LABOUR FORCE REPORT MALAYSIA

OCTOBER 2025

Announcement

Malaysia, for the first time, ranked as number one (1) globally in the biennial Open Data Inventory (ODIN) 2024/25 report released by Open Data Watch (ODW), surpassing 197 other countries. This achievement marks a significant leap from its 67th position in the ODIN 2022/23 assessment.

PREFACE

The monthly Labour Force Report, Malaysia, presents statistics of the labour force, employment and unemployment obtained from the Labour Force Survey (LFS) through a household approach. The implementation of the LFS is based on the guidelines and recommendations of the International Labour Organization (ILO) with reference to the Surveys of Economically Active Population, Employment, Unemployment and Underemployment: An ILO Manual on Concepts and Methods.

The labour force statistics are vital input for labour market analysis, policy formulation, as well as planning, implementing, and monitoring programmes, particularly related to human resource development. These statistics also serve as essential references for researchers, economists, academicians, the private sector, and individuals involved in research related to employment and the labour market.

The Labour Force Report for October 2025 describes the labour supply condition based on the current situation. The report also elaborates on the month-on-month changes to examine the immediate effects of recent events. In addition, annual changes from the same month of the previous year are also reported.

The Department of Statistics Malaysia gratefully acknowledges the cooperation and contribution rendered by all parties in making this publication a success. Every piece of feedback and suggestion towards improving future reports is highly appreciated.

DATO' SRI DR. MOHD UZIR MAHIDIN
Chief Statistician Malaysia

GLOSSARY

Actively unemployed	:	Persons who were available for work and were actively looking for a job during the reference week.
Category of skills	:	<p>For reporting purposes, the category of occupation is regrouped into three levels of skills based on the Malaysia Standard Classification of Occupation (MASCO) 2013 as below:</p> <p>Skilled workers:</p> <ol style="list-style-type: none"> 1. Managers; 2. Professionals; and 3. Technicians and associate professionals. <p>Semi-skilled workers:</p> <ol style="list-style-type: none"> 4. Clerical support workers; 5. Services and sales workers; 6. Skilled agricultural, forestry, livestock, and fishery workers; 7. Craft and related trades workers; and 8. Plant and machine operators and assemblers. <p>Low-skilled workers:</p> <ol style="list-style-type: none"> 9. Elementary occupations. <p>Starting in January 2022, the category of occupation is based on the Malaysia Standard Classification of Occupation (MASCO) 2020 with the addition of group 0 - Armed Forces occupations.</p>
Economic activity	:	Classification of industries according to the Malaysia Standard Industrial Classification (MSIC) 2008 version 1.0 into five main sectors: Agriculture, Mining & quarrying, Manufacturing, Construction and Services. In the meantime, Manufacturing and Services are further disaggregated into sub-sectors.
Employed	:	All persons who, at any time during the reference week worked at least one hour for pay, profit or family gain either as an employer, employee, own-account worker, or unpaid family worker.
Employee	:	A person who works for a public or private employer and receives regular remuneration in wages, salary, commission, tips or payment in kind.
Employer	:	A person who operates a business, a plantation or other trade and employs at least one employee in his business or trade.
Employment-to-population ratio	:	The proportion of the employed population to working-age population.

GLOSSARY

Inactively unemployed	:	Did not look for work because they believed no work was available or that they were not qualified; Would have looked for work if they had not been temporarily ill or had it not been for weather conditions; and had looked for work prior to the reference week and were waiting for the result of job applications.
Labour force participation rate	:	The ratio of the labour force to the working-age population, expressed as a percentage.
Outside labour force	:	All persons not classified as employed or unemployed are classified as outside the labour force. This category consists of housewives, students (including those going for further studies), retired, disabled persons and those not interested in looking for a job.
Own-account worker	:	A person who operates his own farm, business or trade without employing any paid workers to conduct his farm, trade or business.
Skill-related underemployment	:	Those with tertiary education and working in the semi-skilled and low-skilled categories.
Time-related underemployment	:	A group of people who were employed less than 30 hours per week during the reference week because of the nature of their work or due to insufficient work and were able and willing to accept additional hours of work. Persons who were employed more than 30 hours per week during the reference week are considered to be in full employment.
Unemployed	:	Those who did not work during the reference week were classified into two groups, which are actively and inactively unemployed.
Unemployment rate	:	The proportion of the unemployed population to the total population in the labour force, expressed as a percentage.
Unpaid family worker	:	A person who works without pay or wages on a farm, business or trade operated by another member of the family.

MINISTRY OF ECONOMY
DEPARTMENT OF STATISTICS MALAYSIA

CONCEPTS AND DEFINITIONS

What is Labour Force Survey (LFS)?

Labour Force Survey (LFS) was conducted to collect information on the structure and distribution of labour force, employment and unemployment from the perspective of labour supply.

LFS encompasses both urban and rural areas for all administrative districts within all states in Malaysia using multi-modal data collection approach through the personal interview and a Computer-Assisted Telephone Interview (CATI).

The LFS are conducted based on the standard guidelines and recommendations of the International Labour Organization (ILO).

The survey population comprises persons who live in the private living quarters, hence excludes persons residing in institutions such as hotels, hospitals, hostels, prisons, and workers residing in construction worksite.

The working age for the analysis of LFS in Malaysia refers to household members between the age of 15 to 64 years during the reference week, who are either in the labour force or outside the labour force.

LABOUR FORCE

- The population in the working age group of 15 to 64 years (in completed years at last birthday).
- Either employed or unemployed in the reference week.

EMPLOYED

- Persons who, at any time during the reference week worked at least one hour for pay, profit or family gain (as an employer, employee, own-account worker or unpaid family worker).
- Persons who did not work during the reference week because of illness, injury, bad weather, leave, labour dispute and social or religious reasons but had a job, farm, enterprise or other family enterprise to return to.
- Those on temporary lay-off with pay who would definitely be called back to work.

UNEMPLOYED

- Those who did not work during the reference week but are interested to work and seeking for a job.
- Classified into two groups which are actively and inactively unemployed.

OUTSIDE LABOUR FORCE

- All persons not classified as employed or unemployed.
- Example: housewives, students, retirees, disabled persons and those not interested in looking for job.

UNEMPLOYMENT RATE

- The proportion of the unemployed population to the total population in labour force.
- Percentage of the unemployed population in the labour force.

LABOUR FORCE PARTICIPATION RATE

- The economic activity of a population depends on the demographic characteristics of that population.
- The proportion of the economically active population, hence differs between sub-groups of that population.
- These variations are measured by specific activity rates termed as labour force participation rate.
- Labour force participation rate is defined as the ratio of the labour force to the working age population (15 to 64 years), expressed as a percentage.

SEASONAL ADJUSTMENT

- Time-series data are very useful for economist, policy & decision makers and time-series analysts to identify the important features of economics series such as direction, turning point and consistency between other economic indicators. Sometimes this feature is difficult to observe because of seasonal movements. Thus, if seasonal effect can be removed, the behaviour of the series would be better viewed. The estimation and removal of the seasonal effects is called seasonal adjustment.
- Seasonal adjustment is a process to identify and to remove the regular within-a-year seasonal pattern, which may also include the influences of moving holidays and working/trading days effect in each period. The ultimate objective of the process is to highlight the underlying trends and short-term movements in the series.
- In Malaysia, most of the time series data is affected by seasonal effects. Hence, to eliminate the seasonal effect as well as to seasonally adjust the Malaysian economic time series data, a standard seasonal adjustment package, X-12 ARIMA was used by the Department of Statistics Malaysia.

@StatsMalaysia

EXPLANATORY NOTES

Starting with the release of Labour Force Statistics (LFS), January 2025, the principal statistics of the labour force are estimated based on the current population estimates of Malaysia.

The revision of the LFS data series is performed when the most recent Population and Housing Census of Malaysia 2020 data is available. This census data is then used for the revision of the LFS data series to include additional information available from the latest Population and Housing Census of Malaysia. This process of incorporating revised population benchmarks is referred to as rebasing. On the same note, revisions are carried out on LFS data for January to December 2024.

KEY REVIEWS

- The number of **employed persons** continued its upward trend in October 2025, posting an increase of **0.2 per cent (+33.8 thousand persons)** to **17.06 million persons**, compared to 17.03 million persons in September 2025. The **employment-to-population ratio**, which indicates the ability of an economy to create employments, held steady at **68.8 per cent** in October 2025, unchanged from September 2025.
- The employment in the Services sector continued to rise steadily in October 2025, significantly driven by Accommodation and food & beverage services; Wholesale and retail trade; as well as Information and communication activities. Similarly, the Agriculture, Manufacturing, and Construction sectors also recorded increases in the number of employed persons, while the employment in the Mining & quarrying sector posted decreases.
- In October 2025, **74.8 per cent** of the total employed persons were in the **employees'** category. This category registered a marginal increase of **0.1 per cent (+17.2 thousand persons)** to record **12.76 million persons** compared to 12.74 million persons in September 2025. The number of **own-account workers** also continued to edge up, rising by **0.4 per cent (+11.9 thousand persons)** to **3.25 million persons**, as against 3.24 million persons in September 2025.
- The number of **unemployed persons** in October 2025 increased slightly by **0.1 per cent (+0.3 thousand persons)** to **518.9 thousand persons** from 518.6 thousand persons last month. The **unemployment rate** during the month was unchanged at **3.0 per cent** as recorded in September 2025.
- The **labour force** continued its upward trajectory in October 2025, rose by **0.2 per cent (+34.2 thousand persons)** month-on-month to **17.58 million persons** (September 2025: 17.54 million persons). October's **labour force participation rate (LFPR)** remained at **70.9 per cent**, as of last month.
- In October 2025, the number of persons **outside the labour force** was on an upward trend, rising by **0.1 per cent (+8.9 thousand persons)**, reaching **7.22 million persons** compared to 7.21 million in September 2025. The main reason for those being outside the labour force was due to **housework/ family responsibilities**, making up **43.6 per cent**. The second-largest group consisted of those in **schooling/ training** at **40.7 per cent**.
- The outlook for Malaysia's labour market in the coming months is expected to remain positive and resilient, supported by moderate economic growth, strategic investments, and human capital development. Although global challenges such as trade volatility and slowing external demand may pose pressures, Malaysia's labour market is anticipated to stay competitive, inclusive, and stable.

1 INTRODUCTION

THE COUNTRY'S LABOUR MARKET REMAINED ROBUST IN OCTOBER 2025, SUPPORTED BY A STEADY LABOUR FORCE PARTICIPATION RATE, INCREASES IN EMPLOYMENT, AND COMPARATIVELY LOW UNEMPLOYMENT LEVELS

Malaysia continued to strengthen its foothold in the global agro-food sector through ongoing efforts to expand into international markets in October 2025. This was clearly demonstrated when a company under the guidance of Federal Agricultural Marketing Authority (FAMA) successfully entered the Jordanian market with an export value exceeding RM364,000. Supported by FAMA, the company exported nine fruit-based stock keeping units (SKUs), including pineapple and mango products, which were tailored to suit Middle Eastern consumer preferences through improved packaging, labelling, and product quality standards¹. This achievement reflects Malaysia's broader strategy to uplift local agropreneurs by helping them penetrate high-value international markets, diversify export destinations, and enhance the competitiveness of homegrown brands. Beyond increasing income for local fruit producers, this accomplishment also highlights Malaysia's growing role in the regional food supply chains and reinforces the agricultural sector as a key pillar of the nation's economic strength and diversification in 2025.

Beyond developments in the agro-food sector, Malaysia also recorded a major advancement in high-technology manufacturing with the opening of Ichia Technologies Inc's second facility in Kulim Hi-Tech Park, Kedah. The RM490 million investments by the Taiwanese electronic components producer focuses on the manufacturing of printed circuit boards (PCBs), printed circuit board assemblies (PCBAs), and specialised components for the automotive and telecommunications industries. The new plant is expected to generate approximately 600 high-skilled jobs². This investment underscores Malaysia's growing role as a strategic hub in the global electrical & electronics (E&E) supply chain and aligns closely with the government's vision under the New Industrial Master Plan 2030 (NIMP 2030), which aims to elevate the country's Manufacturing sector toward higher value-added and knowledge-intensive industries.

Above that, the Selangor Special Jobcare Career Carnival emerged as a major driver of employment opportunities and inclusive economic participation by offering 6,000 job vacancies across more than 40 companies representing logistics, Manufacturing, shipping, and various Services sectors. Held on 6th October 2025 at the Shah Alam City Council Convention Centre (MBSA), the carnival placed strong emphasis on quality employment, with around 70 per cent of positions offering salaries above RM 2,500, signalling sustained labour demand and improving income prospects for job seekers in the state³. The event is also part of a state-led push for inclusive employment, with 1,060 special job opportunities reserved for vulnerable groups, including persons with disabilities, ex-convicts, National Anti-Drug Agency (AADK) clients, senior citizens, women returning to the workforce, and individuals facing homelessness⁴. This initiative underscores the government's effort to reduce unemployment while ensuring access to meaningful, well-paid jobs.

In the meantime, Public Bank organised its inaugural 10.10 Sales Career Fair at Menara Public Bank, Kuala Lumpur, in collaboration with the Malaysian Youth Community (MYC). The event, held on 10th October 2025, aimed to attract young talent into the financial services sector by offering valuable career pathways beyond traditional sales roles. With the tagline "It's Not Just About Sales, It's About Your Future!", the fair provided participants with opportunities to explore career growth, gain insights

into banking operations, and access professional development resources⁵. By connecting aspiring professionals with employment and mentorship opportunities, the initiative contributed to Malaysia's broader economic goals of youth employment, skills development, and workforce readiness, ensuring that the younger generation is equipped to support the nation's evolving financial and service sectors. Consequently, the combined impact of these initiatives ensured that the country's labour market remained robust in October 2025, supported by a steady labour force participation rate, increases in employment, and comparatively low unemployment levels.

In addition, Malaysia's economic indicators for September 2025 reflected signs of improvement, with the Leading Index (LI) recording a year-on-year increase of 0.8 per cent, rising to 113.3 points from 112.4 points a year earlier. However, on a month-to-month basis, the LI eased by 0.5 per cent compared to the previous month. Although the LI's smoothed long-term trend remained below the 100-point threshold, Malaysia's economic outlook continues to appear favourable, supported by its diversified economic structure and strong domestic fundamentals. Steady trade performance, healthy investment activity, and moderating inflation collectively strengthen the nation's resilience, helping to cushion global uncertainties and easing cost-of-living pressures. In the meantime, Malaysia's external trade indicators for October 2025 showed positive momentum, with exports and imports expanding by 6.7 per cent (September 2025: +5.9%), and 8.9 per cent (September 2025: +2.9%), respectively.

2 EMPLOYED PERSONS

The number of employed persons continued its upward trend in October 2025

The number of **employed persons** continued its upward trend in October 2025, posting an increase of **0.2 per cent (+33.8 thousand persons)** to **17.06 million persons**, compared to 17.03 million persons in September 2025. On a seasonally adjusted basis, the number of employed persons recorded a month-on-month increase of 0.1 per cent. Year-on-year, the number of employed persons went up by 3.1 per cent, equivalent to an additional 510.3 thousand persons from 16.55 million persons in October 2024.

The employment in the Services sector continued to rise steadily in October 2025, significantly driven by Accommodation and food & beverage services; Wholesale and retail trade; as well as Information and communication activities. Similarly, the Agriculture, Manufacturing, and Construction sectors also recorded increases in the number of employed persons, while the employment in the Mining & quarrying sector posted decreases.

The **employment-to-population ratio**, which indicates the ability of an economy to create employments, held steady at **68.8 per cent** in October 2025, unchanged from September 2025. On a year-on-year comparison, the ratio rose by 0.5 percentage points, compared to 68.3 per cent in October 2024 [Chart 1].

⁵ <https://myc.my/events/447/public-bank-1010-sales-career-fair-2025>

Chart 1: Employed persons and employment-to-population ratio, January 2024 - October 2025

In October 2025, **74.8 per cent** of the total employed persons were in the **employees'** category. This category registered a marginal rise of **0.1 per cent (+17.2 thousand persons)** to record **12.76 million persons** compared to 12.74 million persons in September 2025. The number of **own-account workers** also continued to edge up, rising by **0.4 per cent (+11.9 thousand persons)** to **3.25 million persons**, as against 3.24 million persons in September 2025. This category largely consists of daily income earners engaged in small-scale businesses, such as retailers, hawkers, market and stall vendors, and smallholders [Chart 2].

Chart 2: Employed persons by status in employment, September and October 2025

The number of **employed persons who were temporarily not working** during the month posted a decline of **3.2 per cent (-2.6 thousand persons)** to **80.3 thousand persons** (September 2025: 82.9 thousand persons). Compared with one year earlier, the numbers edged up by 6.7 per cent (+5.0 thousand persons) compared to October 2024 at 75.2 thousand persons. This group comprises those who were temporarily not working but not classified as the unemployed, as they had work to return to.

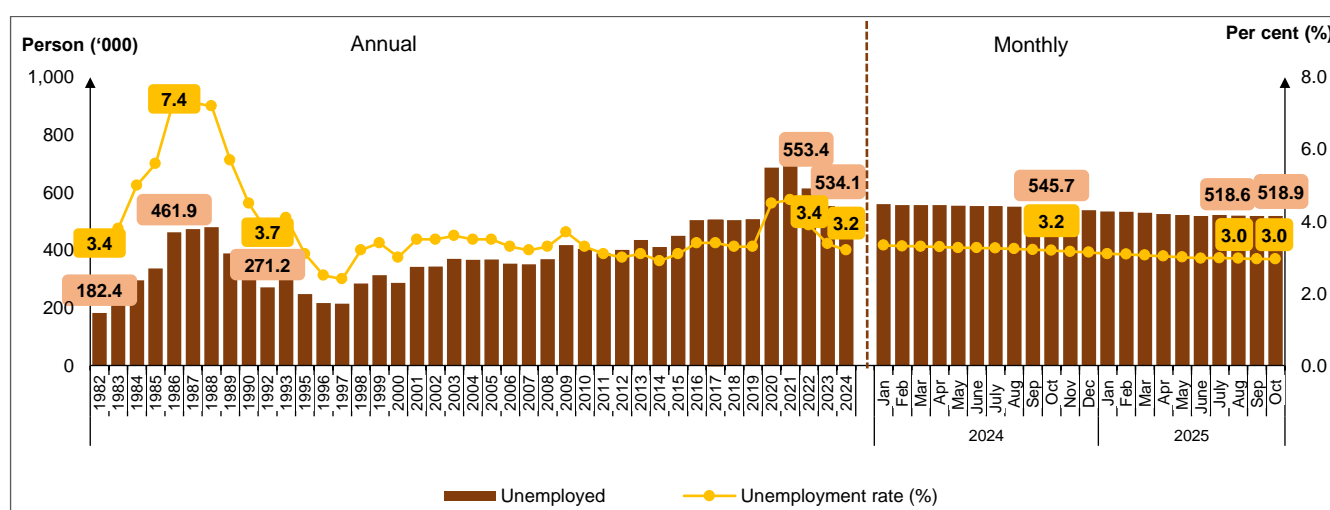

3 UNEMPLOYMENT

The unemployment rate in October 2025 was unchanged at 3.0 per cent

The number of **unemployed persons** in October 2025 increased slightly by **0.1 per cent (+0.3 thousand persons)** to **518.9 thousand persons** from 518.6 thousand persons last month. The **unemployment rate** during the month was unchanged at **3.0 per cent** as recorded in September 2025. In seasonally adjusted estimates, the number of unemployed persons continued to edge up by 0.3 per cent, with 3.0 per cent of the unemployment rate.

On an annual basis, the number of unemployed persons dropped by 4.9 per cent (-26.8 thousand persons) as compared to October 2024 (545.7 thousand persons). Therefore, the unemployment rate declined by 0.2 percentage points from 3.2 per cent in October 2024 [**Chart 3**].

Chart 3: Unemployment, 1982 - 2024 and January 2024 - October 2025

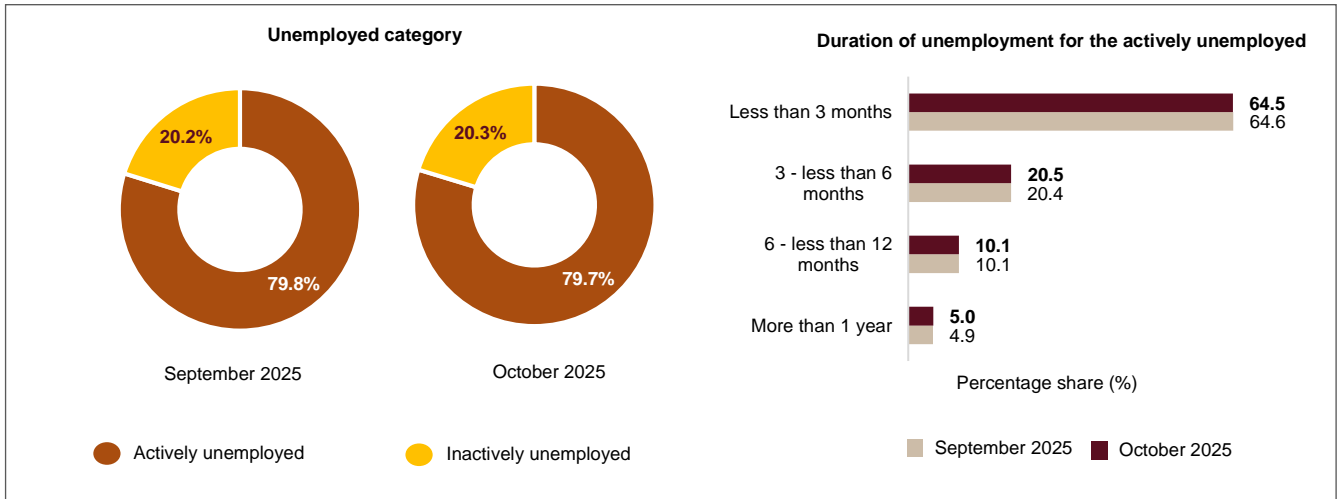

In terms of the unemployment category, the **actively unemployed**, or those who were available for work and actively seeking jobs, made up **79.7 per cent** of the total unemployed persons in October 2025. This group recorded an increase of **0.03 per cent (+0.1 thousand persons)** to **413.8 thousand persons** (September 2025: 413.6 thousand persons). Out of the total actively unemployed, those who were **unemployed for less than three months** comprised **64.5 per cent**, while those who had been **unemployed for more than a year⁶** encompassed **5.0 per cent**.

Meanwhile, the **inactively unemployed**, or those who believed that no jobs were available registered a month-on-month increase of **0.2 per cent (+0.2 thousand persons)** to **105.1 thousand persons** from 104.9 thousand persons in September 2025 [**Chart 4**].

⁶ Referring to a person who has been unemployed for one year or longer (Source: KILM: Long-term unemployment)
https://www.ilo.org/wcmsp5/groups/public/---dgreports/---stat/documents/publication/wcms_422451.pdf

Chart 4: Unemployed category and duration of unemployment for the actively unemployed, September and October 2025

In October 2024, the unemployment rate for youth aged **15 to 24 years** stood at **10.1 per cent**, recording **297.6 thousand unemployed youths** (September 2025: 10.1%; 296.9 thousand persons). In the meantime, the unemployment rate for youth aged **15 to 30 years** edged down by **0.1 percentage points** to **6.1 per cent**, with the number of unemployed youths at **398.5 thousand persons** (September 2025: 6.2%; 398.1 thousand persons) [Chart 5].

Chart 5: The number of unemployed persons and unemployment rate by selected age groups, 1982 - 2024 and January 2024 - October 2025

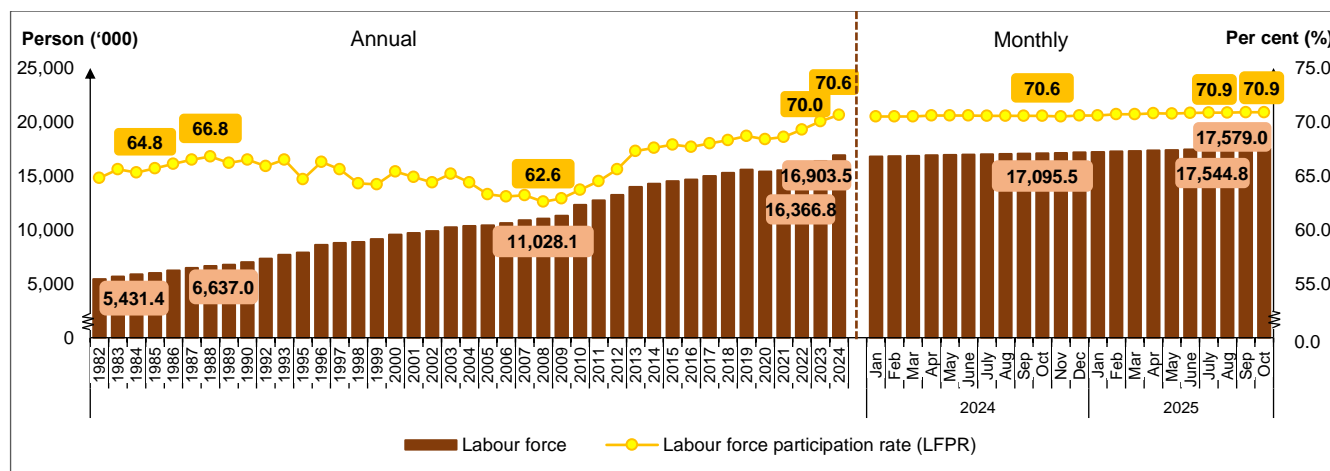

4 LABOUR FORCE

The LFPR for October 2025 remained at 70.9 per cent

The **labour force** continued its upward trajectory in October 2025, rose by **0.2 per cent (+34.2 thousand persons)** month-on-month to **17.58 million persons** (September 2025: 17.54 million persons). October's **labour force participation rate (LFPR)** remained at **70.9 per cent**, as of last month. In terms of seasonally adjusted data, the labour force sustained its positive growth, rising by 0.1 per cent, with the LFPR held steady at 70.9 per cent.

On a year-on-year basis, the labour force increased 2.8 per cent, adding 483.5 thousand persons from 17.10 million persons in October 2024. Therefore, the LFPR rose by 0.3 percentage points as against the same month of the previous year at 70.6 per cent [Chart 6].

Chart 6: Labour force and LFPR, 1982 - 2024 and January 2024 - October 2025

Both male and female labour forces continued to rise during the month. The **male labour force** ascended to **11.08 million persons** (September 2025: 11.06 million persons), while the **female labour force** went up to **6.50 million persons** (September 2025: 6.49 million persons). The **male LFPR** remained at **83.3 per cent** as of September 2025. Meanwhile, the **female LFPR** increased by **0.1 percentage points** to **56.6 per cent** (September 2025: 56.5 per cent).

Compared with October 2024, the male labour force rose by 3.0 per cent from 10.76 million persons, while the female labour force climbed by 2.6 per cent from 6.34 million persons. Accordingly, the LFPR for both males and females rose by 0.3 percentage points from 83.0 per cent and 56.3 per cent, respectively [Chart 7].

Chart 7: Labour force and LFPR by sex, 1982 - 2024 and January 2024 - October 2025

5 OUTSIDE LABOUR FORCE

The main reason for those being outside the labour force was due to housework/ family responsibilities

In October 2025, the number of persons **outside the labour force** was on an upward trend, rising by **0.1 per cent (+8.9 thousand persons)**, reaching **7.22 million persons** compared to 7.21 million in September 2025. Year-on-year, the number edged up by 1.2 per cent (+83.5 thousand persons) as against 7.13 million persons recorded in October 2024.

The main reason for those being outside the labour force was due to **housework/ family responsibilities**, making up **43.6 per cent**. The second-largest group consisted of those in **schooling/ training** at **40.7 per cent** [Chart 8].

Chart 8: Share of outside labour force by reasons for not seeking work, September and October 2025

6 LOOKING AHEAD

Malaysia's economy is seen to remain resilient with a trade surplus, stable international reserves, and record-high exports in October 2025. Consequently, this situation positively impacts the labour market by increasing employment opportunities, reducing unemployment rate, and strengthening the high-skilled sector. Hence, the country's labour force position in October 2025 remains stable, with the number of employed persons continuing to rise while unemployment stays low.

This was supported by Malaysia's exports rising 15.7 per cent year-on-year to RM148.32 billion, which was the highest record ever, as a result of its strategy to penetrate various global markets. The trade surplus continued for 66 consecutive months, signalling the country's underlying economic strength and competitiveness⁷. This situation is expected to increase the demand for labour in the Manufacturing, logistics, and international trade sectors. In addition, Malaysia, as the Chair of ASEAN 2025, also moves forward with the digital and green economy agenda, opening new opportunities in the technology and renewable energy sectors. Green infrastructure and investment projects further expand employment opportunities in renewable energy and digital technologies⁸.

⁸ <https://www.astroawani.com/berita-malaysia/daripada-defa-ke-atiga-baharu-miti-hampir-capai-18-ped-untuk-asean-2025-549626>

ASEAN's digital agenda and investment in the technology sector have led a growing demand for a highly skilled workforce. As such, reskilling and upskilling programmes are becoming increasingly important to ensure that the workforce remains relevant. Emphasising high-tech skills is essential to prepare employees for ongoing industry changes.

In addition, the government has also formulated several other initiatives to ensure that Malaysia's labour market remains competitive. These include empowerment and support of Micro, Small and Medium Enterprises (MSMEs) through the provision of special funds and tax incentives aimed at boosting productivity. Similarly, the digitalisation programmes for MSMEs are designed to their competitiveness in the global market and create more job opportunities. Furthermore, large-scale infrastructure projects in Sabah, Sarawak, and other states are seen to have generated thousands of job opportunities. The promotion of investment in renewable energy and the green economy is also driving increased demand for a highly skilled workforce.

Other initiatives that have also been introduced include special programmes aimed at increasing the participation of youth and women in the labour market through entrepreneurship, vocational training, and financial support. These initiatives help expand the active workforce and reduce gender imbalances in employment. In addition, Malaysia's role as ASEAN Chair 2025 is being leveraged to strengthen the workforce's position in the digital, halal, and regional trade sectors. This regional collaboration has created new job opportunities and enhanced the international competitiveness of Malaysia's workforce.

Hence, the outlook for Malaysia's labour market in the coming months is expected to remain positive and resilient, supported by moderate economic growth, strategic investments, and human capital development. Although global challenges such as trade volatility and slowing external demand may pose pressures, Malaysia's labour market is anticipated to stay competitive, inclusive, and stable.

Notes:

1. The Labour Force Survey statistics for 2019 and preceding years are estimated based on the Population and Housing Census of Malaysia 2010

2. The Labour Force Survey statistics for 2020 and onwards are estimated based on the Population and Housing Census of Malaysia 2020

3. ¹For 1982 - 2000, category of occupation are classified according to the "Dictionary of Occupational Classification, 1980" as follows:

1: Professional, technical and related workers

2: Administrative and managerial workers

3: Clerical and related workers

4: Sales workers

5: Service workers

6: Agricultural, animal husbandry and forestry workers, fishermen and hunters

7: Production and related workers, transport equipment operators and labourers

4. ²For 2001 - 2010, category of occupation are classified according to the "Malaysia Standard Classification of Occupations (MASCO) 1998" as follows:

1: Legislators, senior officials and managers

2: Professionals

3: Technicians and associate professionals

4: Clerical workers

5: Service workers and shop and market sales workers

6: Skilled agricultural and fishery workers

7: Craft and related trade workers

8: Plant and machine-operators and assemblers

9: Elementary occupations

5. ³For 2011 - 2015, category of occupation are classified according to the "Malaysia Standard Classification of Occupations (MASCO) 2008" as follows:

1: Managers

2: Professionals

3: Technicians and associate professionals

4: Clerical support workers

5: Service workers and shop and market sales workers

6: Skilled agricultural, forestry and fishery workers

7: Craft and related trades workers

8: Plant and machine-operators and assemblers

9: Elementary occupations

6. ⁴For 2016 - 2021, category of occupation are classified according to the "Malaysia Standard Classification of Occupations (MASCO) 2013" as follows:

1: Managers

2: Professionals

3: Technicians and associate professionals

4: Clerical support workers

5: Service and sales workers

6: Skilled agricultural, forestry, livestock and fishery workers

7: Craft and related trades workers

8: Plant and machine-operators and assemblers

9: Elementary occupations

7. ⁵For 2022 onwards, categories of occupation are classified according to the "Malaysia Standard Classification of Occupations (MASCO) 2020"

Notes:

1. The Labour Force Survey statistics for 2019 and preceding years are estimated based on the Population and Housing Census of Malaysia 2010

2. The Labour Force Survey statistics for 2020 and onwards are estimated based on the Population and Housing Census of Malaysia 2020

3. ¹For 1982 - 2000, industry was classified according to the "Malaysia Industrial Classification, (Updated) 1972" as follows:

A: Agriculture, forestry, livestock and fishing
 B: Mining and quarrying
 C: Manufacturing
 D: Electricity, gas and water
 E: Construction
 F: Wholesale and retail trade, restaurants and hotels
 G: Transport, storage and communications
 H: Finance, insurance, real estate and business services
 I: Community, social and personal services

4. ²For 2001 - 2009, industry was classified according to the "Malaysia Standard Industrial Classification (MSIC) 2000" as follows:

A: Agriculture, hunting and forestry
 B: Fishing
 C: Mining and quarrying
 D: Manufacturing
 E: Electricity, gas and water supply
 F: Construction
 G: Wholesale and retail trade; repair of motor vehicles, motorcycles and personal and household goods
 H: Hotels and restaurants
 I: Transport, storage and communications
 J: Financial intermediation
 K: Real estate, renting and business activities
 L: Public administration and defence; compulsory social security
 M: Education
 N: Health and social work
 O: Other community, social and personal service activities
 P: Private households with employed persons

5. ³For 2010 - 2022, industry was classified according to the "Malaysia Standard Industrial Classification (MSIC) 2008" as follows:

A: Agriculture, forestry and fishing
 B: Mining and quarrying
 C: Manufacturing
 D: Electricity, gas, steam and air conditioning supply
 E: Water supply; sewerage, waste management and remediation activities
 F: Construction
 G: Wholesale and retail trade, repair of motor vehicles and motorcycles
 H: Transportation and storage
 I: Accommodation and food service activities
 J: Information and communication
 K: Financial and insurance/takaful activities
 L: Real estate activities
 M: Professional, scientific and technical activities
 N: Administrative and support service activities
 O: Public administration and defence; compulsory social security
 P: Education
 Q: Human health and social work activities
 R: Arts, entertainment and recreation
 S: Other service activities
 T: Activities of households as employers

6. ⁴For year 2011-2019 & 2021-2024, total includes 'Activities of extraterritorial organizations and bodies'

Table E: Employed person by industry, Malaysia, 1982 - 2024 (cont'd)

Notes:

1. The Labour Force Survey statistics for 2019 and preceding years are estimated based on the Population and Housing Census of Malaysia 2010

2. The Labour Force Survey statistics for 2020 and onwards are estimated based on the Population and Housing Census of Malaysia 2020

3. ¹For 1982 - 2000, industry was classified according to the "Malaysia Industrial Classification, (Updated) 1972" as follows:

- A: Agriculture, forestry, livestock and fishing
 B: Mining and quarrying
 C: Manufacturing
 D: Electricity, gas and water
 E: Construction
 F: Wholesale and retail trade, restaurants and hotels
 G: Transport, storage and communications
 H: Finance, insurance, real estate and business services
 I: Community, social and personal services

4. ²For 2001 - 2009, industry was classified according to the "Malaysia Standard Industrial Classification (MSIC) 2000" as follows:

- A: Agriculture, hunting and forestry
 B: Fishing
 C: Mining and quarrying
 D: Manufacturing
 E: Electricity, gas and water supply
 F: Construction
 G: Wholesale and retail trade; repair of motor vehicles, motorcycles and personal and household goods
 H: Hotels and restaurants
 I: Transport, storage and communications
 J: Financial intermediation
 K: Real estate, renting and business activities
 L: Public administration and defence; compulsory social security
 M: Education
 N: Health and social work
 O: Other community, social and personal service activities
 P: Private households with employed persons

5. ³For 2010 - 2022, industry was classified according to the "Malaysia Standard Industrial Classification (MSIC) 2008" as follows:

- A: Agriculture, forestry and fishing
 B: Mining and quarrying
 C: Manufacturing
 D: Electricity, gas, steam and air conditioning supply
 E: Water supply; sewerage, waste management and remediation activities
 F: Construction
 G: Wholesale and retail trade, repair of motor vehicles and motorcycles
 H: Transportation and storage
 I: Accommodation and food service activities
 J: Information and communication
 K: Financial and insurance/takaful activities
 L: Real estate activities
 M: Professional, scientific and technical activities
 N: Administrative and support service activities
 O: Public administration and defence; compulsory social security
 P: Education
 Q: Human health and social work activities
 R: Arts, entertainment and recreation
 S: Others service activities
 T: Activities of households as employers

6. ⁴For year 2011-2019 & 2021-2024, total includes 'Activities of extraterritorial organizations and bodies'

Table F: Employed person by status of employment, Malaysia, 1982 - 2024

('000)

Time Series	Total	Status of Employment
