Announcement

DOSM is conducting the Economic Census in 2023. DOSM greatly appreciates the cooperation of respondents in providing information and ensuring the success of this census. Please visit www.dosm.gov.my for more information.

DOSM has launched OpenDOSM NextGen as a medium that provides a catalogue of data and visualisation to facilitate users in analysing various data. OpenDOSM NextGen is an open source data sharing platform and accessible through <https://open.dosm.gov.my> portal.

The Government of Malaysia has declared National Statistics Day (MyStats Day) on October 20 each year. MyStats Day theme is "Statistics is the Essence of Life".

PREFACE

The monthly Labour Force Report, Malaysia, presents the statistics of the labour force, employment and unemployment obtained from the Labour Force Survey (LFS). The implementation of the LFS is based on the guidelines and recommendations of the International Labour Organization (ILO) with reference to the Surveys of Economically Active Population, Employment, Unemployment and Underemployment: An ILO Manual on Concepts and Methods.

The labour force statistics are used as a vital input for labour market analysis, policy formulation, as well as planning, implementing, and monitoring programmes particularly related to human resource development. These statistics also serve as essential references for researchers, economists, academicians, the private sector, and individuals involved in research related to employment and the labour market.

The Labour Force Report for July 2023 describes the labour supply situation as the country was in the transition phase to endemicity. The report also elaborates on the month-on-month changes to examine the immediate effects of recent events. In addition, annual changes from the same month of the previous year are also reported.

The Department of Statistics Malaysia gratefully acknowledges the cooperation and contribution rendered by all parties in making this publication a success. Every piece of feedback and suggestion towards improving future reports is highly appreciated.

GLOSSARY

Actively unemployed	:	Persons who were available for work and were actively looking for a job during the reference week.
Category of skills	:	For reporting purposes, the category of occupation is regrouped into three levels of skills based on the Malaysia Standard Classification of Occupation (MASCO) 2013 as below: Skilled workers: 1. Managers; 2. Professionals; and 3. Technicians and associate professionals. Semi-skilled workers: 4. Clerical support workers; 5. Services and sales workers; 6. Skilled agricultural, forestry, livestock, and fishery workers; 7. Craft and related trades workers; and 8. Plant and machine operators and assemblers. Low-skilled workers: 9. Elementary occupations. Starting in January 2022, the category of occupation is based on the Malaysia Standard Classification of Occupation (MASCO) 2020 with an addition of group 0 - Armed forces occupations.
Economic activity	:	Classification of industries according to the Malaysia Standard Industrial Classification (MSIC) 2008 version 1.0 into five main sectors namely Agriculture, Mining & quarrying, Manufacturing, Construction and Services. In the meantime, Manufacturing and Services are further disaggregated into subsectors.
Employed	:	All persons who, at any time during the reference week worked at least one hour for pay, profit or family gain either as an employer, employee, own-account worker or unpaid family worker.
Employee	:	A person who works for a public or private employer and receives regular remuneration in wages, salary, commission, tips or payment in kind.
Employer	:	A person who operates a business, a plantation or other trade and employs one or more workers to help him.
Employment-to-population ratio	:	The proportion of the employed population to working-age population.
Inactively unemployed	:	Did not look for work because they believed no work was available or that they were not qualified; Would have looked for work if they had not been temporarily ill or had it not been for weather conditions; and had looked for work prior to the reference week and were waiting for the result of job applications.

GLOSSARY

Labour force	:	Labour force refers to population in the working age group (15 to 64 years) who are either employed or unemployed
Labour force participation rate	:	The ratio of the labour force to the working-age population, expressed as a percentage.
Outside labour force	:	All persons not classified as employed or unemployed are classified as outside labour force. This category consists of housewives, students (including those going for further studies), retired, disabled persons and those not interested in looking for a job.
Own account worker	:	A person who operates his own farm, business or trade without employing any paid workers in the conduct of his farm, trade or business.
Skill-related underemployment	:	Those with tertiary education and working in the semi-skilled and low-skilled categories.
Time-related underemployment	:	A group of people who were employed less than 30 hours during the reference week because of the nature of their work or due to insufficient work and were able and willing to accept additional hours of work. Persons who were employed more than 30 hours during the reference week are considered to be in full employment.
Unemployed	:	Those who did not work during the reference week were classified into two groups, which are actively and inactively unemployed.
Unemployment rate	:	The proportion of the unemployed population to the total population in the labour force, expressed as a percentage.
Unpaid family worker	:	A person who works without pay or wages on a farm, business or trade operated by another member of the family.

CONCEPTS AND DEFINITIONS

What is Labour Force Survey (LFS)?

Labour Force Survey (LFS) was conducted to collect information on the structure and distribution of labour force, employment and unemployment from the perspective of labour supply.

LFS encompasses both urban and rural areas for all administrative districts within all states in Malaysia using multi-modal data collection approach through the personal interview and a Computer-Assisted Telephone Interview (CATI).

The LFS are conducted based on the standard guidelines and recommendations of the International Labour Organizations (ILO).

The survey population comprises persons who live in the private living quarters, hence excludes persons residing in institutions such as hotels, hospitals, hostels, prisons, and workers residing in construction worksite.

The working age for the analysis of LFS in Malaysia refers to household members between the age of 15 to 64 years during the reference week, who are either in the labour force or outside the labour force.

LABOUR FORCE

- The population in the working age group of 15 to 64 years (in completed years at last birthday).
- Either employed or unemployed in the reference week.

EMPLOYED

- Persons who, at any time during the reference week worked at least one hour for pay, profit or family gain (as an employer, employee, own-account worker or unpaid family worker).
- Persons who did not work during the reference week because of illness, injury, bad weather, leave, labour dispute and social or religious reasons but had a job, farm, enterprise or other family enterprise to return to.
- Those on temporary lay-off with pay who would definitely be called back to work.

UNEMPLOYED

- Those who did not work during the reference week but are interested to work and seeking for a job.
- Classified into two groups which are actively and inactively unemployed.

OUTSIDE LABOUR FORCE

- All persons not classified as employed or unemployed.
- Example: housewives, students, retirees, disabled persons and those not interested in looking for a job.

UNEMPLOYMENT RATE

- The proportion of the unemployed population to the total population in labour force.
- Percentage of the unemployed population in the labour force.

LABOUR FORCE PARTICIPATION RATE

- The economic activity of a population depends on the demographic characteristics of that population.
- The proportion of the economically active population, hence differs between sub-groups of that population.
- These variations are measured by specific activity rates termed as labour force participation rate.
- Labour force participation rate is defined as the ratio of the labour force to the working age population (15 to 64 years), expressed as a percentage.

SEASONAL ADJUSTMENT

- Time-series data are very useful for economist, policy & decision makers and time-series analysts to identify the important features of economics series such as direction, turning point and consistency between other economic indicators. Sometimes this feature is difficult to observe because of seasonal movements. Thus, if seasonal effect can be removed, the behaviour of the series would be better viewed. The estimation and removal of the seasonal effects is called seasonal adjustment.
- Seasonal adjustment is a process to identify and to remove the regular within-a-year seasonal pattern, which may also include the influences of moving holidays and working/trading days effect in each period. The ultimate objective of the process is to highlight the underlying trends and short-term movements in the series.
- In Malaysia, most of the time series data is affected by seasonal effects. Hence, to eliminate the seasonal effect as well as to seasonally adjust the Malaysian economic time series data, a standard seasonal adjustment package, X-12 ARIMA was used by the Department of Statistics Malaysia.

KEY REVIEWS

- In July 2023, the number of **employed persons** recorded a continuous upward trend, with a growth of **0.2 per cent (+27.2 thousand persons)** month-on-month, resulting in a total of **16.34 million persons** (June 2023: 16.31 million persons). During the month, the **employment-to-population ratio** which indicates the ability of an economy to create employment, rose by **0.1 per cent to 67.7 per cent** (June 2023: 67.6%).
- Looking at the distribution of employed persons across economic sectors, the Services sector continued to record increases in the number of employed persons, particularly in Food & beverage services; Wholesale & retail trade; and Education activities. Likewise, the number of employed persons in the Construction and Mining & quarrying sectors also remained on a positive trend, while the Manufacturing and Agriculture sectors registered marginal declines during the month.
- The **employees' category** constituted the largest composition of the total employed persons, making up **75.4 per cent**. In July 2023, this category registered a rise of **0.1 per cent (+14.4 thousand persons)** to **12.31 million persons** as compared to the previous month (June 2023: 12.30 million persons). Similarly, the number of **own-account workers** were also on increasing trend, with an addition of **10.4 thousand persons (+0.4%)** to **2.96 million persons** (June 2023: 2.95 million persons).
- In July 2023, the number of **unemployed persons** continued to decline, falling by **0.4 per cent (-2.5 thousand persons)** to record **579.2 thousand persons** (June 2023: 581.7 thousand persons). The **unemployment rate** in July 2023 remained at **3.4 per cent** as in the previous month.
- The number of **labour force** continued an upward trend in July 2023, with a month-on-month rise of **0.1 per cent** or equivalent to **24.8 thousand persons** to **16.91 million persons** (June 2023: 16.89 million persons). During the month, a higher **labour force participation rate (LFPR)** was recorded at **70.1 per cent** (June 2023: 70.0%).
- In July 2023, the number of persons **outside the labour force** posted a marginal decline of **0.01 per cent (-0.7 thousand persons)** to **7.23 million persons** (June 2023: 7.23 million persons). **Housework/ family responsibilities** were the major composition of the outside labour force (**43.6%**), followed by the **schooling/ training** category (**39.8%**).
- In line with the positive business expectations for the third quarter of 2023, which are supported by the stability of the job market, the increase in domestic tourism and more optimistic prospects in the health tourism industry, the country's labour force position is expected to remain positive and expand moderately in the upcoming month as Malaysia's short-term economic outlook is anticipated to moderate in the future months.

1 A PROMISING MALAYSIAN ECONOMIC OUTLOOK, SIGNIFIED A POSITIVE IMPACT ON THE LABOUR MARKET, BY RECORDING A STEADILY INCREASING NUMBER OF EMPLOYED PERSONS WHILE THE NUMBER OF UNEMPLOYED IS DECREASING IN JULY 2023

In July 2023, Malaysia's inflation rate was lower than many other Asia-Pacific countries at 2.0 per cent, which was the lowest rate of growth since almost a year ago. In light of declining inflation and the economy was seen to grow modestly in the second quarter based on the Gross Domestic Product (GDP) which recorded 2.9 per cent growth in the second quarter of 2023, the economists expected that Bank Negara Malaysia (BNM) would keep the Overnight Policy Rate (OPR) unchanged at 3 per cent. In addition, Malaysian Industrial Development Finance Berhad (MIDF) Research sees the easing of inflationary pressure as an optimistic sign, especially for domestic demand to continue on an increasing path in the coming months¹.

Furthermore, Malaysia's trade performance continues to grow positively, driven by various initiatives to attract foreign and domestic investors to invest in this country, including Foreign Direct Investment (FDI) and Domestic Direct Investment (DDI). This shows the confidence of foreign investors in Malaysia, which helps the government create many opportunities for the corporate sector, Small and Medium Enterprises (SMEs) and improve Malaysia's labour market across various sectors, encourage domestic demand, and stimulate economic activity. The Ministry of Investment, Trade and Industry (MITI) also reported that Malaysia's approved investment in the first quarter of this year recorded a remarkable increase of 60 per cent year-on-year to RM71.4 billion. The figure comprises over 1,200 projects, which are expected to generate around 24,000 new job opportunities². Therefore, with this favourable economic outlook, it signified a positive impact on the labour market, which is seen to continue to expand by recording a steadily increasing number of employed persons while the number of unemployed is decreasing during the month.

As for the Malaysian Leading Index (LI) indicator, it declined by 2.1 per cent in June 2023 to record 109.8 points as against 112.1 points in the previous year. Likewise, the monthly LI indicator also declined by 0.5 per cent as compared to May 2023 (1.7%). Looking at the smoothed long-term trend in June 2023, LI remained below the 100.0 point trend, which indicates that Malaysia's short-term economic outlook is likely to moderate, anticipating that the economic policy measures will offset the challenges faced in the economy. Meanwhile, the monthly external trade indicators for exports recorded a decrease of 5.8 per cent (June 2023: 3.7%), while imports registered an increase of 1.3 per cent (June 2023: 5.2%) in July 2023.

2 The number of employed persons recorded a continuous upward trend in July 2023

In July 2023, the number of **employed persons** recorded a continuous upward trend, with a growth of **0.2 per cent (+27.2 thousand persons)**, resulting in a total of **16.34 million persons** (June 2023: 16.31 million persons). In seasonally adjusted terms, there was a 0.1 per cent decrease in employed persons. Year-on-year comparison, the number of employed persons posted a rise, with an increase of 2.2 per cent (+356.6 thousand persons) as compared to a year ago (July 2022: 15.98 million persons).

Looking at the distribution of employed persons across economic sectors, the Services sector continued to record increases in the number of employed persons, particularly in Food & beverage services; Wholesale & retail trade; and Education activities. Likewise, the number of employed persons in the

¹ <https://www.straitstimes.com/business/economy/malaysias-inflation-rate-drops-to-2-year-low-in-july>

² <https://www.sinarharian.com.my/article/266084/bisnes/prestasi-perdagangan-malaysia-terus-berkembang-positif>

Construction and Mining & quarrying sectors also remained on a positive trend, while the Manufacturing and Agriculture sectors recorded marginal declines during the month.

During the month, the **employment-to-population ratio** which indicates the ability of an economy to create employment, rose by **0.1 per cent to 67.7 per cent** (June 2023: 67.6%). On a yearly comparison, the ratio improved by 0.7 percentage points from 67.0 per cent registered in July 2022 [**Chart 1**].

Chart 1: Employed persons and employment-to-population ratio, January 2019 - July 2023

The **employees' category** constituted the largest composition of the total employed persons, making up **75.4 per cent**. In July 2023, this category registered a rise of **0.1 per cent (+14.4 thousand persons)** to **12.31 million persons** as compared to the previous month (June 2023: 12.30 million persons). Similarly, the number of **own-account workers** were also on increasing trend, with an addition of **10.4 thousand persons (+0.4%)** to register **2.96 million persons** (June 2023: 2.95 million persons). This category consists mostly of daily income earners working as small businesses, such as small retailers, hawkers and sellers in markets and stalls, as well as smallholders [**Chart 2**].

Chart 2: Employed person by status in employment, June 2023 and July 2023

In July 2023, the number of **employed persons who were temporarily not working** rose by **0.7 per cent (+0.5 thousand persons)** to record **80.9 thousand persons** as compared to the preceding month (June 2023: 80.4 thousand persons). Year-on-year, this category lessened by 3.3 per cent (-2.8 thousand persons) from 83.7 thousand persons registered in the same month of the

previous year. This specific group of persons, who were most likely not able to work temporarily, were not classified as unemployed as they had work to return to.

3 The unemployment rate in July 2023 remained at 3.4 per cent

In July 2023, the number of **unemployed persons** continued to decline, falling by **0.4 per cent (-2.5 thousand persons)** to record **579.2 thousand persons** (June 2023: 581.7 thousand persons). The **unemployment rate** in July 2023 remained at **3.4 per cent** as in the previous month. Meanwhile, on seasonally adjusted estimates, the number of unemployed increased by 1.0 per cent, with an unemployment rate of 3.3 per cent.

As compared to the same month of the previous year, the number of unemployed persons posted a decrease of 6.7 per cent or equivalent to a reduction of 41.5 thousand persons (July 2022: 620.7 thousand persons). Subsequently, the unemployment rate also edged down by 0.3 percentage points as compared to July last year (3.7%) [Chart 3].

Chart 3: Unemployed persons and unemployment rate, 1982 - 2022 and January 2021 - July 2023

In terms of the unemployment category, **80.2 per cent** of the total unemployed persons were those who were available for work and were actively seeking jobs or the **actively unemployed**. This category decreased by **0.5 per cent (-2.2 thousand persons)** to **464.7 thousand persons** (June 2023: 466.9 thousand persons). By duration of unemployment among the total actively unemployed, those who were **unemployed for less than three months** comprised **61.3 per cent**, while those who were in **long-term unemployment for more than a year³** encompassed **6.3 per cent**. Similarly, the **inactively unemployed** or those who believed that there were no jobs available, registered a decrease of **0.3 per cent (-0.3 thousand persons)** to **114.5 thousand persons** (June 2023: 114.8 thousand persons) [Chart 4].

Chart 4: Unemployed category and duration of unemployment, June 2023 and July 2023

In July 2023, the unemployment rate for youth aged **15 to 24 years** fell by **0.1 percentage points** to record **10.9 per cent**, with the number of unemployed youths at **311.2 thousand persons** (June 2023: 11.0%; 312.4 thousand persons). Likewise, the unemployment rate for youth aged **15 to 30 years** decreased by **0.1 percentage points** to **6.8 per cent**, registering **444.8 thousand unemployed youths** (June 2023: 6.9%; 446.8 thousand persons) [Chart 5].

Chart 5: Unemployment rate by selected age groups, 1982 - 2022 and January 2021 - July 2023

4

A higher LFPR was recorded in July 2023 at 70.1 per cent

The number of **labour force** continued an upward trend in July 2023, with a month-on-month rise of **0.1 per cent** or equivalent to **24.8 thousand persons** to **16.91 million persons** (June 2023: 16.89 million persons). During the month, a higher **labour force participation rate (LFPR)** was recorded at **70.1 per cent** (June 2023: 70.0%). Based on the seasonally adjusted estimate, the number of labour force improved by 0.1 per cent, registering the LFPR at 70.2 per cent.

In a year-on-year comparison, the number of labour force went up by 1.9 per cent (+315.0 thousand persons) as against July 2022 (16.60 million persons). Accordingly, the LFPR edged up by 0.5 percentage points compared to 69.6 per cent recorded in July 2022 [Chart 6].

Chart 6: Labour force and LFPR, 1982 - 2022 and January 2021 - July 2023

By gender comparison, both the **male** and **female labour force** registered increases, recording **10.33 million persons** (June 2023: 10.32 million persons) and **6.58 million persons** (June 2023: 6.57 million persons) respectively. In terms of LFPR, **males** increased to **83.0 per cent** (June 2023: 82.9%), while **females LFPR** stood at **56.3 per cent** as in the last month.

On a yearly comparison, both the male and female labour force continued on an increasing trend, with a rise of 1.4 per cent (July 2022: 10.19 million person), and 2.7 per cent (July 2022: 6.41 million person) respectively. Accordingly, male and female LFPR also rose by 0.4 percentage points from 82.6 per cent and 0.6 percentage points from 55.7 per cent respectively [Chart 7].

Chart 7: Labour force and LFPR by sex, 1982 - 2022 and January 2021 - July 2023

5 Housework/ family responsibilities were the major composition of the outside labour force

In July 2023, the number of persons **outside the labour force** posted a marginal decline of **0.01 per cent (-0.7 thousand persons)** to **7.23 million persons** (June 2023: 7.23 million persons). As for the year-on-year comparison, the number continued to fall by 22.9 thousand persons (-0.3%) compared to July 2022 (7.25 million persons). **Housework/ family responsibilities** were the major

composition of the outside labour force (**43.6%**), followed by the **schooling/ training** category (**39.8%**) [Chart 8].

Chart 8: Share of outside labour force by reasons for not seeking work, June 2023 and July 2023

6 LOOKING AHEAD

The Malaysian economy was seen to grow modestly in the second quarter based on the Gross Domestic Product (GDP) recorded at 2.9 per cent in the quarter after posting an impressive growth of 5.6 per cent in the previous quarter³. This growth is supported by an improving labour market, continued domestic demand, and encouraging economic activity.

However, the global economy is expected to flourish at a slower pace in 2023 as there are still hindrances from continued high inflation and higher interest rates. While the reopening of China's economy remains supportive of the global economy, the slower-than-expected pace of recovery in recent months is seen as affecting global growth.

As a result, the Malaysian economy is anticipated to continue to grow at a moderate pace in the third quarter due to slower external demand, which is seen as continuing to affect economic activities, especially in export-oriented sectors. However, Malaysia's economic growth will also be supported by domestic demand and a favourable labour market position, particularly in domestically oriented sectors. The number of tourist arrivals is also expected to continue increasing, which will encourage tourist activities.

In line with this, based on business performance forecasts for the third quarter of 2023, traders foresee an improved business position for the third quarter of 2023 with a positive confidence indicator of 0.7 per cent compared to -3.1 per cent in the second quarter of 2023. These positive business expectations are supported by the stability of the job market, the increase in domestic tourism and more optimistic prospects in the health tourism industry.

Therefore, the country's labour force position in the coming months is expected to remain positive and expand modestly in line with the Malaysian LI in June 2023, which anticipates Malaysia's short-term economic outlook to moderate in the future months.

Notes:

¹For 1982- 2000, category of occupation are classified according to the "Dictionary of Occupational Classification, 1980" as follows:

- 1: Professional, technical and related workers
- 2: Administrative and managerial workers
- 3: Clerical and related workers
- 4: Sales workers
- 5: Service workers
- 6: Agricultural, animal husbandry and forestry workers, fishermen and hunters
- 7: Production and related workers, transport equipment operators and labourers

²For 2001 - 2010, category of occupation are classified according to the "Malaysia Standard Classification of Occupations (MASCO) 1998" as follows:

- 1: Legislators, senior officials and managers
- 2: Professionals
- 3: Technicians and associate professionals
- 4: Clerical workers
- 5: Service workers and shop and market sales workers
- 6: Skilled agricultural and fishery workers
- 7: Craft and related trade workers
- 8: Plant and machine-operators and assemblers
- 9: Elementary occupations

³For 2011 - 2015, category of occupation are classified according to the "Malaysia Standard Classification of Occupations (MASCO) 2008" as follows:

- 1: Managers
- 2: Professionals
- 3: Technicians and associate professionals
- 4: Clerical support workers
- 5: Service workers and shop and market sales workers
- 6: Skilled agricultural, forestry and fishery workers
- 7: Craft and related trades workers
- 8: Plant and machine-operators and assemblers
- 9: Elementary occupations

⁴For 2016 - 2021, category of occupation are classified according to the "Malaysia Standard Classification of Occupations (MASCO) 2013" as follows:

- 1: Managers
- 2: Professionals
- 3: Technicians and associate professionals
- 4: Clerical workers
- 5: Service and sales workers
- 6: Skilled agricultural, forestry, livestock and fishery workers
- 7: Craft and related trades workers
- 8: Plant and machine-operators and assemblers
- 9: Elementary occupations

⁵For 2022 onwards, categories of occupation are classified according to the "Malaysia Standard Classification of Occupations (MASCO) 2020"

Notes:

¹For 1982 - 2000, industry was classified according to the "Malaysia Industrial Classification, (Updated) 1972" as follows:

- A: Agriculture, forestry, livestock and fishing
- B: Mining and quarrying
- C: Manufacturing
- D: Electricity, gas and water
- E: Construction
- F: Wholesale and retail trade, restaurants and hotels
- G: Transport, storage and communications
- H: Finance, insurance, real estate and business services
- I: Community, social and personal services

²For 2001 - 2009, industry was classified according to the "Malaysia Standard Industrial Classification (MSIC) 2000" as follows:

- A: Agriculture, hunting and forestry
- B: Fishing
- C: Mining and quarrying
- D: Manufacturing
- E: Electricity, gas and water supply
- F: Construction
- G: Wholesale and retail trade; repair of motor vehicles, motorcycles and personal and household goods
- H: Hotels and restaurants
- I: Transport, storage and communications
- J: Financial intermediation
- K: Real estate, renting and business activities
- L: Public administration and defence; compulsory social security
- M: Education
- N: Health and social work
- O: Other community, social and personal service activities
- P: Private households with employed persons

³For 2010 - 2021, industry was classified according to the "Malaysia Standard Industrial Classification (MSIC) 2008" as follows:

- A: Agriculture, forestry and fishing
- B: Mining and quarrying
- C: Manufacturing
- D: Electricity, gas, steam and air conditioning supply
- E: Water supply; sewerage, waste management and remediation activities
- F: Construction
- G: Wholesale and retail trade, repair of motor vehicles and motorcycles
- H: Transportation and storage
- I: Accommodation and food service activities
- J: Information and communication
- K: Financial and insurance/takaful activities
- L: Real estate activities
- M: Professional, scientific and technical activities
- N: Administrative and support service activities
- O: Public administration and defence; compulsory social security
- P: Education
- Q: Human health and social work activities
- R: Arts, entertainment and recreation
- S: Others service activities
- T: Activities of households as employers

^fRevised

⁴For year 2011-2019, 2021 and 2022, total includes 'Activities of extraterritorial organizations and bodies'

Table E: Employed person by industry, Malaysia, 1982 - 2022 (cont'd)

Notes:

¹For 1982 - 2000, industry was classified according to the "Malaysia Industrial Classification, (Updated) 1972" as follows:

- A: Agriculture, forestry, livestock and fishing
- B: Mining and quarrying
- C: Manufacturing
- D: Electricity, gas and water
- E: Construction
- F: Wholesale and retail trade, restaurants and hotels
- G: Transport, storage and communications
- H: Finance, insurance, real estate and business services
- I: Community, social and personal services

²For 2001 - 2009, industry was classified according to the "Malaysia Standard Industrial Classification (MSIC) 2000" as follows:

- A: Agriculture, hunting and forestry
- B: Fishing
- C: Mining and quarrying
- D: Manufacturing
- E: Electricity, gas and water supply
- F: Construction
- G: Wholesale and retail trade; repair of motor vehicles, motorcycles and personal and household goods
- H: Hotels and restaurants
- I: Transport, storage and communications
- J: Financial intermediation
- K: Real estate, renting and business activities
- L: Public administration and defence; compulsory social security
- M: Education
- N: Health and social work
- O: Other community, social and personal service activities
- P: Private households with employed persons

³For 2010 - 2021, industry was classified according to the "Malaysia Standard Industrial Classification (MSIC) 2008" as follows:

- A: Agriculture, forestry and fishing
- B: Mining and quarrying
- C: Manufacturing
- D: Electricity, gas, steam and air conditioning supply
- E: Water supply; sewerage, waste management and remediation activities
- F: Construction
- G: Wholesale and retail trade, repair of motor vehicles and motorcycles
- H: Transportation and storage
- I: Accommodation and food service activities
- J: Information and communication
- K: Financial and insurance/takaful activities
- L: Real estate activities
- M: Professional, scientific and technical activities
- N: Administrative and support service activities
- O: Public administration and defence; compulsory social security
- P: Education
- Q: Human health and social work activities
- R: Arts, entertainment and recreation
- S: Others service activities
- T: Activities of households as employers

^f Revised

⁴For year 2011-2019, 2021 and 2022, total includes 'Activities of extraterritorial organizations and bodies'

Table F: Employed person by status of employment, Malaysia, 1982 - 2022

('000)

Time Series	Total	Status of Employment
