. This group decreased marginally by **0.02 per cent** or equivalent to **0.1 thousand persons** to record **451.9 thousand persons** (May 2024: 452.0 thousand persons). Out of the total of actively unemployed, **61.5 per cent** were those who were **unemployed for less than three months**, while **7.0 per cent** were those who had been **unemployed for more than a year[3]**. Similarly, the **inactively unemployed** or those who believed that no jobs were available registered a month-on-month decline of **0.5 per cent** **(-0.6 thousand persons)** to **113.4 thousand persons** (May 2024: 114.0 thousand persons) **[Chart 4]**.

Chart 4: Unemployed category and duration of unemployment, May 2024 and June 2024
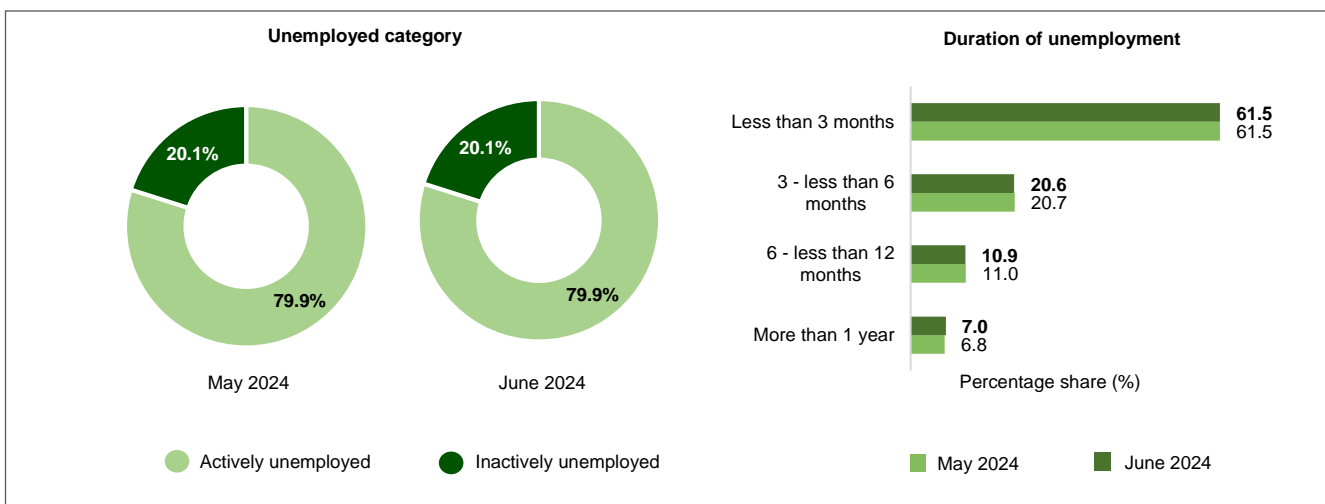

In June 2024, the unemployment rate for youth aged **15 to 24 years** stood at **10.5 per cent**, recording the number of **unemployed youths** at **305.0 thousand persons** (May 2024: 10.5%; 305.6 thousand persons). In the meantime, the unemployment rate for youth aged **15 to 30 years** remained at **6.5 per cent**, registering **434.2 thousand unemployed youths** (May 2024: 6.5%; 434.6 thousand persons) **[Chart 5]**.

Chart 5: Unemployment rate by selected age groups, 1982 - 2023 and January 2021 - June 2024

https://www.ilo.org/wcmsp5/groups/public/---dgreports/---stat/documents/publication/wcms_422451.pdf

In June 2024, the number of **labour force** continued to register month-on-month increase, rising by **0.1 per cent (+25.2 thousand persons)** to **17.17 million persons** (May 2024: 17.15 million persons). Therefore, the **labour force participation rate (LFPR)** during the month edged up by **0.1 percentage points** to **70.4 per cent** (May 2024: 70.3%). In seasonally adjusted estimates, the number of labour force rose by 0.3 per cent, with a higher LFPR of 70.4 per cent.

As compared to the same month last year, the number of labour force remained stable, with an increase of 1.7 per cent (+281.7 thousand persons) from 16.89 million persons registered in June 2023. Accordingly, the LFPR climbed by 0.4 percentage points as against 70.0 per cent recorded in June last year **[Chart 6]**.

Chart 6: Labour force and LFPR, 1982 - 2023 and January 2021 - June 2024
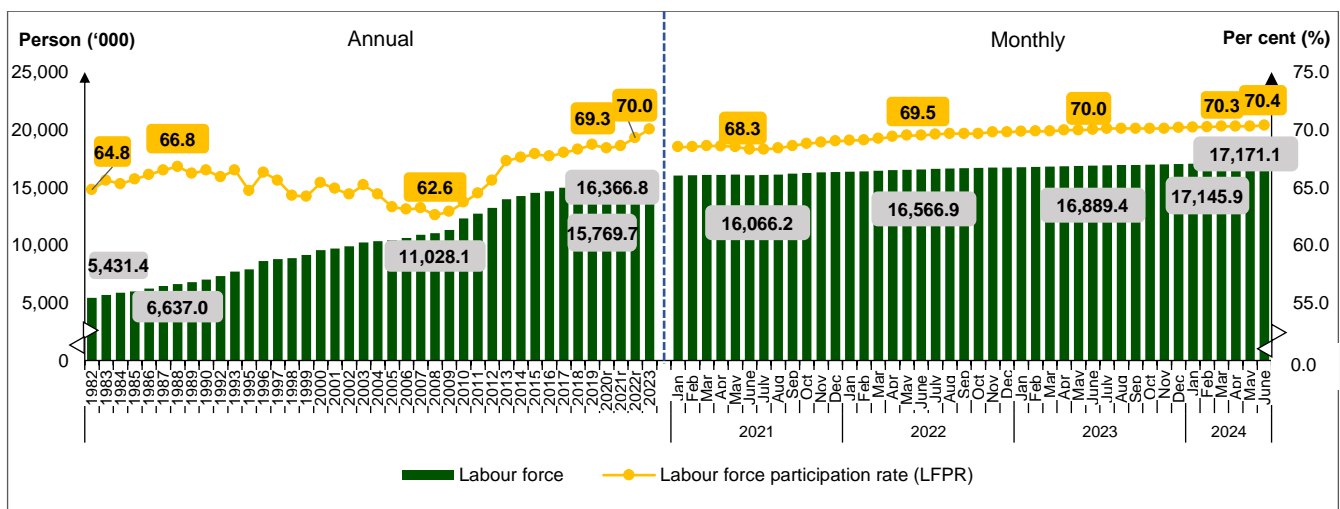

In terms of labour force by sex, both **male** and **female labour force** continued to rise during the month to record **10.50 million persons** (May 2024: 10.48 million persons) and **6.68 million persons** (May 2024: 6.67 million persons), respectively. In terms of LFPR, both **males** and **females LFPR** was unchanged at **83.2 per cent** and **56.6 per cent**, respectively.

On a yearly comparison, both the male and female labour force remained on a positive trend, posting an increase of 1.7 per cent (June 2023: 10.32 million persons) and 1.6 per cent (June 2023: 6.57 million persons), respectively. Accordingly, male and female LFPR both registered an increase of 0.3 percentage points from 82.9 per cent and from 56.3 per cent recorded in June 2023, respectively **[Chart 7]**.

---
6 **LOOKING AHEAD**

Malaysia's economy is seen to be strengthening following the advanced estimates of Gross Domestic Product (GDP) estimated to grow by 5.8 per cent in the second quarter of 2024, up from 4.2 per cent in the previous quarter[4]. The economic performance in the second quarter also showed that the country's economic activities were becoming more active, with all sectors recording positive growth and the

---

[4] *https://www.hmetro.com.my/bisnes/2024/07/1113117/kekal-momentum-pertumbuhan*

Agriculture and Construction sectors growing rapidly. This situation is reflected by more people getting jobs as well as business transactions that are getting more vibrant. In addition, the country's economy is also expected to maintain its growth momentum, which is supported by domestic and export factors with a positive outlook for the next 6 months of the current year.

Following the country's improving economic position, Malaysia is seen as on the right track to attract more investment and trade, thereby catapulting the country's economy to a better level and being able to return to become a regional economic power if the GDP projection of 5.8 per cent can be achieved. This situation is also in line with business performance expectations, where businesses anticipate favourable business conditions in the second quarter of 2024 due to the continued upbeat business performance of the industrial sector. This will also have a positive impact on the country's labour market, with more job opportunities created which in turn will encourage more labour participation in the market.

Therefore, the country's labour market is foreseen to continue to be in a stable growth momentum due to the country's encouraging economic position as well as the continuous increase in tourist arrivals and better growth in all sectors of the economy.

TABLES

LABOUR FORCE, MALAYSIA
JUNE 2024

9: Elementary occupations

4. [3]For 2011 - 2015, category of occupation are classified according to the "Malaysia Standard Classification of Occupations (MASCO) 2008" as follows:
1: Managers
2: Professionals
3: Technicians and associate professionals
4: Clerical support workers
5: Service workers and shop and market sales workers
6: Skilled agricultural, forestry and fishery workers
7: Craft and related trades workers
8: Plant and machine-operators and assemblers
9: Elementary occupations

5. [4]For 2016 - 2021, category of occupation are classified according to the "Malaysia Standard Classification of Occupations (MASCO) 2013" as follows:
1: Managers
2: Professionals
3: Technicians and associate professionals
4: Clerical workers
5: Service and sales workers
6: Skilled agricultural, forestry, livestock and fishery workers
7: Craft and related trades workers
8: Plant and machine-operators and assemblers
9: Elementary occupations

6. [5]For 2022 onwards, categories of occupation are classified according to the "Malaysia Standard Classification of Occupations (MASCO) 2020"

7. [r] Revision based on the current population estimates from Population and Housing Census 2020

Notes:

1. Labour Force Survey indicators for 2019 and previously still using the estimated population data of the Malaysia Population and Housing Census, 2010

2. **[1]For 1982 - 2000, industry was classified according to the "Malaysia Industrial Classification, (Updated) 1972" as follows:**

A: Agriculture, forestry, livestock and fishing
B: Mining and quarrying
C: Manufacturing
D: Electricity, gas and water
E: Construction
F: Wholesale and retail trade, restaurants and hotels
G: Transport, storage and communications
H: Finance, insurance, real estate and business services
I: Community, social and personal services

3.**[2]For 2001 - 2009, industry was classified according to the "Malaysia Standard Industrial Classification (MSIC) 2000" as follows:**

A: Agriculture, hunting and forestry
B: Fishing
C: Mining and quarrying
D: Manufacturing
E: Electricity, gas and water supply
F: Construction
G: Wholesale and retail trade; repair of motor vehicles, motorcycles and personal and household goods
H: Hotels and restaurants
I: Transport, storage and communications
J: Financial intermediation
K: Real estate, renting and business activities
L: Public administration and defence; compulsory social security
M: Education
N: Health and social work
O: Other community, social and personal service activities
P: Private households with employed persons

4. **[3]For 2010 - 2022, industry was classified according to the "Malaysia Standard Industrial Classification (MSIC) 2008" as follows:**

A: Agriculture, forestry and fishing
B: Mining and quarrying
C: Manufacturing
D: Electricity, gas, steam and air conditioning supply
E: Water supply; sewerage, waste management and remediation activities
F: Construction
G: Wholesale and retail trade, repair of motor vehicles and motorcycles
H: Transportation and storage
I: Accommodation and food service activities
J: Information and communication

K: Financial and insurance/takaful activities
L: Real estate activities

M: Professional, scientific and technical activities
N: Administrative and support service activities
O: Public administration and defence; compulsory social security
P: Education
Q: Human health and social work activities
R: Arts, entertainment and recreation
S: Others service activities
T: Activities of households as employers

5. **[4]For year 2011-2019 & 2021-2023, total includes 'Activities of extraterritorial organizations and bodies'

6. [r] Revision based on the current population estimates from Population and Housing Census 2020

Notes:

1. Labour Force Survey indicators for 2019 and previously still using the estimated population data of the Malaysia Population and Housing Census, 2010

2. [1]**For 1982 - 2000, industry was classified according to the "Malaysia Industrial Classification, (Updated) 1972" as follows:**

A: Agriculture, forestry, livestock and fishing
B: Mining and quarrying
C: Manufacturing
D: Electricity, gas and water
E: Construction
F: Wholesale and retail trade, restaurants and hotels
G: Transport, storage and communications
H: Finance, insurance, real estate and business services
I: Community, social and personal services

3.[2]**For 2001 - 2009, industry was classified according to the "Malaysia Standard Industrial Classification (MSIC) 2000" as follows:**

A: Agriculture, hunting and forestry
B: Fishing
C: Mining and quarrying
D: Manufacturing
E: Electricity, gas and water supply
F: Construction
G: Wholesale and retail trade; repair of motor vehicles, motorcycles and personal and household goods
H: Hotels and restaurants
I: Transport, storage and communications
J: Financial intermediation
K: Real estate, renting and business activities
L: Public administration and defence; compulsory social security
M: Education
N: Health and social work
O: Other community, social and personal service activities
P: Private households with employed persons

4. [3]**For 2010 - 2022, industry was classified according to the "Malaysia Standard Industrial Classification (MSIC) 2008" as follows:**

A: Agriculture, forestry and fishing
B: Mining and quarrying
C: Manufacturing
D: Electricity, gas, steam and air conditioning supply
E: Water supply; sewerage, waste management and remediation activities
F: Construction
G: Wholesale and retail trade, repair of motor vehicles and motorcycles
H: Transportation and storage
I: Accommodation and food service activities
J: Information and communication
K: Financial and insurance/takaful activities
L: Real estate activities
M: Professional, scientific and technical activities
N: Administrative and support service activities
O: Public administration and defence; compulsory social security
P: Education
Q: Human health and social work activities
R: Arts, entertainment and recreation
S: Others service activities
T: Activities of households as employers

5. [4]For year 2011-2019 & 2021-2023, total includes 'Activities of extraterritorial organizations and bodies'

6. [r] Revision based on the current population estimates from Population and Housing Census 2020
