Announcement

The Department of Statistics Malaysia (DOSM) has launched OpenDOSM NextGen as a medium that provides a catalog of data and visualisations to facilitate users' analysis of various data and can be accessed through <https://open.dosm.gov.my>.

DOSM will conduct the Agricultural Census in 2024. Please visit <https://www.myagricensus.gov.my> for more information. The theme is "Agriculture Census, Key to Agricultural Development".

The Government of Malaysia has declared National Statistics Day (MyStats Day) on October 20th each year. MyStats Day theme is "Statistics is the Essence of Life". DOSM commemorates its 75th Diamond Jubilee in 2024.

PREFACE

The monthly Labour Force Report, Malaysia, presents the statistics of the labour force, employment and unemployment obtained from the Labour Force Survey (LFS). The implementation of the LFS is based on the guidelines and recommendations of the International Labour Organization (ILO) with reference to the Surveys of Economically Active Population, Employment, Unemployment and Underemployment: An ILO Manual on Concepts and Methods.

The labour force statistics are used as a vital input for labour market analysis, policy formulation, as well as planning, implementing, and monitoring programmes particularly related to human resource development. These statistics also serve as essential references for researchers, economists, academicians, the private sector, and individuals involved in research related to employment and the labour market.

The Labour Force Report for April 2024 describes the labour supply condition based on the current situation. The report also elaborates on the month-on-month changes to examine the immediate effects of recent events. In addition, annual changes from the same month of the previous year are also reported.

The Department of Statistics Malaysia gratefully acknowledges the cooperation and contribution rendered by all parties in making this publication a success. Every piece of feedback and suggestion towards improving future reports is highly appreciated.

DATO' SRI DR. MOHD UZIR MAHIDIN
Chief Statistician Malaysia

GLOSSARY

Actively unemployed	:	Persons who were available for work and were actively looking for a job during the reference week.
Category of skills	:	For reporting purposes, the category of occupation is regrouped into three levels of skills based on the Malaysia Standard Classification of Occupation (MASCO) 2013 as below: Skilled workers: <ol style="list-style-type: none">1. Managers;2. Professionals; and3. Technicians and associate professionals. Semi-skilled workers: <ol style="list-style-type: none">4. Clerical support workers;5. Services and sales workers;6. Skilled agricultural, forestry, livestock, and fishery workers;7. Craft and related trades workers; and8. Plant and machine operators and assemblers. Low-skilled workers: <ol style="list-style-type: none">9. Elementary occupations. <p>Starting in January 2022, the category of occupation is based on the Malaysia Standard Classification of Occupation (MASCO) 2020 with an addition of group 0 - Armed forces occupations.</p>
Economic activity	:	Classification of industries according to the Malaysia Standard Industrial Classification (MSIC) 2008 version 1.0 into five main sectors namely Agriculture, Mining & quarrying, Manufacturing, Construction and Services. In the meantime, Manufacturing and Services are further disaggregated into sub-sectors.
Employed	:	All persons who, at any time during the reference week worked at least one hour for pay, profit or family gain either as an employer, employee, own-account worker or unpaid family worker.
Employee	:	A person who works for a public or private employer and receives regular remuneration in wages, salary, commission, tips or payment in kind.
Employer	:	A person who operates a business, a plantation or other trade and employs one or more workers to help him.
Employment-to-population ratio	:	The proportion of the employed population to working-age population.
Inactively unemployed	:	Did not look for work because they believed no work was available or that they were not qualified; Would have looked for work if they had not been temporarily ill or had it not been for weather conditions; and had looked for work prior to the reference week and were waiting for the result of job applications.

GLOSSARY

Labour force	:	Labour force refers to population in the working age group (15 to 64 years) who are either employed or unemployed
Labour force participation rate	:	The ratio of the labour force to the working-age population, expressed as a percentage.
Outside labour force	:	All persons not classified as employed or unemployed are classified as outside labour force. This category consists of housewives, students (including those going for further studies), retired, disabled persons and those not interested in looking for a job.
Own-account worker	:	A person who operates his own farm, business or trade without employing any paid workers in the conduct of his farm, trade or business.
Skill-related underemployment	:	Those with tertiary education and working in the semi-skilled and low-skilled categories.
Time-related underemployment	:	A group of people who were employed less than 30 hours per week during the reference week because of the nature of their work or due to insufficient work and were able and willing to accept additional hours of work. Persons who were employed more than 30 hours per week during the reference week are considered to be in full employment.
Unemployed	:	Those who did not work during the reference week were classified into two groups, which are actively and inactively unemployed.
Unemployment rate	:	The proportion of the unemployed population to the total population in the labour force, expressed as a percentage.
Unpaid family worker	:	A person who works without pay or wages on a farm, business or trade operated by another member of the family.

CONCEPTS AND DEFINITIONS

What is Labour Force Survey (LFS)?

Labour Force Survey (LFS) was conducted to collect information on the structure and distribution of labour force, employment and unemployment from the perspective of labour supply.

LFS encompasses both urban and rural areas for all administrative districts within all states in Malaysia using multi-modal data collection approach through the personal interview and a Computer-Assisted Telephone Interview (CATI).

The LFS are conducted based on the standard guidelines and recommendations of the International Labour Organization (ILO).

The survey population comprises persons who live in the private living quarters, hence excludes persons residing in institutions such as hotels, hospitals, hostels, prisons, and workers residing in construction worksite.

The working age for the analysis of LFS in Malaysia refers to household members between the age of 15 to 64 years during the reference week, who are either in the labour force or outside the labour force.

LABOUR FORCE

- The population in the working age group of 15 to 64 years (in completed years at last birthday).
- Either employed or unemployed in the reference week.

EMPLOYED

- Persons who, at any time during the reference week worked at least one hour for pay, profit or family gain (as an employer, employee, own-account worker or unpaid family worker).
- Persons who did not work during the reference week because of illness, injury, bad weather, leave, labour dispute and social or religious reasons but had a job, farm, enterprise or other family enterprise to return to.
- Those on temporary lay-off with pay who would definitely be called back to work.

UNEMPLOYED

- Those who did not work during the reference week but are interested to work and seeking for a job.
- Classified into two groups which are actively and inactively unemployed.

OUTSIDE LABOUR FORCE

- All persons not classified as employed or unemployed.
- Example: housewives, students, retirees, disabled persons and those not interested in looking for a job.

UNEMPLOYMENT RATE

- The proportion of the unemployed population to the total population in labour force.
- Percentage of the unemployed population in the labour force.

LABOUR FORCE PARTICIPATION RATE

- The economic activity of a population depends on the demographic characteristics of that population.
- The proportion of the economically active population, hence differs between sub-groups of that population.
- These variations are measured by specific activity rates termed as labour force participation rate.
- Labour force participation rate is defined as the ratio of the labour force to the working age population (15 to 64 years), expressed as a percentage.

SEASONAL ADJUSTMENT

- Time-series data are very useful for economist, policy & decision makers and time-series analysts to identify the important features of economics series such as direction, turning point and consistency between other economic indicators. Sometimes this feature is difficult to observe because of seasonal movements. Thus, if seasonal effect can be removed, the behaviour of the series would be better viewed. The estimation and removal of the seasonal effects is called seasonal adjustment.
- Seasonal adjustment is a process to identify and to remove the regular within-a-year seasonal pattern, which may also include the influences of moving holidays and working/trading days effect in each period. The ultimate objective of the process is to highlight the underlying trends and short-term movements in the series.
- In Malaysia, most of the time series data is affected by seasonal effects. Hence, to eliminate the seasonal effect as well as to seasonally adjust the Malaysian economic time series data, a standard seasonal adjustment package, X-12 ARIMA was used by the Department of Statistics Malaysia.

KEY REVIEWS

- In April 2024, the number of **employed persons** continued to record increases, with a month-on-month growth of **0.1 per cent (+23.5 thousand persons)** to **16.56 million persons** compared to the previous month (March 2024: 16.53 million persons). The **employment-to-population ratio**, which indicates the ability of the economy to create employment, rose by **0.1 percentage points to 68.0 per cent** in April 2024 (March 2024: 67.9%).
- As for the employment by the economic sector, the Services sector continued to record a rise in the number of employed persons, mainly in the Information & communication, Food & beverage services and Transportation & storage activities. A similar trend in the number of employed persons was also observed in the Manufacturing, Construction, Mining & quarrying sectors, as well as the Agriculture sector during the month.
- The number of employed persons in the **employees'** category constituted **75.1 per cent** of the total employed persons in April 2024. This group rose by **0.1 per cent (+12.3 thousand persons)** to **12.43 million persons** (March 2024: 12.42 million persons). On the same note, the **own-account workers** category continued its upward trend, with a growth of **0.3 per cent (+9.1 thousand persons)** to **3.04 million persons** (March 2024: 3.03 million persons).
- In April 2024, the number of **unemployed persons** posted a slight decrease of **0.04 per cent (-0.2 thousand persons)** to **566.4 thousand persons**, as against 566.6 thousand persons in March 2024. The **unemployment rate** in April remained at **3.3 per cent**, as recorded last month.
- In April 2024, the number of **labour force** edged up by **0.1 per cent (+23.4 thousand persons)**, registering **17.12 million persons** (March 2024: 17.10 million persons). The **labour force participation rate** during the month was unchanged at **70.3 per cent** as in the prior month.
- The number of persons **outside the labour force** in April 2024 registered a slight increase of **0.01 per cent (+0.6 thousand persons)** to **7.23 million persons** (March 2024: 7.23 million persons). The main reason for being outside the labour force was due to **housework/ family responsibilities** with a share of **42.7 per cent**, followed by **schooling/ training** at **41.4 per cent**.
- The positive growth of Malaysia's economy is projected to continue in the coming quarters, backed by resilient domestic spending patterns and an increase in tourism activity, as well as the positive labour market position and revenue growth. Moreover, external demand is also expected to recover as Malaysia benefits from an increase in global production and international trade. Stronger public sector investment in line with progress in the construction sector, especially continued infrastructure development under the 12th Malaysia Plan, will lead to an increase in more jobs. This situation will encourage more people to enter the job market, thus boosting Malaysia's labour market position. Therefore, a more optimistic condition of the country's labour force is expected in the coming months, in line with Malaysia's favourable economic performance.

1

A VIBRANT LABOUR FORCE SITUATION WAS OBSERVED IN APRIL 2024, MIRRORING THE ENCOURAGING COUNTRY'S ECONOMIC SITUATION

The recovery of the global economy encouraged Malaysia's trade growth, which led to a better Malaysia's economy as well as the labour market in April 2024. The Ministry of Investment, Trade and Industry (MITI) stated that, Malaysia's trade continued its upward trajectory in April 2024, recording a 12.1 per cent growth to RM221.74 billion against April 2023¹. Moreover, the growth was contributed mainly by higher exports of machinery, equipment and parts; chemicals and chemical products; crude petroleum; palm oil and palm oil-based agriculture products; and iron and steel products. Therefore, many large companies and firms, especially in the Manufacturing sector, took this opportunity to improve their production to fulfil the export demand. Thus, the existence of various job opportunities to attain labour demand had supported a better country's economy and furthered the labour supply to meet the needs, and thus encouraged more entry into the country's labour market.

Furthermore, in early April 2024, Malaysians were celebrating Eid al-Fitr. This celebration seems to have partly sustained the country's economy and further supported the improvement of the labour market due to higher demands in various types of Food and beverage (F&B) businesses, especially in bakeries, pastries, cookies, and other traditional Malay foods. Many new and existing entrepreneurs took the opportunity to be more creative by creating various innovations and quality foods that could attract buyers, further launching their online businesses, or opening stalls in Aidilfitri Bazaars. Thus, many businesses have commenced their activities particularly for Micro, Small, and Medium Enterprises (MSMEs), leading to a healthier economic situation. Therefore, a vibrant labour force situation was observed in April 2024, with a higher number of employed persons while the unemployed were further reduced, mirroring the encouraging country's economic situation as portrayed by the higher Gross Domestic Product (GDP) of 4.2 per cent for the first quarter of 2024 (Q4 2023: 2.9%).

In the meantime, Malaysia's Leading Index (LI) remained in positive growth for four consecutive months, recording an increase of 2.3 per cent to 112.2 points in March 2024 (March 2023: 109.7 points). However, the monthly LI fell by 0.5 per cent in March 2024 as against the previous month. The smoothed growth rate of the LI for March 2024 is consistently above the trend, surpassing 100 points, reflecting an optimistic Malaysian economy in line with a robust private consumption and external trade recovery. Meanwhile, the monthly external trade indicators for April 2024 for exports and imports, both registered a decline of -10.7 per cent (March 2024: +15.5%) and -7.6 per cent (March 2024: +15.7%), respectively.

2

The number of employed persons continued to record increases in April 2024

In April 2024, the number of employed persons continued to record increases, with a month-on-month growth of **0.1 per cent (+23.5 thousand persons)** to **16.56 million persons** compared to the previous month (March 2024: 16.53 million persons). Based on the seasonally adjusted estimates, there was a 0.1 per cent growth in the number of employed persons. Year-on-year, the number of employed persons continued to increase by 1.9 per cent (+304.3 thousand persons) compared to 16.25 million persons in April 2023.

As for employment by the economic sector, the Services sector continued to record a rise in the number of employed persons, mainly in the Information & communication, Food & beverage services and Transportation & storage activities. A similar trend in the number of employed persons was also

¹ <https://malaysiagazette.com/2024/05/20/perdagangan-malaysia-kekal-prestasi-kukuh/#:~:text=KUALA%20LUMPUR%20%E2%80%93%20Perdagangan%20Malaysia%20menganalkan,yang%20keempat%20bulan%20berturut%20turut>

observed in the Manufacturing, Construction, Mining & quarrying sectors, as well as the Agriculture sector during the month.

The **employment-to-population ratio**, which indicates the ability of the economy to create employment, rose by **0.1 percentage points** to **68.0 per cent** in April 2024 (March 2024: 67.9%). Compared to one year earlier, this ratio increased by 0.5 percentage points from 67.5 per cent in April 2023 [Chart 1].

Chart 1: Employed persons and employment-to-population ratio, January 2019 - April 2024

The number of employed persons in the **employees’** category constituted **75.1 per cent** of the total employed persons in April 2024. This group rose by **0.1 per cent (+12.3 thousand persons)** to **12.43 million persons** (March 2024: 12.42 million persons). On the same note, the **own-account workers** category continued its upward trend, with a growth of **0.3 per cent (+9.1 thousand persons)** to **3.04 million persons** (March 2024: 3.03 million persons). This category primarily consists of daily income earners working as small business operators, such as retailers, hawkers and sellers in the market, as well as smallholders [Chart 2].

Chart 2: Employed person by status in employment, Mar 2024 and April 2024

During the month, the number of **employed persons who were temporarily not working** decreased by **2.5 per cent (-2.1 thousand persons)** to **82.4 thousand persons** (March 2024: 84.6 thousand persons). Year-on-year, this category experienced a decline of 4.7 per cent (-4.1 thousand persons) from 86.5 thousand persons recorded in April 2023. This group of persons, who were most likely unable to work temporarily, were not classified as unemployed as they still had work to return to.

3 April's unemployment rate stood at 3.3 per cent

In April 2024, the number of **unemployed persons** posted a slight decrease of **0.04 per cent (-0.2 thousand persons)** to **566.4 thousand persons** from 566.6 thousand persons in March 2024. The **unemployment rate** in April stood at **3.3 per cent** as recorded last month. In seasonally adjusted estimates, the number of unemployed persons increased by 0.1 per cent, recording 3.3 per cent of the unemployment rate.

On an annual basis, the number of unemployed persons fell by 3.5 per cent (-20.5 thousand persons) as compared to April 2023 (586.9 thousand persons). Accordingly, the unemployment rate declined by 0.2 percentage points from 3.5 per cent in April 2023 [**Chart 3**].

Chart 3: Unemployed persons and unemployment rate, 1982 - 2022 and January 2021 - April 2024

In terms of the unemployment category, the **actively unemployed** or those who were available for work and actively seeking jobs, made up **79.7 per cent** of the total unemployed persons in April 2024. This group recorded a decrease of **0.03 per cent (-0.2 thousand persons)** to **451.4 thousand persons** (March 2024: 451.5 thousand persons). Out of the total of actively unemployed, those who were **unemployed for less than three months** encompassed **61.7 per cent**, while those who had been **unemployed for more than a year²** were **6.7 per cent**. Similarly, those who believed that no jobs were available or the **inactively unemployed** registered a month-on-month decline of **0.05 per cent (-0.1 thousand persons)** to **115.0 thousand persons** (March 2024: 115.0 thousand persons) [**Chart 4**].

² Referring to a person who has been unemployed for one year or longer (Source: KILM: Long-term unemployment) https://www.ilo.org/wcmsp5/groups/public/---dgreports/---stat/documents/publication/wcms_422451.pdf

Chart 4: Unemployed category and duration of unemployment, March 2024 and April 2024

The unemployment rate for youth aged **15 to 24 years** in April 2024 remained unchanged at **10.6 per cent**, with **305.9 thousand unemployed youths** (March 2024: 10.6%; 306.3 thousand persons). On the same note, the unemployment rate for youth aged **15 to 30 years** was **6.5 per cent**, registering **434.9 thousand unemployed youths** (March 2024: 6.6%; 434.5 thousand persons) [Chart 5].

Chart 5: Unemployment rate by selected age groups, 1982 - 2022 and January 2021 - April 2024

4 LFPR in April 2024 was unchanged at 70.3 per cent

In April 2024, the number of **labour force** edged up by **0.1 per cent (+23.4 thousand persons)**, registering **17.12 million persons** (March 2024: 17.10 million persons). The **labour force participation rate (LFPR)** during the month was unchanged at **70.3 per cent** as in the prior month. In terms of seasonally adjusted estimates, the number of labour force increased by 0.1 per cent, with the LFPR of 70.2 per cent.

Annually, the number of labour force rose by 1.7 per cent (+283.7 thousand persons) as against the same month of the preceding year (April 2023: 16.84 million persons). Subsequently, the LFPR rose by 0.3 percentage points as compared to April 2023 (70.0%) [Chart 6].

Chart 6: Labour force and LFPR, 1982 - 2022 and January 2021 - April 2024

By gender comparison, both **males** and **females** registered increases in the number of labour force by recording **10.47 million persons** (March 2024: 10.45 million persons) and **6.66 million persons** (March 2024: 6.65 million persons), respectively. As for the LFPR of males and females, both registered a rise of **0.1 percentage points to 83.2 per cent and 56.6 per cent**, respectively.

On a yearly comparison, both the male and female labour force remained in a positive trend, with a rise of 1.7 per cent and 1.6 per cent, respectively (April 2023: 10.29 million persons; 6.55 million persons). Accordingly, male LFPR improved by 0.3 percentage points from 82.9 per cent, while female LFPR rose by 0.4 percentage points from 56.2 per cent in April 2023 [**Chart 7**].

Chart 7: Labour force and LFPR by sex, 1982 - 2022 and January 2021 - April 2024

5 The main reason for being outside the labour force was due to housework/ family responsibilities

The number of persons **outside the labour force** in April 2024 registered a slight increase of **0.01 per cent (+0.6 thousand persons)** to **7.23 million persons** (March 2024: 7.23 million persons). Year-on-year, the number of outside labour force went up by 0.1 per cent from 7.23 million persons in April last year. The main reason for being outside the labour force was due to **housework/ family responsibilities** with a share of **42.7 per cent**, followed by **schooling/ training** at **41.4 per cent** [Chart 8].

Chart 8: Share of outside labour force by reasons for not seeking work, March 2024 and April 2024

6 LOOKING AHEAD

The Malaysian economy was seen to be encouraging with the growth of GDP in the first quarter of 2024, which was higher than expected, growing by 4.2 per cent compared to 2.9 per cent in the previous quarter. The increase was driven by a recovery in export performance and strong domestic demand. Malaysia is also well positioned and is expected to grow between 4 per cent and 5 per cent in 2024.

The encouraging underlying performance of the Malaysian economy can be seen through the labour market, which continues to have positive momentum with a low inflation rate, a rising industrial production index and value of construction work, as well as Malaysia's growing trade volume. This increase in economic momentum reflects the country's strong foundation and investor confidence in the domestic economy, as well as the implementation of various government policies.

Thus, Malaysia's economic growth is expected to pick up in the next quarter, which will be supported by resilient domestic spending patterns and an increase in tourism activity based on the country's stable labour market, the unemployment rate returning to pre-pandemic levels due to better job creation rates, Malaysia's export momentum is expected to increase in the first half of 2024 based on weak global growth assumptions as well as moderate current inflationary pressures³.

Following the positive growth momentum, which is expected to continue in the coming quarters, domestic spending activity will continue to grow due to the positive labour market position, revenue growth and increased tourist arrivals. In addition, external demand is also expected to recover as

³ <https://www.bharian.com.my/bisnes/lain-lain/2024/05/1248925/ekonomi-malaysia-diunjur-lebih-baik-pada-suku-akan-datang>

Malaysia benefits from an increase in global production and international trade. Stronger public sector investment, in line with progress in the construction sector, especially continued infrastructure development under the 12th Malaysia Plan will lead to an increase in more jobs. This situation will encourage more people to enter the job market, thus boosting Malaysia's labour market position.

In addition, the implementation of strategies and measures under the National Energy Transition Roadmap, the New Industry Master Plan 2030, and the initiatives of the 12th Malaysia Plan will continue to attract high-value investment in high-value-added industries, thereby creating high-income jobs that improve people's quality of life. Furthermore, based on the forecast of business performance for the second quarter of 2024, businesses are expecting favorable surrounding backed by a marginal positive confidence indicator of +0.7 per cent as compared to +4.2 per cent in the previous quarter. Therefore, a more optimistic condition of the country's labour force is expected in the coming months, in line with Malaysia's favourable economic performance.

Notes:

¹For 1982 - 2000, industry was classified according to the "Malaysia Industrial Classification, (Updated) 1972" as follows:

- A: Agriculture, forestry, livestock and fishing
- B: Mining and quarrying
- C: Manufacturing
- D: Electricity, gas and water
- E: Construction
- F: Wholesale and retail trade, restaurants and hotels
- G: Transport, storage and communications
- H: Finance, insurance, real estate and business services
- I: Community, social and personal services

²For 2001 - 2009, industry was classified according to the "Malaysia Standard Industrial Classification (MSIC) 2000" as follows:

- A: Agriculture, hunting and forestry
- B: Fishing
- C: Mining and quarrying
- D: Manufacturing
- E: Electricity, gas and water supply
- F: Construction
- G: Wholesale and retail trade; repair of motor vehicles, motorcycles and personal and household goods
- H: Hotels and restaurants
- I: Transport, storage and communications
- J: Financial intermediation
- K: Real estate, renting and business activities
- L: Public administration and defence; compulsory social security
- M: Education
- N: Health and social work
- O: Other community, social and personal service activities
- P: Private households with employed persons

³For 2010 - 2022, industry was classified according to the "Malaysia Standard Industrial Classification (MSIC) 2008" as follows:

- A: Agriculture, forestry and fishing
- B: Mining and quarrying
- C: Manufacturing
- D: Electricity, gas, steam and air conditioning supply
- E: Water supply; sewerage, waste management and remediation activities
- F: Construction
- G: Wholesale and retail trade, repair of motor vehicles and motorcycles
- H: Transportation and storage
- I: Accommodation and food service activities
- J: Information and communication
- K: Financial and insurance/takaful activities
- L: Real estate activities
- M: Professional, scientific and technical activities
- N: Administrative and support service activities
- O: Public administration and defence; compulsory social security
- P: Education
- Q: Human health and social work activities
- R: Arts, entertainment and recreation
- S: Others service activities
- T: Activities of households as employers

^f Revised

⁴For year 2011-2019, 2021 and 2022, total includes 'Activities of extraterritorial organizations and bodies'

Table E: Employed person by industry, Malaysia, 1982 - 2022 (cont'd)

('000)

Notes:

¹For 1982 - 2000, industry was classified according to the "Malaysia Industrial Classification, (Updated) 1972" as follows:

- A: Agriculture, forestry, livestock and fishing
- B: Mining and quarrying
- C: Manufacturing
- D: Electricity, gas and water
- E: Construction
- F: Wholesale and retail trade, restaurants and hotels
- G: Transport, storage and communications
- H: Finance, insurance, real estate and business services
- I: Community, social and personal services

²For 2001 - 2009, industry was classified according to the "Malaysia Standard Industrial Classification (MSIC) 2000" as follows:

- A: Agriculture, hunting and forestry
- B: Fishing
- C: Mining and quarrying
- D: Manufacturing
- E: Electricity, gas and water supply
- F: Construction
- G: Wholesale and retail trade; repair of motor vehicles, motorcycles and personal and household goods
- H: Hotels and restaurants
- I: Transport, storage and communications
- J: Financial intermediation
- K: Real estate, renting and business activities
- L: Public administration and defence; compulsory social security
- M: Education
- N: Health and social work
- O: Other community, social and personal service activities
- P: Private households with employed persons

³For 2010 - 2022, industry was classified according to the "Malaysia Standard Industrial Classification (MSIC) 2008" as follows:

- A: Agriculture, forestry and fishing
- B: Mining and quarrying
- C: Manufacturing
- D: Electricity, gas, steam and air conditioning supply
- E: Water supply; sewerage, waste management and remediation activities
- F: Construction
- G: Wholesale and retail trade, repair of motor vehicles and motorcycles
- H: Transportation and storage
- I: Accommodation and food service activities
- J: Information and communication
- K: Financial and insurance/takaful activities
- L: Real estate activities
- M: Professional, scientific and technical activities
- N: Administrative and support service activities
- O: Public administration and defence; compulsory social security
- P: Education
- Q: Human health and social work activities
- R: Arts, entertainment and recreation
- S: Others service activities
- T: Activities of households as employers

^f Revised

⁴For year 2011-2019, 2021 and 2022, total includes 'Activities of extraterritorial organizations and bodies'

Table F: Employed person by status of employment, Malaysia, 1982 - 2022

Time Series	Total	Status of Employment
