

LABOUR FORCE, MALAYSIA **APRIL 2021**

Released at 12.00 p.m, Wednesday, 09 June 2021

KEY REVIEWS

- In April 2021, the number of employed persons remained in an increasing trend with month-on-month changes of 0.1 per cent or equivalent to 22.7 thousand persons to record 15.35 million persons (March 2021: 15.33 million persons). The employment-to-population ratio which indicates the ability of an economy to create employment remained unchanged at 65.4 per cent in April 2021.
- From the viewpoint of economic sector, Services registered an upward trend in the number of employed persons during the month largely in Wholesale & retail trade; Food and beverages services, Education and Human health & social work activities. Similar trend were also observed in Manufacturing and Construction sectors while both Agriculture and Mining & Quarrying sectors continued to record a negative month-on-month momentum.
- The largest composition of employed persons was the employee's category which comprised of 77.9 per cent, increased by 17.2 thousand persons month-on-month to register 11.96 million persons (March 2021: 11.95 million persons). Similarly, own-account workers registered an addition of 12.3 thousand persons to record 2.49 million persons in April (March 2021: 2.48 million persons).
- The unemployment rate continued to decline in April 2021, lessening by 0.1 percentage point to 4.6 per cent as against the previous month (March 2021: 4.7%). The number of unemployed persons reduced by 10.5 thousand persons (-1.4%) month-on-month to register **742.7 thousand persons** (March 2021: 753.2 thousand persons).
- In April 2021, the number of labour force was higher by 0.1 per cent or 12.2 thousand persons to 16.09 million persons (March 2021: 16.08 million persons). Despite the increase in the number of labour force, the labour force participation rate (LFPR) stood at **68.6 per cent** during the month (March 2021: 68.6%).
- The number of outside labour force during the month was higher by 0.2 per cent (+13.1 thousand persons) to 7.38 million persons as compared to 7.36 million persons in March 2021. Outside labour force was dominated by schooling/ training categories with 43.5 per cent (3.21 million persons) and followed by housework/ family responsibilities with 42.1 per cent (3.10 million persons).
- May 2021 witnessed the public health crisis situation in Malaysia becoming more challenging with a rise in the number of daily infections cases, hence resulting in the implementation of MCO 3.0 nationwide until 31 May 2021. Furthermore, looking at the escalating number of COVID-19 cases and the sharp increase in daily cases towards the end of May 2021, resulted in the implementation of the total lockdown imposed nationwide from 1 to 14 June 2021 with the closure of all economic and social sectors except for essential economic and service sectors. Hence, labour market condition is foreseen to face another challenging situation in the upcoming months.

LABOUR FORCE REMAINED OPTIMIST IN APRIL 2021 WITH SLIGHT IMPROVEMENT IN NUMBER OF EMPLOYED PERSONS AND LOWER UNEMPLOYMENT RATE

The new daily cases of COVID-19 in April 2021, increased of about 1,000 and reached more than 3,000 towards the end of the month. During this period, most states were in Recovery Movement Control Order (MCO), with the exception of the largely populated states namely Johor, Kelantan, Kuala Lumpur, Selangor and Pulau Pinang which were in Conditional MCO. In particular, MCO was implemented in Kelantan from 16 to 29 April, and extended to 17 May. Inter-state travelling was still not allowed; however, most of economic activities were operating adhering to strict standard operating procedures (SOP).

April this year observed more bazaars, buffets and night market activities following of Ramadhan, unlike the previous fasting month in 2020, whereby all of these activities were restricted. Hence, along with festive season, businesses had seen more demand, thereby allowing some relief to the labour market situation. Additionally, secondary schools had reopened, thereby allowing education-related businesses such as school canteens and bus services to expand their operations.

In summary, labour force remained optimist in April 2021 with slight improvement in number of employed persons and lower unemployment rate. Moreover, monthly indicators of exports and imports continued to post a positive growth with 0.6 per cent and 5.4 per cent respectively. Better business outlook was also reflected by the performance of Leading Index (LI) for March 2021 which posted an increase of 1.8 per cent month-on-month (February 2021: 1.1%).

Despite the labour force positive situation in April 2021, it may be short-lived with the nationwide MCO implemented starting on 12 May 2021. The uncertainties of labour market may had emerged as the country faced the rapid climb in the new cases. In the bright side, the expansion of the COVID-19 vaccination programme through the voluntary opt-in registrations from May 2021 onwards may post signs of better recovery in the economy and subsequently in the labour market.

The **Labour Force Report for April 2021** describes the labour supply situation as the country entered the fourteenth month of various phases MCO. The report will elaborate on the month-on-month changes to examine the immediate effects of the MCO to contain the spread of COVID-19. Users are advised to interpret the monthly statistics with caution since they are non-seasonally adjusted. In addition, annual changes from the same month of the previous year are also reported.

Employed persons remained in an increasing trend with month-on-month changes of 0.1 per cent

In April 2021, the number of employed persons remained in an increasing trend with month-on-month changes of 0.1 per cent or equivalent to 22.7 thousand persons to record 15.35 million persons (March 2021: 15.33 million persons). Similarly, on year-on-year basis, the number of employed persons continued its upward changes for two consecutive months, registering a stronger year-on-year growth of 2.8 per cent (March 2021:0.6%; April 2020: -1.0%) or 418.6 thousand persons (April 2020: 14.93 million persons). This year-on-year increase was due to low base of number of employed persons during April last year as a result of nationwide total lockdown.

From the viewpoint of economic sector, Services registered an upward trend in the number of employed persons during the month largely in Wholesale & retail trade; Food and beverages services, Education and Human health & social work activities. Similar trends were also observed in Manufacturing and

Construction sectors while both Agriculture and Mining & Quarrying sectors continued to record a negative month-on-month momentum.

The employment-to-population ratio which indicates the ability of an economy to create employment remained unchanged at 65.4 per cent in April 2021. However, the ratio was higher by 0.6 percentage points as compared with one year earlier (64.8%). [Chart 1]

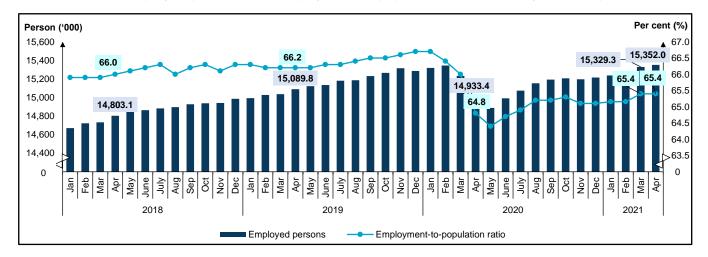

Chart 1: Employed persons and employment-to-population ratio, January 2018 - April 2021

In April 2021, the largest composition of employed persons was the employee's category which comprised of 77.9 per cent, increased by 17.2 thousand persons month-on-month to register 11.96 million persons (March 2021: 11.95 million persons). Similarly, own-account workers registered an addition of 12.3 thousand persons to record 2.49 million persons in April (March 2021: 2.48 million persons). The increase in own-account workers was following the continuous operations of small businesses during the month. [Chart 2]

This group comprised mostly of daily income earners working as small business operators such as small retailers; hawkers; sellers in markets and stalls as well as smallholders.

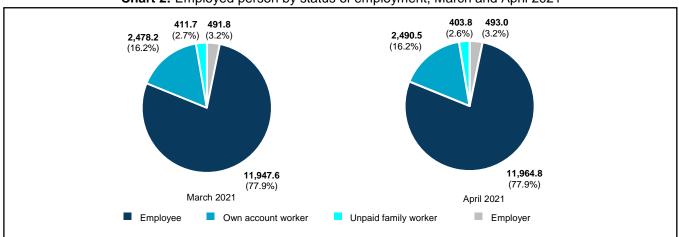

Chart 2: Employed person by status of employment, March and April 2021

During the month, the number of **employed persons who were temporarily not working remained on a declining trend with a reduction of 5.0 thousand persons to record 116.0 thousand persons** (March 2021: 121.0 thousand persons). Likewise, comparing with the twelve months earlier, the number of employed persons who were temporarily not working edged down by 5.8 million persons (-98.0%) as against to 5.9 million persons in April 2020 which was during the second months of the total lockdown in the country due to the pandemic. This group of persons, who were most likely not able to work was not categorised as unemployed as they had work to return to.

The unemployment rate continued to decline in April 2021

The unemployment rate continued to decline in April 2021, lessening by 0.1 percentage point to 4.6 per cent as against the previous month (March 2021: 4.7%). The number of unemployed persons reduced by 10.5 thousand persons (-1.4%) month-on-month to register 742.7 thousand persons (March 2021: 753.2 thousand persons).

Similarly, comparing with the same month of the previous year, after posting continuous increase for fourteen months since the beginning of the pandemic, the unemployment rate recorded year-on-year negative changes for the first time due to the high base of unemployment rate (April 2020: 5.0%). During the same period, the number of unemployed persons recorded a decline of 4.6 per cent or equivalent to 36.1 thousand persons (April 2020: 778.8 thousand persons). [Chart 3]

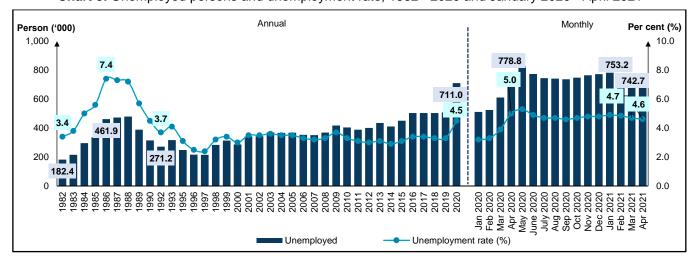

Chart 3: Unemployed persons and unemployment rate, 1982 - 2020 and January 2020 - April 2021

The actively unemployed which is defined as those who were available for work and were actively seeking job encompassed of more than 80 per cent of the total unemployed person. This category was reduced by 8.2 thousand persons (-1.3%) to record 618.7 thousand persons (March 2021: 626.9 thousand persons). Out of the total of actively unemployed, 52.1 per cent were unemployed for less than three months, while 10.4 per cent were in long-term unemployment of more than a year. The average share of the unemployed persons of more than a year was much higher as compared to the previous year, thus indicating that the country is experiencing a slow term in hiring the unemployed persons. [Chart 4]

¹ Referring to people who have been unemployed for one year or longer (Source: KILM 11: long-term Unemployment) https://www.ilo.org/wcmsp5/groups/public/---dgreports/---stat/documents/publication/wcms 422451.pdf)

4

The same scenario was witnessed in the number of **inactively unemployed** who believed that there were no jobs available. The number was **lowered by 2.3 thousand persons (-1.8%) for the second consecutive months to record 124.0 thousand persons** (March 2021: 126.3 thousand persons).

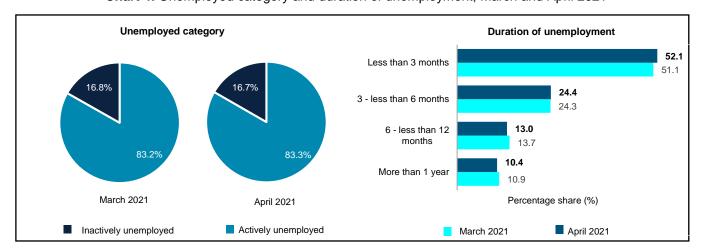

Chart 4: Unemployed category and duration of unemployment, March and April 2021

During the month, the youth unemployment rate for aged 15 to 24 years registered an increase of 0.3 percentage points to record 13.7 per cent as compared to March 2021 (13.4%). On the contrary, the number of youths unemployed fell by 10.4 thousand persons to 310.7 thousand persons as compared to the previous month (321.1 thousand persons). Similarly, the youth unemployment rate for aged 15 to 30 years dropped by 0.6 percentage points to mark 8.7 per cent in March 2021. **[Chart 5]**

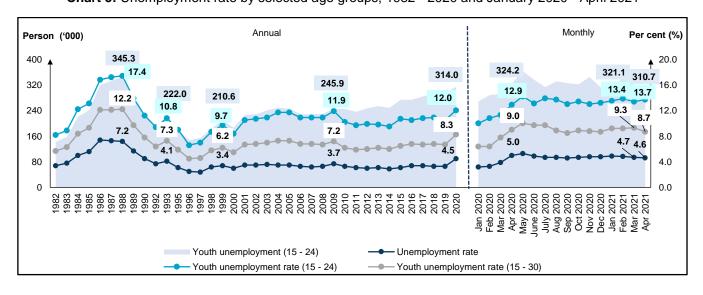

Chart 5: Unemployment rate by selected age groups, 1982 - 2020 and January 2020 - April 2021

LFPR stood at 68.6 per cent

In April 2021, the number of labour force was higher by 0.1 per cent or 12.2 thousand persons to 16.09 million persons (March 2021: 16.08 million persons). Despite the increase in the number of labour force, the labour force participation rate (LFPR) stood at 68.6 per cent during the month (March 2021: 68.6%).

Likewise, the number of labour force was **added up by 382.5 thousand persons (2.4%)** year-on-year (April 2020: 15.71 million persons) while the LFPR rose by 0.5 percentage points from 68.1 per cent. **[Chart 6]**

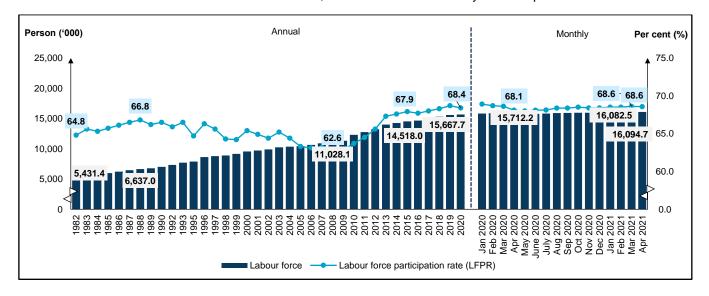

Chart 6: Labour force and LFPR, 1982 - 2020 and January 2020 - April 2021

During the month, both male and female LFPR were unchanged with male LFPR marked at 81.0 per cent, while female LFPR was 55.2 per cent. Labour force by sex showed that male labour force declined by 0.1 per cent (-8.9 thousand persons) to 9.84 million persons (March 2021: 9.84 million persons). Meanwhile, female labour force improved by 0.3 per cent (+21.1 thousand persons) to 6.26 million persons (March 2021: 6.24 million persons). In comparison to one year earlier, male and female LFPR heightened by 0.1 percentage point and 0.7 percentage points respectively. [Chart 7]

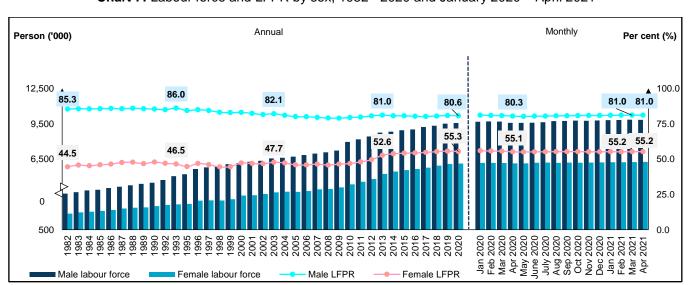

Chart 7: Labour force and LFPR by sex, 1982 - 2020 and January 2020 - April 2021

Outside labour force was dominated by schooling/ training categories

The number of **outside labour force during the month was higher by 0.2 per cent (+13.1 thousand persons)** to **7.38 million persons** as compared to 7.36 million persons in March 2021. Likewise, outside labour force climbed up by 0.4 per cent (+31.7 thousand persons) in the same month of the preceding year. **Outside labour force was dominated by schooling/ training category** with 43.5 per cent (3.21 million persons) and followed by **housework/ family responsibilities category** with 42.1 per cent (3.10 million persons). **[Chart 8]**

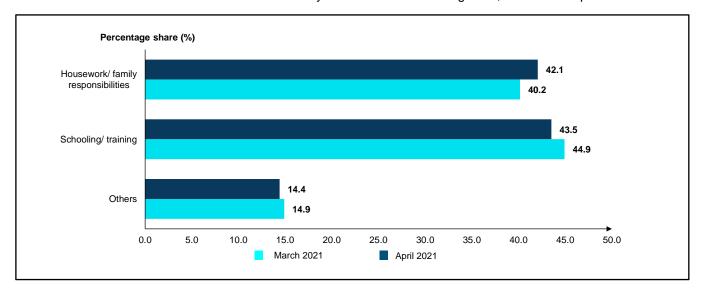

Chart 8: Share of outside labour force by reasons for not seeking work, March and April 2021

GOVERNMENT'S INITIATIVES²

A total of 322,177 employers and 2.64 million registered employees under the Wage Subsidy Programme (PSU) 1.0 had been benefited under PRIHATIN and PENJANA. As of 23 April 2021, the approved wage subsidy applications totalled RM12.88 billion. In the meantime, a total of RM1.17 billion was distributed to 73,567 employers to support them in continuing their operations as well as maintaining the 635,748 employees. Furthermore, 137,075 persons were accepted to participate in the Reskilling and Upskilling Program's courses, which were offered by a selected ministries and government agencies. In addition, 132,403 employees were able to obtain job under the Recruitment Incentive and Training Assistance Program. Manufacturing, as well as wholesale and retail trade, were some of the most common industries and areas in which workers are employed.

To support the businesses, through the PENJANA SME Financing, a total of 7,424 applications with a total loan value of RM1.39 billion were granted. Moreover, a total of RM421.1 million was disseminated to assist 12,662 Micro SMEs, including those in the retail and services sectors through the PENJANA Microcredit Financing under Bank Simpanan Nasional (BSN). To support the Agriculture and Food Industry, a total of RM107.23 million was distributed to aid 9,400 agricultural micro-SMEs through the Agrobank Microcredit Financing Scheme. Meanwhile, a total of RM1 billion has been apportioned by the government for SMEs and micro-SMEs which were still impacted by COVID-19. As of April 23, there

² This segment is included in the report as a reference for reader based on the 52^{2d} LAKSANA Report of 30 April 2021 on the status of approvals, disbursements and registrations

7

were 644 applications for PENJANA Tourism Financing with 321 had been approved totalling RM63.9 million. Additionally, a total of RM226.8 million fund had been channelled to 749 SMEs under the Bumiputera Relief Financing (BRF) which particularly designated for the affected Bumiputera SMEs.

Furthermore, to support the Technical and Digital Mid-tier Companies (MTCs), a total of RM65.3 million was disseminated to 13,864 SMEs and companies under the Technical and Digital Utilisation support initiative in the form of grants and loans for digitisation services subscription. Additionally, a total of 229 applications costing RM106.4 million were received for MyCreative Venture to assist the Arts, Culture and Entertainment sector, with 117 applications worth RM21.7 million being approved amounting to RM21.7 million. Meanwhile, the CENDANA programme has channelled a total of RM3.01 million to 469 recipients, including artists, collectives, and organisations operating in the Malaysian arts and culture sector.

Hence, it is hoped that the labour market will remain stable with the injection of support from various initiatives implemented despite the worsening state of the country's health crisis.

LOOKING AHEAD

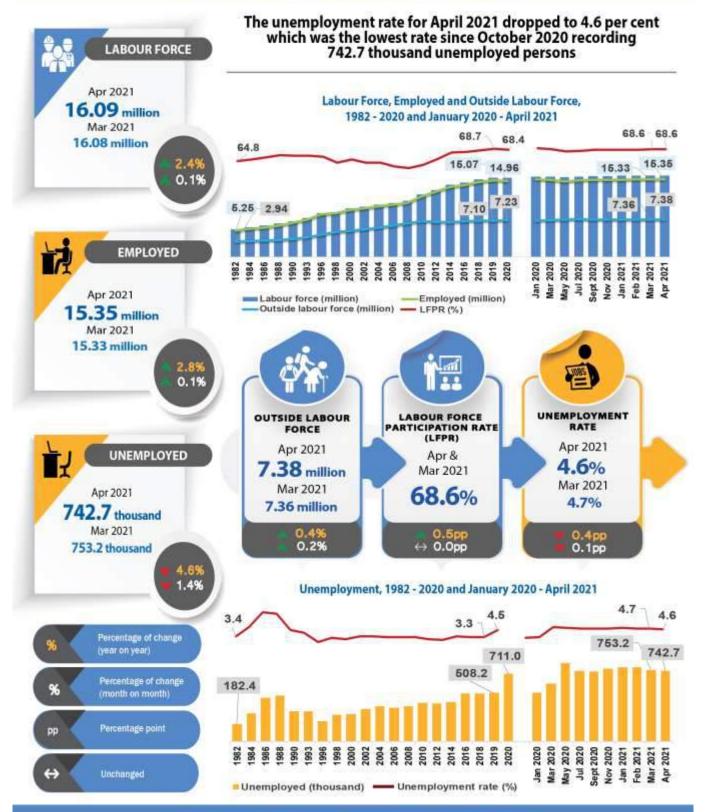

May 2021 witnessed the public health crisis situation in Malaysia becoming more challenging with a rise in the number of daily infections cases, hence resulting in the implementation of MCO 3.0 nationwide until 31 May 2021. During this phase, most of economic sectors were allowed to operate, although employers had to adopt work from home policies with not more than 30 percent of management-level staff in the premises in addition to closures of all educational institutions while social events, sports activities, games and recreation were prohibited. Inter-states and inter-district travels were also restricted with certain exceptions. This scenario signalled some challenges to the labour market in May especially to the new entrants and small business operators.

Furthermore, the escalating number of COVID-19 cases and the sharp increase in daily cases towards the end of May 2021, resulted in the implementation of the total lockdown imposed nationwide from 1 to 14 June 2021 with the closure of all economic and social sectors except for essential economic and service sectors. Hence, labour market condition is foreseen to face another challenging situation in the upcoming months.

Nevertheless, with the implementation of various initiatives under the PEMERKASA Plus assistance program, including the extension of the wage subsidy program for a month to all affected sectors of the economy, the increase in the rate of Special Prihatin Grant by RM500 to RM1,500, the facility of assistance facilities and targeted recovery to affected SMEs, one-off special assistance to taxi drivers, rental cars, school buses, tour buses, e-hailing & tourist guides, extending the service period of 14,000 medical officers and existing contract nurses, re-appointing over 500 retired health workers this year on a contractual basis to accommodate the urgent needs of health workers and to accelerate the vaccination from 80,000 to 150,000 doses per day to the people by June 2021, therefore, it is hoped that the provision of these various assistances will assist the affected groups as well as help to restore the labour market condition and the public health situation in Malaysia in the months ahead.

CONCEPTS AND DEFINITIONS

What is Labour Force Survey (LFS)?

Labour Force Survey (LFS) was conducted to collect information on the structure and distribution of labour force, employment and unemployment from the perspective of labour supply.

The LFS are conducted based on the standard guidelines recommendations of International Labour Organizations (ILO).

LFS encompasses both urban and rural areas for all administrative districts within of all states in Malaysia using the actual status approach through the personal interview, Computer Assisted Telephone Interview (CATI) and telephone interview method.

The survey population comprises persons who live in the private living quarters, hence excludes persons residing in institutions such as hotels, hospitals, hostels, prisons, and workers residing in construction worksite.

The working age for the analysis of LFS in Malaysia refers to household members between the age of 15 to 64 years during the reference week, who are either in the labour force or outside the labour force.

LABOUR FORCE

- . The population in the working age group of 15 to 64 years (in completed years at last birthday).
- · Either employed or unemployed in the reference week.

OUTSIDE LABOUR FORCE

- · All persons not classified as employed or unemployed.
- Example: housewives, students, retired, disabled persons and those not interested in looking for a job.

EMPLOYED

- Persons who, at any time during the reference week worked at least one hour for pay, profit or family gain (as an employer, employee, own-account worker or unpaid family worker).
- Persons who did not work during the reference week because of illness, injury, bad weather, leave, labour dispute and social or religious reasons but had a job, farm, enterprise or other family enterprise to return to.
- . Those on temporary lay-off with pay who would definitely be called back to work.

UNEMPLOYED

- . Those who did not work during the reference week but are interested to work and seeking for a job.
- Classified into two groups which are actively and inactively unemployed.

UNEMPLOYMENT RATE

Percentage of the unemployed population in the labour force.

LABOUR FORCE PARTICIPATION RATE

- The economic activity of a population depends on the demographic characteristics of that population.
- The proportion of the economically active population, hence differs between sub-groups of that population.
- These variations are measured by specific activity rates termed as labour force participation rate.
- Labour force participation rate is defined as the ratio of the labour force to the working age population (15 to 64 years), expressed as a percentage.

¹For 1982- 2000, category of occupation are classified according to the "Dictionary of Occupational Classification, 1980" as follows:

- 1: Professional, technical and related workers
- 2: Administrative and managerial workers
- 3: Clerical and related workers
- 4: Sales workers
- 5: Service workers
- 6: Agricultural, animal husbandry and forestry workers, fishermen and hunters
- 7: Production and related workers, transport equipment operators and labourers

²For 2001 - 2010, category of occupation are classified according to the "Malaysia Standard Classification of Occupations (MASCO) 1998" as follows:

- 1: Legislators, senior officials and managers
- 2: Professionals
- 3: Technicians and associate professionals
- 4: Clerical workers
- 5: Service workers and shop and market sales workers
- 6: Skilled agricultural and fishery workers
- 7: Craft and related trade workers
- 8: Plant and machine-operators and assemblers
- 9: Elementary occupations

³For 2011 - 2015, category of occupation are classified according to the "Malaysia Standard Classification of Occupations (MASCO) 2008" as follows:

- 1: Managers
- 2: Professionals
- 3: Technicians and associate professionals
- 4: Clerical support workers
- 5: Service workers and shop and market sales workers
- 6: Skilled agricultural, forestry and fishery workers
- 7: Craft and related trades workers
- 8: Plant and machine-operators and assemblers
- 9: Elementary occupations

⁴For 2016 - 2019, category of occupation are classified according to the "Malaysia Standard Classification of Occupations (MASCO) 2013" as follows:

- 1: Managers
- 2: Professionals
- 3: Technicians and associate professionals
- 4: Clerical workers
- 5: Service and sales workers
- 6: Skilled agricultural, forestry, livestock and fishery workers
- 7: Craft and related trades workers
- 8: Plant and machine-operators and assemblers
- 9: Elementary occupations

Note

¹For 1982 - 2000, industry was classified according to the "Malaysia Industrial Classification, (Updated) 1972" as follows:

- A: Agriculture, forestry, livestock and fishing
- B: Mining and quarrying
- C: Manufacturing
- D: Electricity, gas and water
- E: Construction
- F: Wholesale and retail trade, restaurants and hotels
- G: Transport, storage and communications
- H: Finance, insurance, real estate and business services
- I: Community, social and personal services

²For 2001 - 2009, industry was classified according to the "Malaysia Standard Industrial Classification (MSIC) 2000" as follows:

- A: Agriculture, hunting and forestry
- B: Fishing
- C: Mining and quarrying
- D: Manufacturing
- E: Electricity, gas and water supply
- F: Construction
- G: Wholesale and retail trade; repair of motor vehicles, motorcycles and personal and household goods
- H: Hotels and restaurants
- I: Transport, storage and communications
- J: Financial intermediation
- K: Real estate, renting and business activities
- L: Public administration and defence; compulsory social security
- M: Education
- N: Health and social work
- O: Other community, social and personal service activities
- P: Private households with employed persons

³For 2010 - 2019, industry was classified according to the "Malaysia Standard Industrial Classification (MSIC) 2008" as follows:

- A: Agriculture, forestry and fishing
- B: Mining and quarrying
- C: Manufacturing
- D: Electricity, gas, steam and air conditioning supply
- E: Water supply; sewerage, waste management and remediation activities
- F: Construction
- G: Wholesale and retail trade, repair of motor vehicles and motorcycles
- H: Transportation and storage
- I: Accommodation and food service activities
- J: Information and communication
- K: Financial and insurance/takaful activities
- L: Real estate activities
- M: Professional scientific and technical activities
- N: Administrative and support service activities
- O: Public administration and defence; compulsory social security
- P: Education
- Q: Human health and social work activities
- R: Arts, entertainment and recreation
- S: Others service activities
- T: Activities of households as employers

Note

¹For 1982 - 2000, industry was classified according to the "Malaysia Industrial Classification, (Updated) 1972" as follows:

- A: Agriculture, forestry, livestock and fishing
- B: Mining and quarrying
- C: Manufacturing
- D: Electricity, gas and water
- E: Construction
- F: Wholesale and retail trade, restaurants and hotels
- G: Transport, storage and communications
- H: Finance, insurance, real estate and business services
- I: Community, social and personal services

²For 2001 - 2009, industry was classified according to the "Malaysia Standard Industrial Classification (MSIC) 2000" as follows:

- A: Agriculture, hunting and forestry
- B: Fishing
- C: Mining and quarrying
- D: Manufacturing
- E: Electricity, gas and water supply
- F: Construction
- G: Wholesale and retail trade; repair of motor vehicles, motorcycles and personal and household goods
- H: Hotels and restaurants
- I: Transport, storage and communications
- J: Financial intermediation
- K: Real estate, renting and business activities
- L: Public administration and defence; compulsory social security
- M: Education
- N: Health and social work
- O: Other community, social and personal service activities
- P: Private households with employed persons

³For 2010 - 2019, industry was classified according to the "Malaysia Standard Industrial Classification (MSIC) 2008" as follows:

- A: Agriculture, forestry and fishing
- B: Mining and quarrying
- C: Manufacturing
- D: Electricity, gas, steam and air conditioning supply
- E: Water supply; sewerage, waste management and remediation activities
- F: Construction
- G: Wholesale and retail trade, repair of motor vehicles and motorcycles
- H: Transportation and storage
- I: Accommodation and food service activities
- J: Information and communication
- K: Financial and insurance/takaful activities
- L: Real estate activities
- M: Professional scientific and technical activities
- N: Administrative and support service activities
- O: Public administration and defence; compulsory social security
- P: Education
- Q: Human health and social work activities
- R: Arts, entertainment and recreation
- S: Others service activities
- T: Activities of households as employers

Table F: Employed person by status of employment, Malaysia, 1982 - 2020

Time Series	 Total	('000) Status of Employment									
		Employer	Employee	Own Account Worker	Unpaid Family Worker
