PREFACE

The monthly Labour Force Report, Malaysia, presents the statistics of the labour force, employment and unemployment obtained from the Labour Force Survey (LFS). The implementation of the LFS is based on the guidelines and recommendations of the International Labour Organization (ILO) with reference to the Surveys of Economically Active Population, Employment, Unemployment and Underemployment: An ILO Manual on Concepts and Methods.

The labour force statistics are used as a vital input for labour market analysis, policy formulation, as well as planning, implementing, and monitoring programmes particularly related to human resource development. These statistics also serve as essential references for researchers, economists, academicians, the private sector, and individuals involved in research related to employment and the labour market.

The Labour Force Report for October 2023 describes the labour supply condition based on the current situation. The report also elaborates on the month-on-month changes to examine the immediate effects of recent events. In addition, annual changes from the same month of the previous year are also reported.

The Department of Statistics Malaysia gratefully acknowledges the cooperation and contribution rendered by all parties in making this publication a success. Every piece of feedback and suggestion towards improving future reports is highly appreciated.

GLOSSARY

Actively unemployed

Persons who were available for work and were actively looking for a job during the reference week.

Category of skills

For reporting purposes, the category of occupation is regrouped into three levels of skills based on the Malaysia Standard Classification of Occupation (MASCO) 2013 as below:

Skilled workers:

- 1. Managers;
- 2. Professionals; and
- 3. Technicians and associate professionals.

Semi-skilled workers:

- 4. Clerical support workers;
- 5. Services and sales workers:
- 6. Skilled agricultural, forestry, livestock, and fishery workers;
- 7. Craft and related trades workers; and
- 8. Plant and machine operators and assemblers.

Low-skilled workers:

9. Elementary occupations.

Starting in January 2022, the category of occupation is based on the Malaysia Standard Classification of Occupation (MASCO) 2020 with an addition of group 0 - Armed forces occupations.

Economic activity

Classification of industries according to the Malaysia Standard Industrial Classification (MSIC) 2008 version 1.0 into five main sectors namely Agriculture, Mining & guarrying, Manufacturing, Construction and Services. In the meantime, Manufacturing and Services are further disaggregated into sub-sectors.

Employed

All persons who, at any time during the reference week worked at least one hour for pay, profit or family gain either as an employer, employee, own-account worker or unpaid family worker.

Employee

A person who works for a public or private employer and receives regular remuneration in wages, salary, commission, tips or payment in kind.

Employer

A person who operates a business, a plantation or other trade and employs one or more workers to help him.

Employment-topopulation ratio

The proportion of the employed population to working-age population.

Inactively unemployed

Did not look for work because they believed no work was available or that they were not qualified; Would have looked for work if they had not been temporarily ill or had it not been for weather conditions; and had looked for work prior to the reference week and were waiting for the result of job applications.

GLOSSARY

Labour force	:	Labour force refers to population in the working age group (15 to 64 years) who are either employed or unemployed
Labour force participation rate	:	The ratio of the labour force to the working-age population, expressed as a percentage.
Outside labour force	:	All persons not classified as employed or unemployed are classified as outside labour force. This category consists of housewives, students (including those going for further studies), retired, disabled persons and those not interested in looking for a job.
Own-account worker	:	A person who operates his own farm, business or trade without employing any paid workers in the conduct of his farm, trade or business.
Skill-related underemployment	:	Those with tertiary education and working in the semi-skilled and low-skilled categories.
Time-related underemployment	:	A group of people who were employed less than 30 hours per week during the reference week because of the nature of their work or due to insufficient work and were able and willing to accept additional hours of work. Persons who were employed more than 30 hours per week during the reference week are considered to be in full employment.
Unemployed	:	Those who did not work during the reference week were classified into two groups, which are actively and inactively unemployed.
Unemployment rate	:	The proportion of the unemployed population to the total population in the labour force, expressed as a percentage.
Unpaid family worker	:	A person who works without pay or wages on a farm, business or trade operated by another member of the family.

CONCEPTS AND DEFINITIONS

What is Labour Force Survey (LFS)?

Labour Force Survey (LFS) was conducted to collect information on the structure and distribution of labour force, employment and unemployment from the perspective of labour supply.

The survey population comprises persons who live in the private living quarters, hence excludes persons residing in institutions such as hotels, hospitals, hostels, prisons, and workers residing in construction worksite.

LFS encompasses both urban and rural areas for all administrative districts within all states in Malaysia using multi-modal data collection approach through the personal interview and a Computer-Assisted Telephone Interview (CATI).

The LFS are conducted based on the standard guidelines and recommendations of the International Labour Organization (ILO).

The working age for the analysis of LFS in Malaysia refers to household members between the age of 15 to 64 years during the reference week, who are either in the labour force or outside the labour force.

LABOUR FORCE

- The population in the working age group of 15 to 64 years (in completed years at last birthday).
- Either employed or unemployed in the reference week.

EMPLOYED

- Persons who, at any time during the reference week worked at least one hour for pay, profit or family gain (as an employer, employee, own-account worker or unpaid family worker).
- Persons who did not work during the reference week because of illness, injury, bad weather, leave, labour dispute and social or religious reasons but had a job, farm, enterprise or other family enterprise to return to.
- Those on temporary lay-off with pay who would definitely be called back to work.

UNEMPLOYED

- Those who did not work during the reference week but are interested to work and seeking for a job.
- Classified into two groups which are actively and inactively unemployed.

OUTSIDE LABOUR FORCE

- All persons not classified as employed or unemployed.
- Example: housewives, students, retirees, disabled persons and those not interested in looking for a job.

UNEMPLOYMENT RATE

- The proportion of the unemployed population to the total population in labour force.
- Percentage of the unemployed population in the labour force.

LABOUR FORCE PARTICIPATION RATE

- The economic activity of a population depends on the demographic characteristics of that population.
- The proportion of the economically active population, hence differs between sub-groups of that population.
- These variations are measured by specific activity rates termed as labour force participation rate.
- Labour force participation rate is defined as the ratio of the labour force to the working age population (15 to 64 years), expressed as a percentage.

SEASONAL ADJUSTMENT

- Time-series data are very useful for economist, policy & decision makers and time-series analysts to identify the important features of economics series such as direction, turning point and consistency between other economic indicators. Sometimes this feature is difficult to observe because of seasonal movements. Thus, if seasonal effect can be removed, the behaviour of the series would be better viewed. The estimation and removal of the seasonal effects is called seasonal adjusment.
- Seasonal adjustment is a process to identify and to remove the regular within-a-year seasonal pattern, which may also include the influences of moving holidays and working/trading days effect in each period. The ultimate objective of the process is to highlight the underlying trends and short-term movements in the series.
- In Malaysia, most of the time series data is affected by seasonal effects. Hence, to eliminate the seasonal effect as well as to seasonally adjust the Malaysian economic time series data, a standard seasonal adjustment package, X-12 ARIMA was used by the Department of Statistics Malaysia.

KEY REVIEWS

- The improvement in the number of **employed persons** continued in October 2023 with a month-on-month increase of **0.2 per cent (+28.1 thousand persons)** to register **16.40 million persons** (September 2023: 16.38 million persons). In October 2023, the **employment-to-population ratio** which indicates the ability of an economy to create employment, was unchanged at **67.7 per cent** as in the preceding month.
- In the economic sector, there is a consistent increase in the number of employed persons in the Services sector, notably in Wholesale & retail trade; Food & beverage services; and Transportation & storage activities. On the same note, the Manufacturing, Construction, Mining & quarrying sectors, as well as the Agriculture sector also posted rises in the number of employed persons in October 2023.
- During the month, the employees' category which was the largest composition of the total employed persons with a share of 75.3 per cent, posted a rise of 0.1 per cent or equivalent to 15.0 thousand persons to record 12.35 million persons (September 2023: 12.33 million persons). Likewise, the own-account workers category continued to increase, with an addition of 0.4 per cent (+10.8 thousand persons) to 2.99 million persons (September 2023: 2.97 million persons).
- In October 2023, the number of **unemployed persons** continued to trend down, with a reduction of **0.5 per cent** or equivalent to **2.8 thousand persons** to record **570.9 thousand persons** (September 2023: 573.7 thousand persons). The **unemployment rate** during the month remained at **3.4 per cent**, as registered last month.
- In October 2023, the number of **labour force** was in an upward trend, with an addition of **0.1 per cent** or **25.3 thousand persons** to **16.97 million persons** (September 2023: 16.95 million persons). October's **labour force participation rate (LFPR)** stood at **70.1 per cent** as of September 2023.
- The number of **outside labour force** during the month declined marginally by **0.02 per cent** (-1.3 thousand persons) to **7.24 million persons** (September 2023: 7.24 million persons). The largest composition of the outside labour force was due to **housework/ family responsibilities** (42.6%) and the **schooling/ training** category (40.9%).
- Malaysia's economy is poised to navigate a healthier economic prospect in the future, with business confidence increasing, reflecting businesses continuing to grow. This growth is underpinned by an improving labour market, burgeoning domestic demand, improving tourism activities and the implementation of infrastructure projects, which in turn may increase job opportunities. Therefore, the country's labour force is anticipated to maintain steady growth momentum in the near term, albeit in a potentially challenging economic environment.

THE NATION'S LABOUR FORCE IN OCTOBER 2023 PORTRAYED PROMISING SIGNS, WITH EMPLOYED PERSONS SHOWING A SLIGHT UPSTICK, COINCIDING WITH A CONTINUOUS DECLINE IN UNEMPLOYED PERSONS

In the third quarter of 2023, Malaysia's economy grew by 3.3 per cent, driven by strong domestic demand, as reported by the Ministry of Economy. This growth, fuelled primarily by private sector spending and supported by household spending and investments, signifies a rebound from the pandemic, surpassing pre-pandemic levels. However, exports remained sluggish due to persistent weaknesses in external demand, although this was partly offset by the recovery in inbound foreign tourists¹.

Concurrently, global geopolitical conflicts unfolded, resulting in widespread boycotts and a unified global stance against specific major products. This movement notably might affect Malaysia's economic landscape, particularly impacting prominent franchised enterprises and raising concerns about potential job losses and unemployment issues. However, the Minister of Malaysia's Ministry of Human Resources has verified that, as of present, no instances of employee terminations due to the boycott movement have been reported. Nevertheless, there may be potential socioeconomic impacts and a likelihood of unemployment escalation due to the issue. To address this, the government is considering a multifaceted approach involving collaborations with local Small and Medium Enterprises (SMEs). This approach includes allocating business funds, providing tax incentives, and promoting the purchase of locally manufactured goods to support the absorption of at-risk laid-off workers².

Amidst these challenges, local businesses have an opportunity to thrive. For example, the Selangor International Business Summit (SIBS) 2023 expo provides a platform for local entrepreneurs to explore larger markets, particularly within the ASEAN region, fostering growth and income opportunities that contribute to the nation's economic advancement³. This exhibition not only facilitated market expansion but also significantly contributed to job creation by enabling the establishment and growth of local businesses. The connections forged within this platform acted as catalysts for increased employment opportunities, injecting vitality into the labour market.

These positive trends, coupled with the government's proactive measures and the resilience of local businesses, underscored the efforts to create and sustain employment opportunities while navigating the challenges of the evolving economic scenario. Thus, in October 2023, the nation's labour force portrayed promising signs, with employed persons showing a slight uptick, coinciding with a continuous decline in unemployed persons.

As for the Leading Index (LI) indicator, it showed an improvement to negative 0.3 per cent registering 109.3 points in September 2023, as compared to negative 0.5 per cent in the previous month (September 2022: 109.6 points). In the monthly performance, LI recorded a negative 0.4 per cent during the month as against 0.7 per cent in the last month. As for the smoothed long-term trend in September 2023, LI remained below the 100.0 point trend, which indicates that Malaysia's economy is expected to grow moderately, supported by encouraging local demand amid currency challenges and the world economic slowdown. Nevertheless, in comparison to September 2023, both the monthly external trade indicators for exports and imports recorded positive growth of 1.5 per cent (September 2023: 8.1%) and 13.4 per cent (September 2023: 2.1%), respectively.

¹ https://www.bharian.com.my/bisnes/lain-lain/2023/11/1178099/ekonomi-malaysia-berkembang-33-peratus-pada-suku-ketiga-atasi

³ https://www.astroawani.com/berita-malaysia/sibs-2023-peluang-usahawan-tempatan-teroka-pasaran-asean-442676

The improvement in the number of employed persons continued in October 2023 with a month-on-month increase of 0.2 per cent (+28.1 thousand persons) to register 16.40 million persons (September 2023: 16.38 million persons). In terms of seasonally adjusted data, the number of employed persons rose slightly by 0.03 per cent. Meanwhile, the number of employed persons went up by 2.0 per cent (+321.7 thousand persons) year-on-year (October 2022: 16.08 million persons).

In the economic sector, there is a consistent increase in the number of employed persons in the Services sector, notably in Wholesale & retail trade; Food & beverage services; and Transportation & storage activities. On the same note, the Manufacturing, Construction, Mining & quarrying sectors, as well as the Agriculture sector also posted rises in the number of employed persons in October 2023.

In October 2023, the employment-to-population ratio which indicates the ability of an economy to create employment, was unchanged at 67.7 per cent as in the preceding month. In comparison with one year earlier, the ratio increased by 0.5 percentage points from 67.2 per cent in October 2022 [Chart 1].

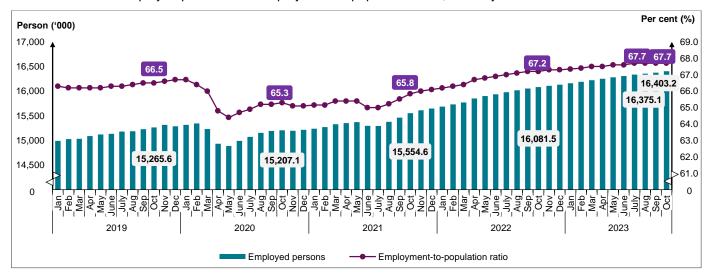

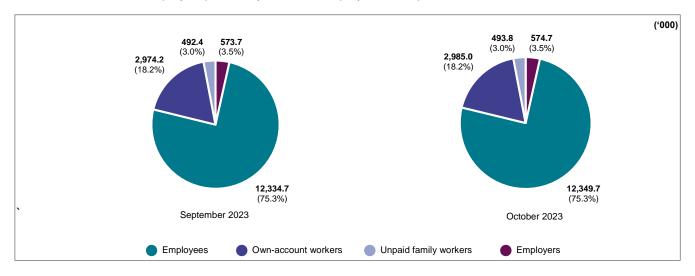

Chart 1: Employed persons and employment-to-population ratio, January 2019 - October 2023

During the month, the employees' category which was the largest composition of the total employed persons with a share of 75.3 per cent, posted a rise of 0.1 per cent or equivalent to 15.0 thousand persons to record 12.35 million persons (September 2023: 12.33 million persons). Likewise, the own-account workers category continued to increase, with an addition of 0.4 per cent (+10.8 thousand persons) to 2.99 million persons (September 2023: 2.97 million persons). This group consists mostly of daily income earners working as small business operators such as retailers; hawkers; sellers in markets and stalls, as well as smallholders [Chart 2].

Chart 2: Employed person by status in employment, September 2023 and October 2023

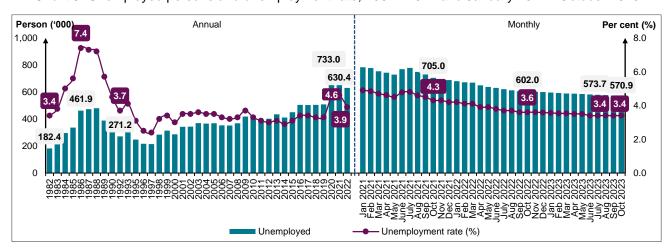

In October 2023, the number of employed persons who were temporarily not working fell by **1.1 thousand persons (-1.3%)** to **80.2 thousand persons** (September 2023: 81.3 thousand persons). On the year-on-year comparison, the number increased by 0.5 per cent (+0.4 thousand persons) compared to October last year (79.8 thousand persons). This group of persons, who were most likely unable to work, was not classified as unemployed as they had work to return to.

The unemployment rate in October 2023 remained at 3.4 per cent

In October 2023, the number of unemployed persons continued to trend down, with a reduction of 0.5 per cent or equivalent to 2.8 thousand persons to record 570.9 thousand persons (September 2023: 573.7 thousand persons). The unemployment rate during the month remained at 3.4 per cent, as registered last month. In seasonally adjusted estimates for October, the number of unemployed persons rose by 0.9 per cent, recording an unemployment rate of 3.4 per cent.

In year-on-year comparison, the number of unemployed persons reduced by 5.2 per cent (-31.1 thousand persons) compared to 602.0 thousand persons registered in October 2022. Accordingly, the unemployment rate decreased by 0.2 percentage points from 3.6 per cent in October last year [Chart 3].

Chart 3: Unemployed persons and unemployment rate, 1982 - 2022 and January 2021 - October 2023

In the unemployment category, 80.1 per cent of the total unemployed persons were actively unemployed or those who were available for work and actively seeking jobs. This category declined by 0.4 per cent (-1.8 thousand persons) to 457.2 thousand persons (September 2023: 458.9 thousand persons). Among the actively unemployed, those who were unemployed for less than three months encompassed 61.6 per cent, while 6.2 per cent were those who were unemployed for more than a year⁴. Similarly, those who believed that no jobs were available or were inactively unemployed went down by 0.9 per cent (-1.0 thousand persons) to 113.8 thousand persons (September 2023: 114.8 thousand persons) [Chart 4].

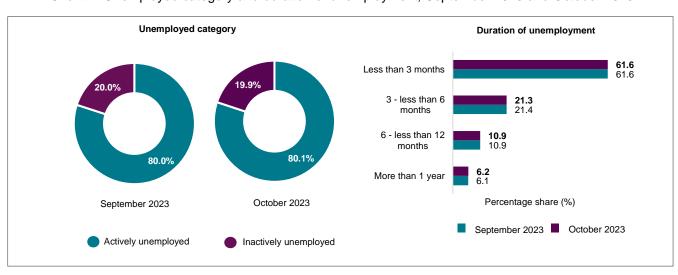

Chart 4: Unemployed category and duration of unemployment, September 2023 and October 2023

The unemployment rate for youth aged 15 to 24 years in October 2023 was 10.7 per cent, with **313.3 thousand unemployed youths** (September 2023: 10.6%; 310.1 thousand persons). Meanwhile, the unemployment rate for youth aged 15 to 30 years fell by 0.1 percentage points to 6.6 per cent, recording the number of unemployed youths at 439.6 thousand persons (September 2023: 6.7%; 440.0 thousand persons) [Chart 5].

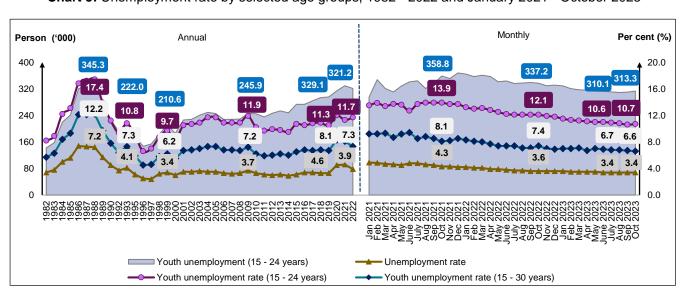

Chart 5: Unemployment rate by selected age groups, 1982 - 2022 and January 2021 - October 2023

⁴ Referring to a person who has been unemployed for one year or longer (Source: KILM: Long-term unemployment) https://www.ilo.org/wcmsp5/groups/public/---dgreports/---stat/documents/publication/wcms_422451.pdf

October's LFPR stood at 70.1 per cent

In October 2023, the number of labour force was on an upward trend, with an addition of 0.1 per cent or 25.3 thousand persons to 16.97 million persons (September 2023: 16.95 million persons). October's labour force participation rate (LFPR) stood at 70.1 per cent as of September 2023. In seasonally adjusted estimates, the number of labour force rose marginally by 0.04 per cent with a lower LFPR of 70.0 per cent.

As compared to October last year, the number of labour force recorded a rise of 290.6 thousand persons (+1.7%) from 16.68 million persons. The LFPR escalated by 0.4 percentage points as against 69.7 per cent in October 2022 [Chart 6].

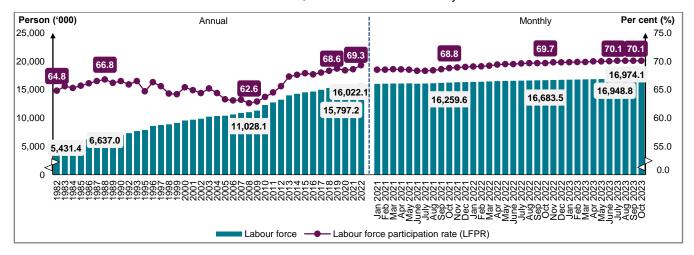

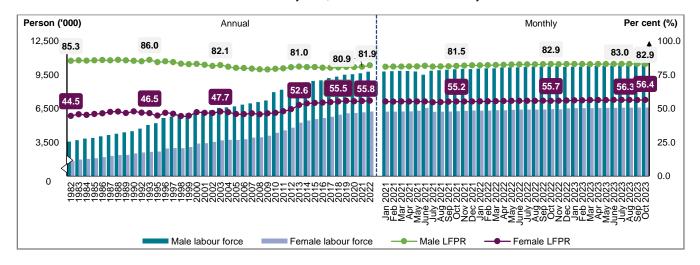

Chart 6: Labour force and LFPR, 1982 - 2022 and January 2021 - October 2023

In terms of gender, both the male and female labour force registered an increase during the month to record 10.38 million persons (September 2023: 10.36 million persons), and 6.59 million persons (September 2023: 6.59 million persons) respectively. The male LFPR remained unchanged at 82.9 per cent, while female LFPR rose by 0.1 percentage points to 56.4 per cent in October 2023 (September 2023: 56.3%).

In comparison with a year ago, both the male and female labour force continued to rise, with an addition of 1.5 per cent (October 2022: 10.23 million persons) and 2.1 per cent (October 2022: 6.46 million persons) respectively. As for the LFPR, male LFPR was the same at 82.9 per cent whereas female LFPR increased by 0.7 percentage points from 55.7 per cent in the same month of the previous year [Chart 7].

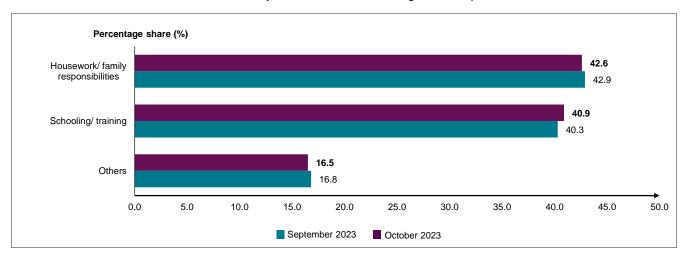

Chart 7: Labour force and LFPR by sex, 1982 - 2022 and January 2021 - October 2023

The largest composition of the outside labour force was due to housework/ family responsibilities

The number of **outside labour force** during the month declined marginally by **0.02 per cent** (-1.3 thousand persons) to **7.24 million persons** (September 2023: 7.24 million persons). On a yearly comparison, the number of outside labour force increased by 0.005 per cent or 0.3 thousand persons (October 2022: 7.24 million persons). The largest composition of the outside labour force was due to **housework/ family responsibilities** (42.6%) and the **schooling/ training** category (40.9%) [Chart 8].

Chart 8: Share of outside labour force by reasons for not seeking work, September 2023 and October 2023

6 LOOKING AHEAD

The Malaysian economy continued to grow as the country's Gross Domestic Product (GDP) registered higher growth of 3.3 per cent in the third quarter of 2023, compared to 2.9 per cent in the previous quarter. This growth was supported by increased domestic demand, an improved labour market, as well as continued tourism and construction activities.

Moreover, based on Malaysia's improved monthly LI performance, it expects a healthier economic prospect in the future. Similarly, based on business performance forecasts, business confidence

increased to 3.2 per cent in the fourth quarter of 2023, compared to 0.7 per cent recorded in the third quarter of 2023, reflecting business continuing to grow and business projections for the period October 2023 to March 2024 are expected to remain vibrant despite moderating.

According to BNM, the Malaysian economy is projected to grow in the range of 4 per cent in 2023 and around 4 to 5 per cent in 2024, despite the challenging global environment⁵. The growth will continue to be driven by increased domestic demand due to stable employment and income prospects, particularly in domestically oriented sectors. In addition, tourist arrivals and spending are also expected to improve, with investment to be supported by continued progress in multi-year infrastructure projects and the implementation of various stimulus initiatives.

Therefore, following the anticipations of the Malaysian economy and the growing business activities in the future, it is seen to have a positive impact on the labour market as more job opportunities will be created in a reassuring business environment. Thus, the country's labour market is expected to remain in a steady growth momentum in the coming months, albeit in a potentially challenging economic environment.

¹For 1982 - 2000, industry was classified according to the "Malaysia Industrial Classification, (Updated) 1972" as follows:

- A: Agriculture, forestry, livestock and fishing
- B: Mining and quarrying
- C: Manufacturing
- D: Electricity, gas and water
- E: Construction
- F: Wholesale and retail trade, restaurants and hotels
- G: Transport, storage and communications
- H: Finance, insurance, real estate and business services
- I: Community, social and personal services

²For 2001 - 2009, industry was classified according to the "Malaysia Standard Industrial Classification (MSIC) 2000" as follows:

- A: Agriculture, hunting and forestry
- B: Fishing
- C: Mining and quarrying
- D: Manufacturing
- E: Electricity, gas and water supply
- F: Construction
- G: Wholesale and retail trade; repair of motor vehicles, motorcycles and personal and household goods
- H: Hotels and restaurants
- I: Transport, storage and communications
- J: Financial intermediation
- K: Real estate, renting and business activities
- L: Public administration and defence; compulsory social security
- M: Education
- N: Health and social work
- O: Other community, social and personal service activities
- P: Private households with employed persons

³For 2010 - 2021, industry was classified according to the "Malaysia Standard Industrial Classification (MSIC) 2008" as follows:

- A: Agriculture, forestry and fishing
- B: Mining and quarrying
- C: Manufacturing
- D: Electricity, gas, steam and air conditioning supply
- E: Water supply; sewerage, waste management and remediation activities
- F: Construction
- G: Wholesale and retail trade, repair of motor vehicles and motorcycles
- H: Transportation and storage
- I: Accommodation and food service activities
- J: Information and communication
- K: Financial and insurance/takaful activities
- L: Real estate activities
- M: Professional, scientific and technical activities
- N: Administrative and support service activities
- O: Public administration and defence; compulsory social security
- P: Education
- Q: Human health and social work activities
- R: Arts, entertainment and recreation
- S: Others service activities
- T: Activities of households as employers

^rRevised

⁴For year 2011-2019, 2021 and 2022, total includes 'Activities of extraterritorial organizations and bodies'

Table E: Employed person by industry, Malaysia, 1982 - 2022 (cont'd)

Notes:											

¹For 1982 - 2000, industry was classified according to the "Malaysia Industrial Classification, (Updated) 1972" as follows:

- A: Agriculture, forestry, livestock and fishing
- B: Mining and quarrying
- C: Manufacturing
- D: Electricity, gas and water
- E: Construction
- F: Wholesale and retail trade, restaurants and hotels
- G: Transport, storage and communications
- H: Finance, insurance, real estate and business services
- I: Community, social and personal services

²For 2001 - 2009, industry was classified according to the "Malaysia Standard Industrial Classification (MSIC) 2000" as follows:

- A: Agriculture, hunting and forestry
- **B**: Fishing
- C: Mining and quarrying
- D: Manufacturing
- E: Electricity, gas and water supply
- F: Construction
- G: Wholesale and retail trade; repair of motor vehicles, motorcycles and personal and household goods
- H: Hotels and restaurants
- I: Transport, storage and communications
- J: Financial intermediation
- K: Real estate, renting and business activities
- L: Public administration and defence; compulsory social security
- M: Education
- N: Health and social work
- O: Other community, social and personal service activities
- P: Private households with employed persons

³For 2010 - 2021, industry was classified according to the "Malaysia Standard Industrial Classification (MSIC) 2008" as follows:

- A: Agriculture, forestry and fishing
- B: Mining and quarrying
- C: Manufacturing
- D: Electricity, gas, steam and air conditioning supply
- E: Water supply; sewerage, waste management and remediation activities
- F: Construction
- G: Wholesale and retail trade, repair of motor vehicles and motorcycles
- H: Transportation and storage
- I: Accommodation and food service activities
- J: Information and communication
- K: Financial and insurance/takaful activities
- L: Real estate activities
- M: Professional, scientific and technical activities
- N: Administrative and support service activities
- O: Public administration and defence; compulsory social security
- P: Education
- Q: Human health and social work activities
- R: Arts, entertainment and recreation
- S: Others service activities
- T: Activities of households as employers
