

# Measuring Public Service Productivity

# Agenda

- Global experience in measuring public sector productivity
- Key Steps in measuring public sector productivity
- Experimental Project measuring public sector productivity for the education sector
- Role of statistics in developing national and sectoral public sector productivity measurement initiatives

# National and sectoral public sector productivity measurement initiatives - Countries initiatives

- **Measuring public sector productivity in the UK**

Since 1988, the Office for National Statistics has been progressively moving away from the output=input approach to productivity, and incorporating direct measures of the volume of government output in the national accounts. the UK government commissioned Sir Tony Atkinson to undertake a review of the measurement of government output in the national accounts. This review (Atkinson, 2005) provides a comprehensive overview of developments and recommendations for future progress.

- **Measuring public sector productivity in Finland**

widely regarded as a European leader in public sector productivity measurement. A project was established to measure public sector productivity in Finland in 1995, located in Statistics Finland, the national statistics office.

- **Measuring public sector productivity in Sweden**

Sweden has been measuring public sector productivity since the mid-1980s. An Expert Group on Public Finances ( a subcommittee under the Ministry of Finance) established a steering group to conduct the work. The steering group was supported by Statistics Sweden, the national statistics office (Ministry of Finance, 1997). Particular focus is given to the development of output indicators for services

## The Extent of Direct Measurement of Real Government Output in Selected OECD Countries

	Government functions for which volume of government outputs are being directly estimated	Percentage coverage
United Kingdom	Health, education, social protection, public order and safety	Two-thirds of government output
Canada	University education	7 per cent of government output
Finland	Health, education, social protection, public order and safety	70-80 per cent of employee expenditure by central government
New Zealand	Health, education, social protection, public order and safety, public insurance services	Between 60 per cent and 70 per cent of central government output
Norway	Health, education	—
Australia	Health, education	Between 50 per cent and 60 per cent of government output. Experimental measures in other areas.
Netherlands	Health, education	Between 20 per cent and 50 per cent of government output
Italy	Health, education	Between 20 per cent and 50 per cent of government output
Other European Union countries	—	See text

Sources: Various, including OECD (1999a), OECD (2003), Tuke (2004), Atkinson (2004:33), Snelling (2004), Fraumeni *et al.* (2004). Countries may use different methods.

## Measuring government productivity : Key steps

- measure public service output using a direct volume approach
- adjust the volume measures of output for quality change
- measure public service inputs using direct or indirect methods
- ensure that appropriate input deflators are used

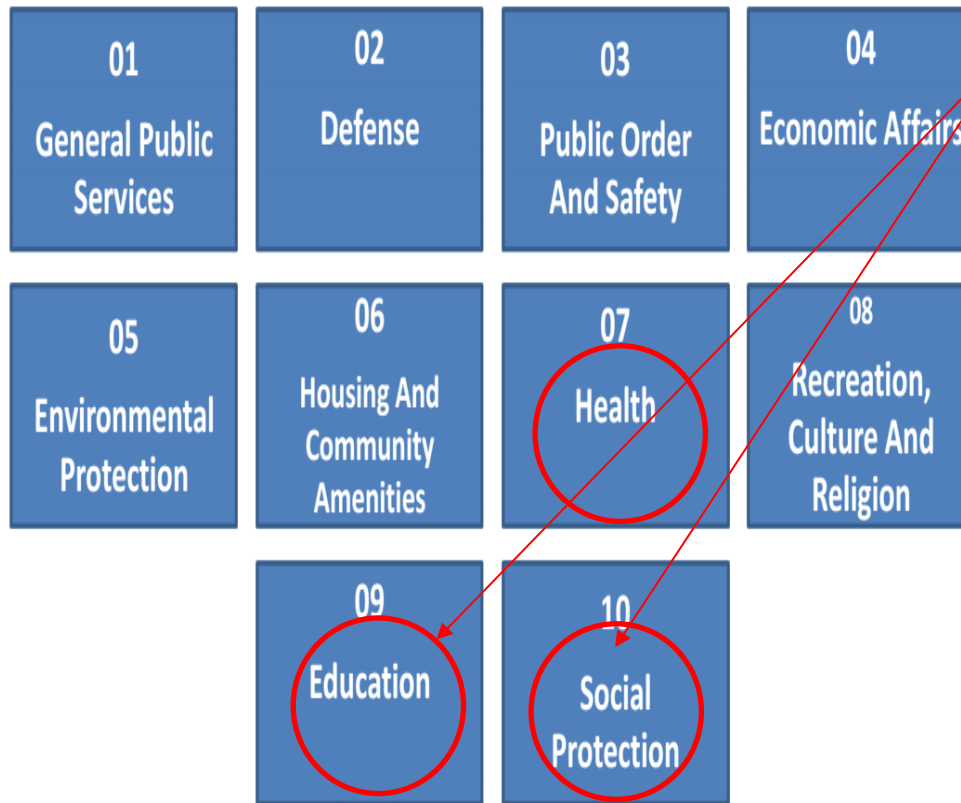

# Make the distinction between individually and collectively consumed serves

## CLASSIFICATION SYSTEM (USED)

COFOG - Classifications of the functions of government

### MAIN COFOG DIVISIONS

#### Individual Consumption

Individual goods and services are those that are consumed by individual households eg. Health Education and Social Protection

#### Collective Consumption

Collective services, on the other hand, are those provided to society as a whole, such as defence and law and order, where individual households cannot be excluded from the benefits of those services.

**Table B.1. First and second level COFOG (cont.)**

First-level	Second-level
Health	<ul style="list-style-type: none"> <li>● Medical products, appliances and equipment.</li> <li>● Outpatient services.</li> <li>● Hospital services.</li> <li>● Public health services.</li> <li>● R&amp;D health.</li> <li>● Health n.e.c.</li> </ul>
Recreation, culture and religion	<ul style="list-style-type: none"> <li>● Recreational and sporting services.</li> <li>● Cultural services.</li> <li>● Broadcasting and publishing services.</li> <li>● Religious and other community services.</li> <li>● R&amp;D recreation, culture and religion.</li> <li>● Recreation, culture and religion n.e.c.</li> </ul>
Education	<ul style="list-style-type: none"> <li>● Pre-primary and primary education.</li> <li>● Secondary education.</li> <li>● Post-secondary non-tertiary education.</li> <li>● Tertiary education.</li> <li>● Education not definable by level.</li> <li>● Subsidiary services to education.</li> <li>● R&amp;D education.</li> <li>● Education n.e.c.</li> </ul>
Social protection	<ul style="list-style-type: none"> <li>● Sickness and disability.</li> <li>● Old age.</li> <li>● Survivors.</li> <li>● Family and children.</li> <li>● Unemployment.</li> <li>● Housing.</li> <li>● Social exclusion n.e.c.</li> <li>● R&amp;D social protection.</li> <li>● Social protection n.e.c.</li> </ul>

Eurostat established a task force to develop a manual on the application of COFOG to national account expenditure data and to discuss the collection of second-level COFOG data for European countries. Second-level COFOG data are not available for Switzerland and all non-European member countries of the OECD: Australia, Canada, Chile, Japan, Israel, Korea, Mexico, New Zealand and the United States. In addition, these data are available only for selected COFOG divisions in some members of the EU. Efforts are underway to reach agreement with these countries about the submission of these data to the OECD.

## COFOG code 09

[Structure](#) [Notes](#)

### Hierarchy

- **Division: 09 - Education**
- 

### Breakdown:

This Division is divided into the following Groups:

- [09.1](#) - Pre-primary and primary education
  - [09.2](#) - Secondary education
  - [09.3](#) - Post-secondary non-tertiary education
  - [09.4](#) - Tertiary education
  - [09.5](#) - Education not definable by level
  - [09.6](#) - Subsidiary services to education
  - [09.7](#) - R&D Education
  - [09.8](#) - Education n.e.c.
- 

### Explanatory note

Government outlays on education include expenditures on services provided to individual pupils and students and expenditures on services provided on a collective basis. Expenditures on individual services are allocated to groups (09.1) through (09.6); expenditures on collective services are assigned to groups (09.7) and (09.8).

Collective educational services are concerned with matters such as formulation and administration of government policy; setting and enforcement of standards; regulation, licensing and supervision of educational establishments; and applied research and experimental development into education affairs and services. However, overhead expenses connected with administration or functioning of a group of schools, colleges, etc. are considered to be individual expenditures and are classified to groups (09.1) through (09.6) as appropriate.

The breakdown of education is based upon the level categories of the 1997 International Standard Classification of Education (ISCED-97) of the United Nations Educational, Scientific and Cultural Organization (UNESCO).

# Detailed structure and explanatory notes

## COFOG code 09.7.0

Structure Notes

### Hierarchy

- Division: 09 - Education
- Group: 09.7 - R&D Education
- Class: **09.7.0 - R&D Education (CS)**

### Explanatory note

- Administration and operation of government agencies engaged in applied research and experimental development related to education;  
- grants, loans and subsidies to support applied research and experimental development related to education undertaken by non-government bodies such as research institutes and universities.  
Excludes: basic research (01.4.0).

- 05.6 - Environmental protection n.e.c.
- 06 - Housing and community amenities
  - 06.1 - Housing development
  - 06.2 - Community development
  - 06.3 - Water supply
  - 06.4 - Street lighting
  - 06.5 - R&D Housing and community amenities
  - 06.6 - Housing and community amenities n.e.c.
- 07 - Health
  - 07.1 - Medical products, appliances and equipment
  - 07.2 - Outpatient services
  - 07.3 - Hospital services
  - 07.4 - Public health services
  - 07.5 - R&D Health
  - 07.6 - Health n.e.c.
- 08 - Recreation, culture and religion
  - 08.1 - Recreational and sporting services
  - 08.2 - Cultural services
  - 08.3 - Broadcasting and publishing services
  - 08.4 - Religious and other community services
  - 08.5 - R&D Recreation, culture and religion
  - 08.6 - Recreation, culture and religion n.e.c.
- 09 - Education
  - 09.1 - Pre-primary and primary education
  - 09.2 - Secondary education
  - 09.3 - Post-secondary non-tertiary education
  - 09.4 - Tertiary education
  - 09.5 - Education not definable by level
  - 09.6 - Subsidiary services to education
  - 09.7 - R&D Education
  - 09.8 - Education n.e.c.

### Hierarchy

- Division: 09 - Education
- Group: **09.1 - Pre-primary and primary education**

### Breakdown:

This Group is divided into the following Classes:

- 09.1.1 - Pre-primary education (IS)
- 09.1.2 - Primary education (IS)

### Hierarchy

- Division: 09 - Education
- Group: 09.1 - Pre-primary and primary education
- **Class: 09.1.1 - Pre-primary education (IS)**

### Explanatory note

- Provision of pre-primary education at ISCED-97 level 0;  
- administration, inspection, operation or support of schools and other institutions providing pre-primary education at ISCED-97 level 0.  
Excludes: subsidiary services to education (09.6.0).

### Hierarchy

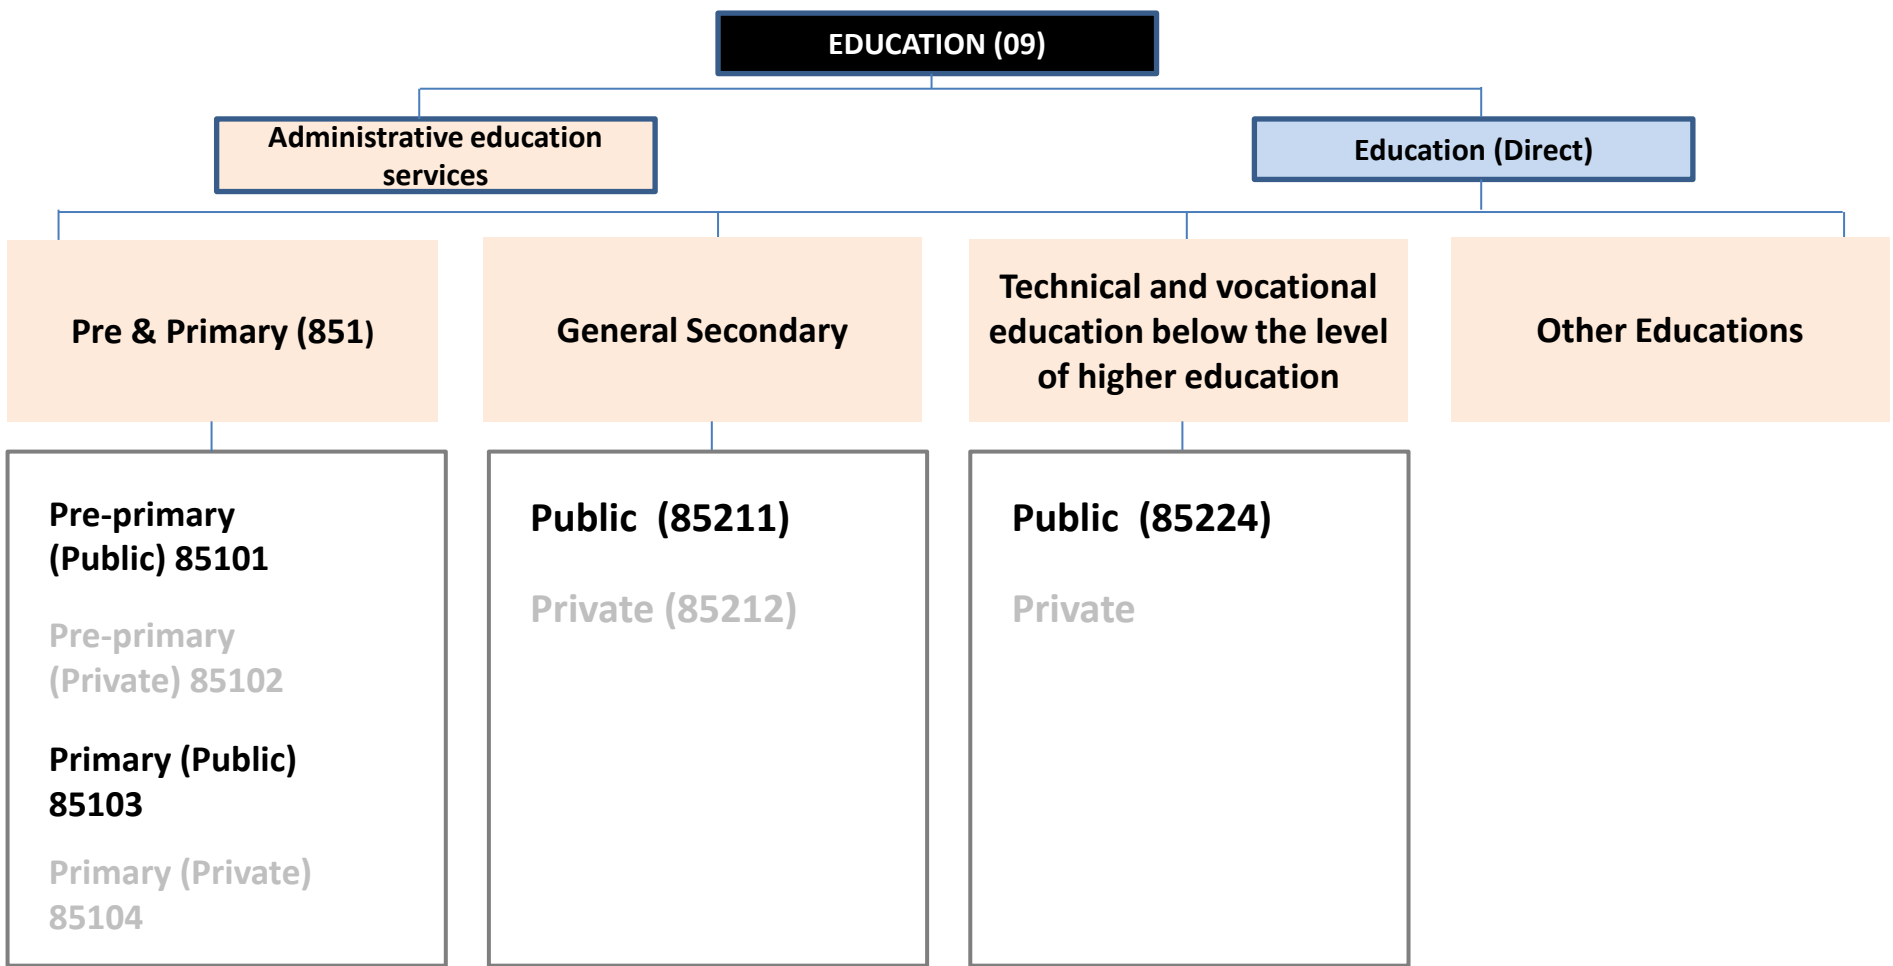

- Division: 09 - Education
- Group: 09.1 - Pre-primary and primary education
- **Class: 09.1.2 - Primary education (IS)**

### Explanatory note

- Provision of primary education at ISCED-97 level 1;  
- administration, inspection, operation or support of schools and other institutions providing primary education at ISCED-97 level 1.  
Includes: literacy programmes for students too old for primary school.  
Excludes: subsidiary services to education (09.6.0).

# Education Expenditure Structure

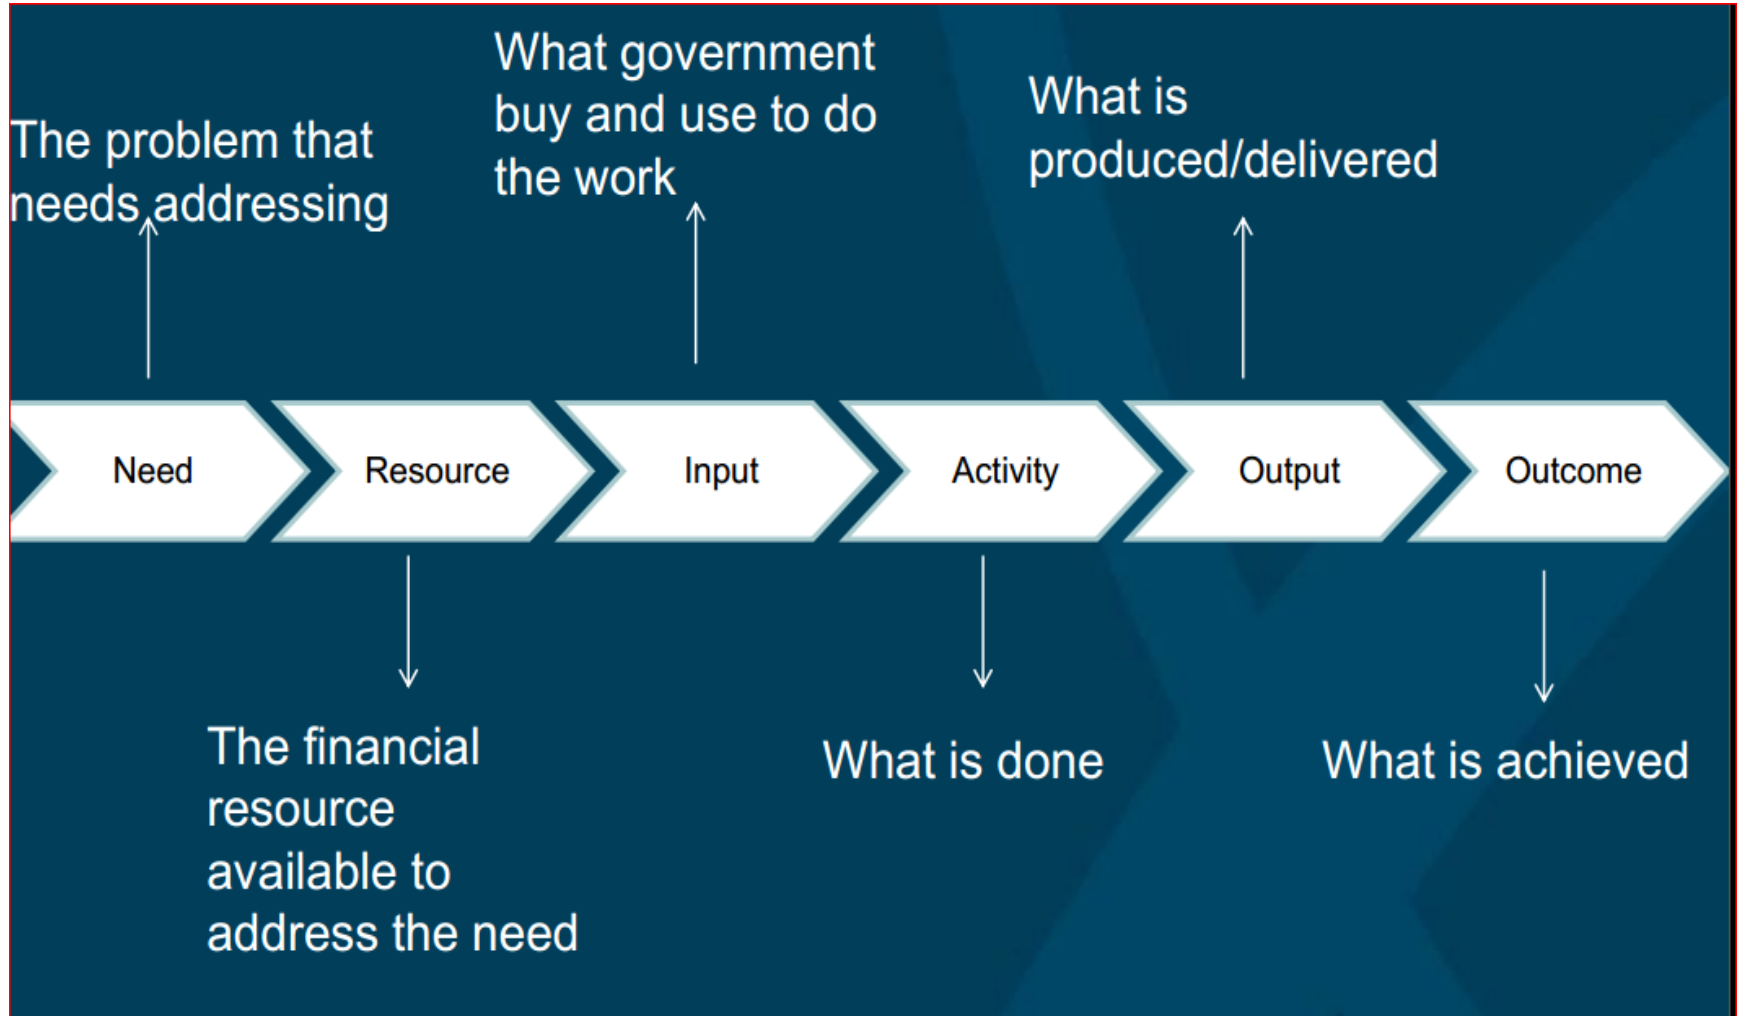

Based on Classification of Functions of the Government (COFOG), all expenditures under Kementerian Pendidikan categorized as Education (09) . Under the Education category, there were six (6) public-related categories divided based on MSIC 2008 - Administrative Education services , Pre-primary education , Primary education, General school secondary education , Technical and vocational below the level of higher education and Other education

**Operasi pendidikan & Pembangunan profesionalisme identified as core**

Code	Programme	Percentage Share expenditure %
010000	PENGURUSAN	3.83
020000	OPERASI PENDIDIKAN	79.4
030000	PENYELIDIKAN DAN PEMBANGUNAN ILMU	0.06
040000	PEMBANGUNAN PROFESIONALISME	2.13
050000	PENGUKUHAN OPERASI PENDIDIKAN	1.78
060000	DASAR PENILAIAN DAN PENGURUSAN PRESTASI	0.17
070000	MAJLIS PEPERIKSAAN MALAYSIA	0.04
080000	DEWAN BAHASA DAN PUSTAKA	0.19
090000	PROGRAM KHUSUS	9.83
100000	DASAR BARU	0.00%
110000	ONE-OFF	2.58

# What are we trying to measure

## Defined / Selected Output by sectors

COFOG categorization	Output Measure	Types of Output	* Quality adjustment
06 Housing & Community Amenities	Inputs = Outputs	Deflated expenditure (pay, goods & services, capital consumption)	Threshold measure (5 or more grade C- & above)
07 Health	Activity measure	<ul style="list-style-type: none"> <li>• # Hospital treatment</li> <li>• # GP consultations</li> <li>• # Prescribed drugs</li> <li>• # Dental Care</li> <li>• # Ophthalmic Care</li> </ul>	<ul style="list-style-type: none"> <li>• Health gain</li> <li>• Short term survival</li> <li>• Waiting Times</li> <li>• National Patient Survey</li> <li>• Primary Care Outcomes</li> </ul>
08 Recreation, Culture & Religion	Inputs = Outputs	Deflated expenditure (pay, goods & services, capital consumption)	
09 Education	Activity measure	# Pupils (Pre-primary, Primary, Secondary) # Pupils (Teacher's training & Healthcare Courses)	<ul style="list-style-type: none"> <li>• Average point scores (APS) for all examinations</li> <li>• Achivement in UPSR (Share of student achieved K1 &amp;K2)</li> <li>• Achivement in SPM (Share of student achieved K1 &amp;K2)</li> </ul>
10 Social Protection Personal social services	Activity measure	# Adults in care # Children in care	
Administration of social security	Activity measure	# Housing benefit cases	

- Besides measuring quantity of output , impak is equally important in delivering public service – indicators to adjust quality must be identified
- K1 :

## Defined / Selected Output by sectors

COFOG categorization	Output Measure	Types of Output
01 General Public Services	Inputs = Outputs	Deflated expenditure (pay, goods & services, capital consumption)
02 Defence	Inputs = Outputs	Deflated expenditure (pay, goods & services, capital consumption)
03 Public Order & Safety 03.1 Police	Inputs = Outputs	Deflated expenditure (pay, goods & services, capital consumption)
03.2 Fire	Activity measure	# of fires attended & # of other services
03.3 Courts	Activity measure	Caseload weighted by average costs
03.4 Prisons	Activity measure	# prisoners
03.4 Probation	Activity measure	Workload hours & # people under supervision
04 Economic Affairs	Inputs = Outputs	Deflated expenditure (pay, goods & services, capital consumption)
05 Environmental Protection	Inputs = Outputs	Deflated expenditure (pay, goods & services, capital consumption)

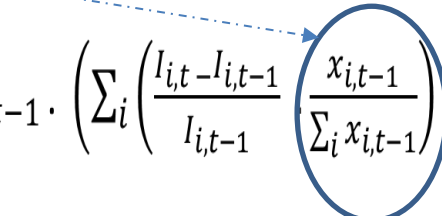

Source: Office of National Statistics,UK

# Formula to compute Public Service Volume of Output

As there is no effective price index for the selected sector, the methodology adopts a volume-based approach to the output activities whereby;

- i. Identify the expenditure for each level output of the sector over time.
- ii. Compute unit cost for the output for the sector (weightage - proxy to price)
- iii. A Chain-linked Laspeyres volume index of output is produced for each output for the sector at National Level
- iv. Adjusted volume measures of output for quality change eg using using change in average point scores at SPM level for education.

- iii. **A National-Level**, chain-linked Laspeyres volume **index of output quantity** is calculated using the **individual sector indices and relative cost weights**, such as

$$L_t = L_{t-1} \cdot \left( \sum_i \left( \frac{I_{i,t} - I_{i,t-1}}{I_{i,t-1}} \cdot \frac{x_{i,t-1}}{\sum_i x_{i,t-1}} \right) + 1 \right)$$

Where:

i and t index sectors, and time respectively

$L_{i,t}$  is a chain-linked aggregate National Laspeyres index of output quantity

$I_{i,t}$  is a chain-linked Laspeyres index of output quantity

$x_{i,t}$  is the level of expenditure in current price terms

Output in the initial period,  $t=0$ , is set equal to 100

## Input Index

- **Public service inputs are the labour, Supplies and Services grant and fixed charges, other expenditure and capital service used to produce public service output**
- **Measure public service inputs using direct (number of employees ) or indirect methods (emolument)**
- **Ensure that appropriate input deflators that are specific to the public service are used in the indirect method**
- **Compute Volume Input index using relative cost weights (Weighting growth of each component by their respective share in aggregate expenditure**

### Output

Quantity of activities performed with *quality adjustment*

### Relative Cost Weights

Weighting growth of each component by their respective share in aggregate expenditure

### Expenditure according to program:

- Number of Teachers and Staff
- Intermediate
- Asset (Consumption of Fixed Capital)

### Deflator

## Output Index

## Input Index

# PRODUCTIVITY

$$P_t = \frac{O_t}{I_t}$$

## Experimental project measuring education sector productivity

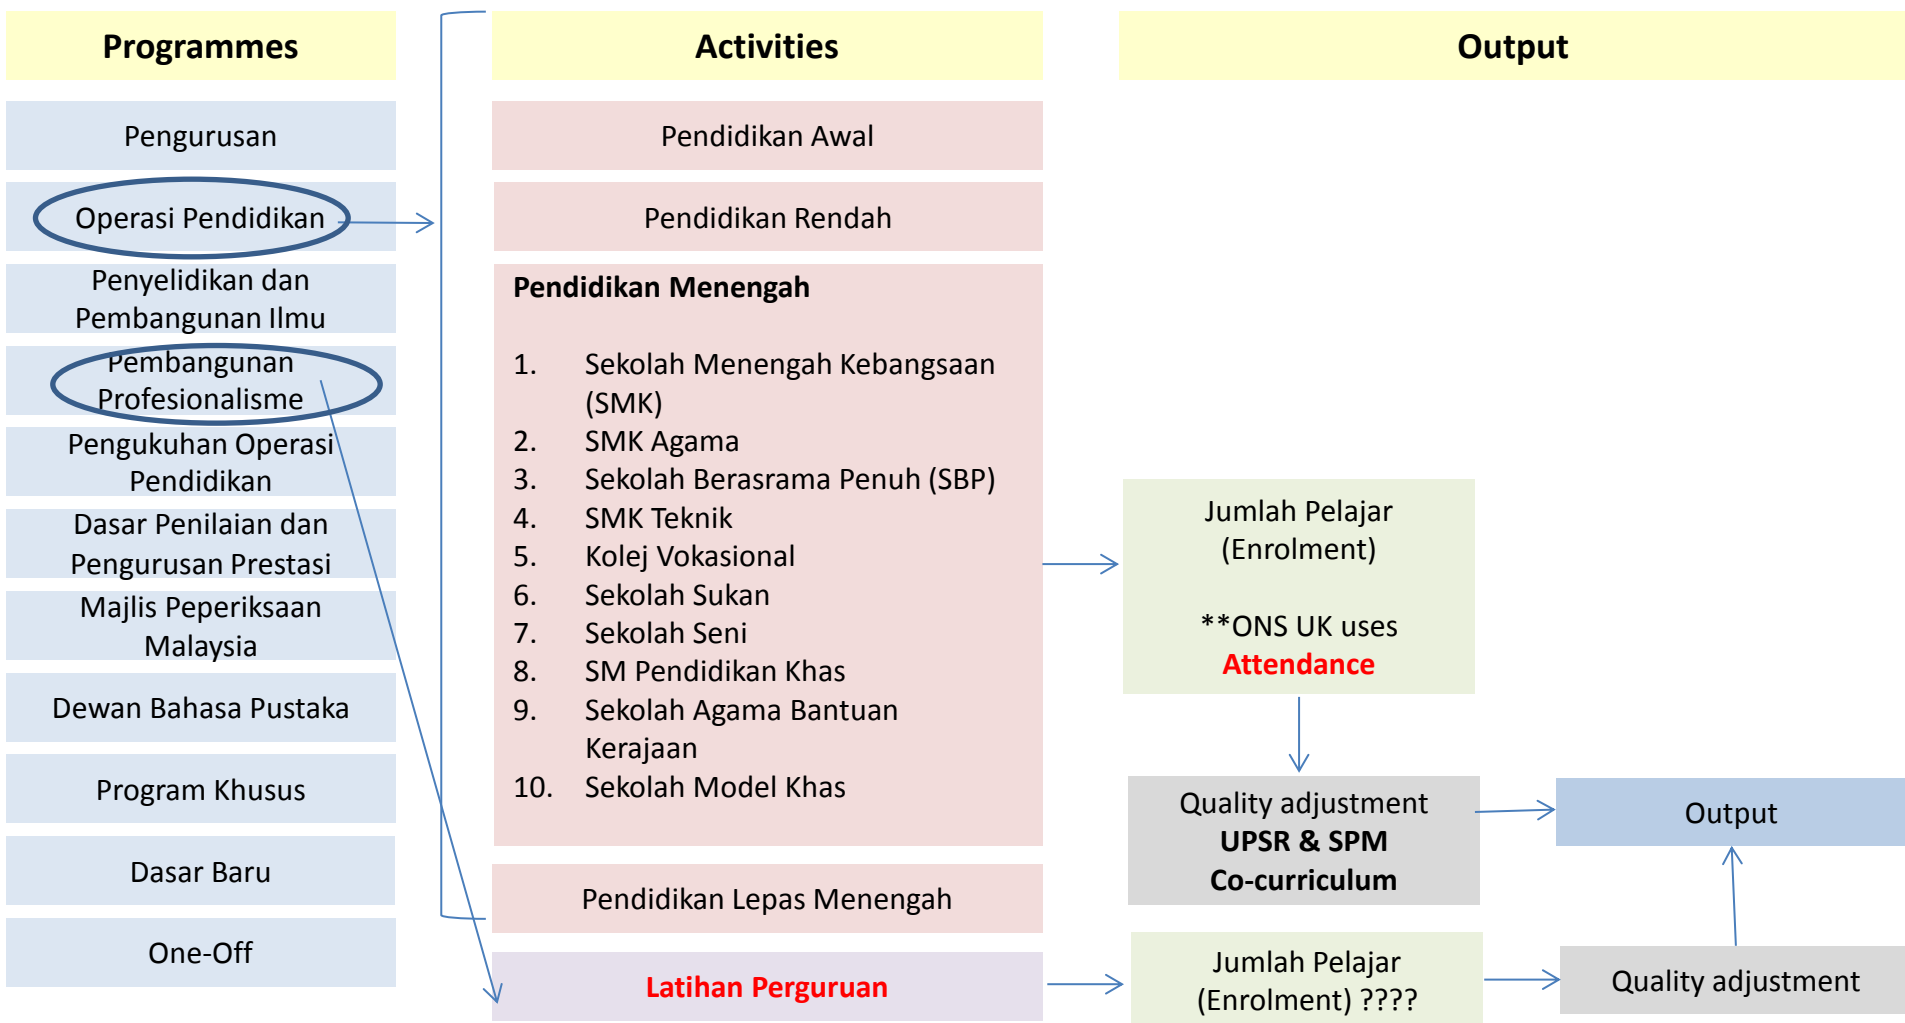

Enhanced methodology of measurement which started in 2015, focus on education based on technical visit to Office for National Statistics and engagement with ONS public service productivity measurement experts;

- Align public service function (education) to Classifications of the Functions of (COFOG) by Dept of Statistics Malaysia (DOSM)
- Quality Adjust output to incorporate impact measures
- Improved use of weightage, direct inputs to reduce inflationary impact on data over time

INPUT	OUTPUT
<ol style="list-style-type: none"><li>1. Emolument</li><li>2. Supplies and Services</li><li>3. Consumption of Fixed Capital (COFC)</li><li>4. Grant and Fixed Charges</li><li>5. Other Expenditures</li></ol>	<p>Student enrolment in pre-primary, primary, secondary, matriculation and institute of teacher education</p>
	<p><b><u>Quality adjustment</u></b> Student examination performance in UPSR (primary school) and SPM (secondary school)</p>

# Experimental project measuring education sector productivity

2. Federal Government Financial Statements 2010-2015

## Education Sector Productivity Index - Findings

With quality adjustment, Education Sector declined by 8.5 % between 2010-2015

**Productivity Index, 2010-2015**  
(2010 index = 100)

- Output index declined in line to the decline in number of students.
- Besides decline in number of students, quality of education was also declining for the last three (3) years, especially for SPM results

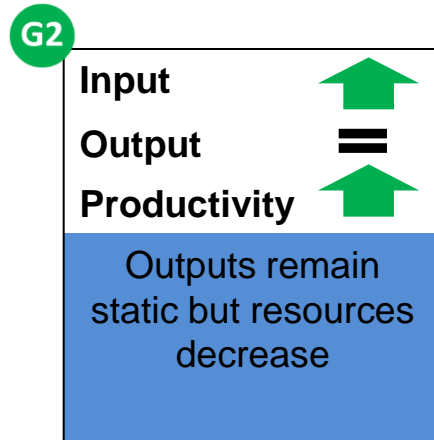

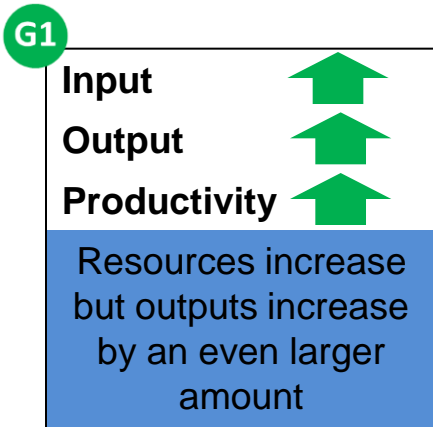

Source :

1. Ministry of Education
2. Federal Government Financial Statements 2010-2015

# There are 8 productivity scenarios

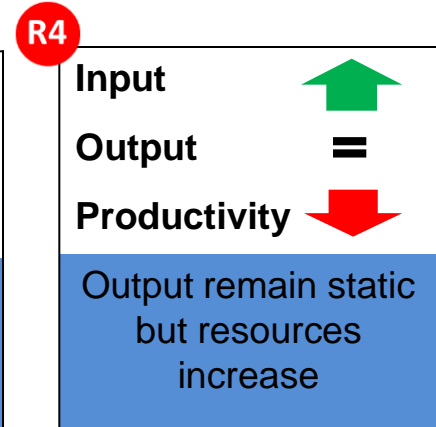

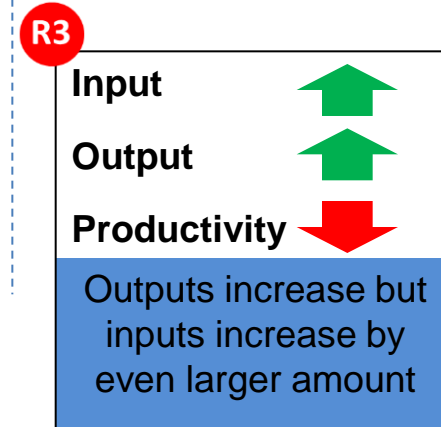

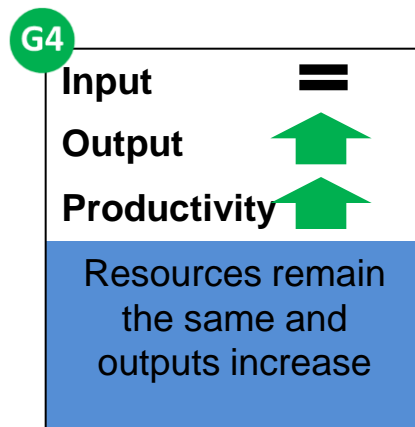

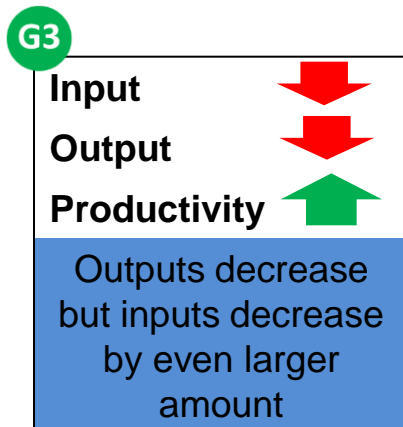

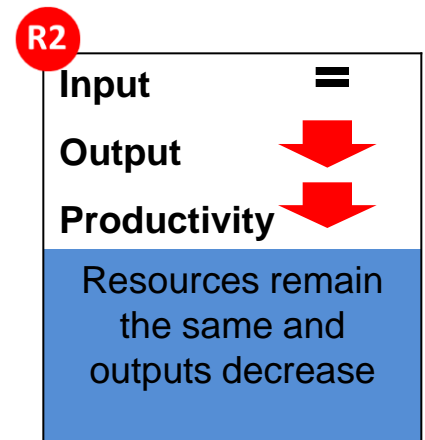

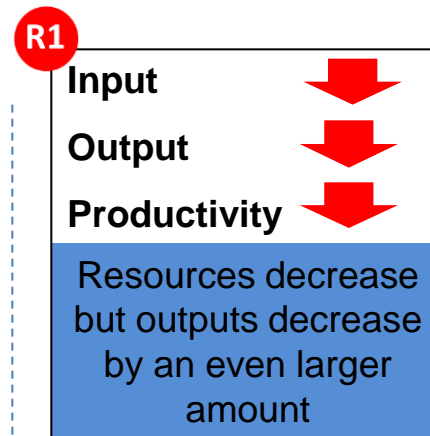

**Output > Input**

**Positive Productivity Growth**

**Input > Output**

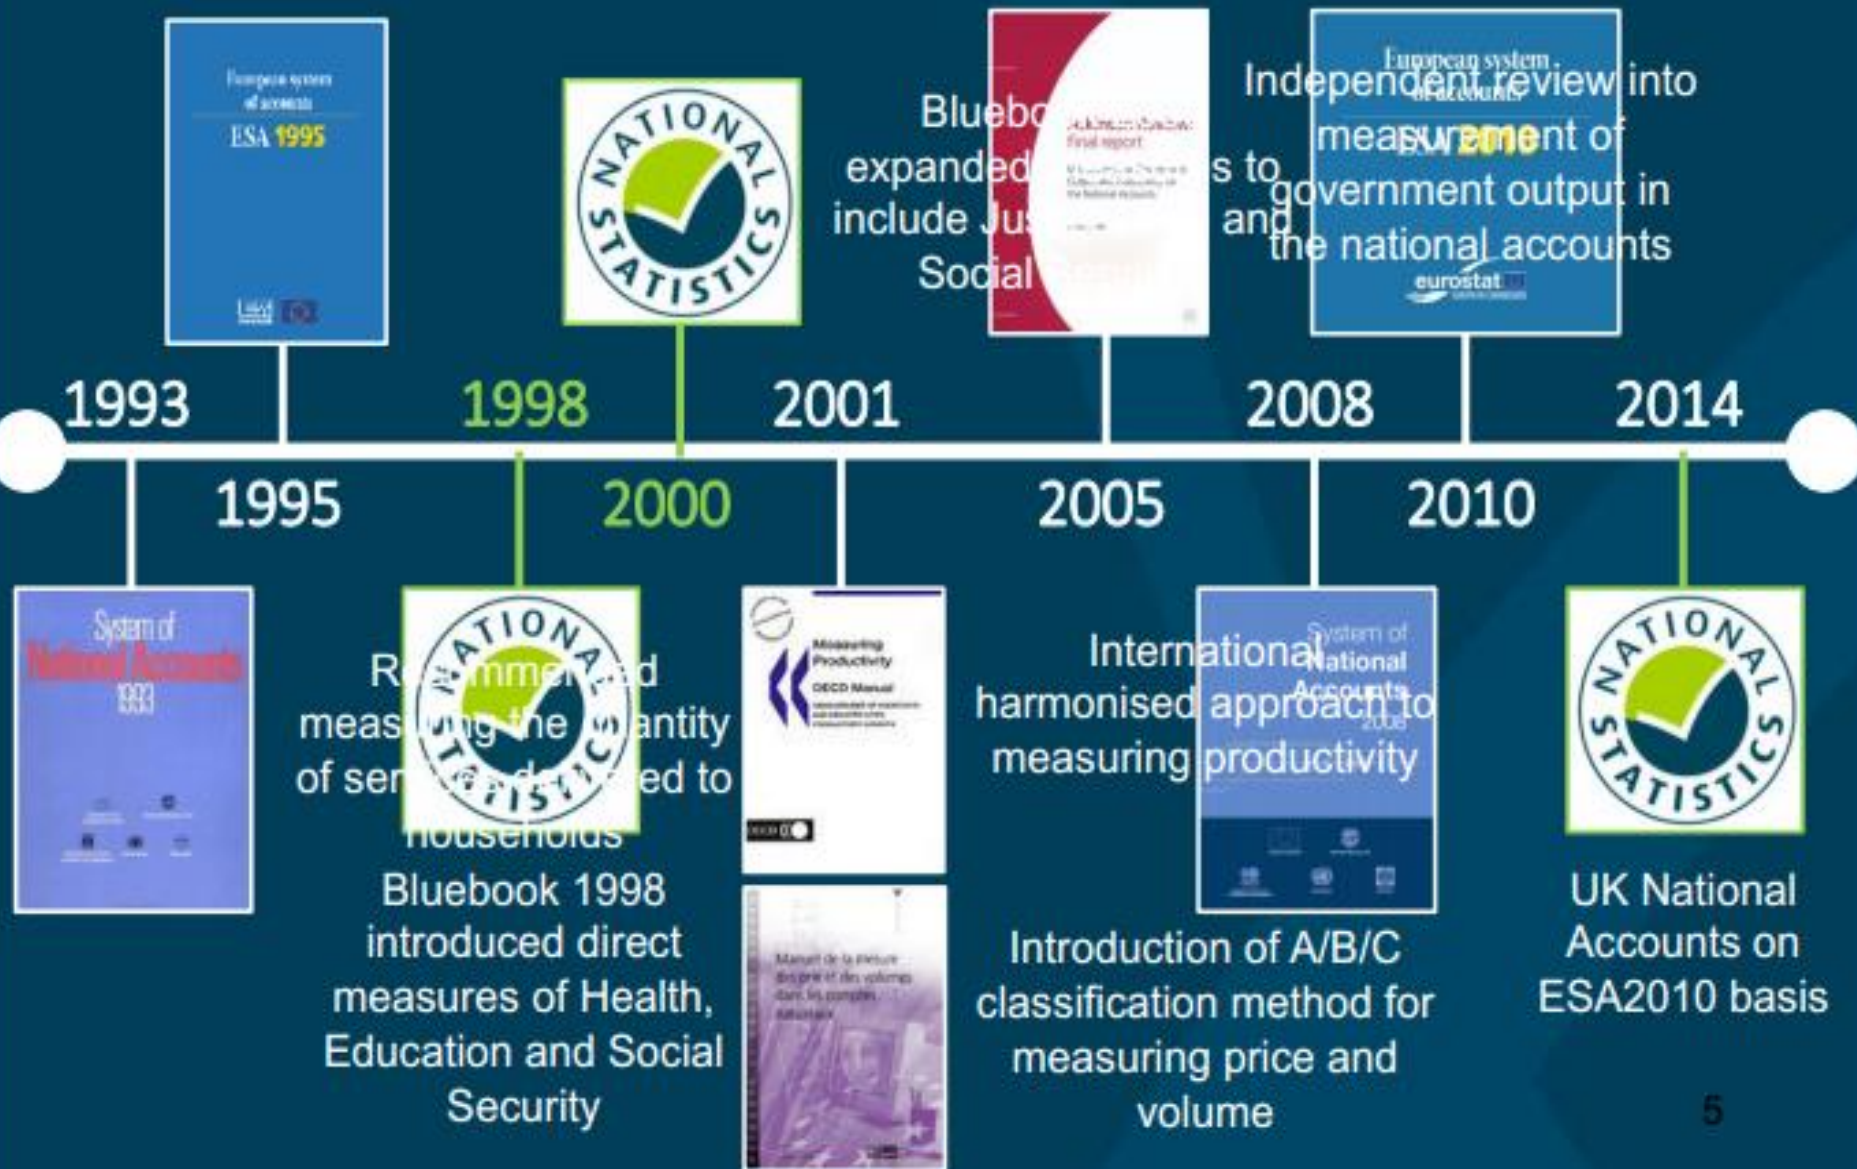

**Negative Productivity Growth**

# Public Service Productivity Analysis

- According to the OECD [3], “productivity is commonly defined as a ratio of a volume measure of output to a volume measure of input use,” that is, outputs divided by inputs. Productivity estimates should be distinguished from performance measures.
- Productivity estimates provide insight into the drivers of efficiency in government service by breaking down growth into growth of inputs, growth of output, and changes in productivity.
- Change in productivity, or change in the ratio of output to inputs, is one of many indicators that may be of interest to those wishing to understand the efficiency of the government sector in utilising resources when delivering public service

# The ONS Journey

**Thank You**
